PHASE I

ORQIX AI

Admin & Internal User Workflows

A complete walkthrough of management setup, employee operations, automation controls, client publishing and consultation handling.

A A GARG & CO

45 screens | Workflow explanations | Page-by-page screenshots

PROJECT WALKTHROUGH / 4 NOVEMBER 2026

How the platform works

ADMIN SETUP

Login & roles > Teams & users > Client allocation > Client organization

INTERNAL OPERATIONS

Assigned client > CPCB login + OTP > Scrape All / Available > Final Excel download

CLIENT DELIVERY

Final Excel upload > Choose client / unit > Publish directly > Client portal updated

Admin responsibilities

Maintain identities, reporting relationships, assignments and organization links. Permissions are enforced by the API.

Internal user responsibilities

Work on assigned clients, execute the supported BOT workflow and manage tasks. Upload and deletion modes retain their source-specific inputs and protections.

Client consultations

Client questions arrive in Client Consultation Requests. Authorized staff reply and choose In Progress, Awaiting Client or Resolved; the same thread is visible to the client.

ACCESS

/admin/login

Admin Login

Management access starts with a secure staff account. Admin privileges and account status are checked by the server.

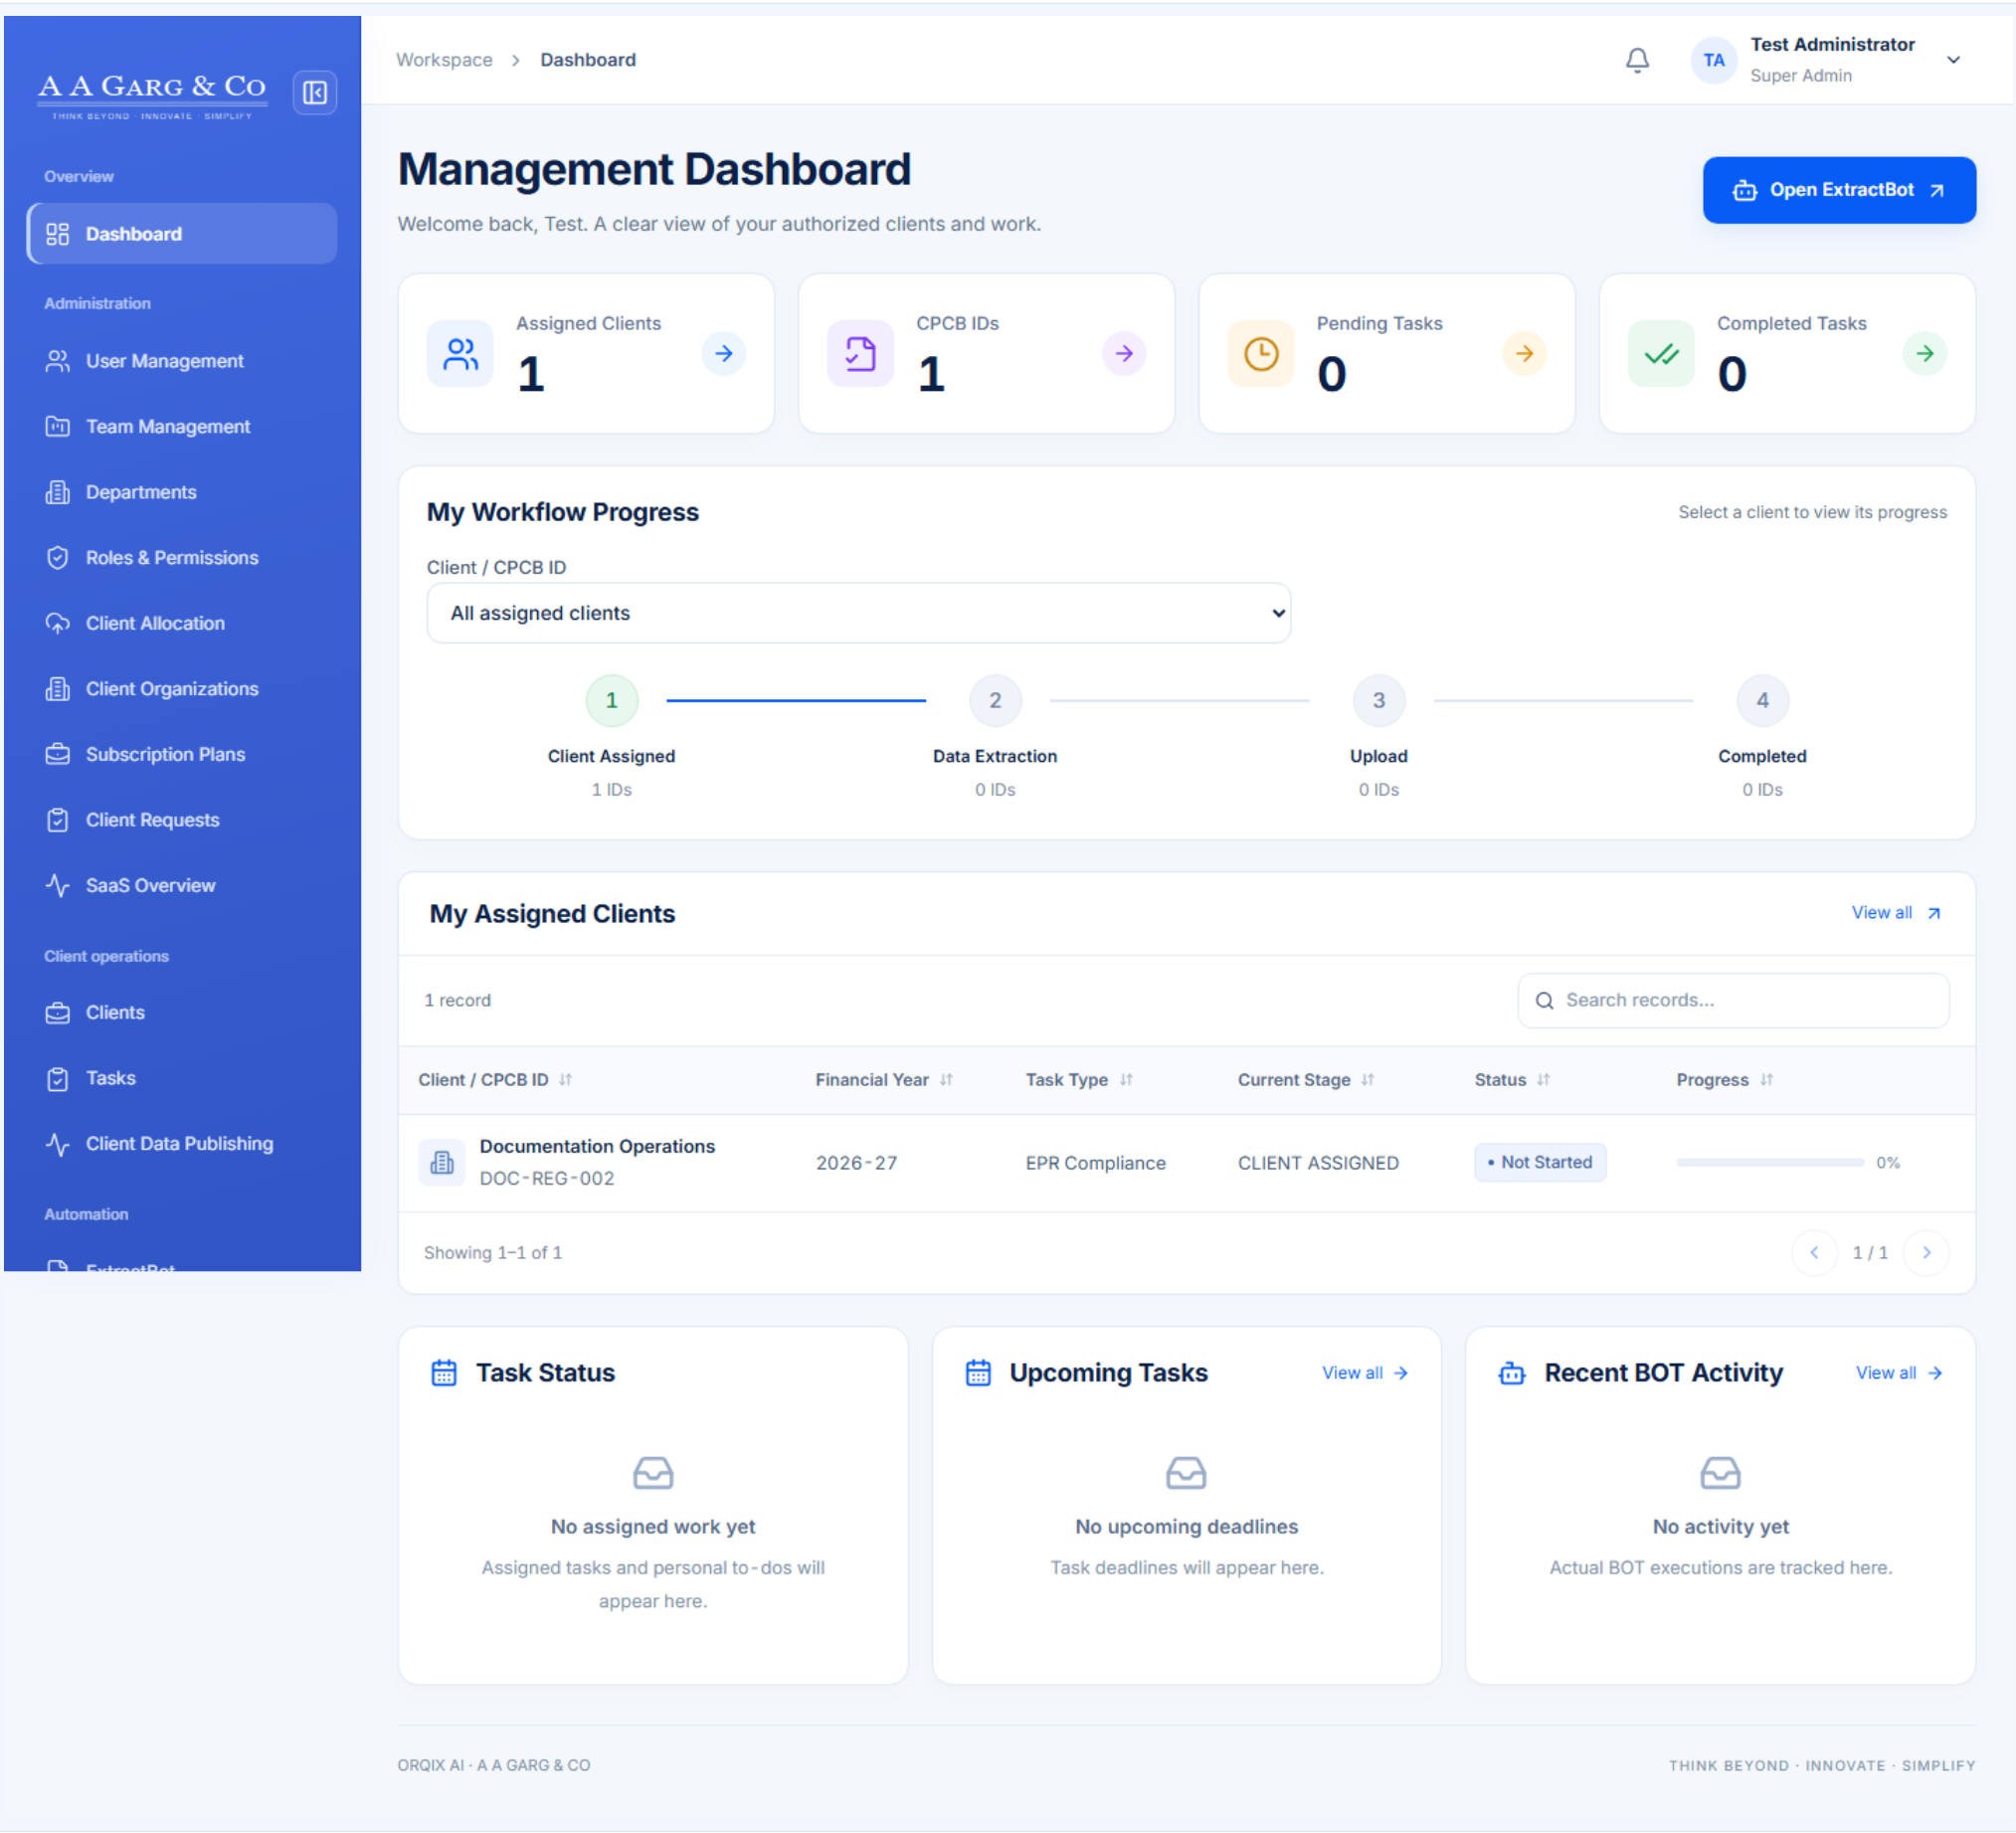

ADMIN

/dashboard

Management Dashboard

Organization workload, client assignments and current workflow progress are summarized from permitted records.

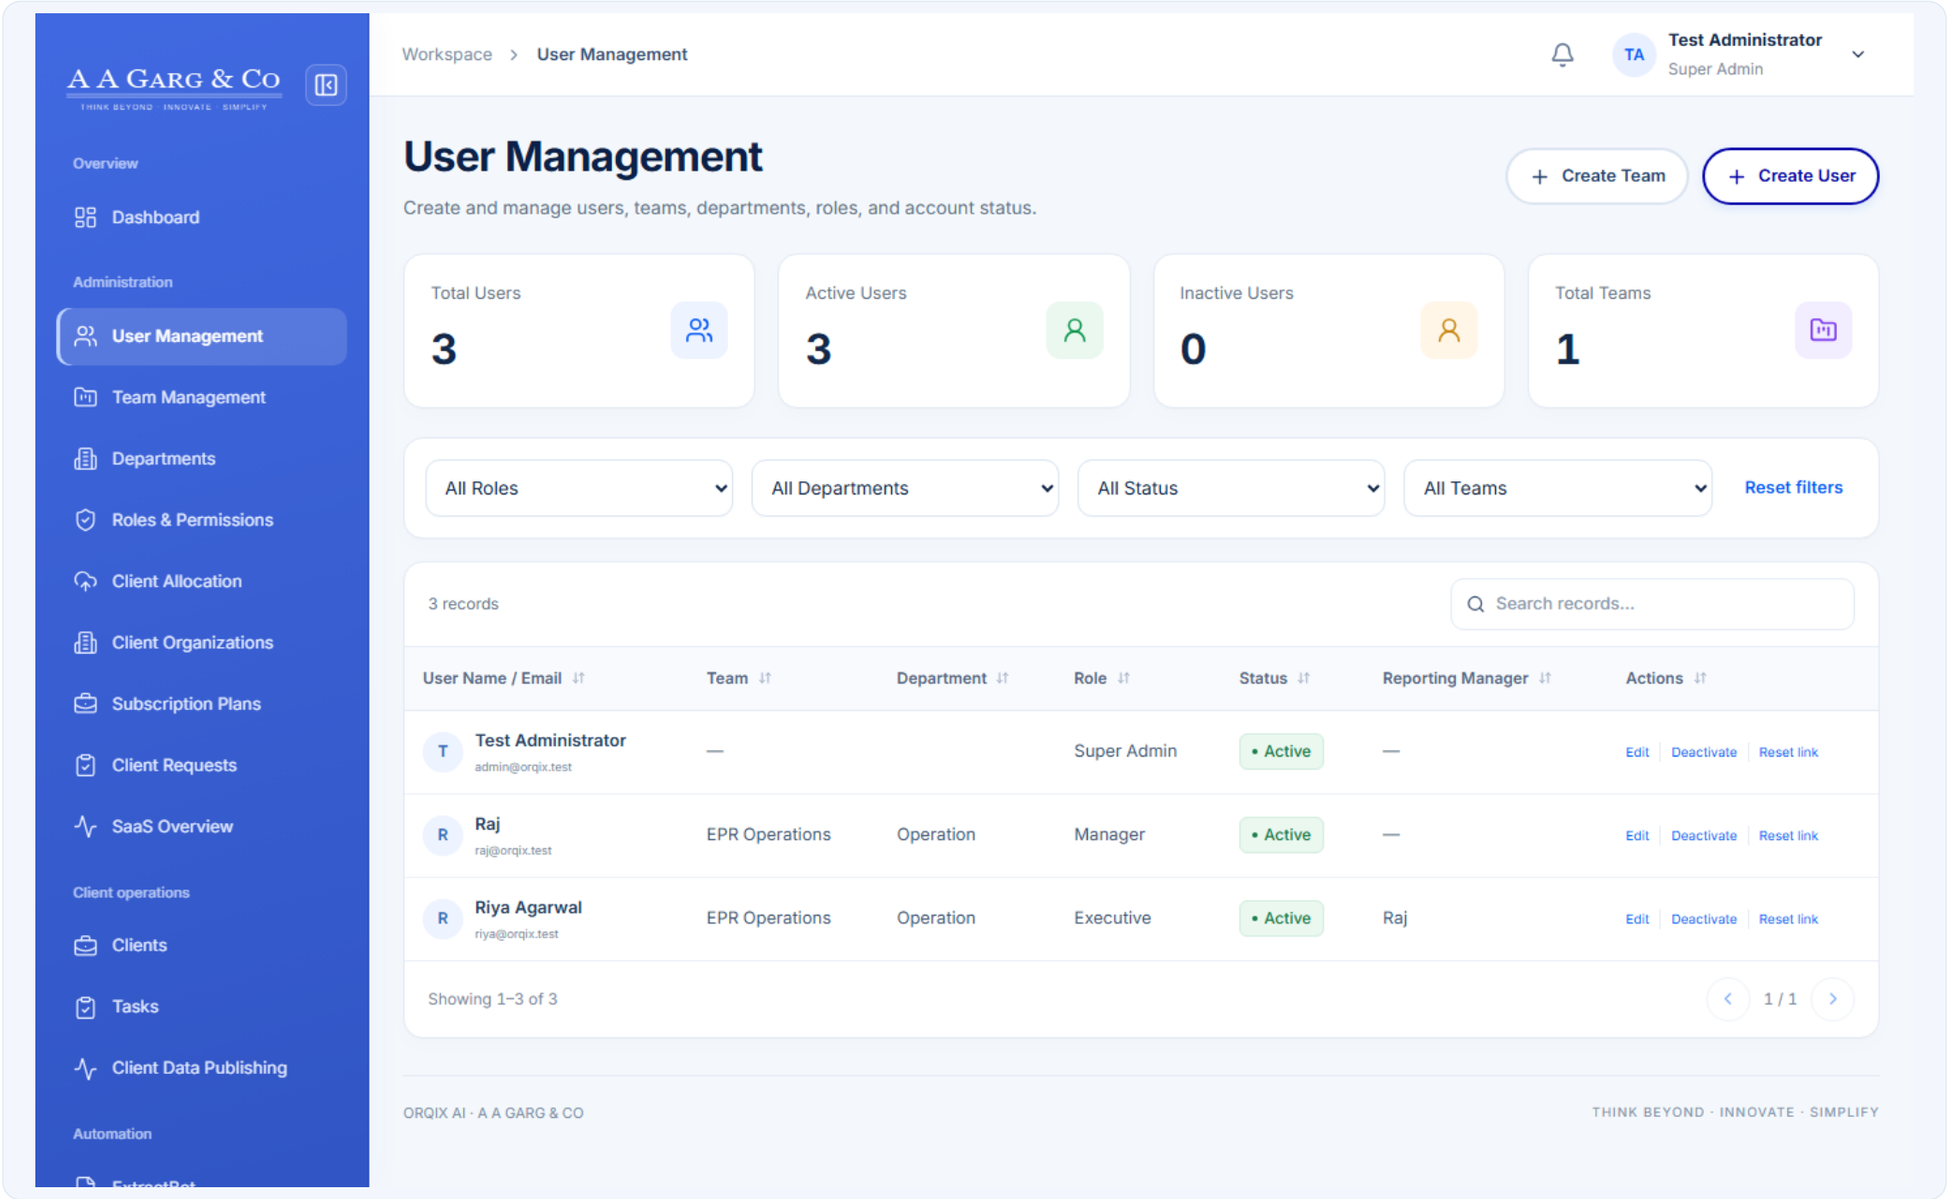

ADMIN

/admin/users

User Management

Create and maintain staff identities, roles, departments, team membership and reporting managers.

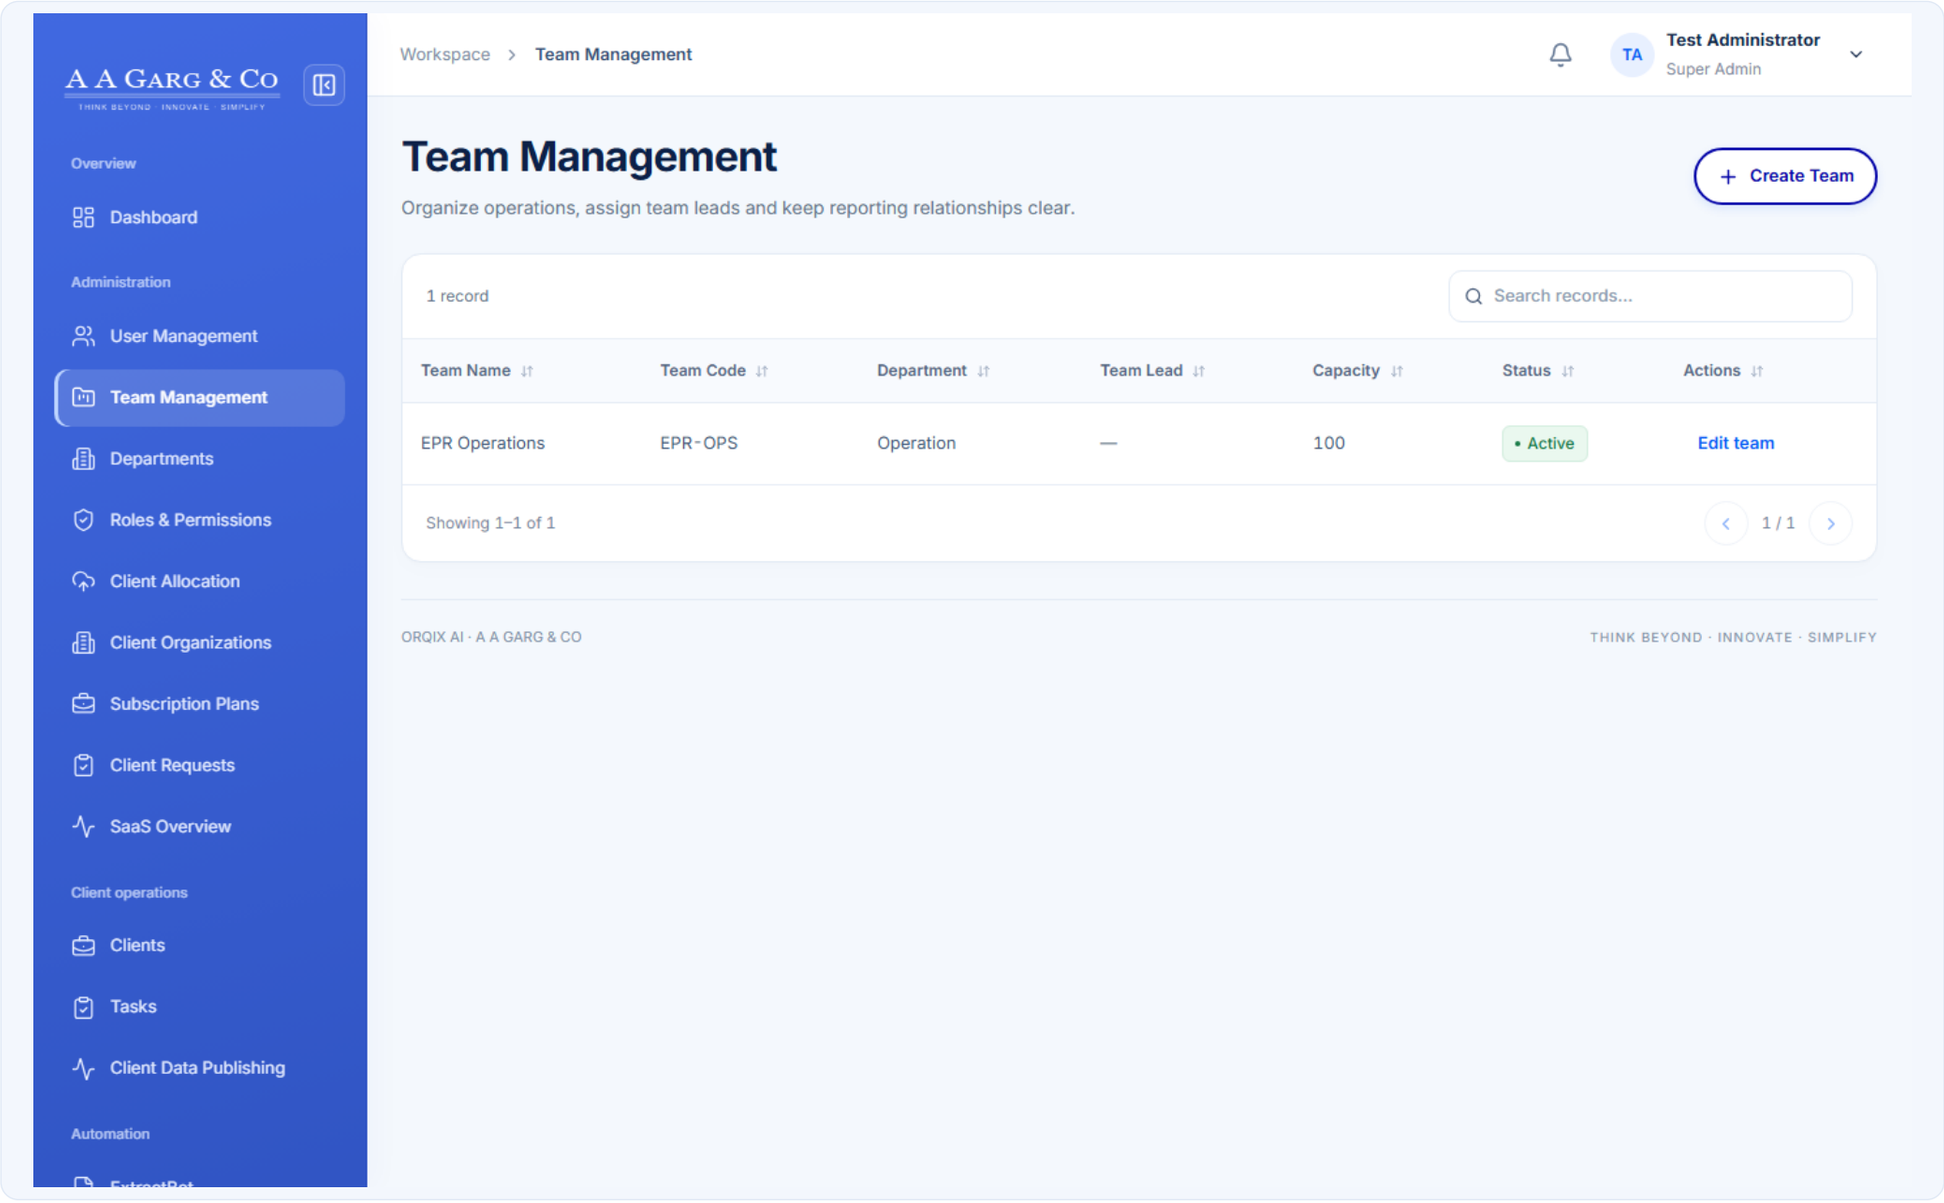

ADMIN

/admin/teams

Team Management

Organize employees into teams with department, lead, capacity and visibility settings.

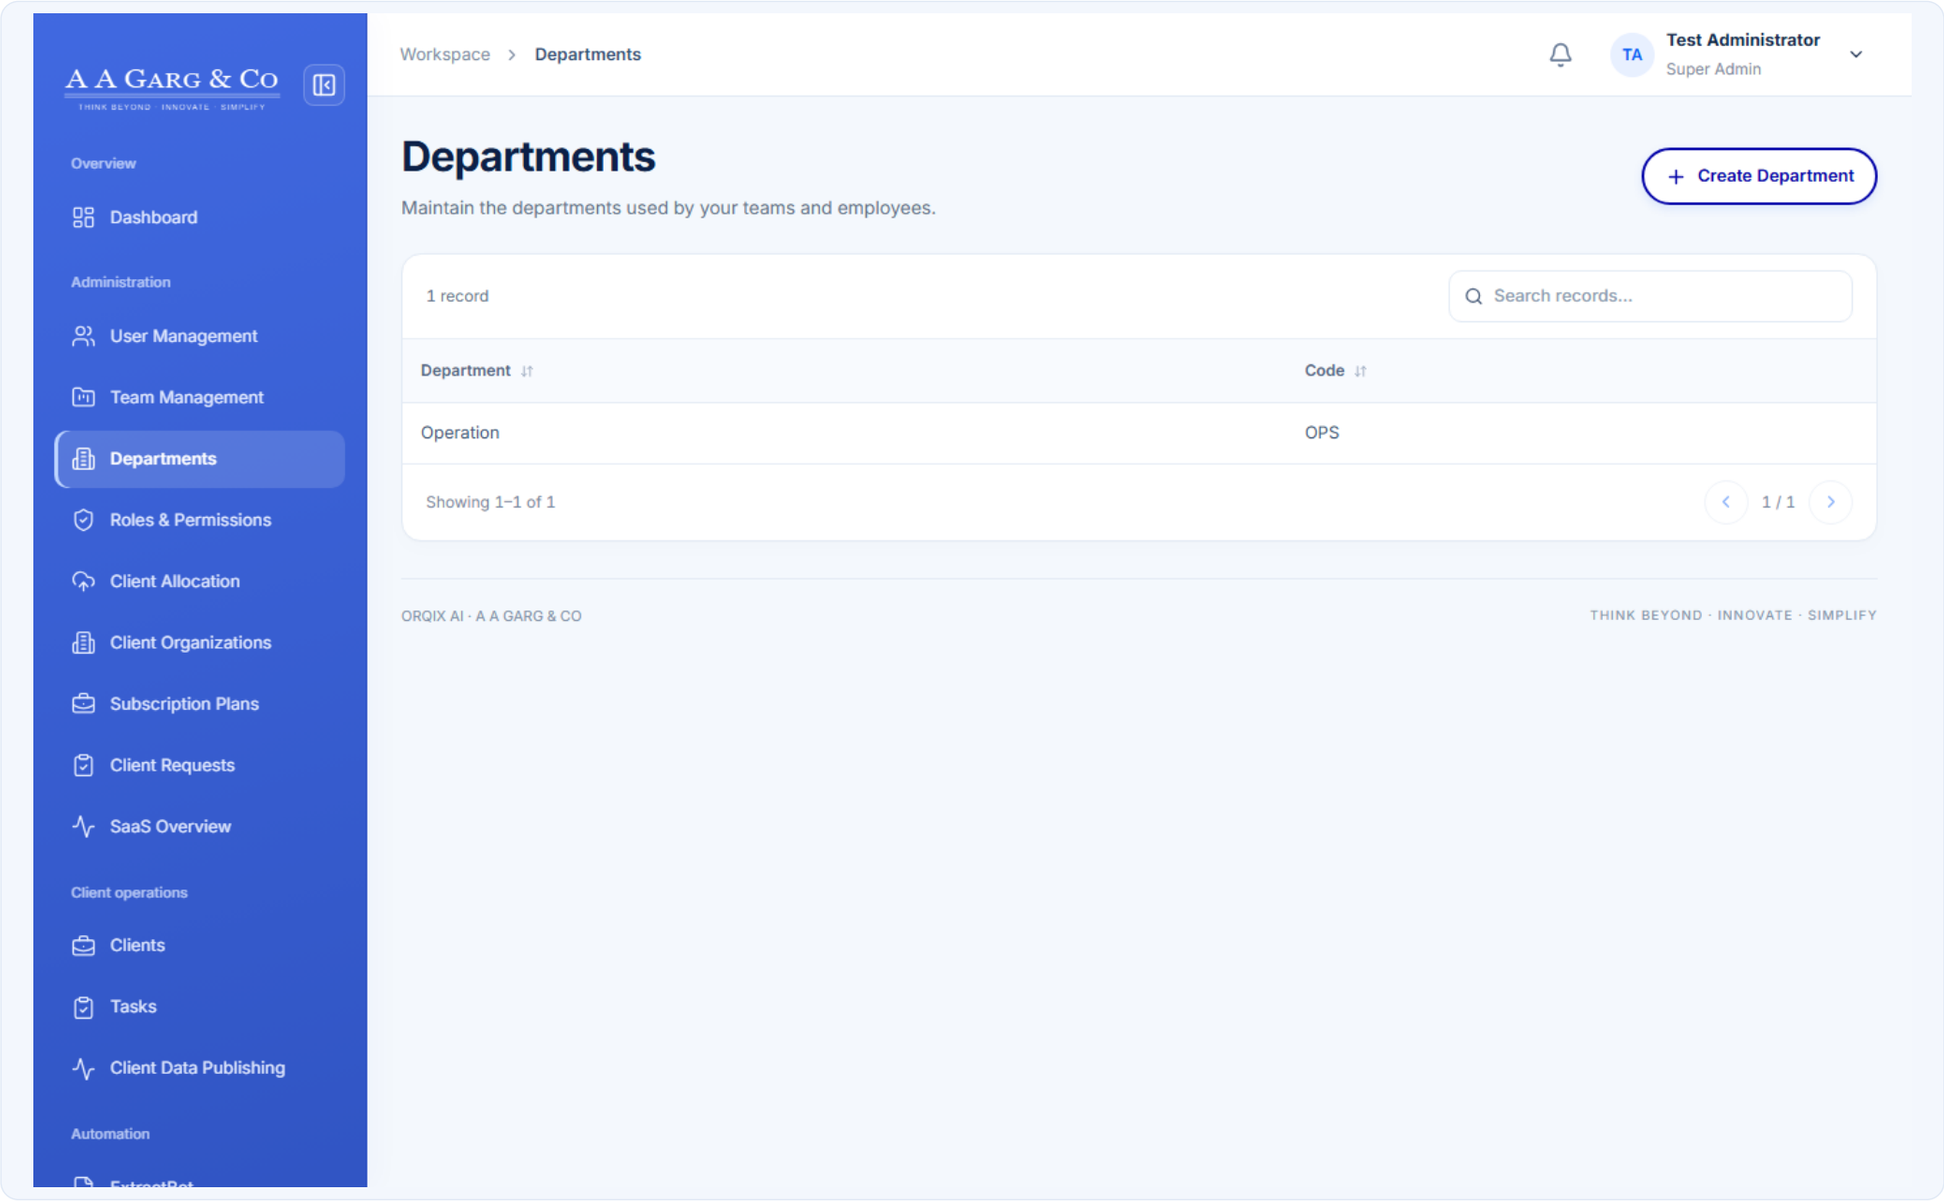

ADMIN

/admin/departments

Departments

Maintain the department directory used by teams and staff profiles.

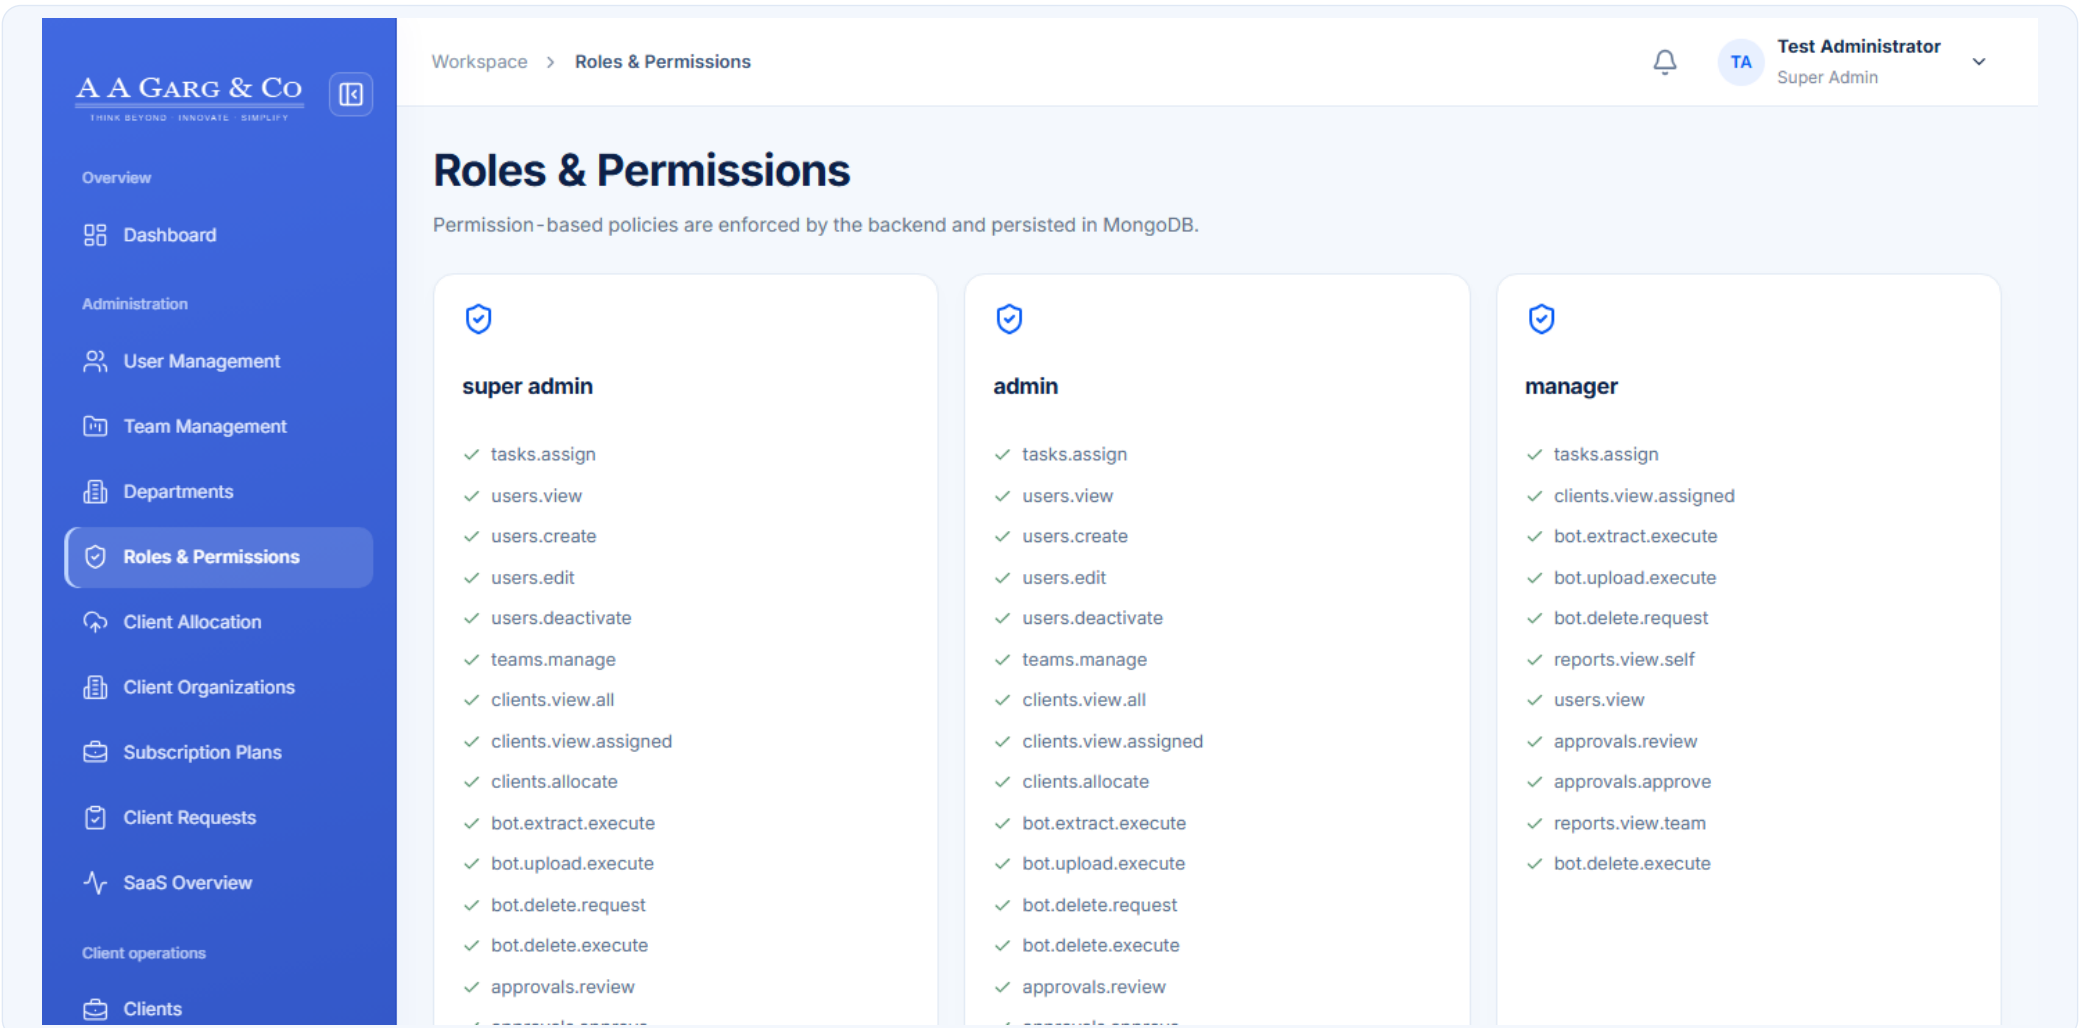

ADMIN

/admin/roles

Roles & Permissions | 1/2

Inspect and configure permission policies. Backend checks control management, client access and automation actions.

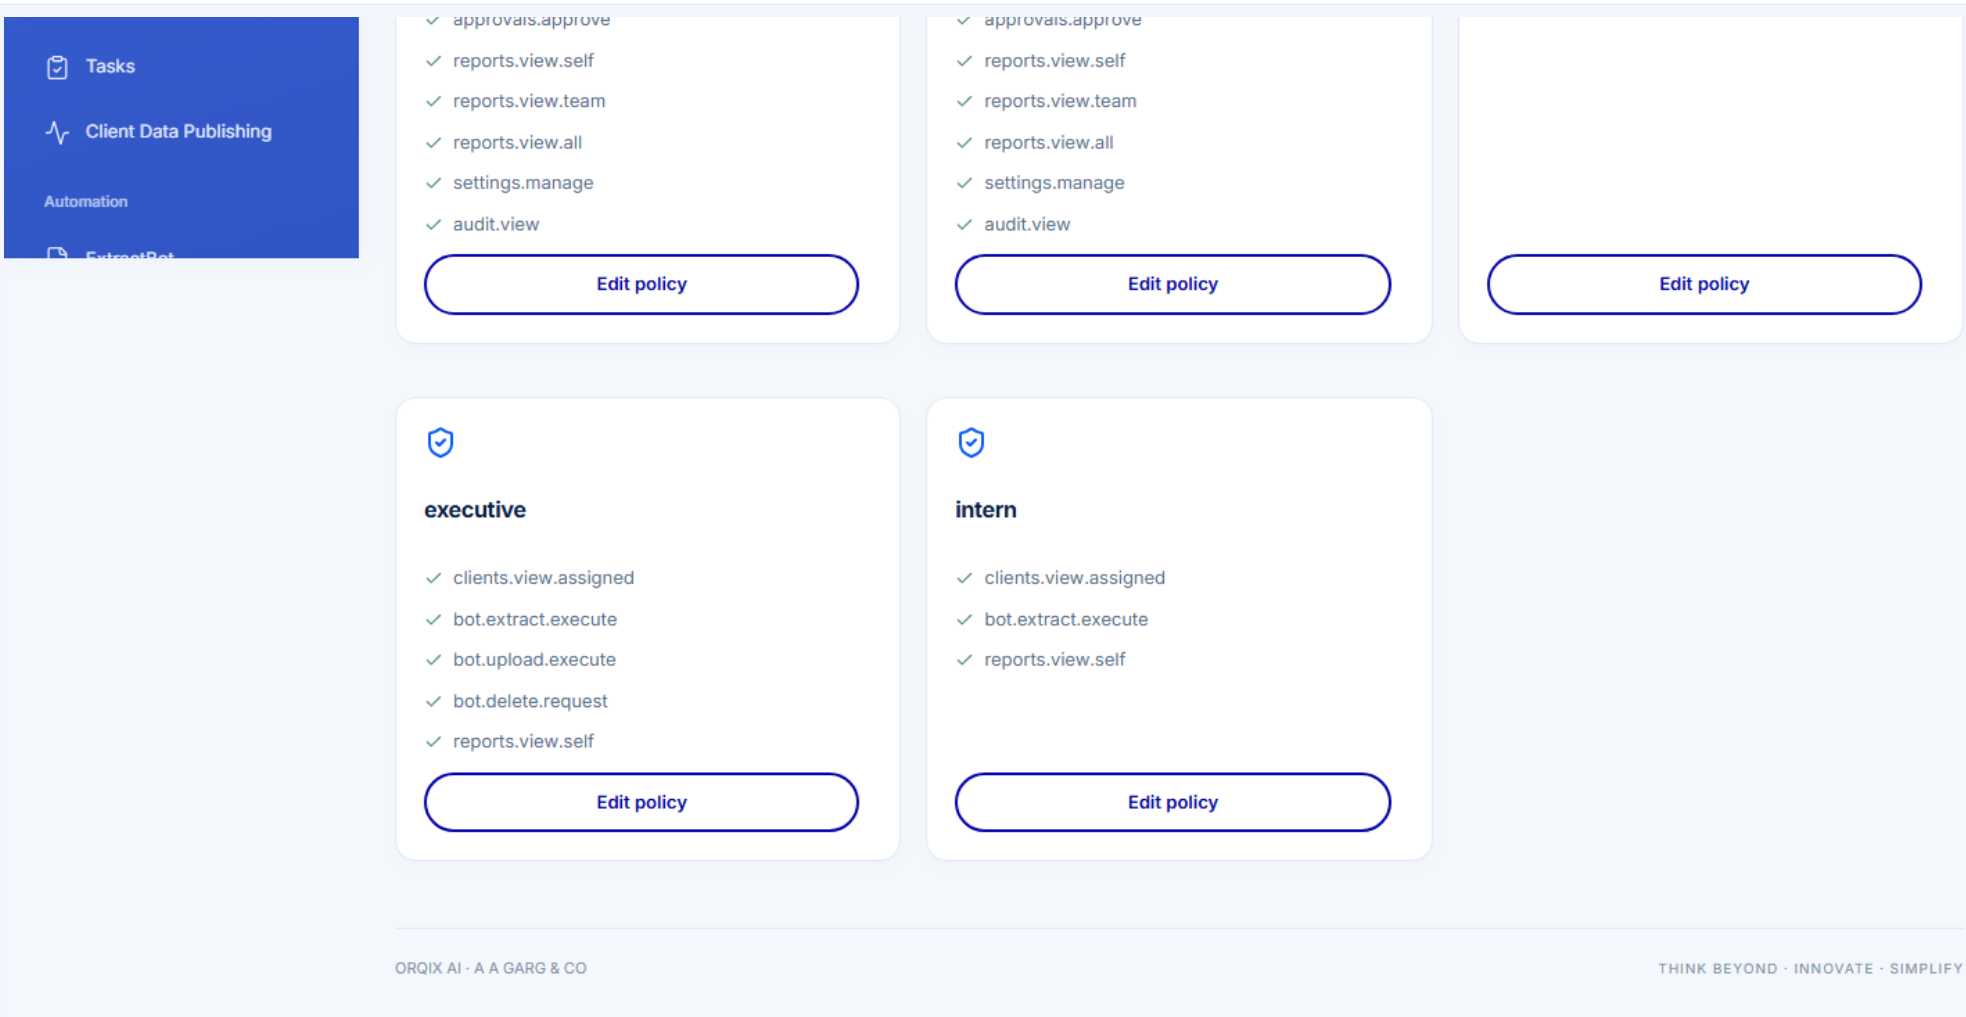

ADMIN

/admin/roles

Roles & Permissions | 2/2

Inspect and configure permission policies. Backend checks control management, client access and automation actions.

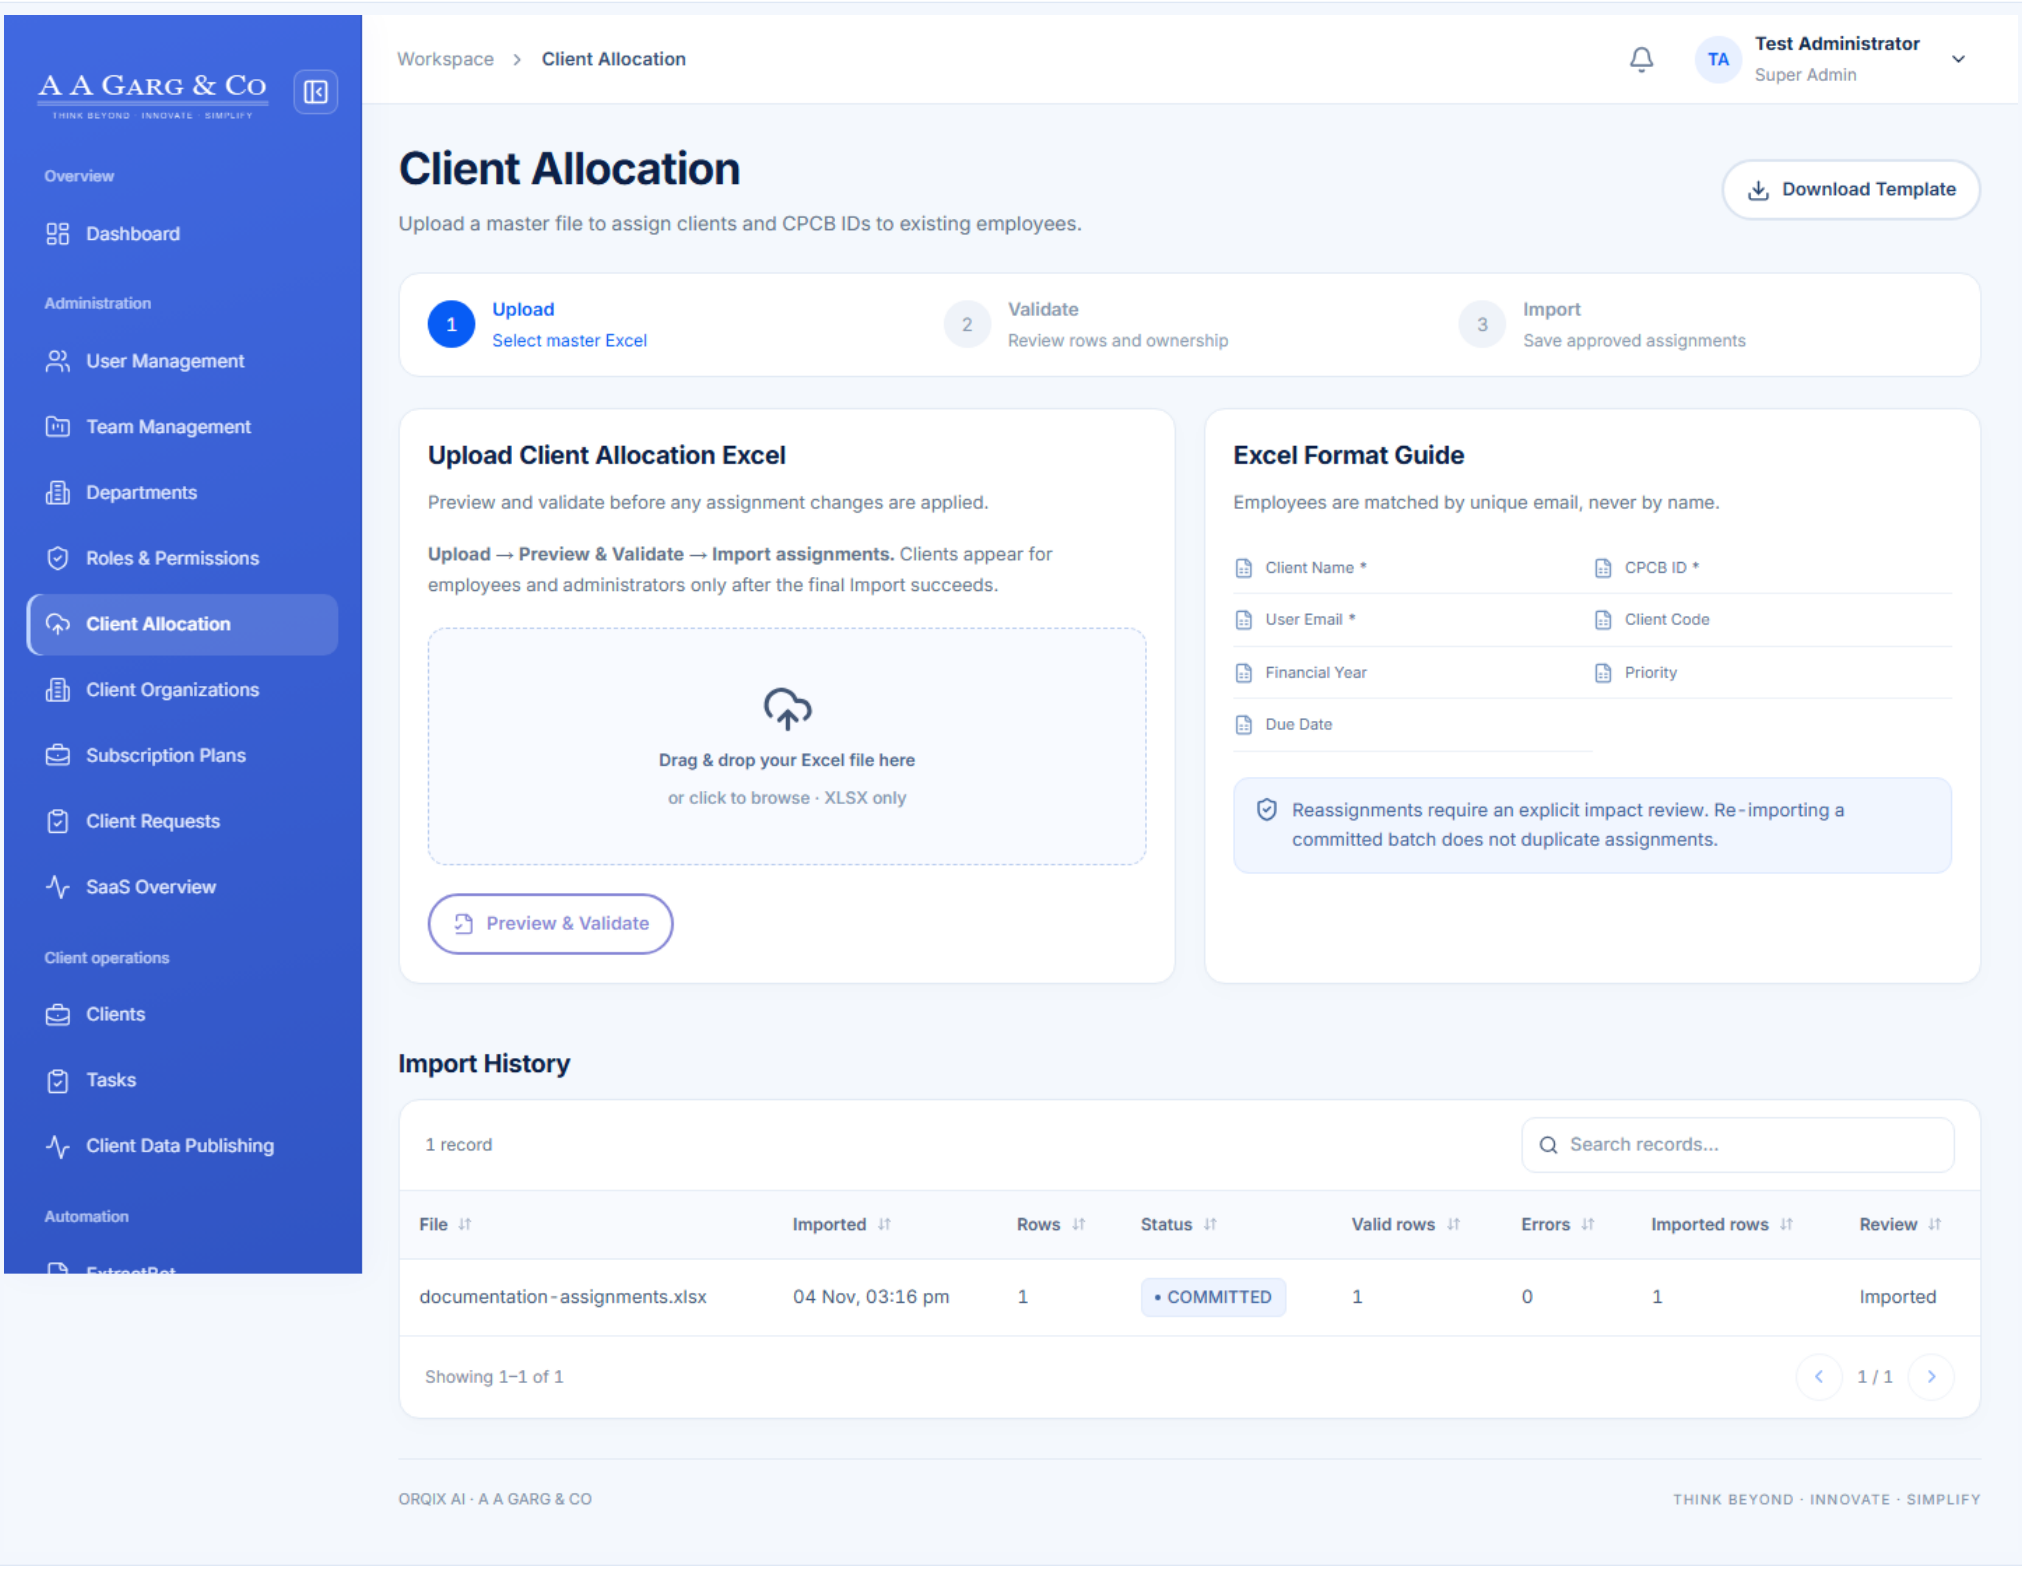

ADMIN

/admin/client-allocation

Client Allocation

Upload the allocation Excel, validate employee mappings and import client, registration and financial-year assignments.

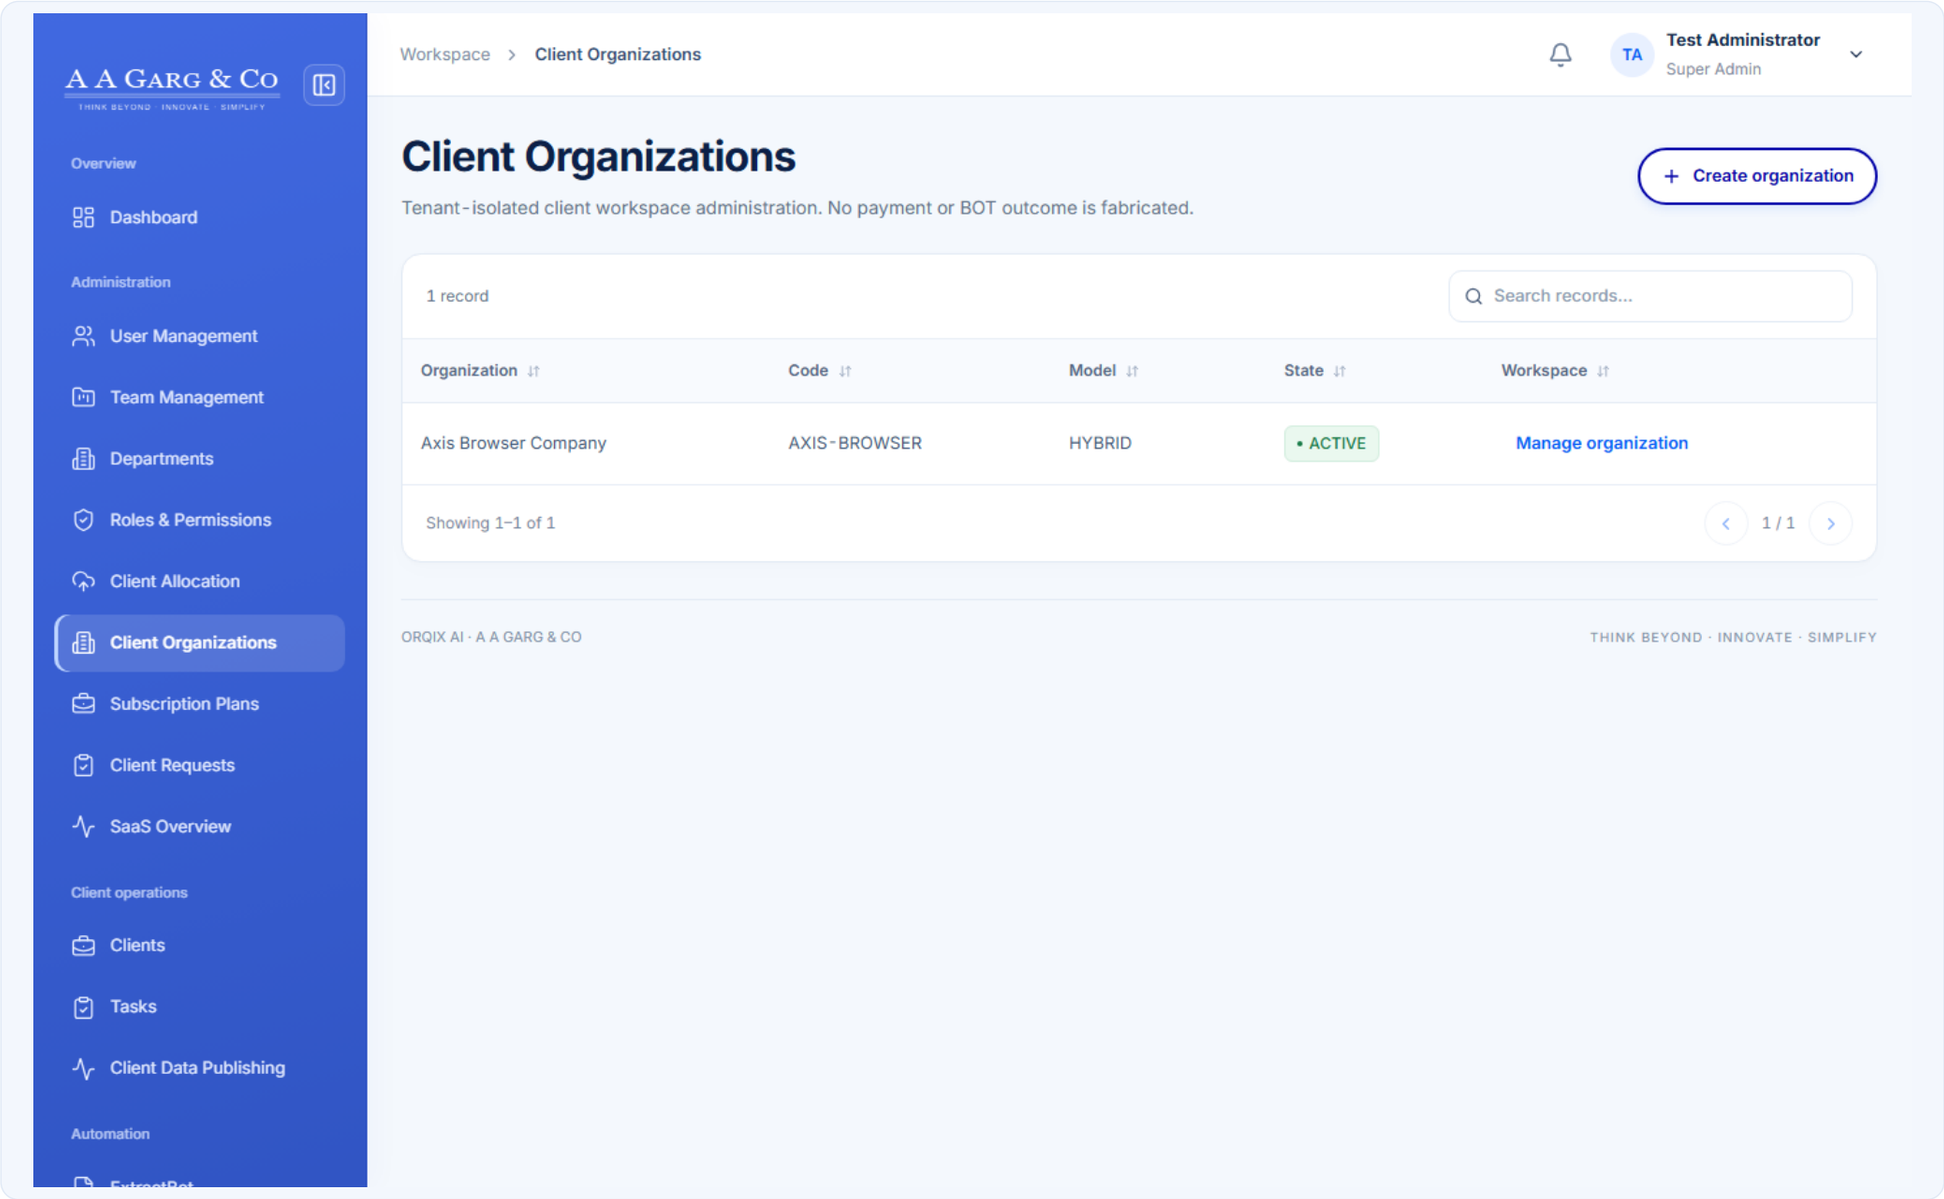

ADMIN

/admin/organizations

Client Organizations

Manage external client organizations, owners and links to internal clients. This mapping determines client data visibility.

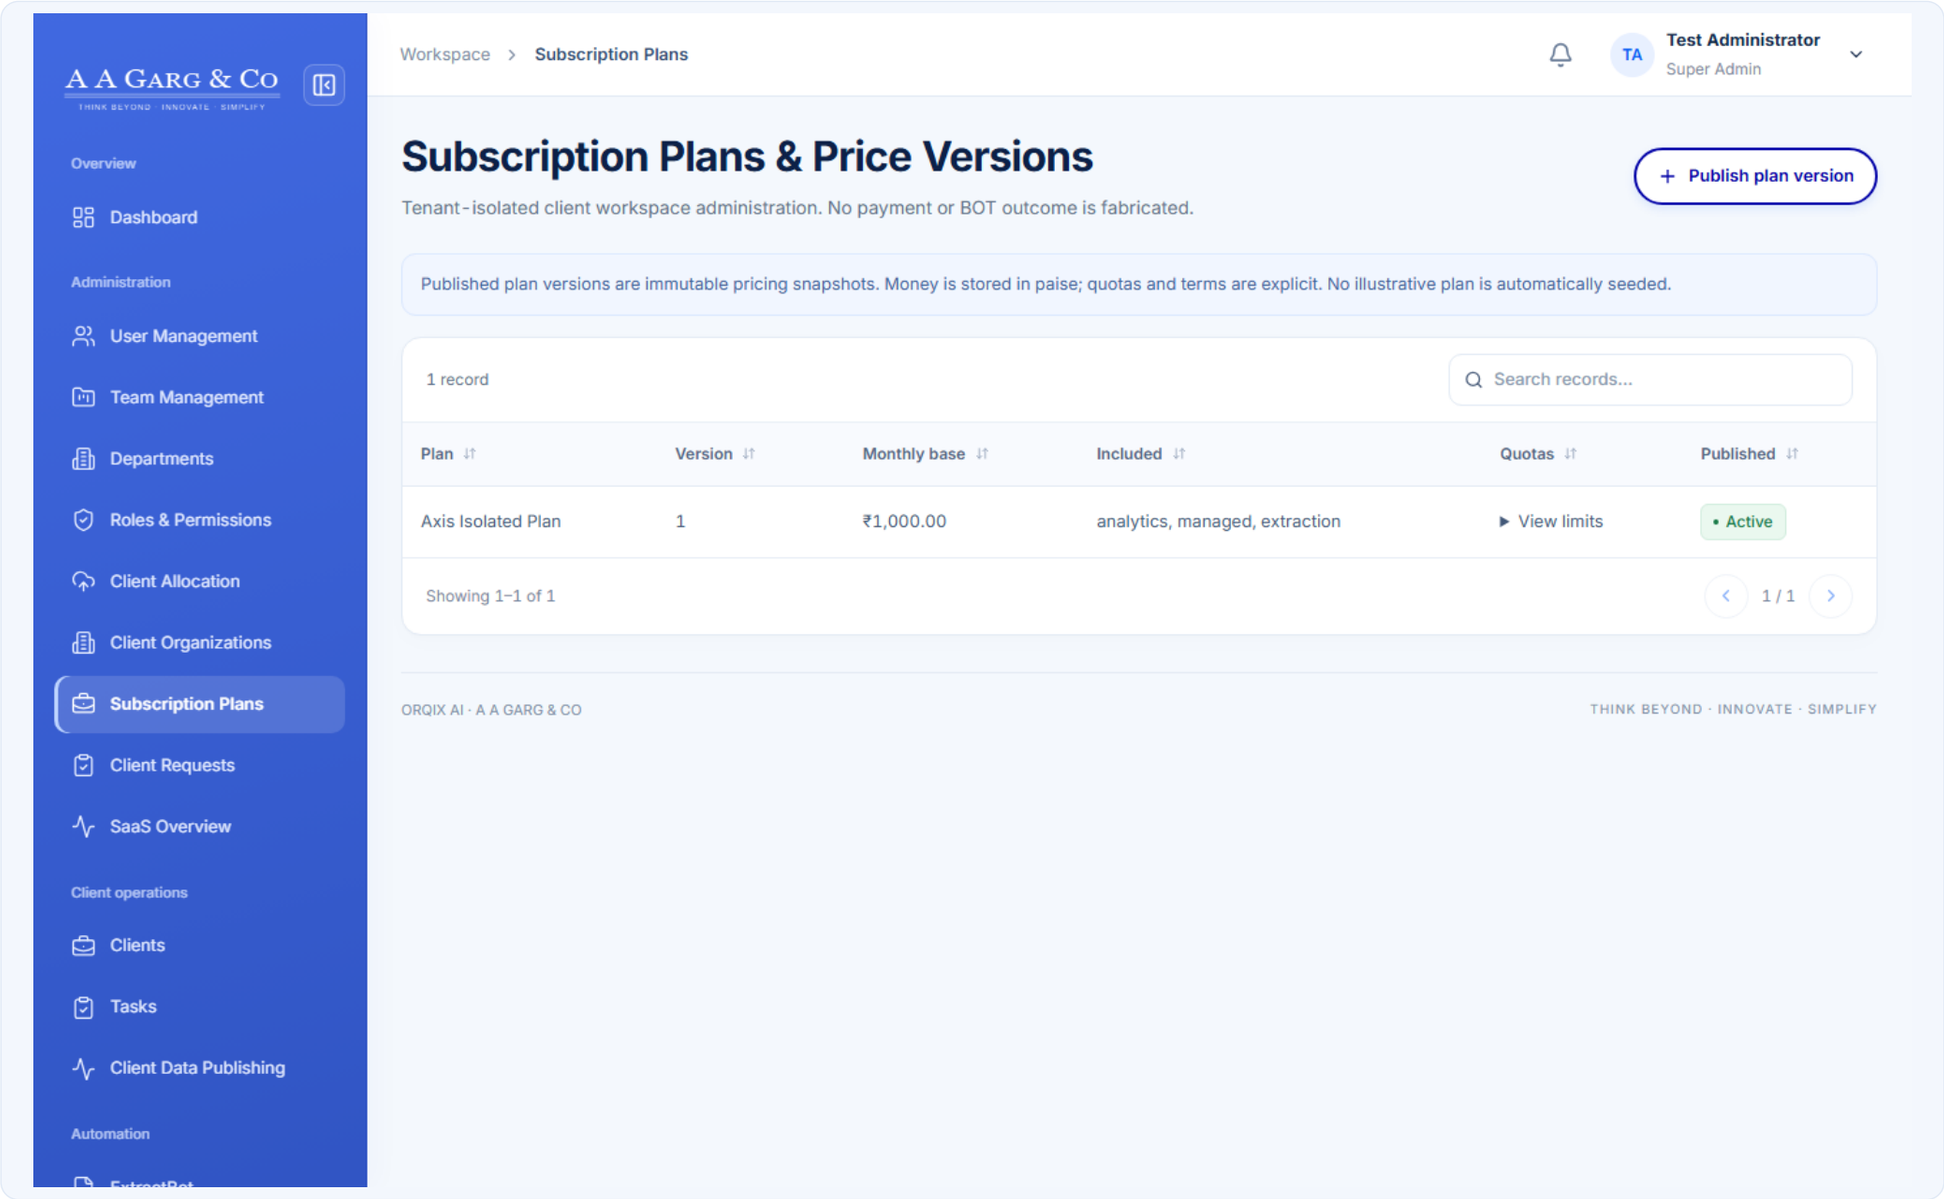

ADMIN

/admin/subscription-plans

Subscription Plans

Maintain plan pricing, service coverage and usage limits for client organizations.

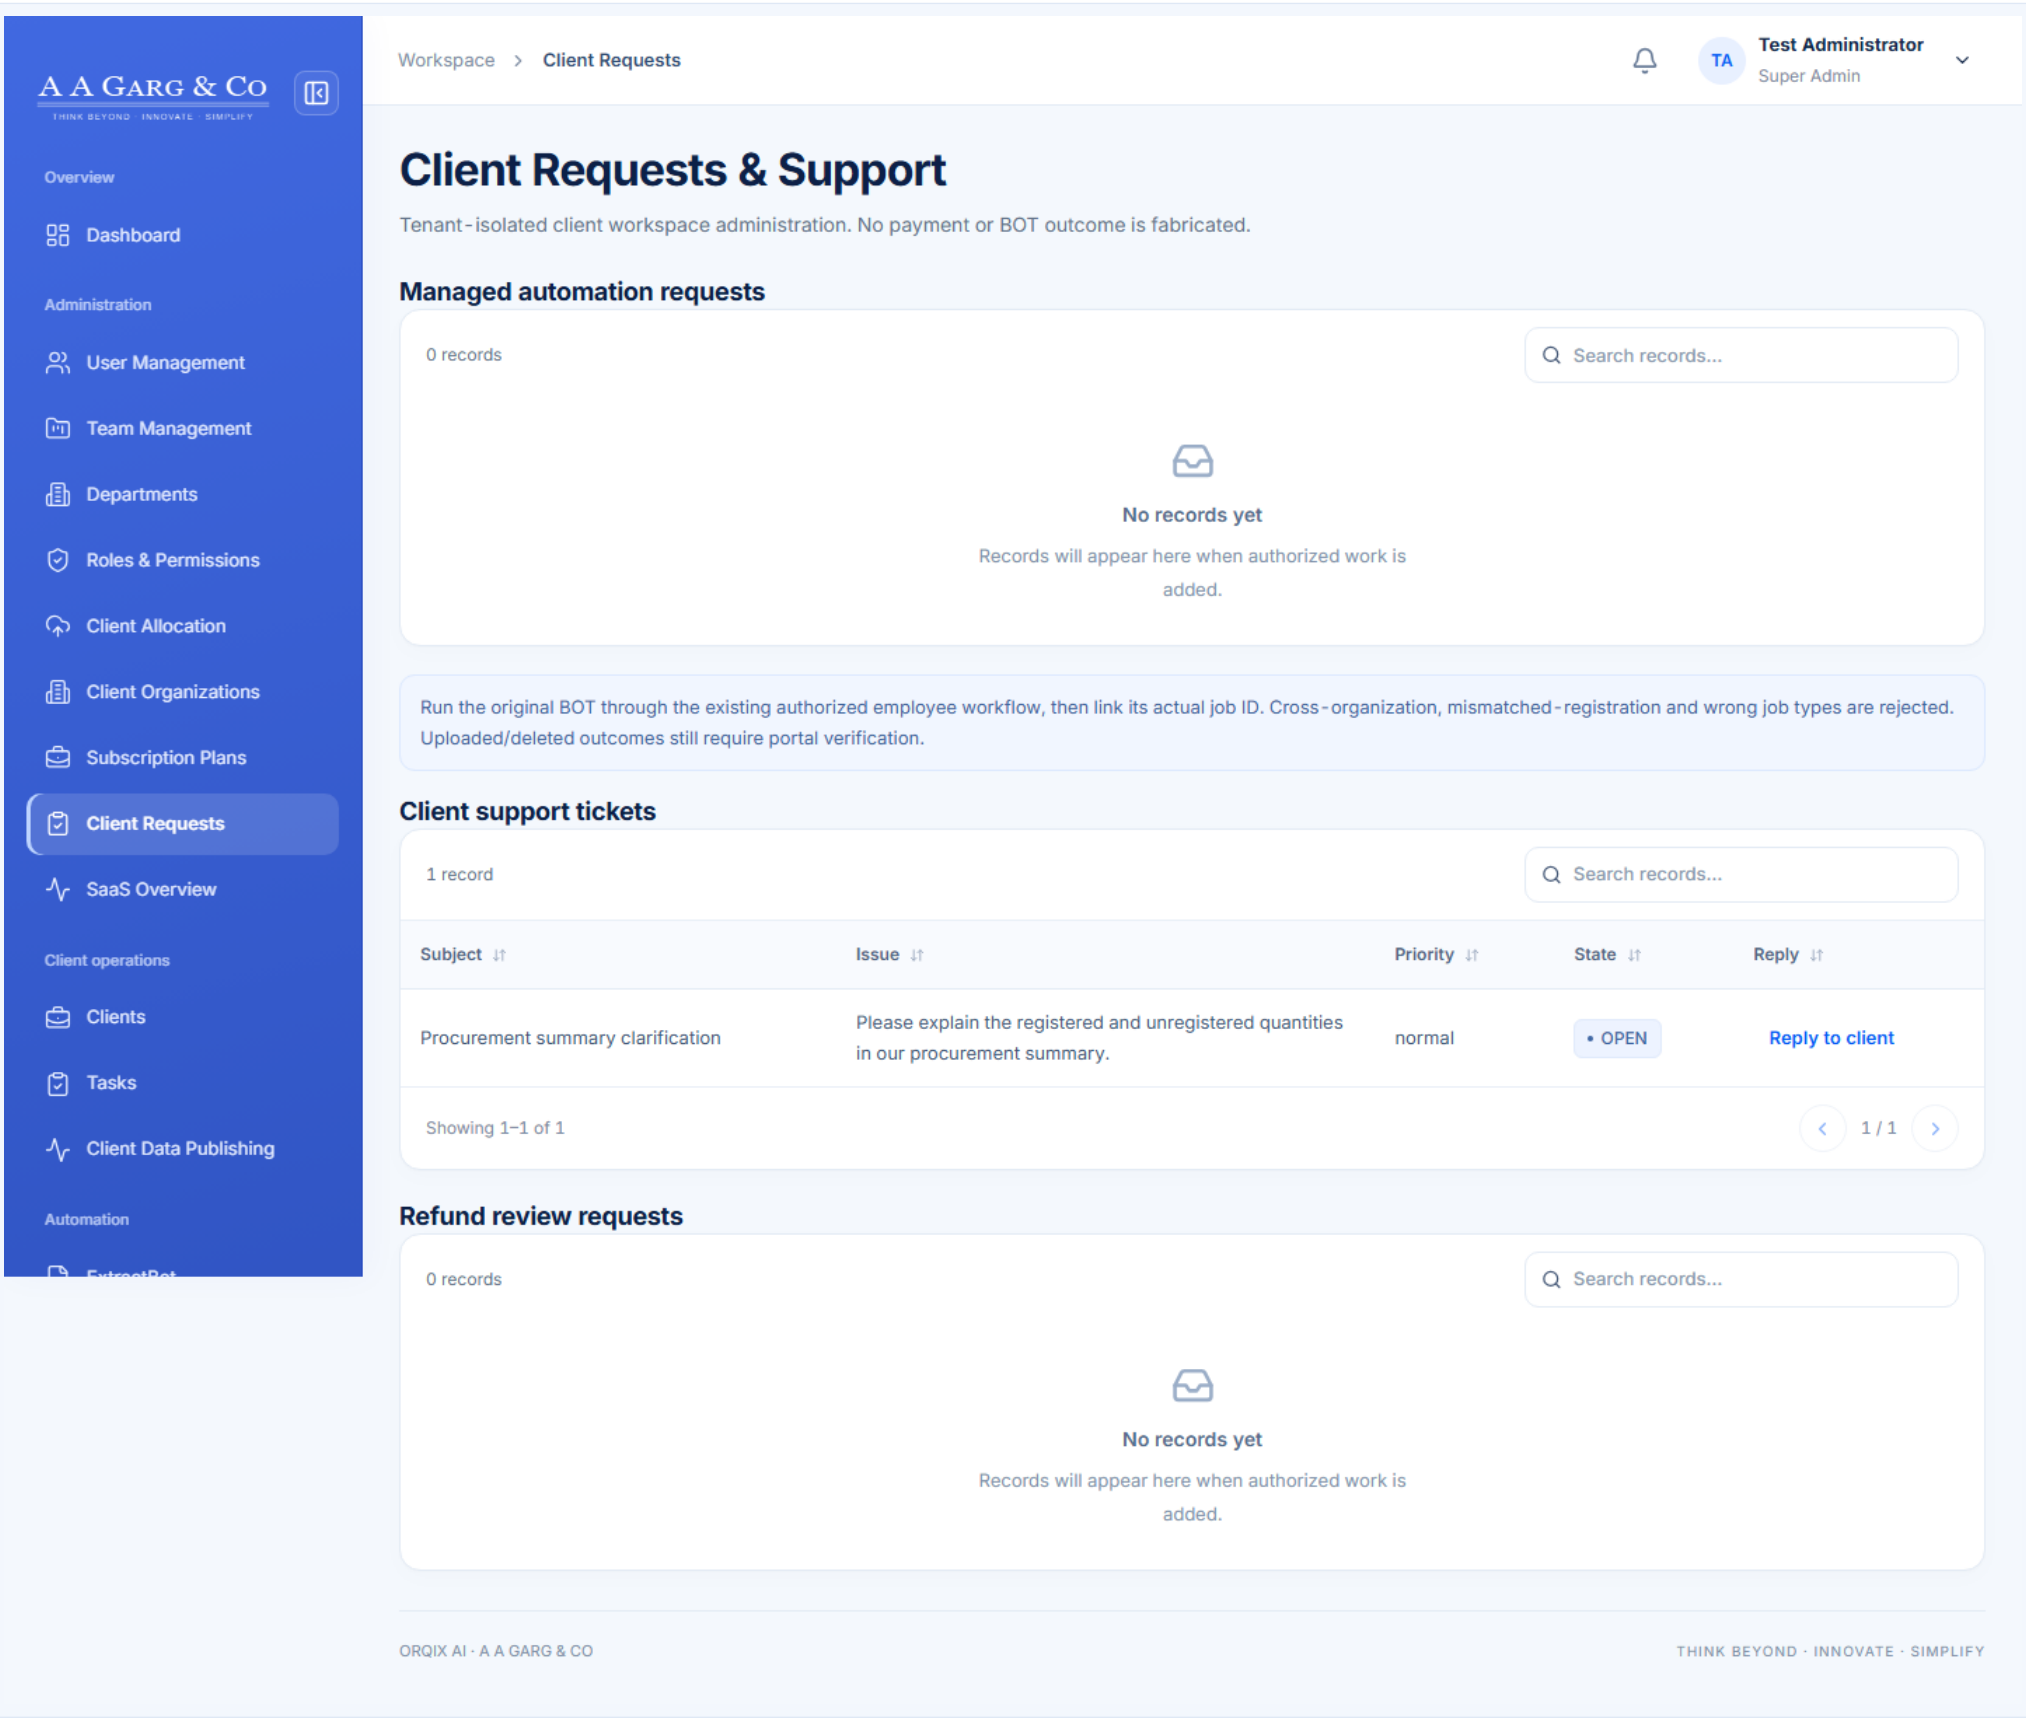

ADMIN

/admin/client-requests

Client Requests

Inspect organization service requests and administrative onboarding records. This is separate from the consultation inbox.

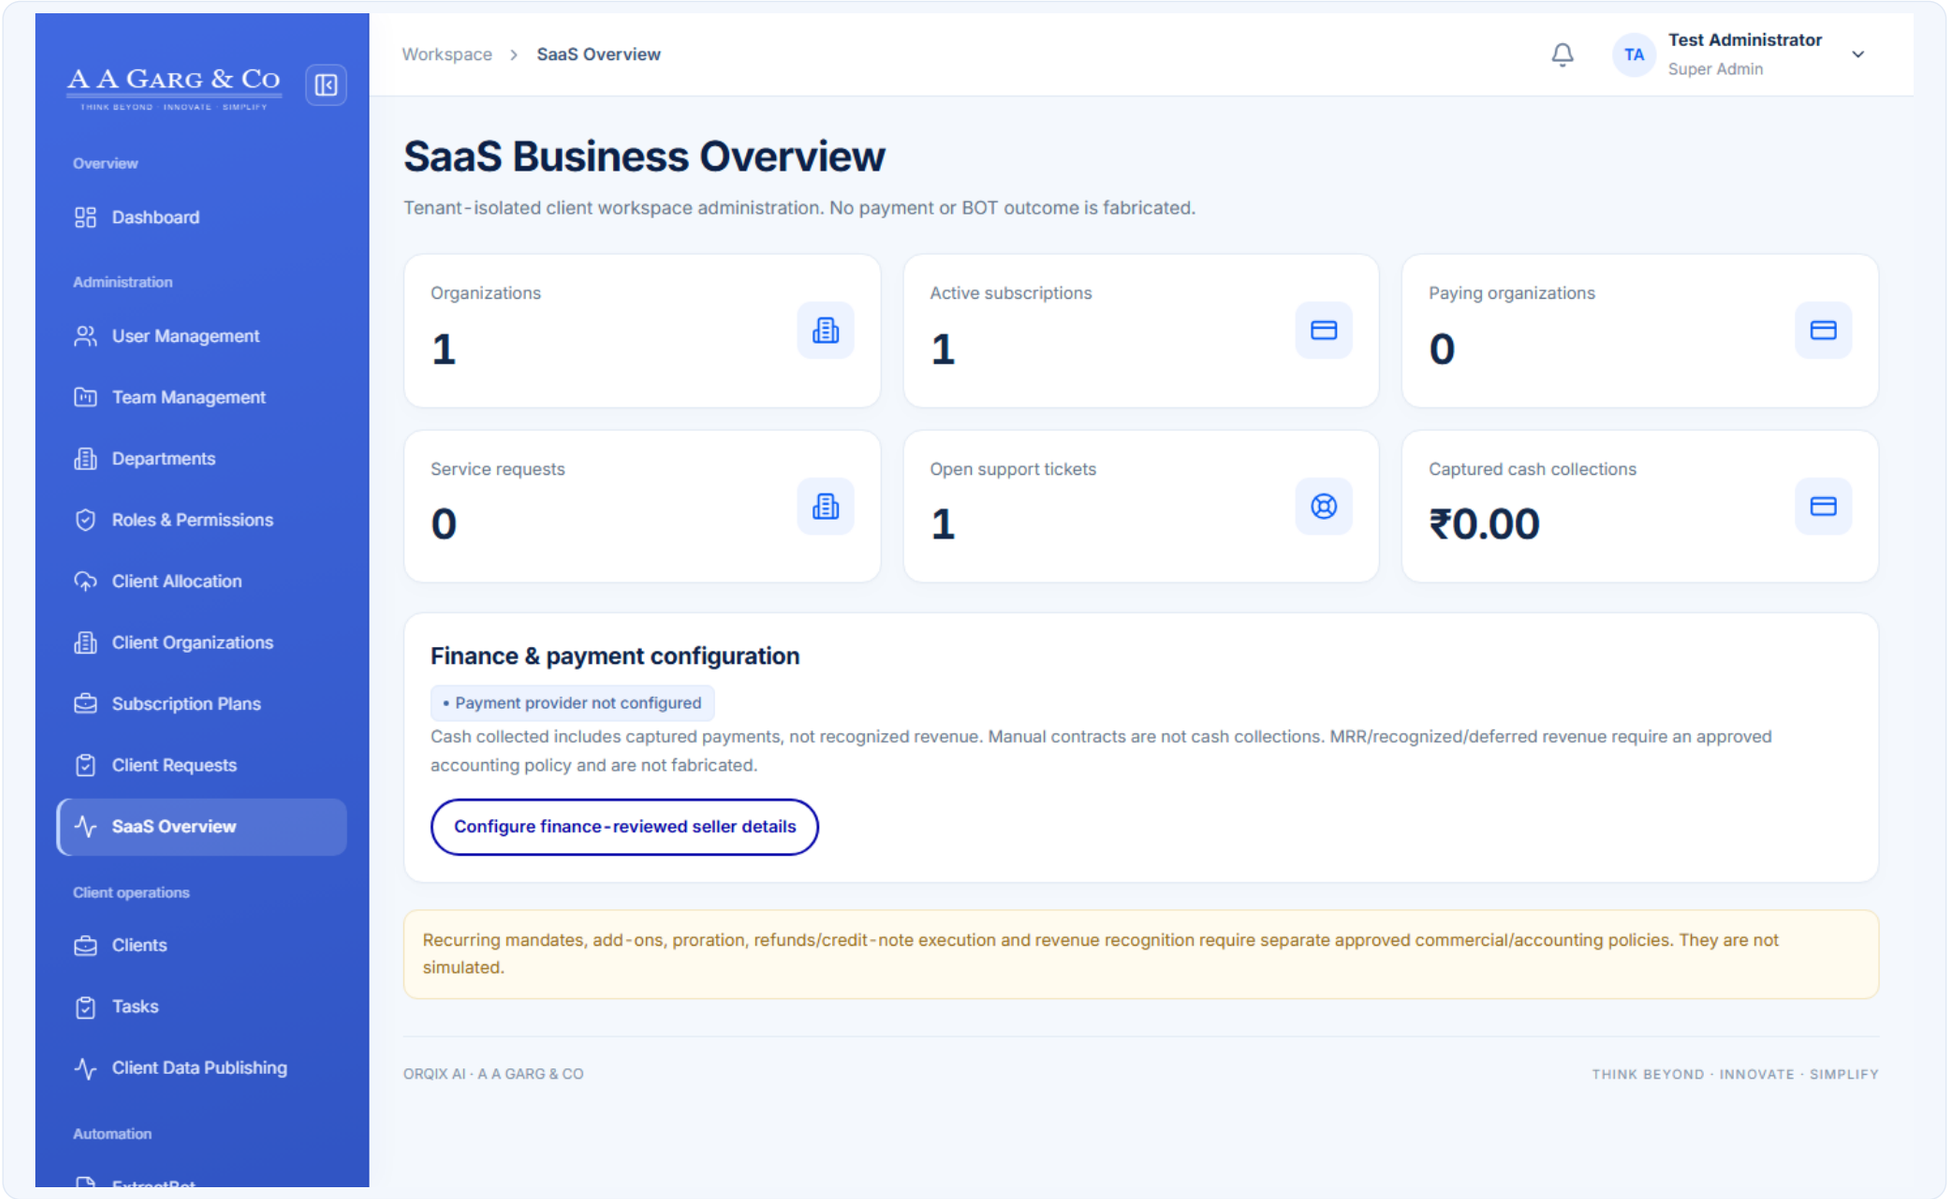

ADMIN

/admin/saas-dashboard

SaaS Overview

Review organization, subscription and service-request totals from the application database.

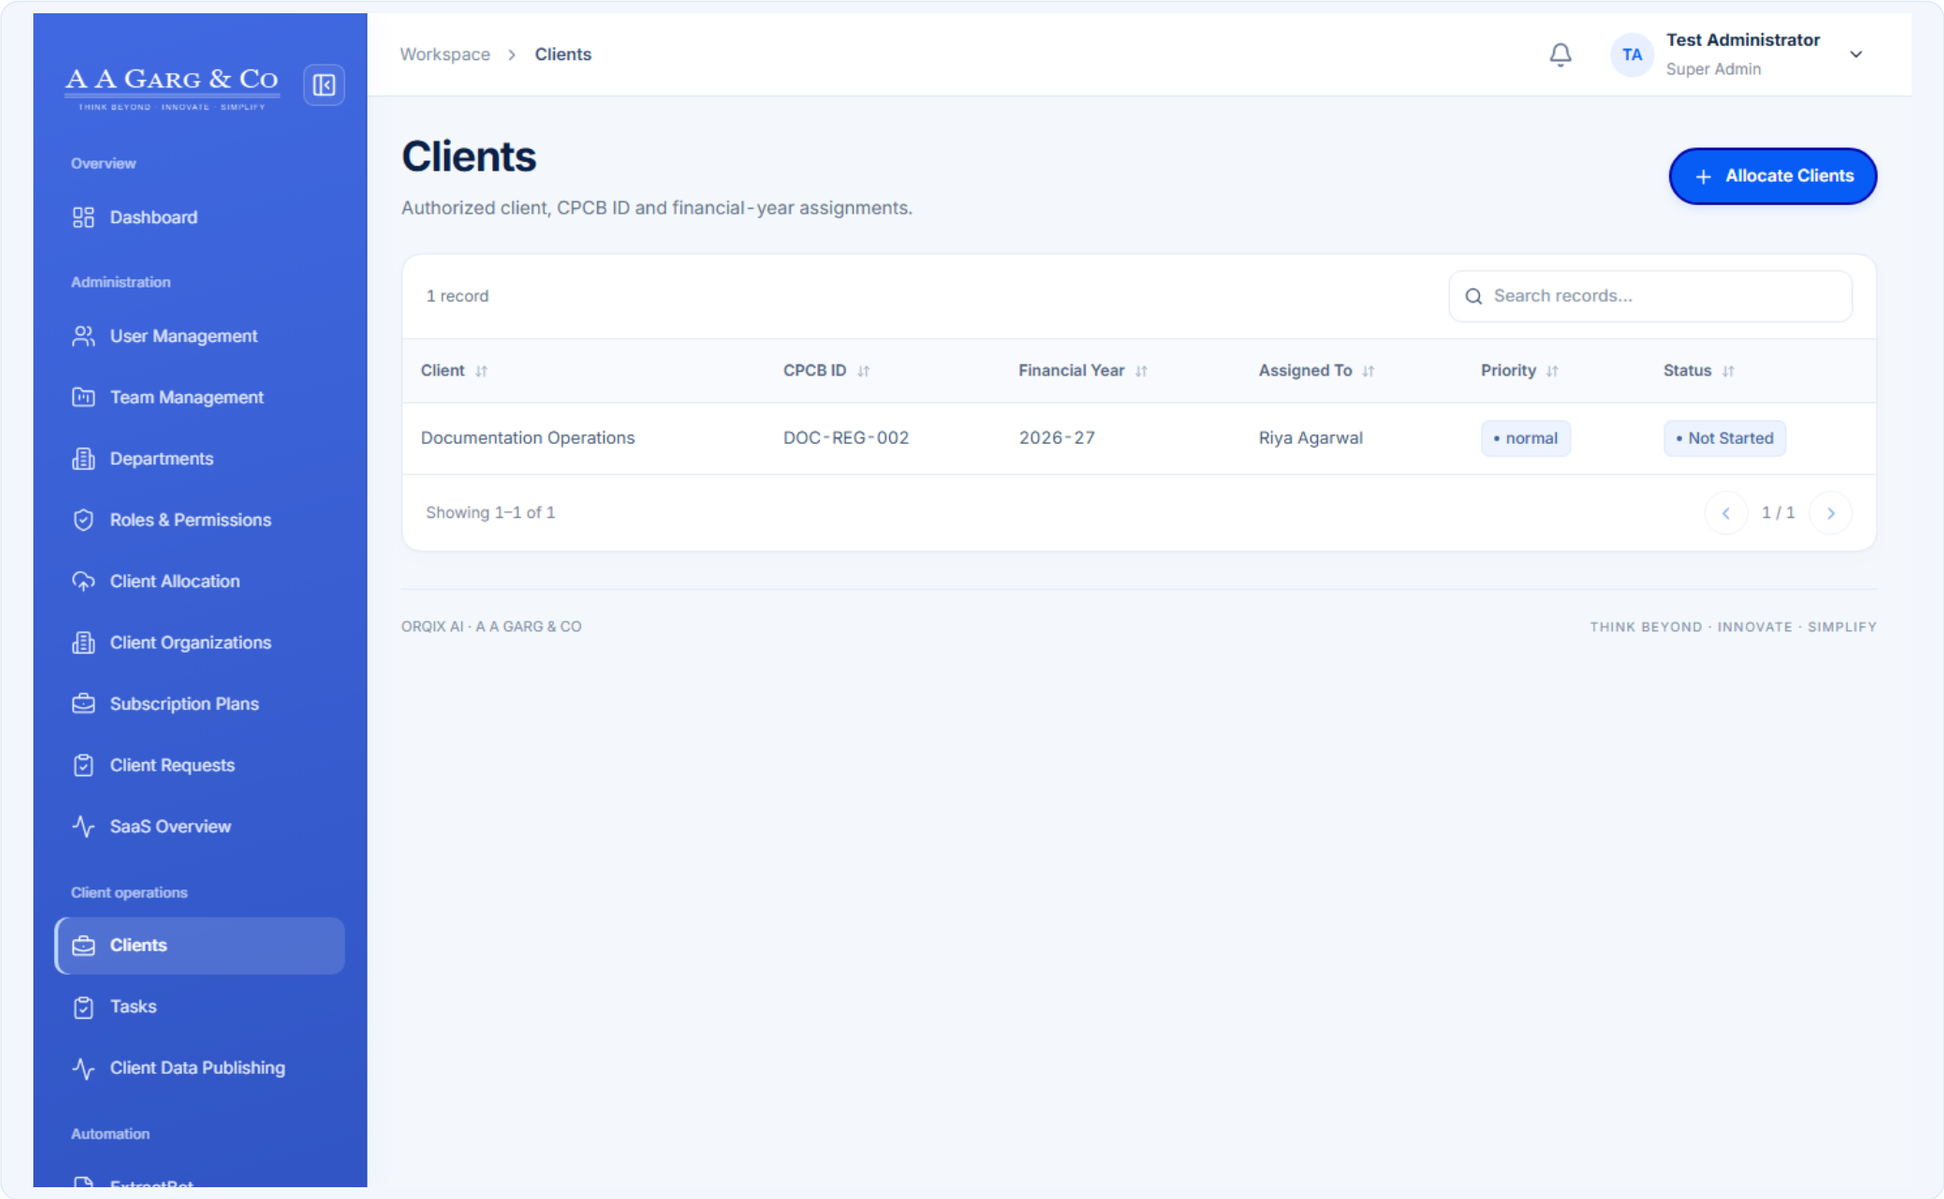

ADMIN

/clients

Clients

Browse authorized client and registration assignments and their financial-year workflow states.

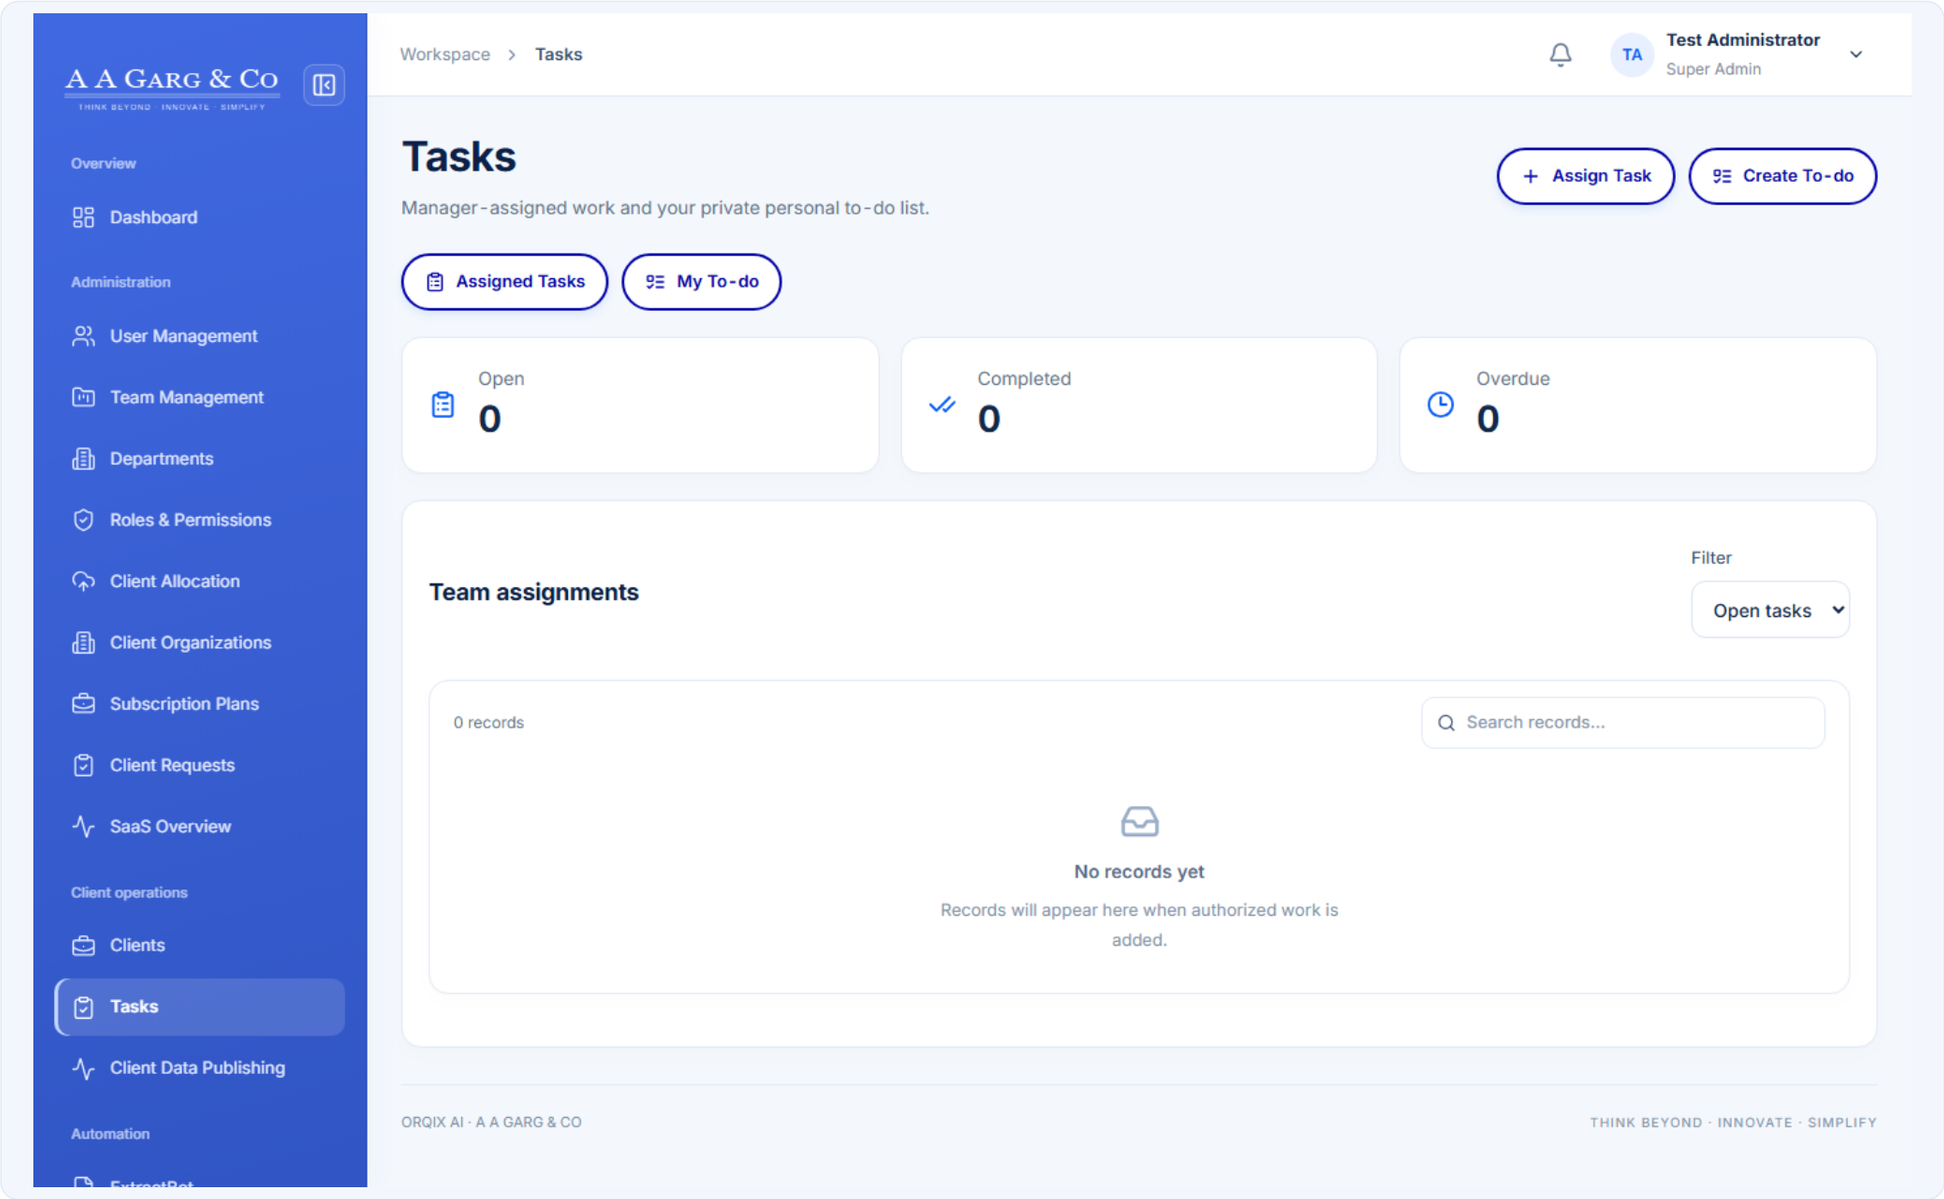

ADMIN

/tasks

Tasks & Personal To-do

Managers assign work with a title, description, deadline and employee. Users also maintain private personal to-dos.

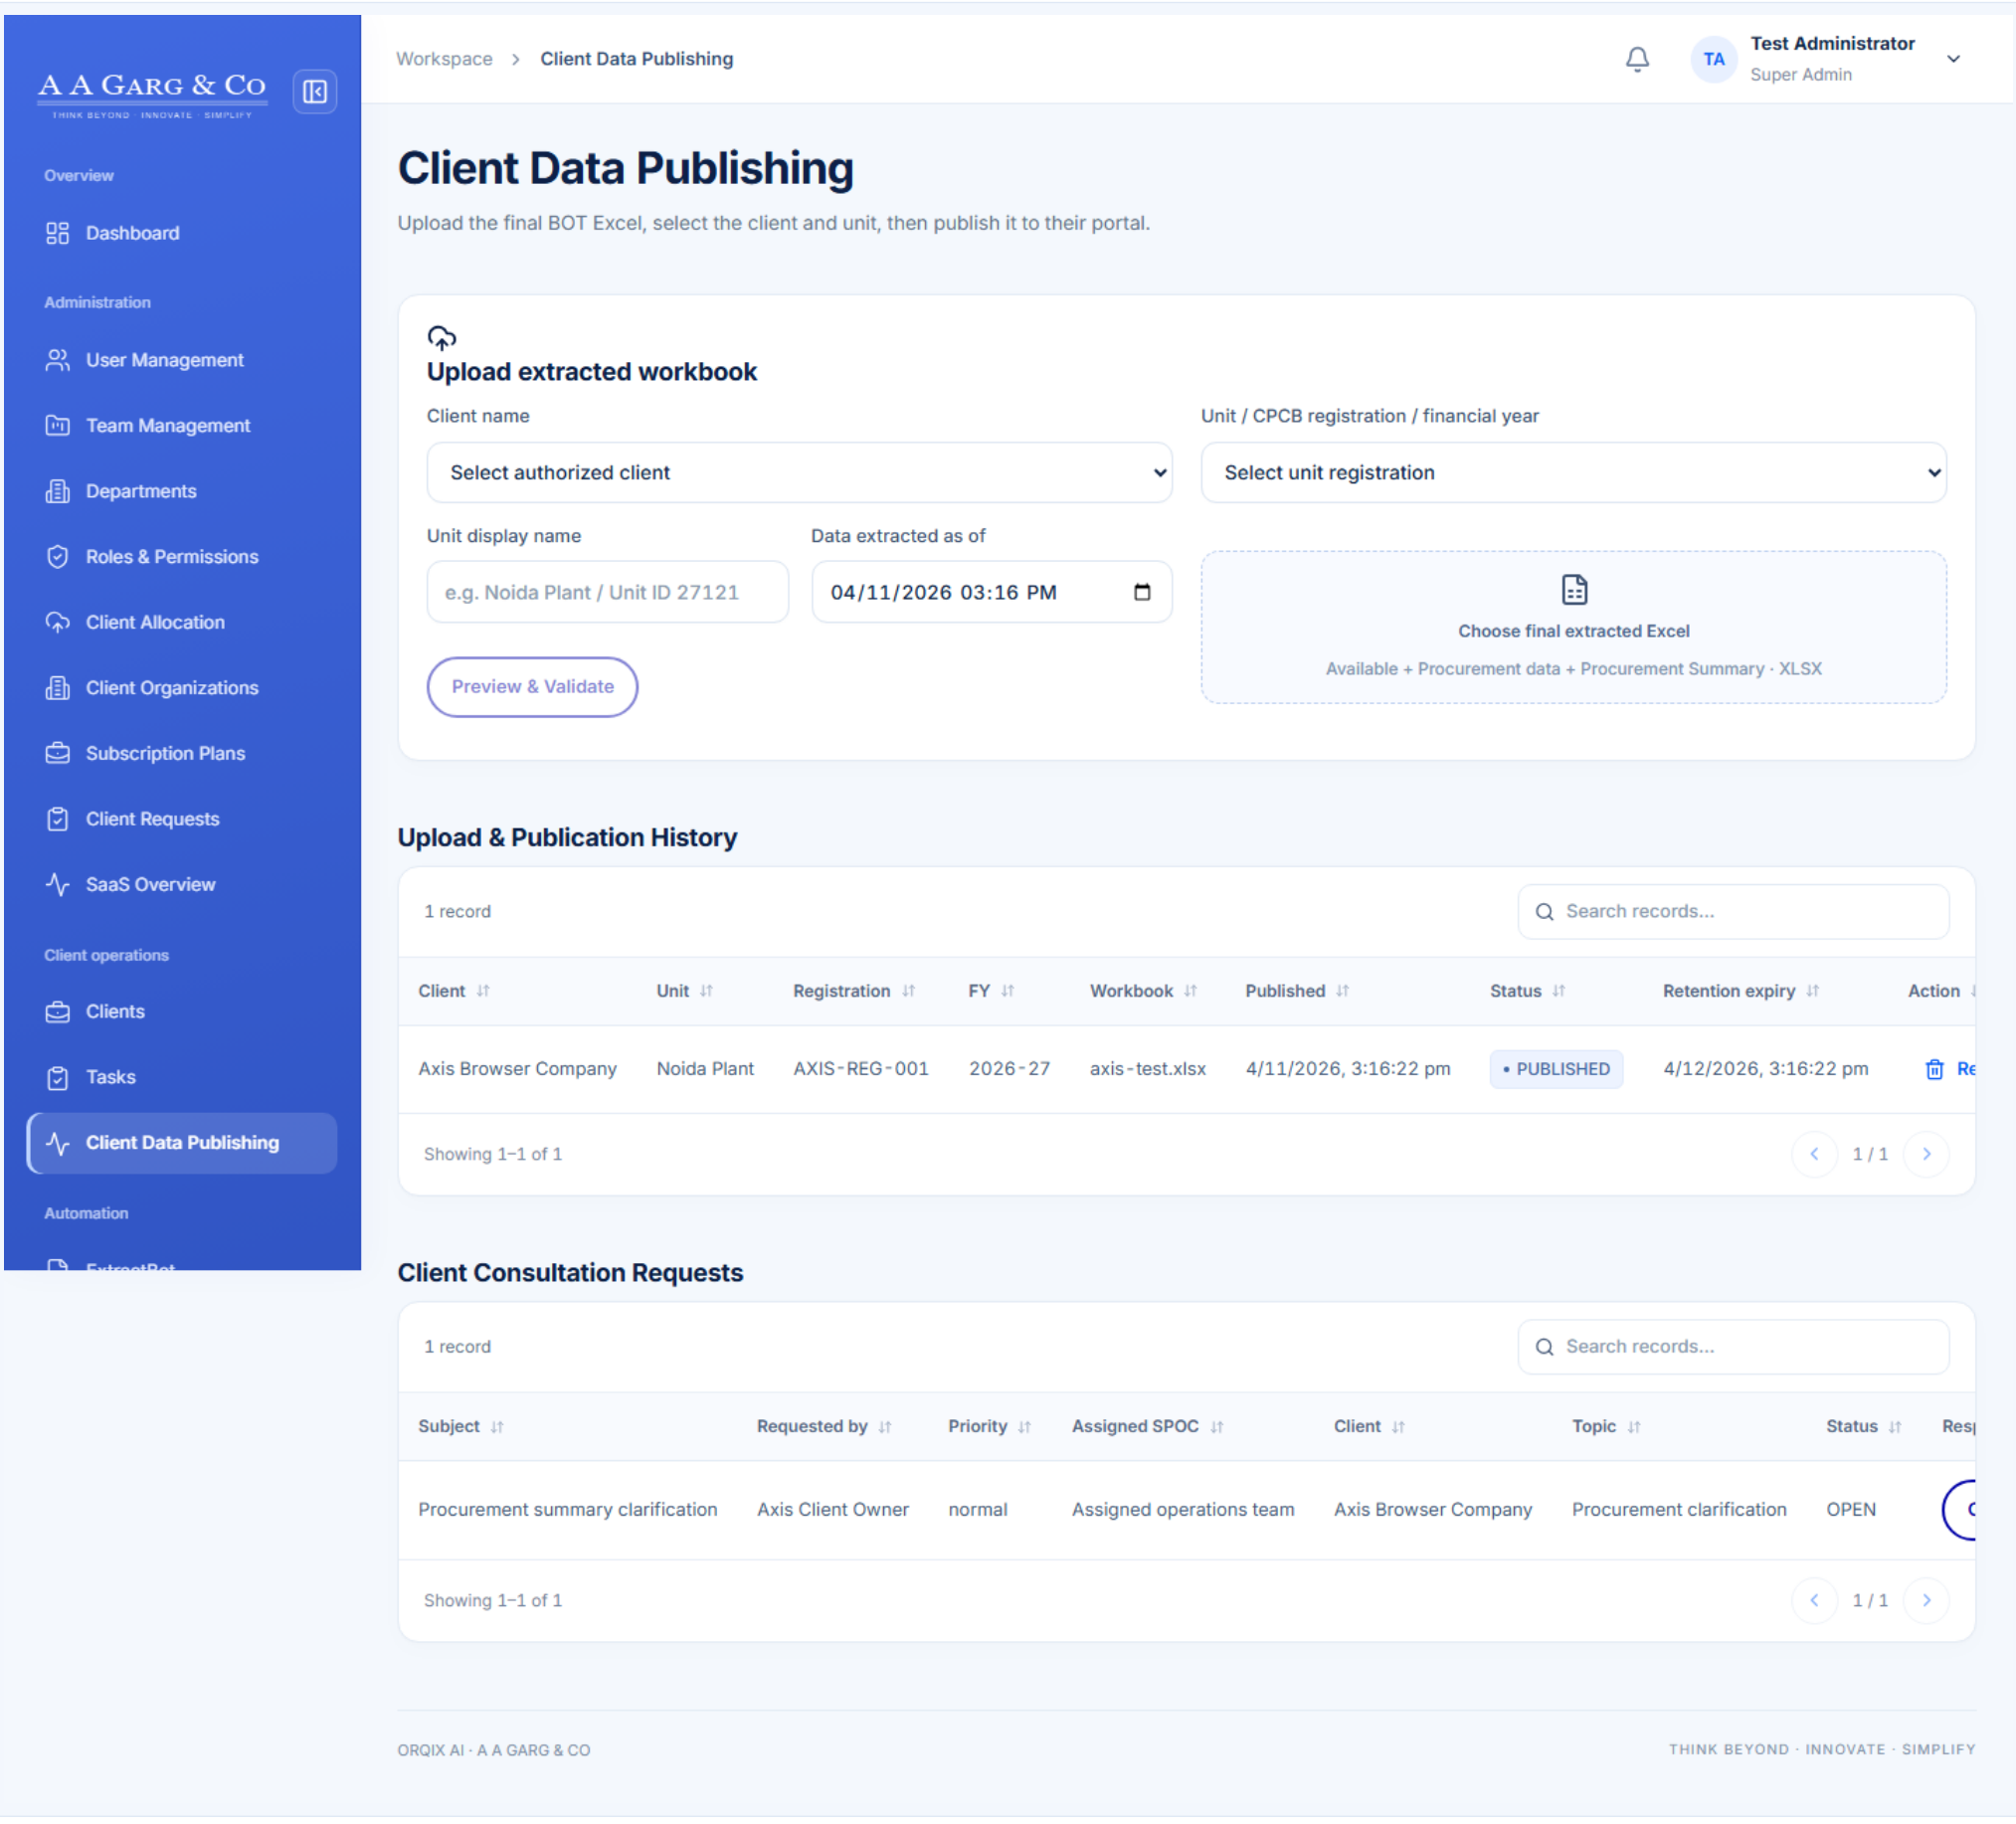

ADMIN

/axis-dashboard

Client Data Publishing

Select the client and unit, upload final Excel, preview supported sheets and publish directly. History records publications; consultation requests appear below.

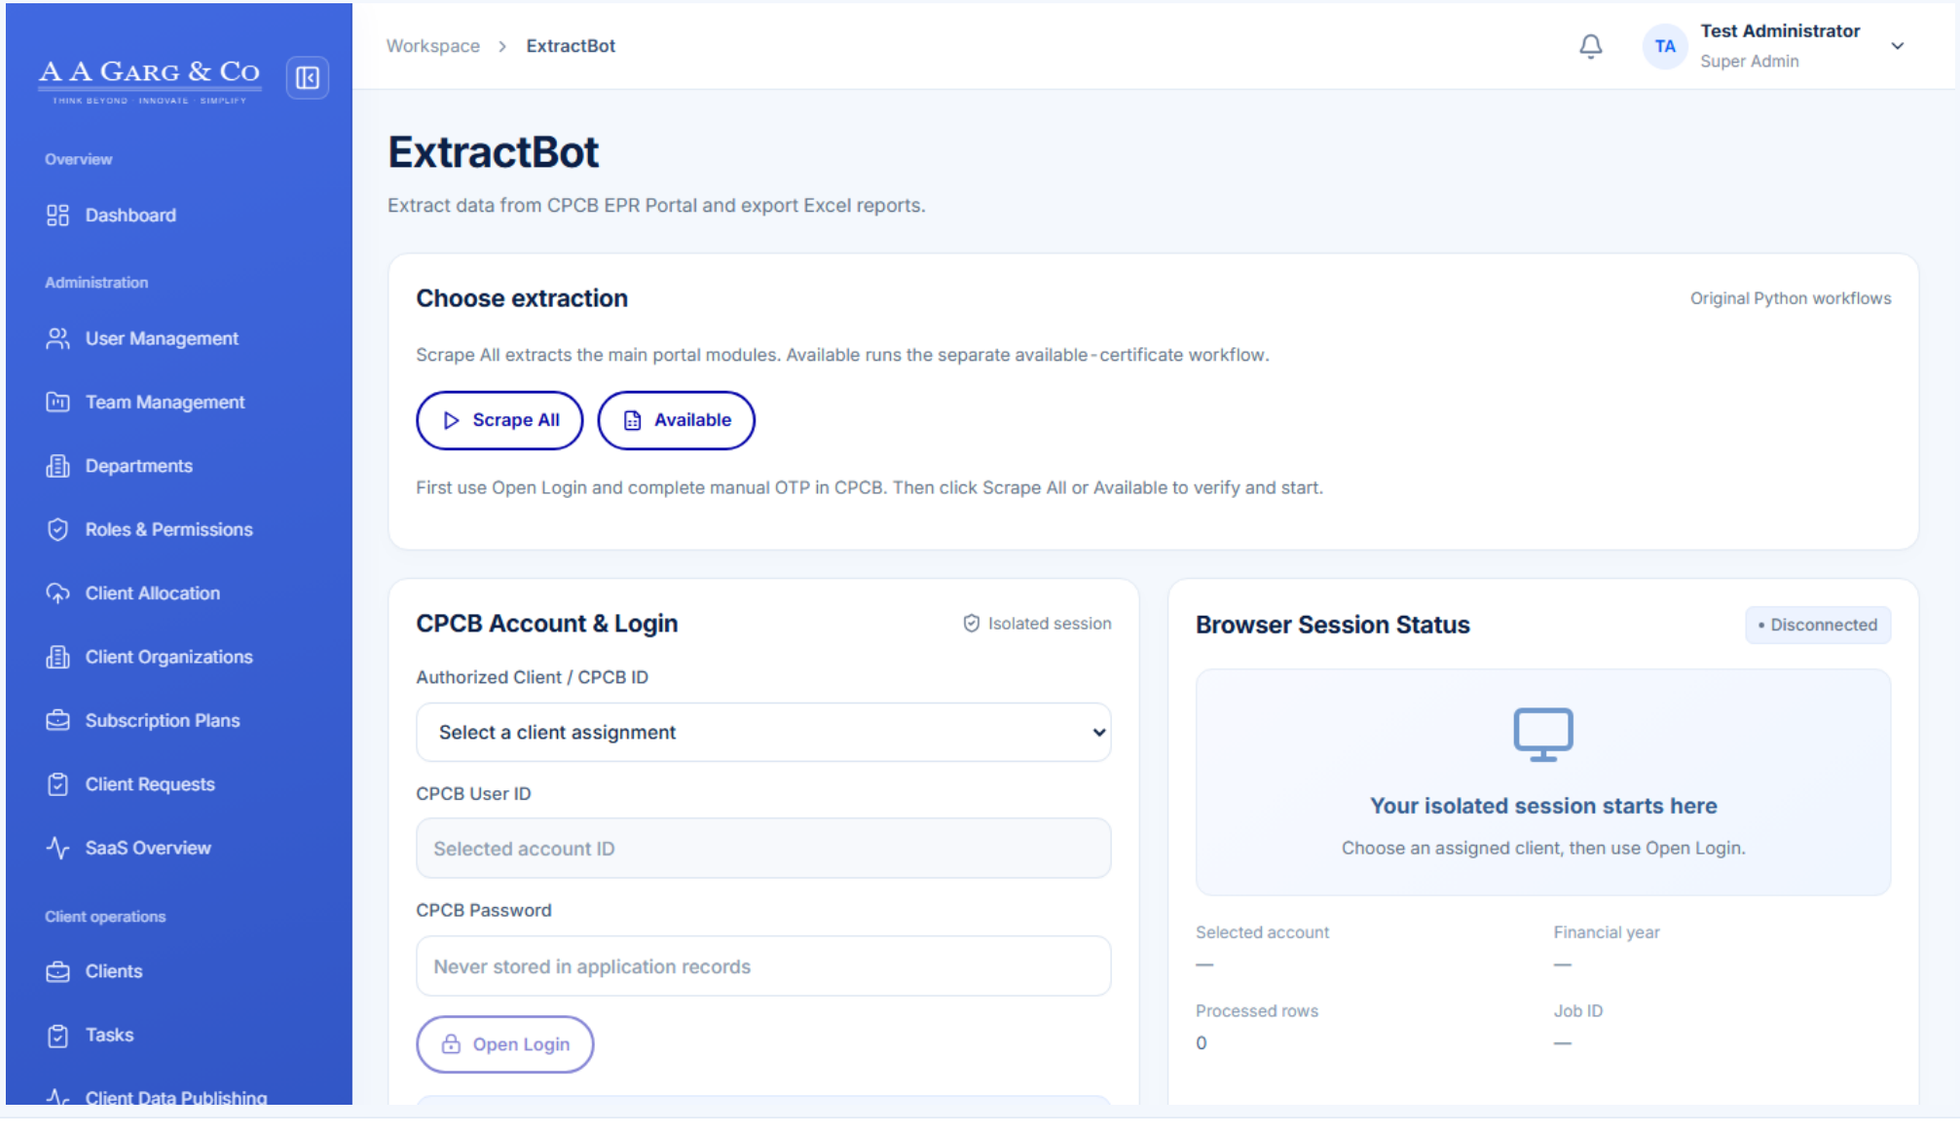

ADMIN

/bots/extract

ExtractBot | 1/2

Open Login launches the isolated CPCB session. Complete OTP manually, then use Scrape All and Available. The final workbook is offered for download.

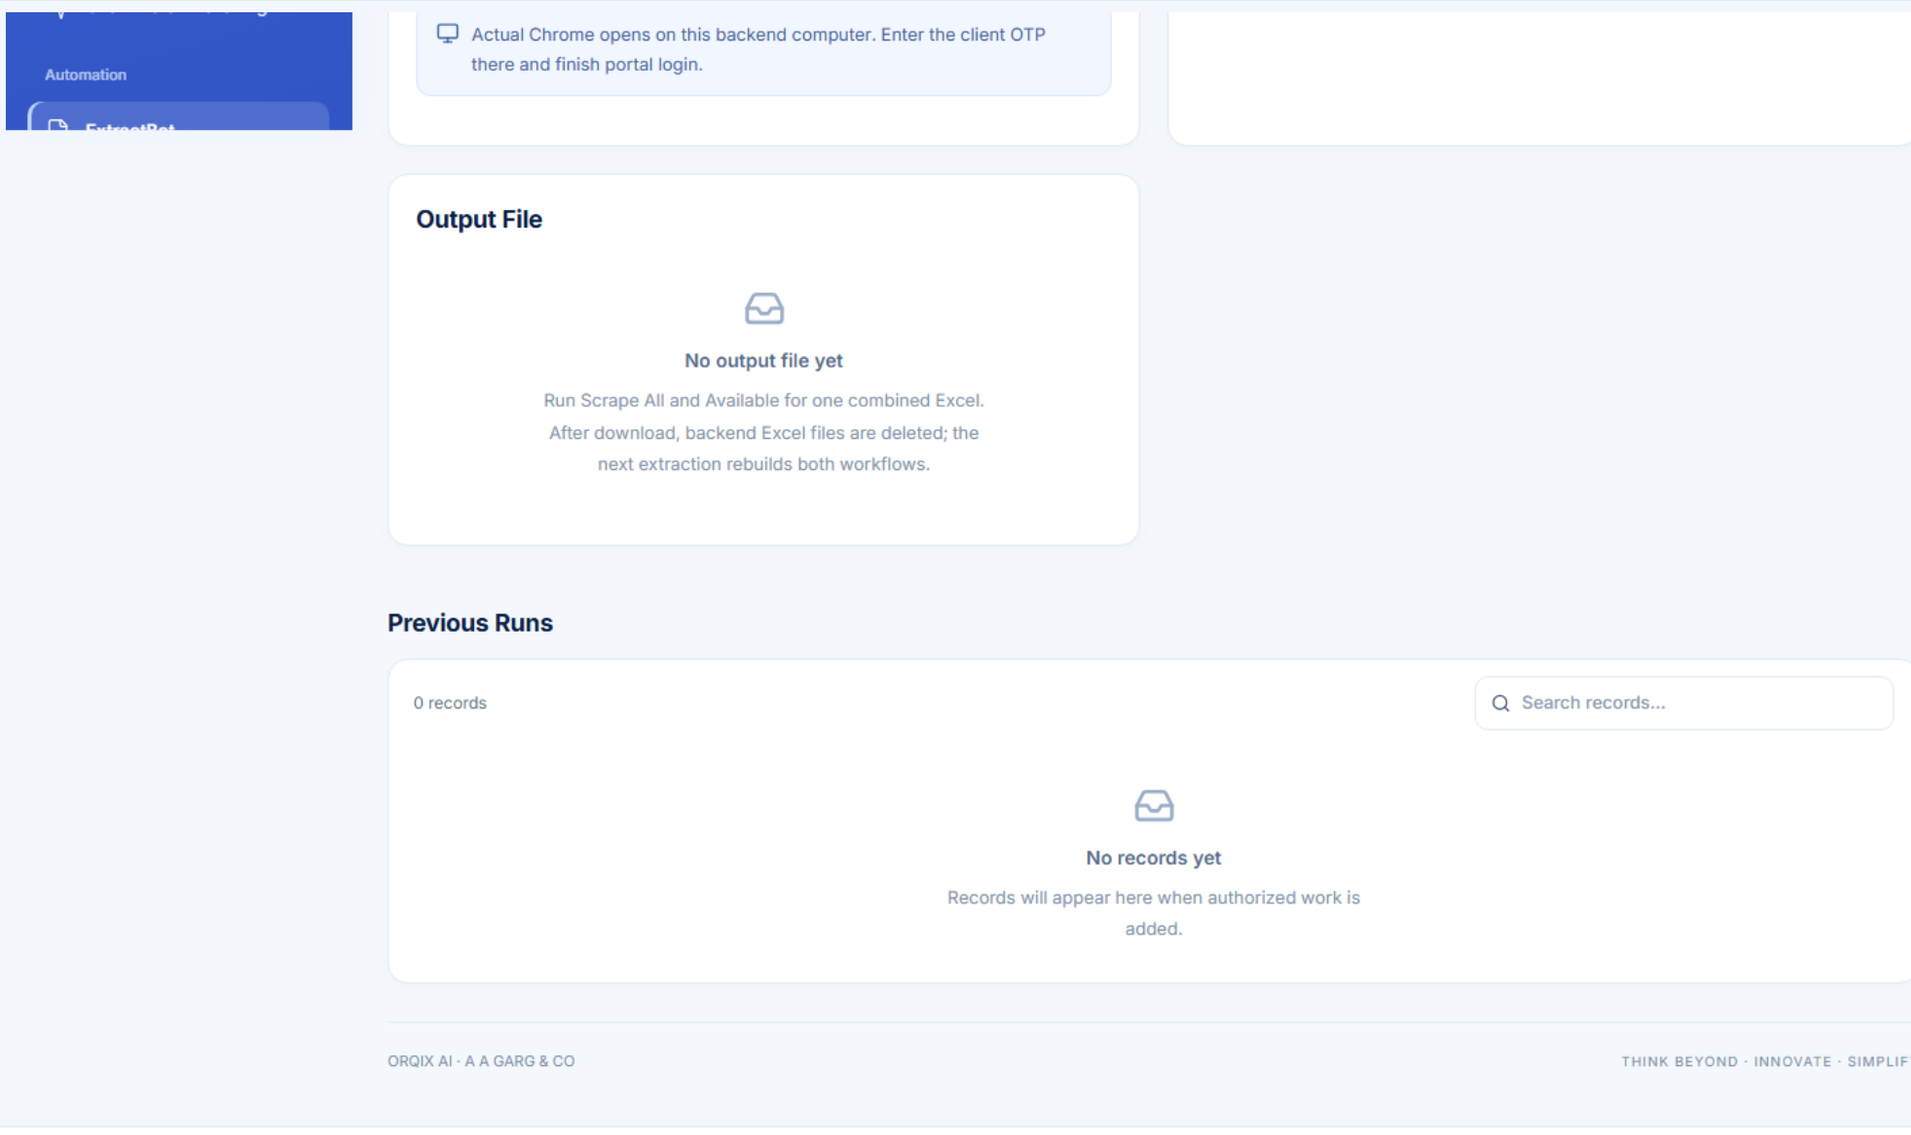

ADMIN

/bots/extract

ExtractBot | 2/2

Open Login launches the isolated CPCB session. Complete OTP manually, then use Scrape All and Available. The final workbook is offered for download.

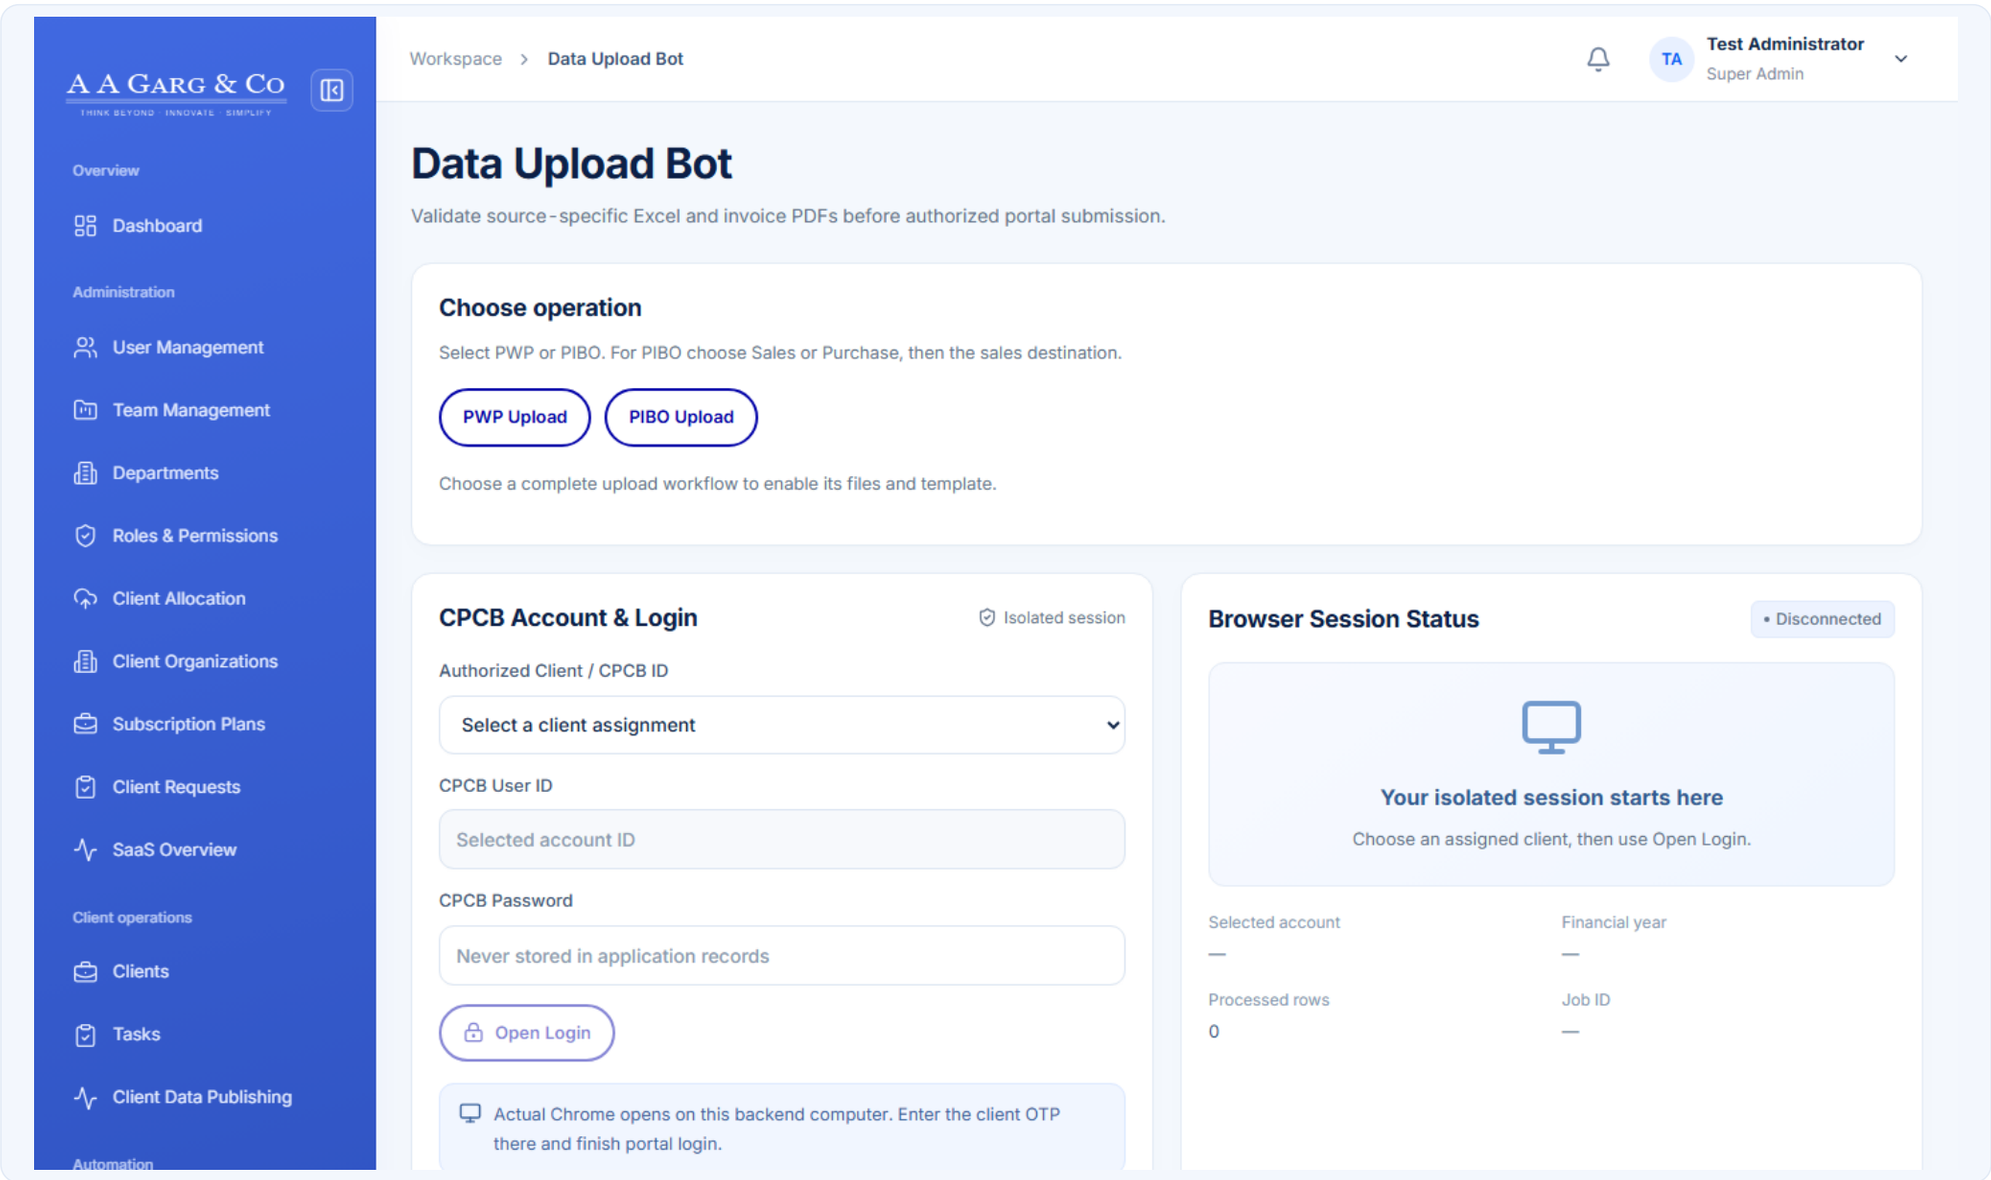

ADMIN

/bots/upload

Data Upload Bot | 1/2

Choose PWP or PIBO. PIBO branches into Sales or Purchase, and Sales into Domestic or Export. Validate the appropriate Excel and invoice inputs before submission.

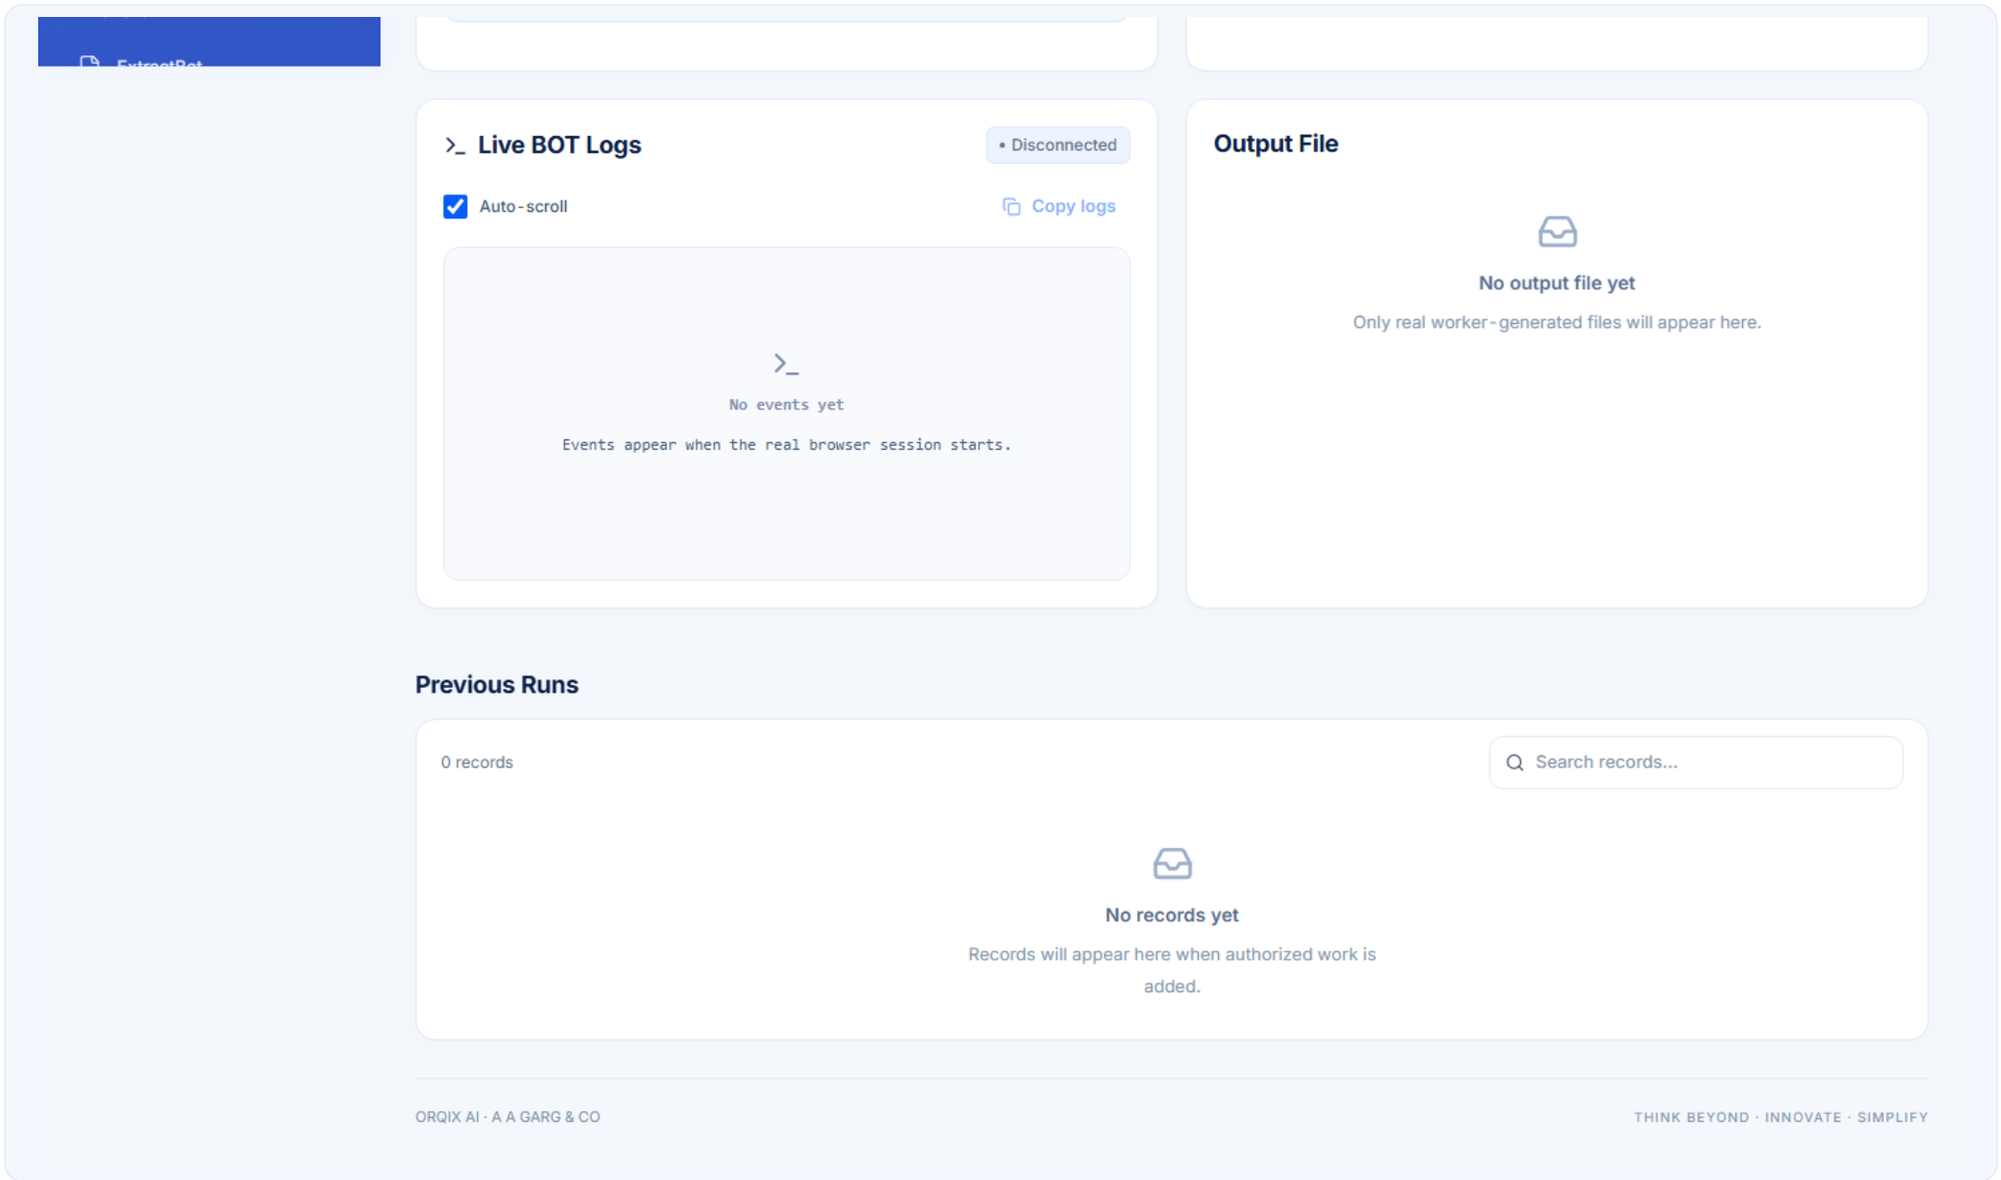

ADMIN

/bots/upload

Data Upload Bot | 2/2

Choose PWP or PIBO. PIBO branches into Sales or Purchase, and Sales into Domestic or Export. Validate the appropriate Excel and invoice inputs before submission.

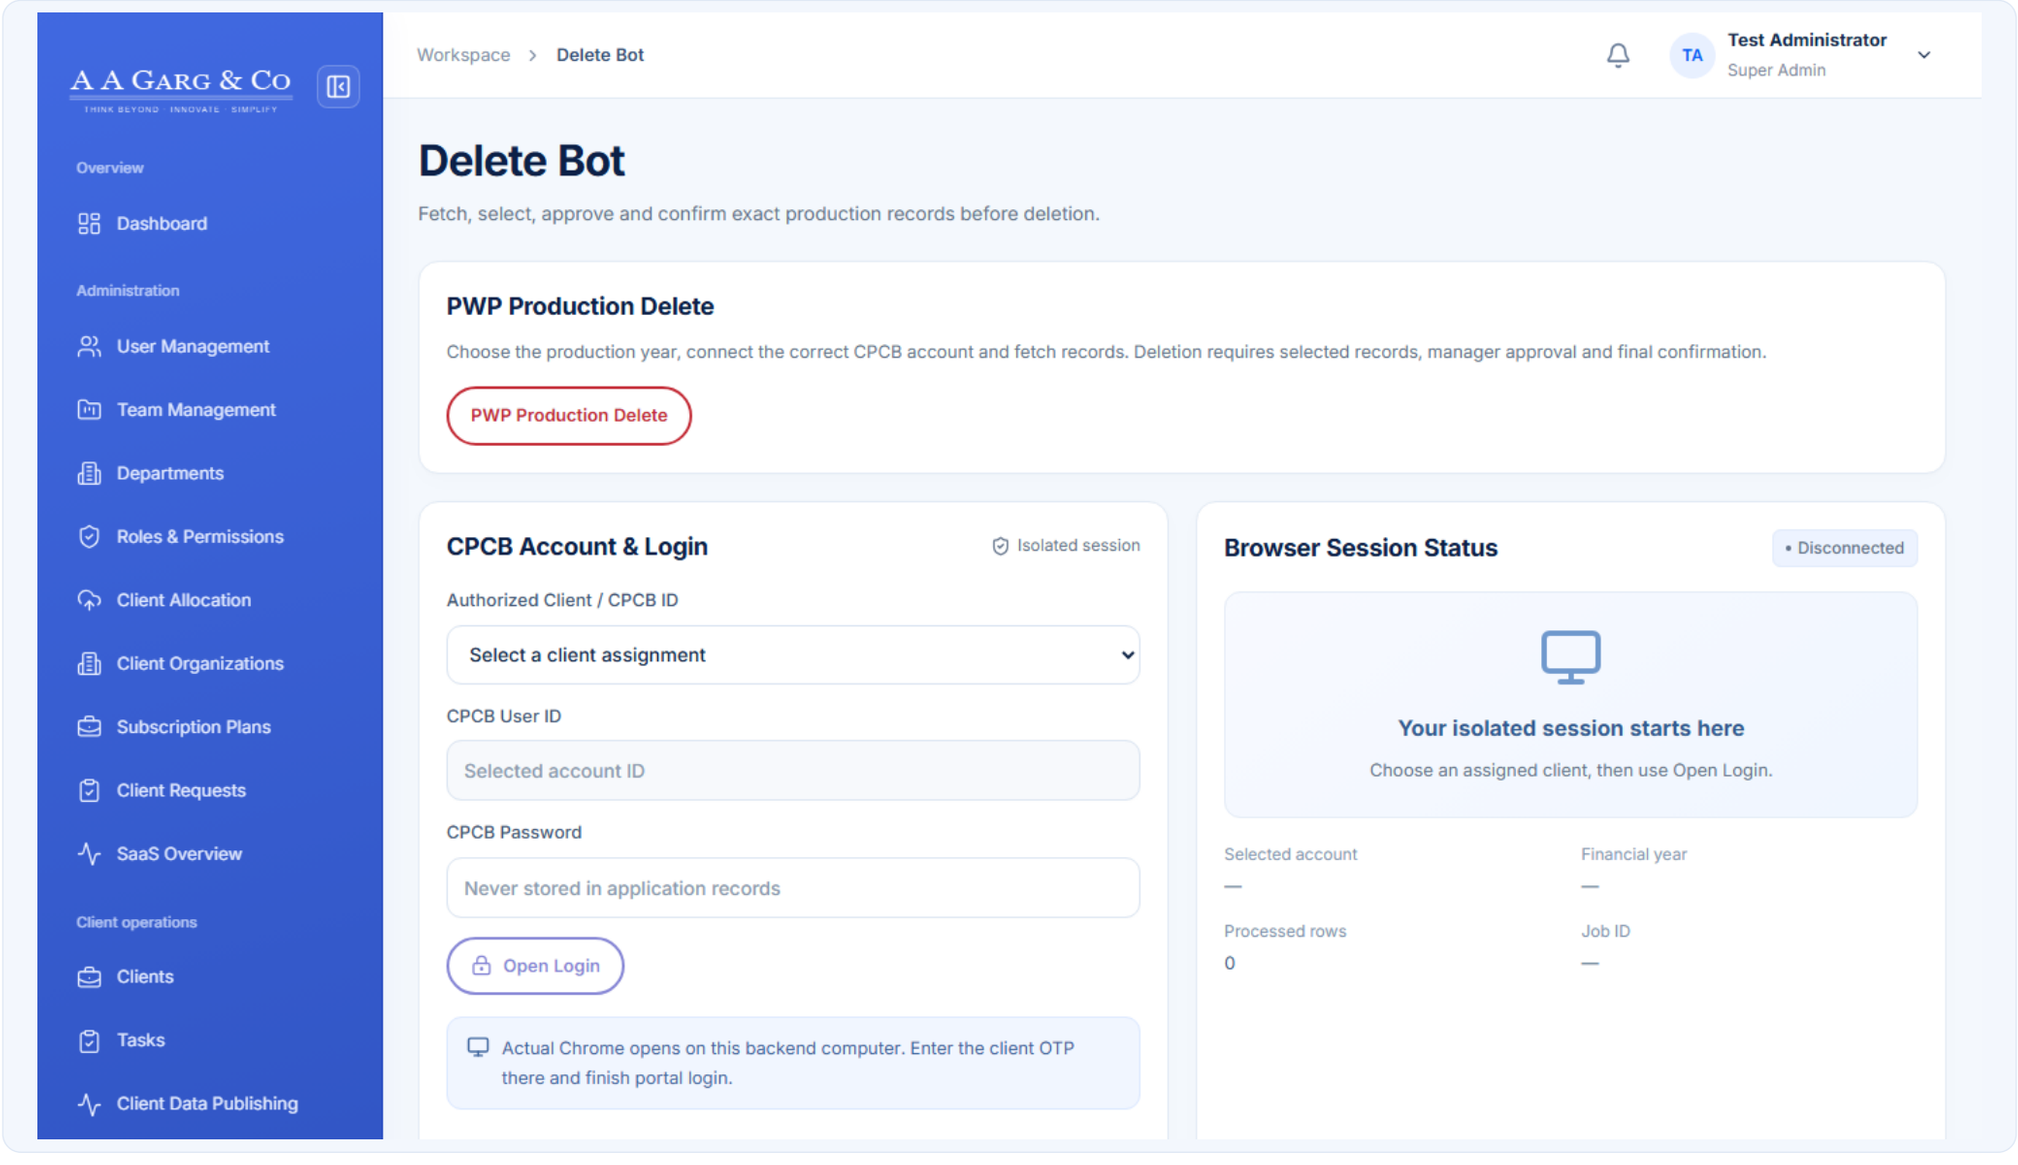

ADMIN

/bots/delete

Delete Bot | 1/2

Prepare a scoped PWP production-record deletion. Record selection, authorization and explicit confirmation protect destructive portal actions.

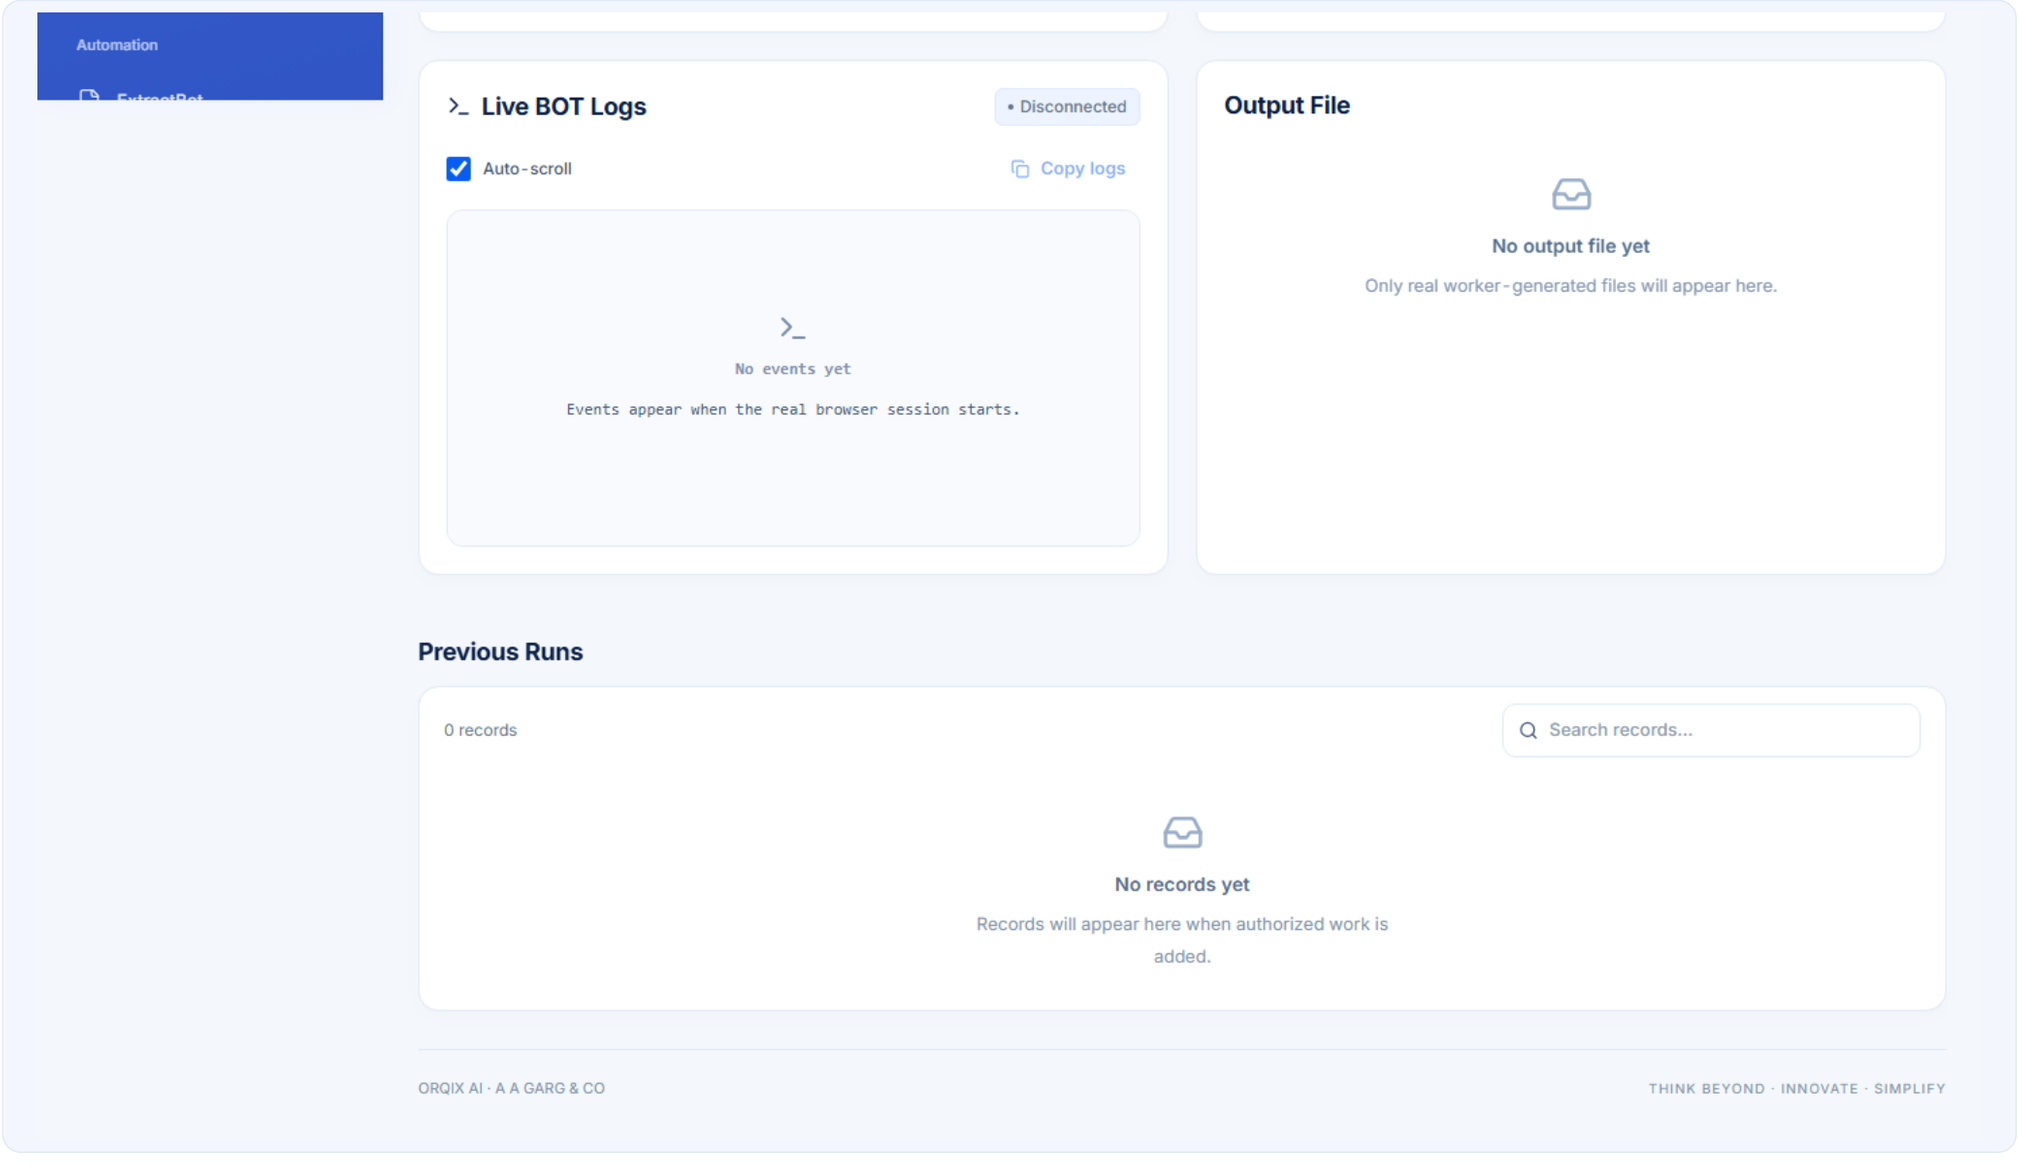

ADMIN

/bots/delete

Delete Bot | 2/2

Prepare a scoped PWP production-record deletion. Record selection, authorization and explicit confirmation protect destructive portal actions.

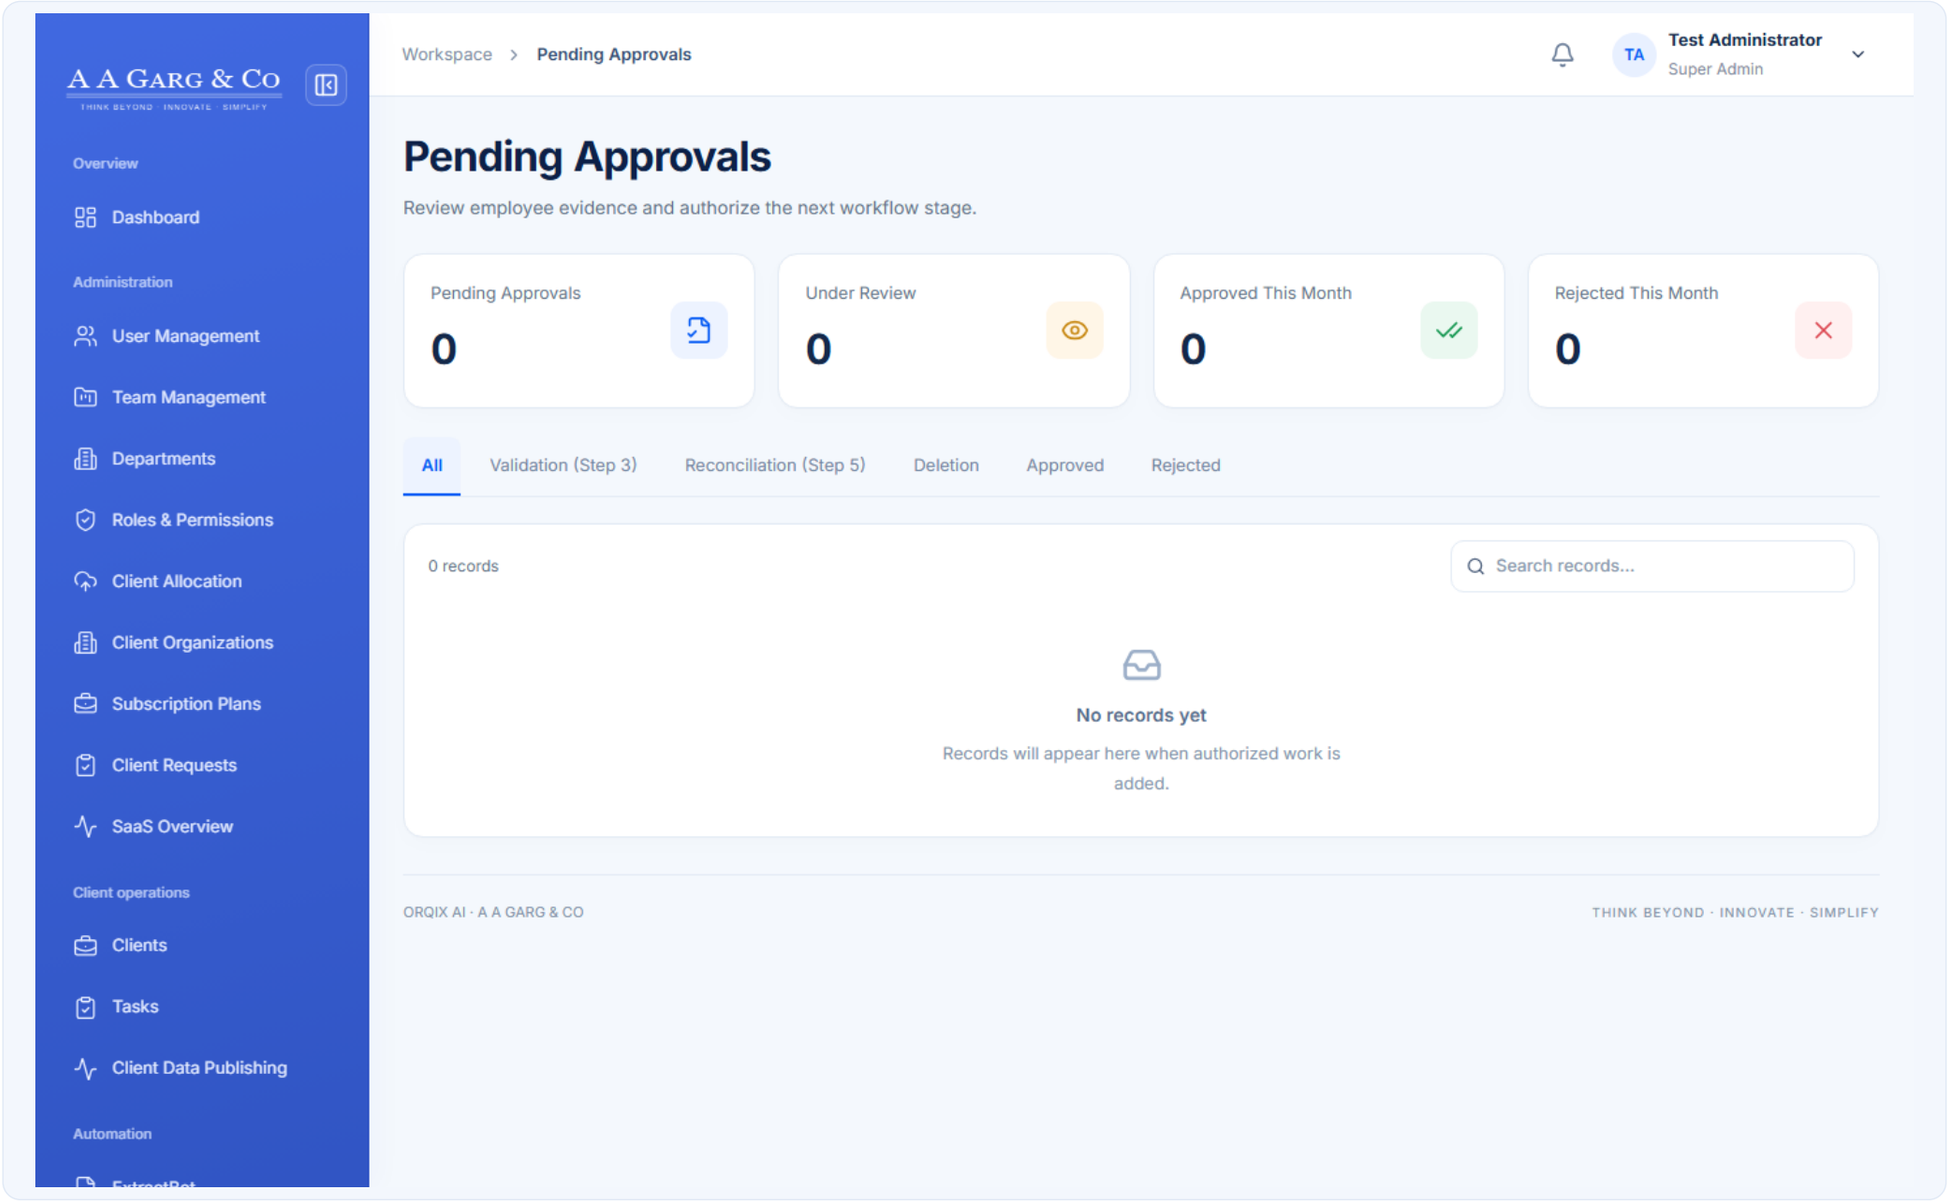

ADMIN

/approvals

Pending Approvals

Review permitted approval and deletion requests. Visibility follows the configured role and reporting scope.

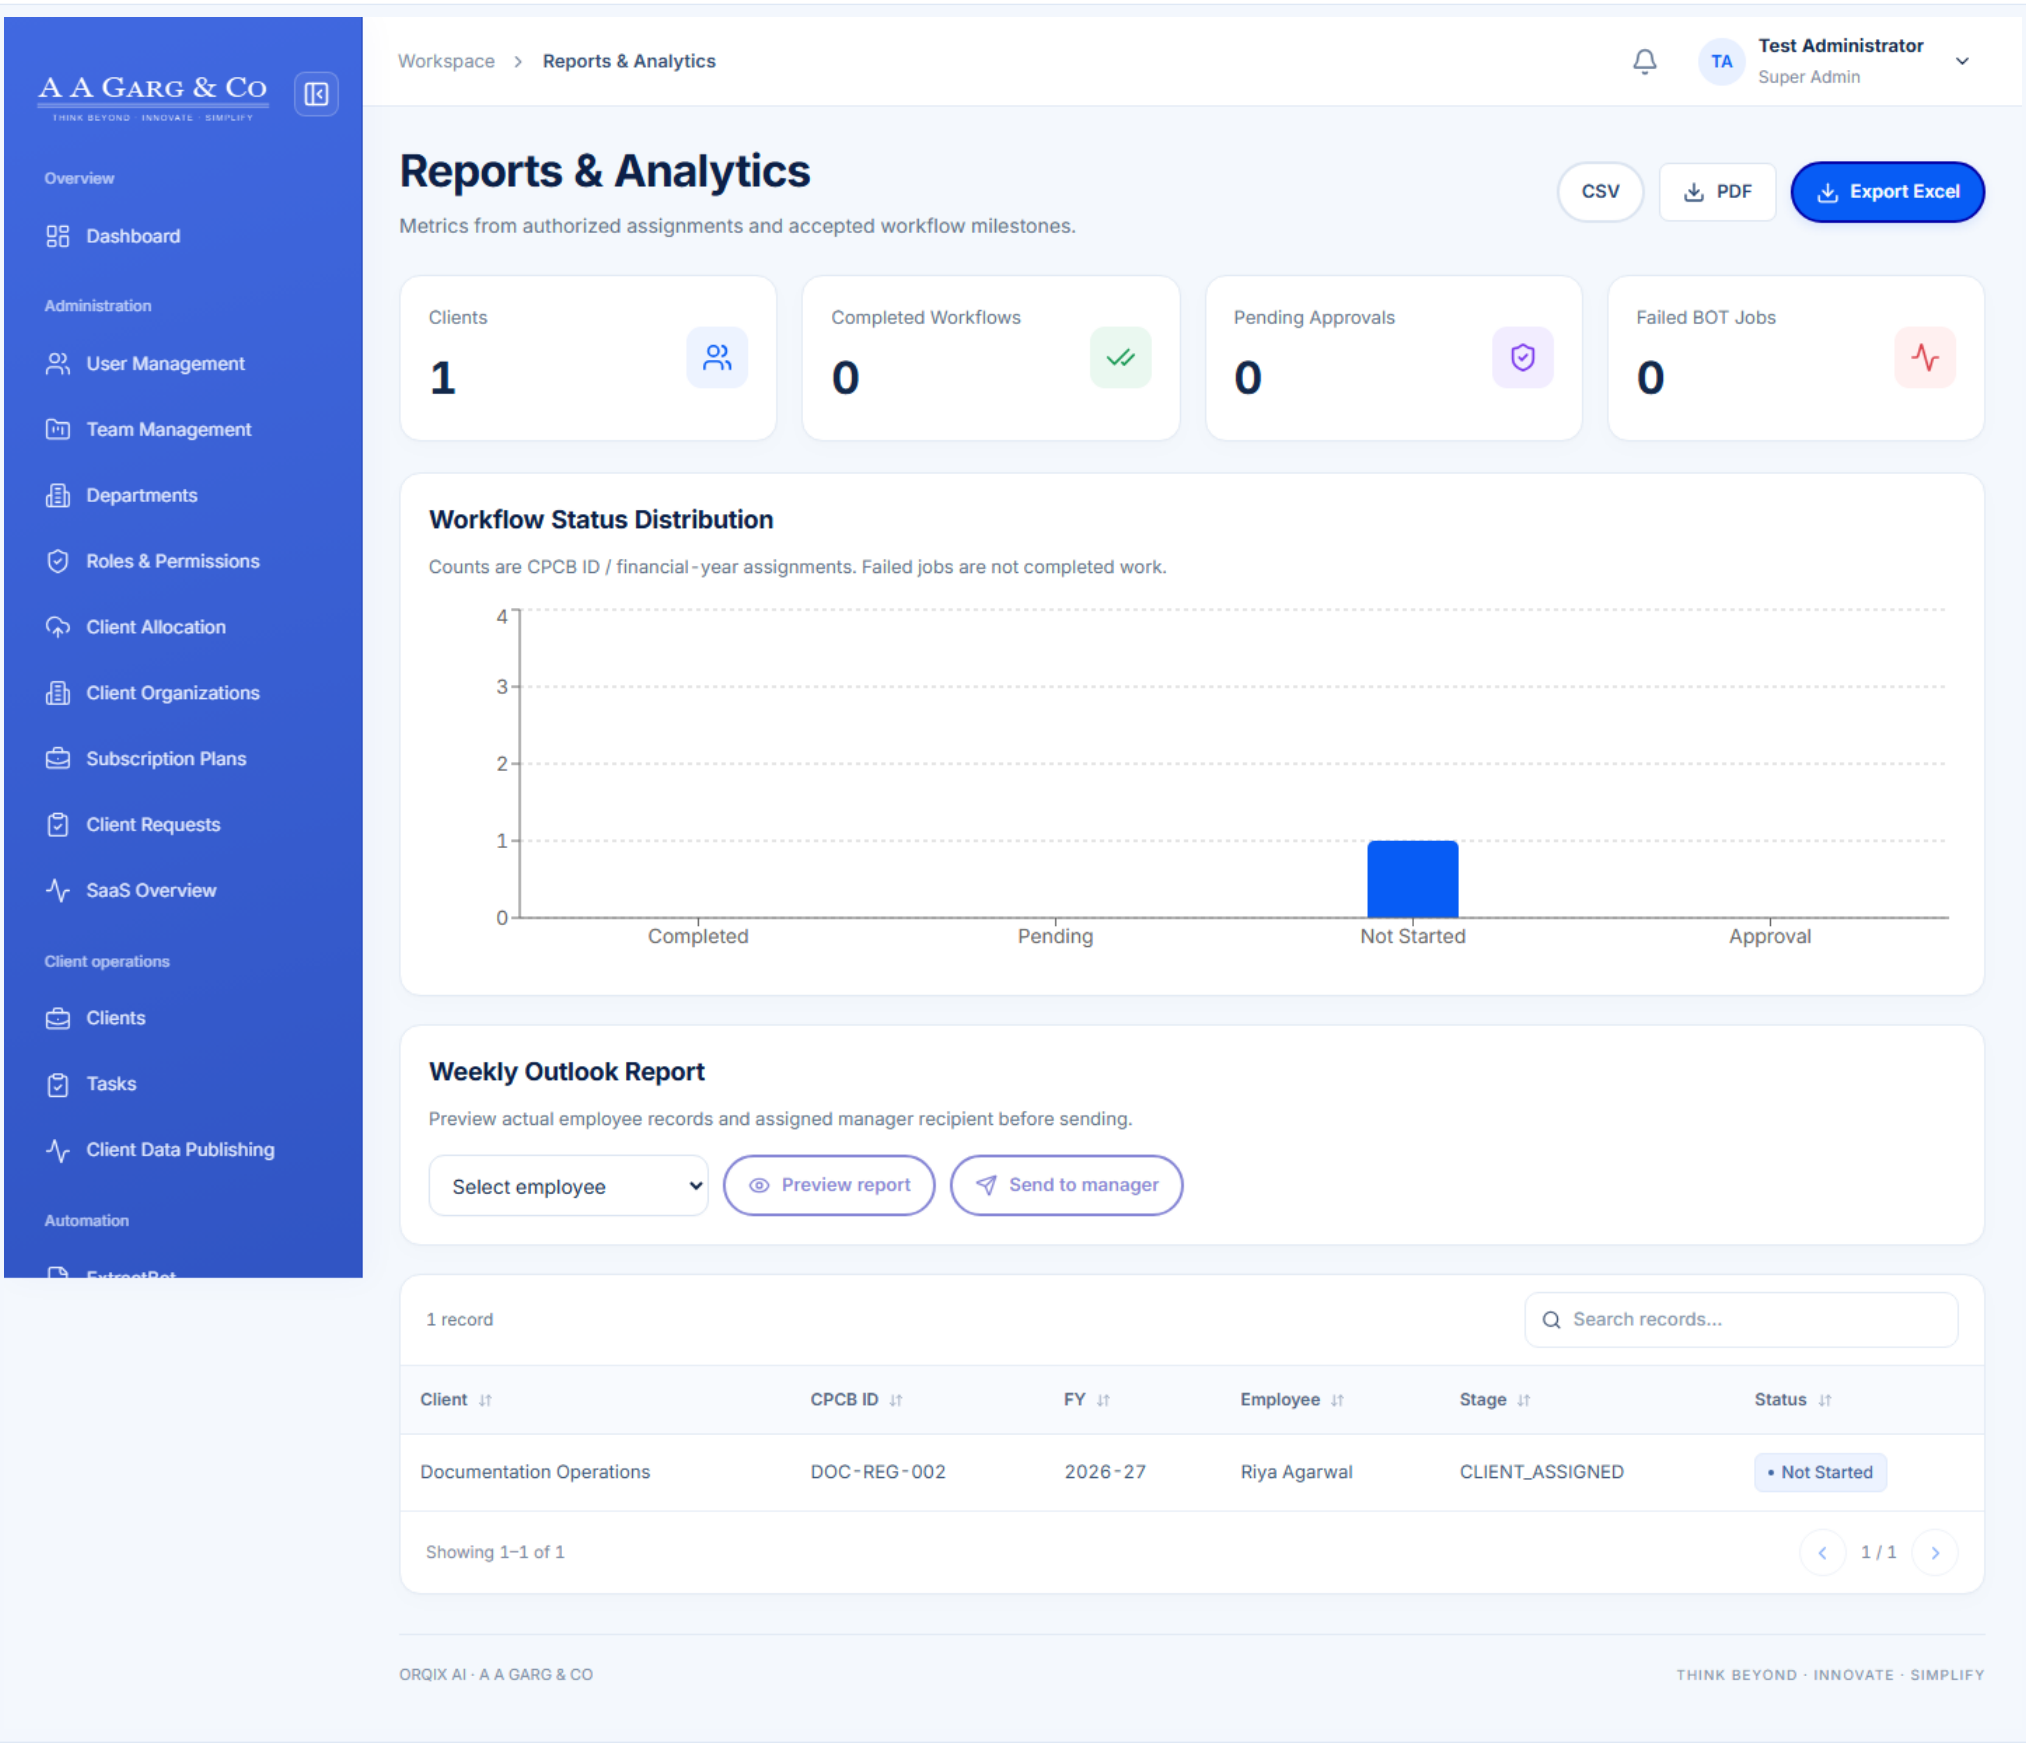

ADMIN

/reports

Reports & Analytics

View permitted organization or personal workflow statistics and download available reporting formats.

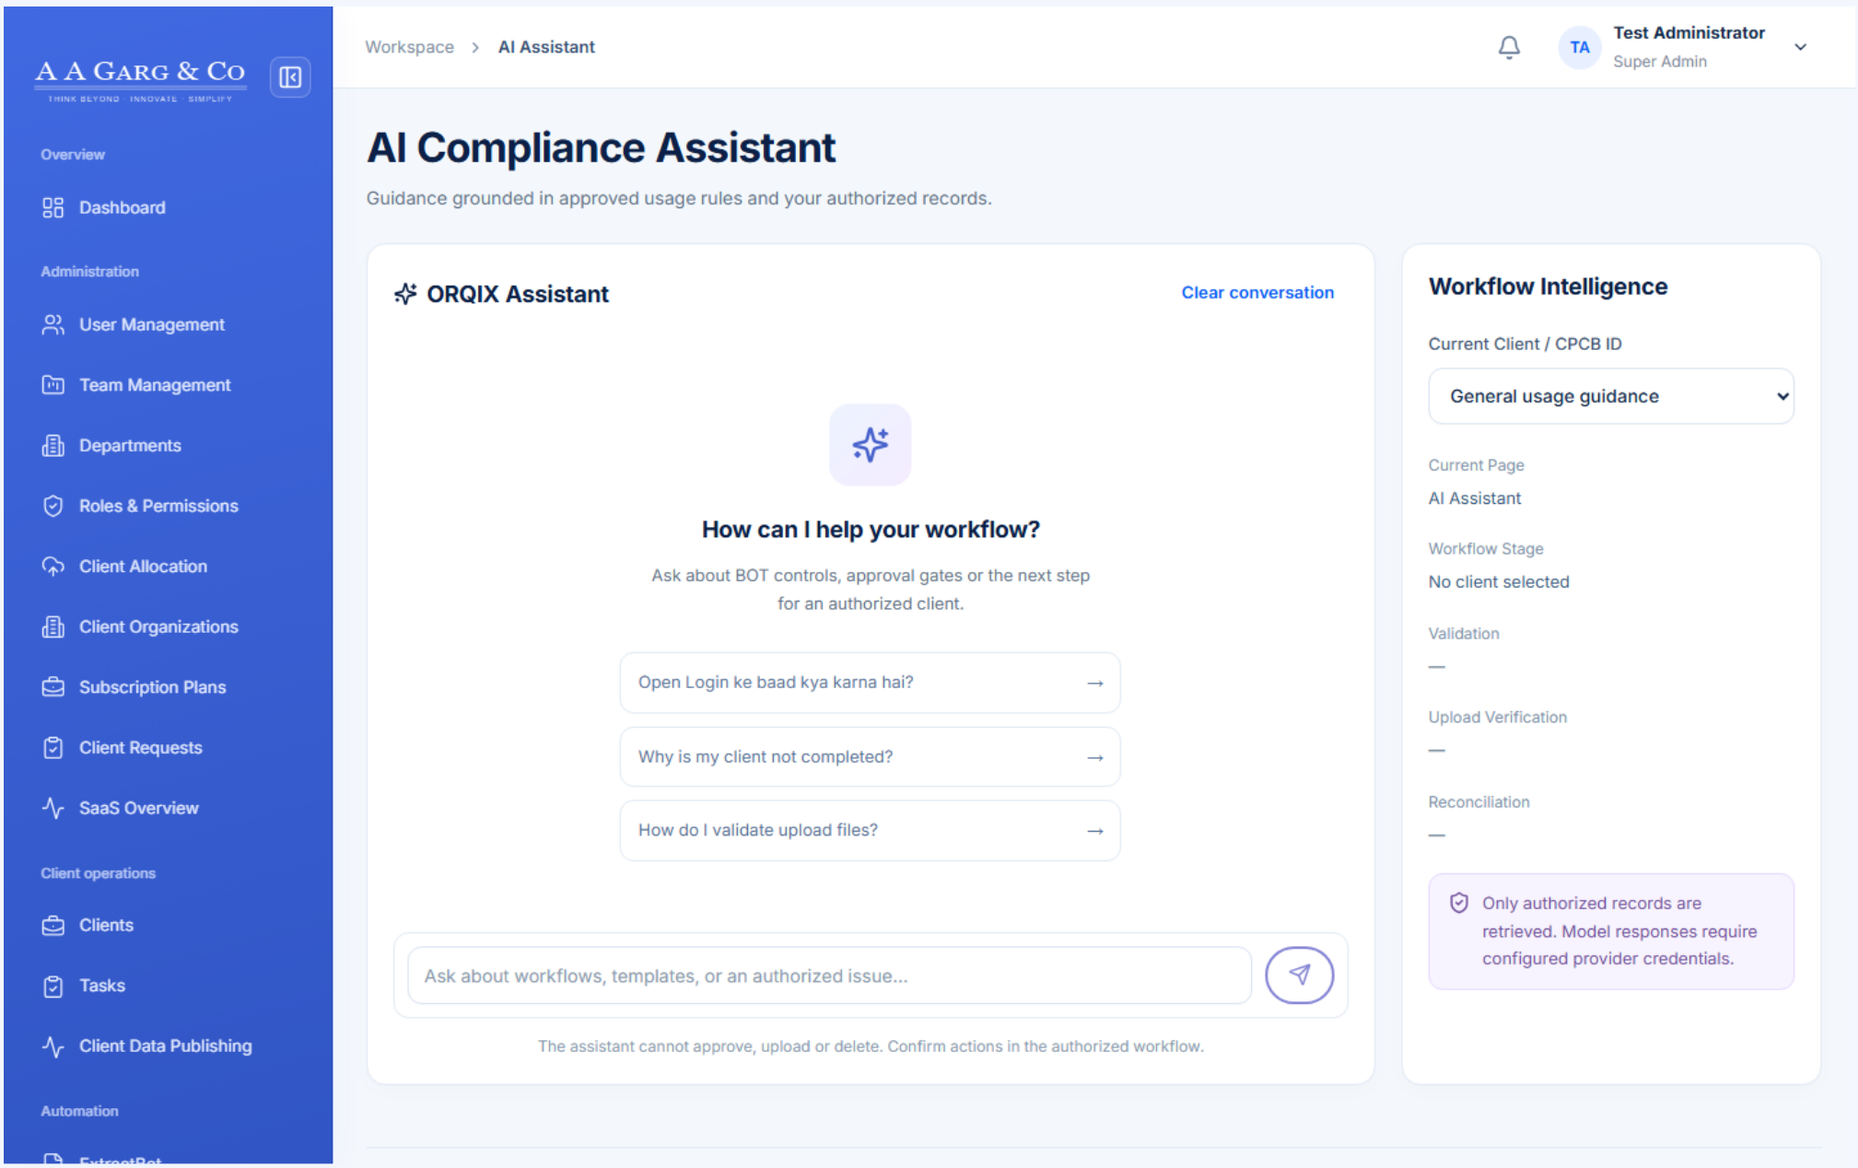

ADMIN

/ai-assistant

AI Assistant

Ask platform and workflow questions. Provider-dependent responses require configured integration; the assistant does not bypass permissions.

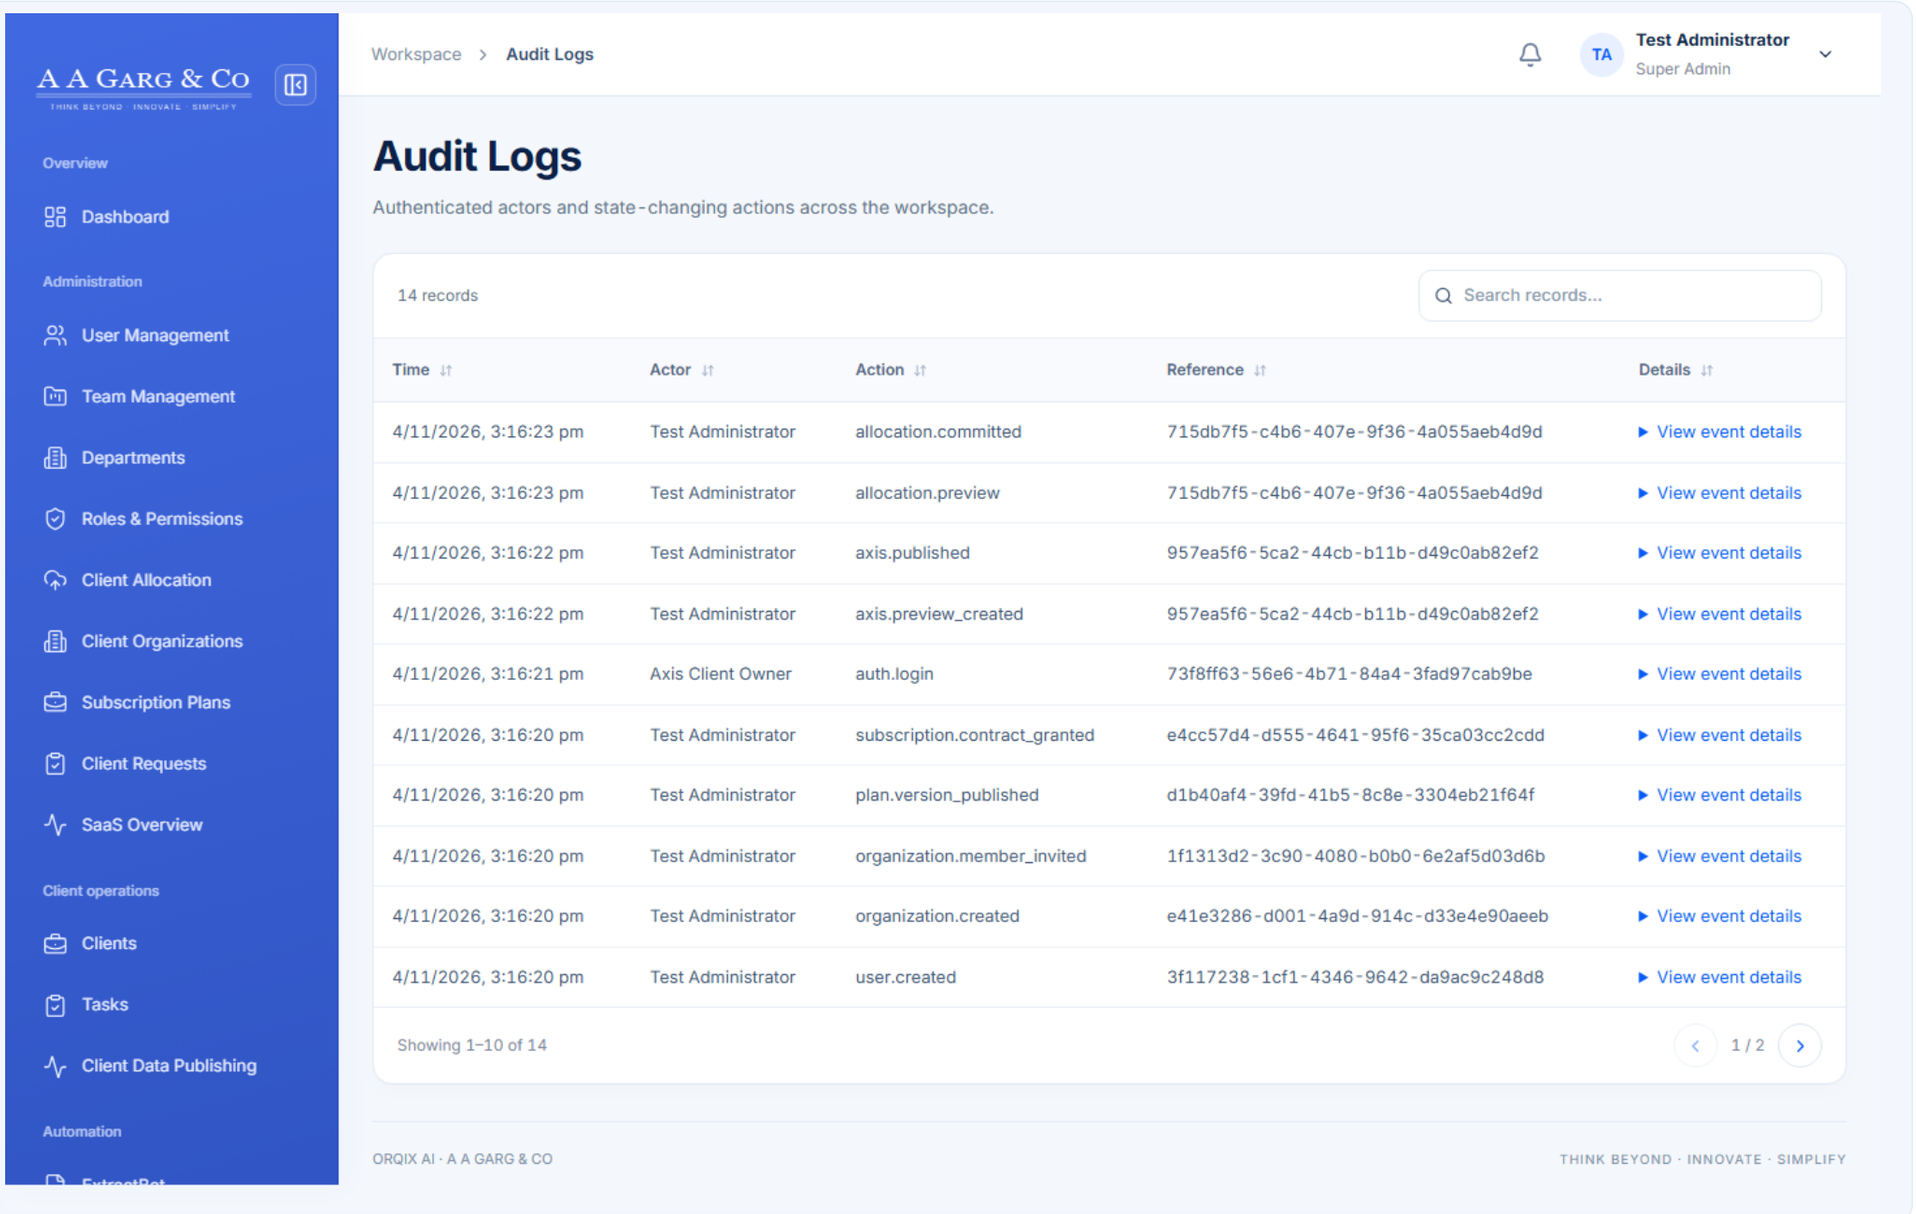

ADMIN

/audit

Audit Logs

Inspect recorded application events, actors and timestamps for management traceability.

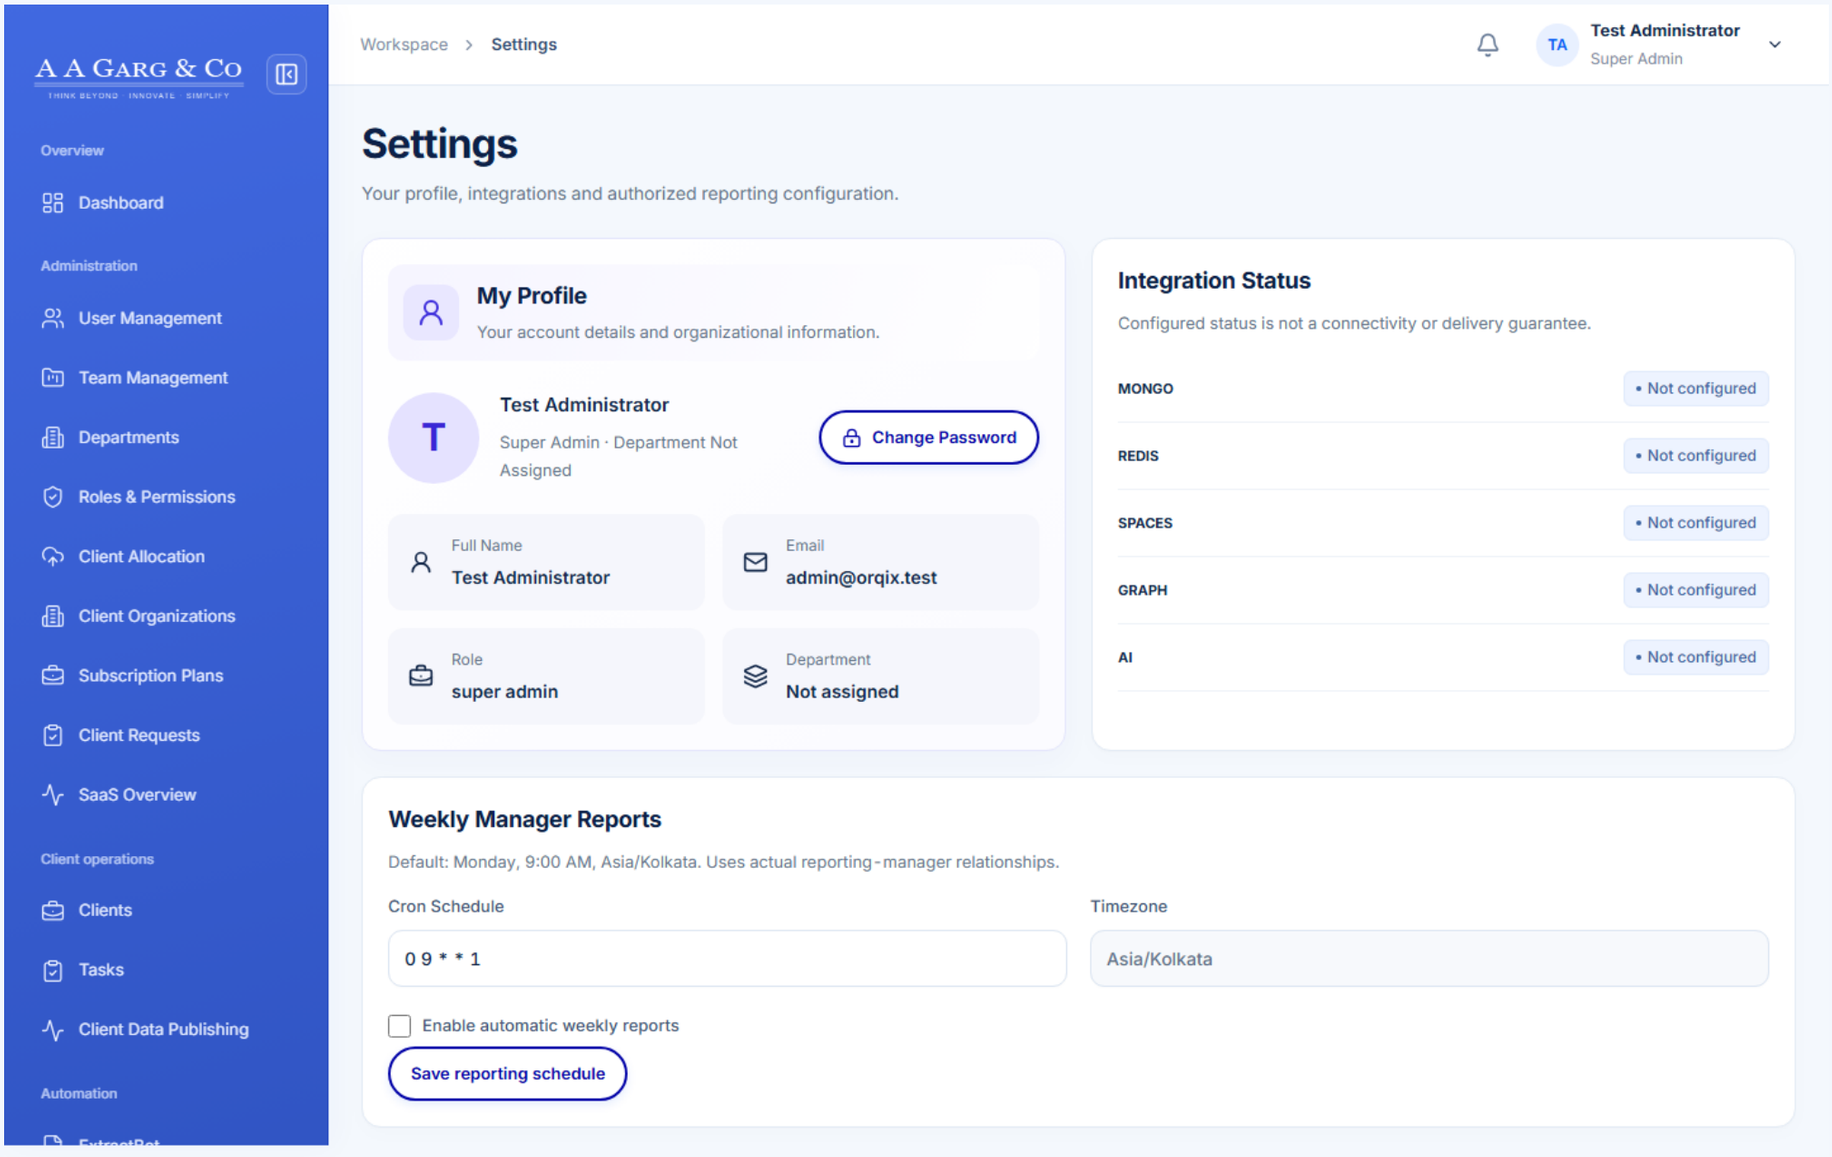

ADMIN

/settings

Profile & Settings

View account identity, role and department; use the password-change flow to maintain account access.

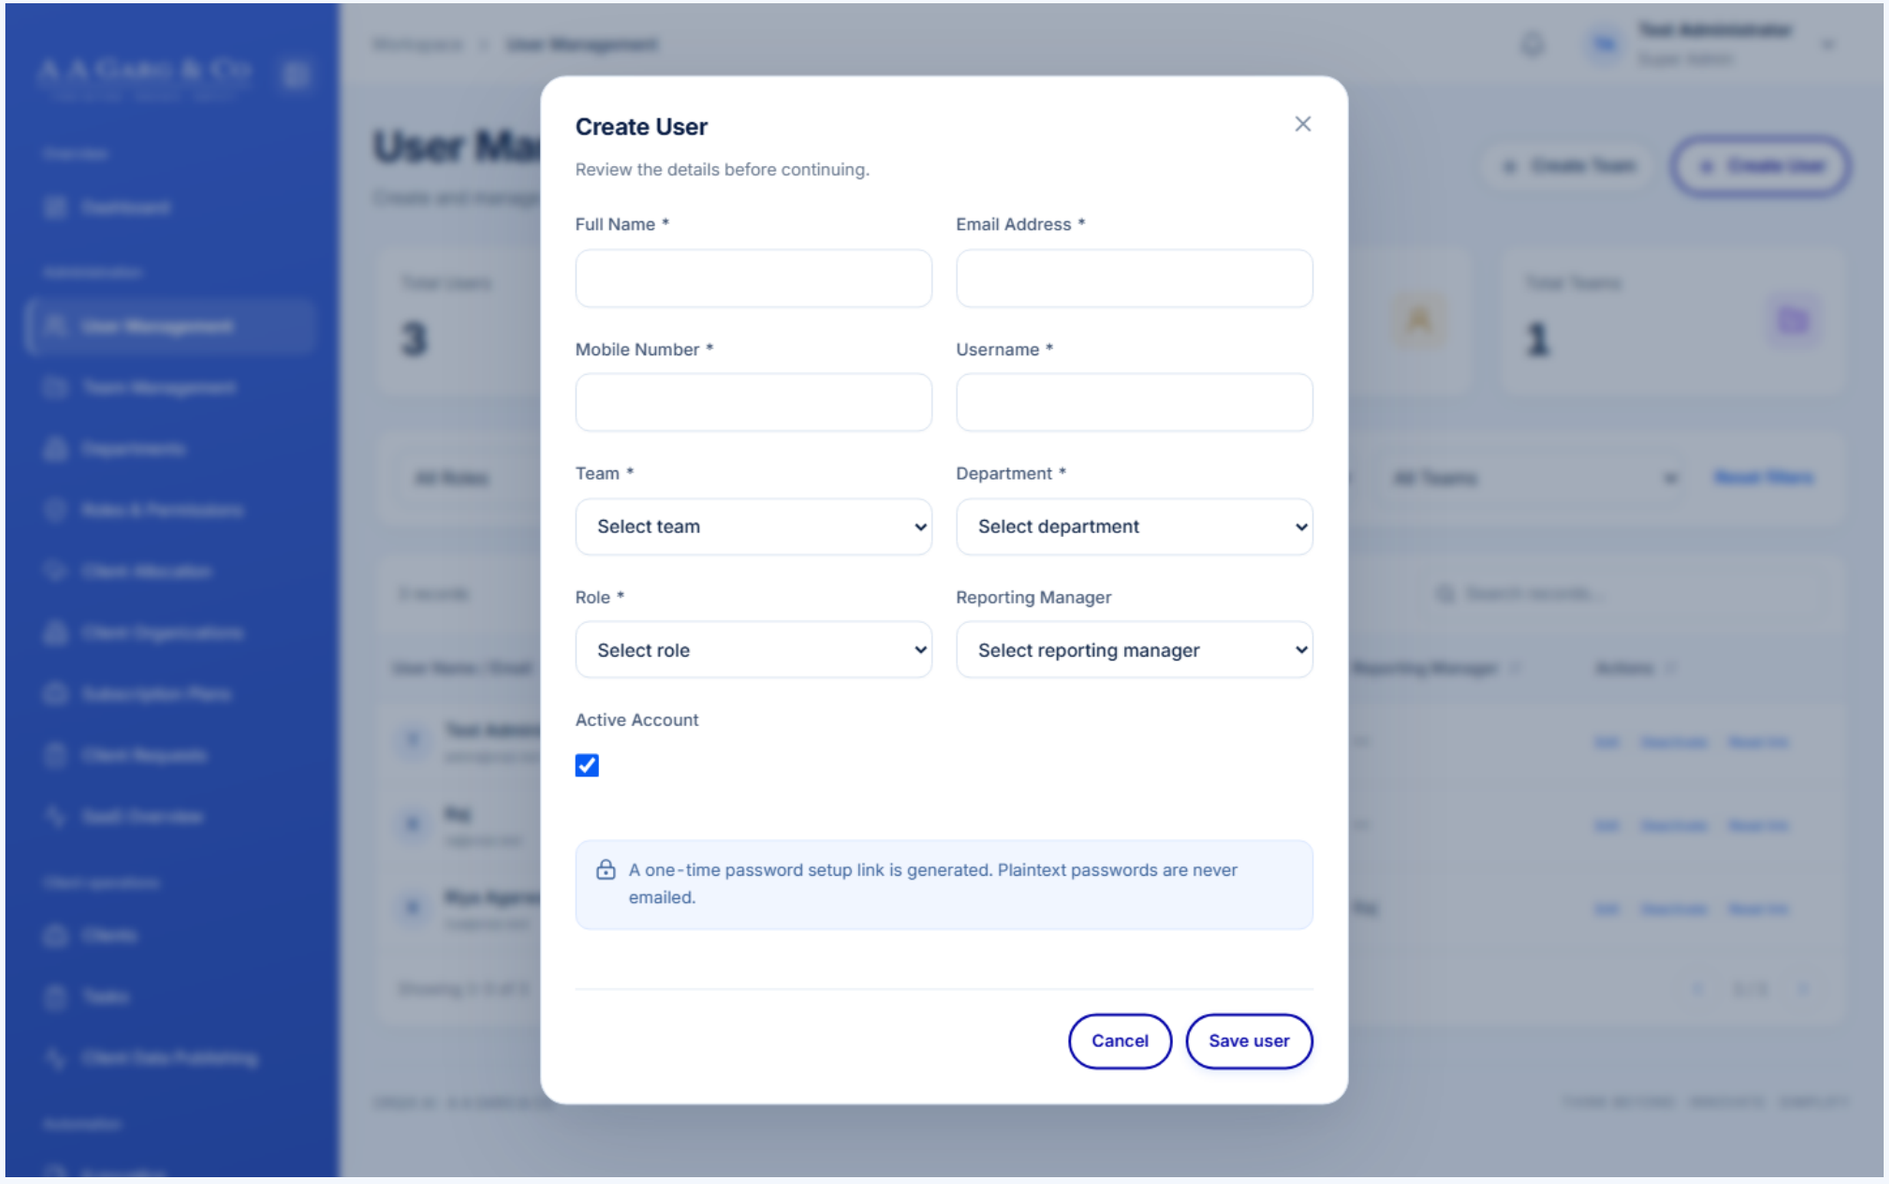

ADMIN FORMS

/admin/users

Create User

Set staff identity, team, department, role and reporting manager. A one-time password setup flow follows creation; passwords are not shared in this guide.

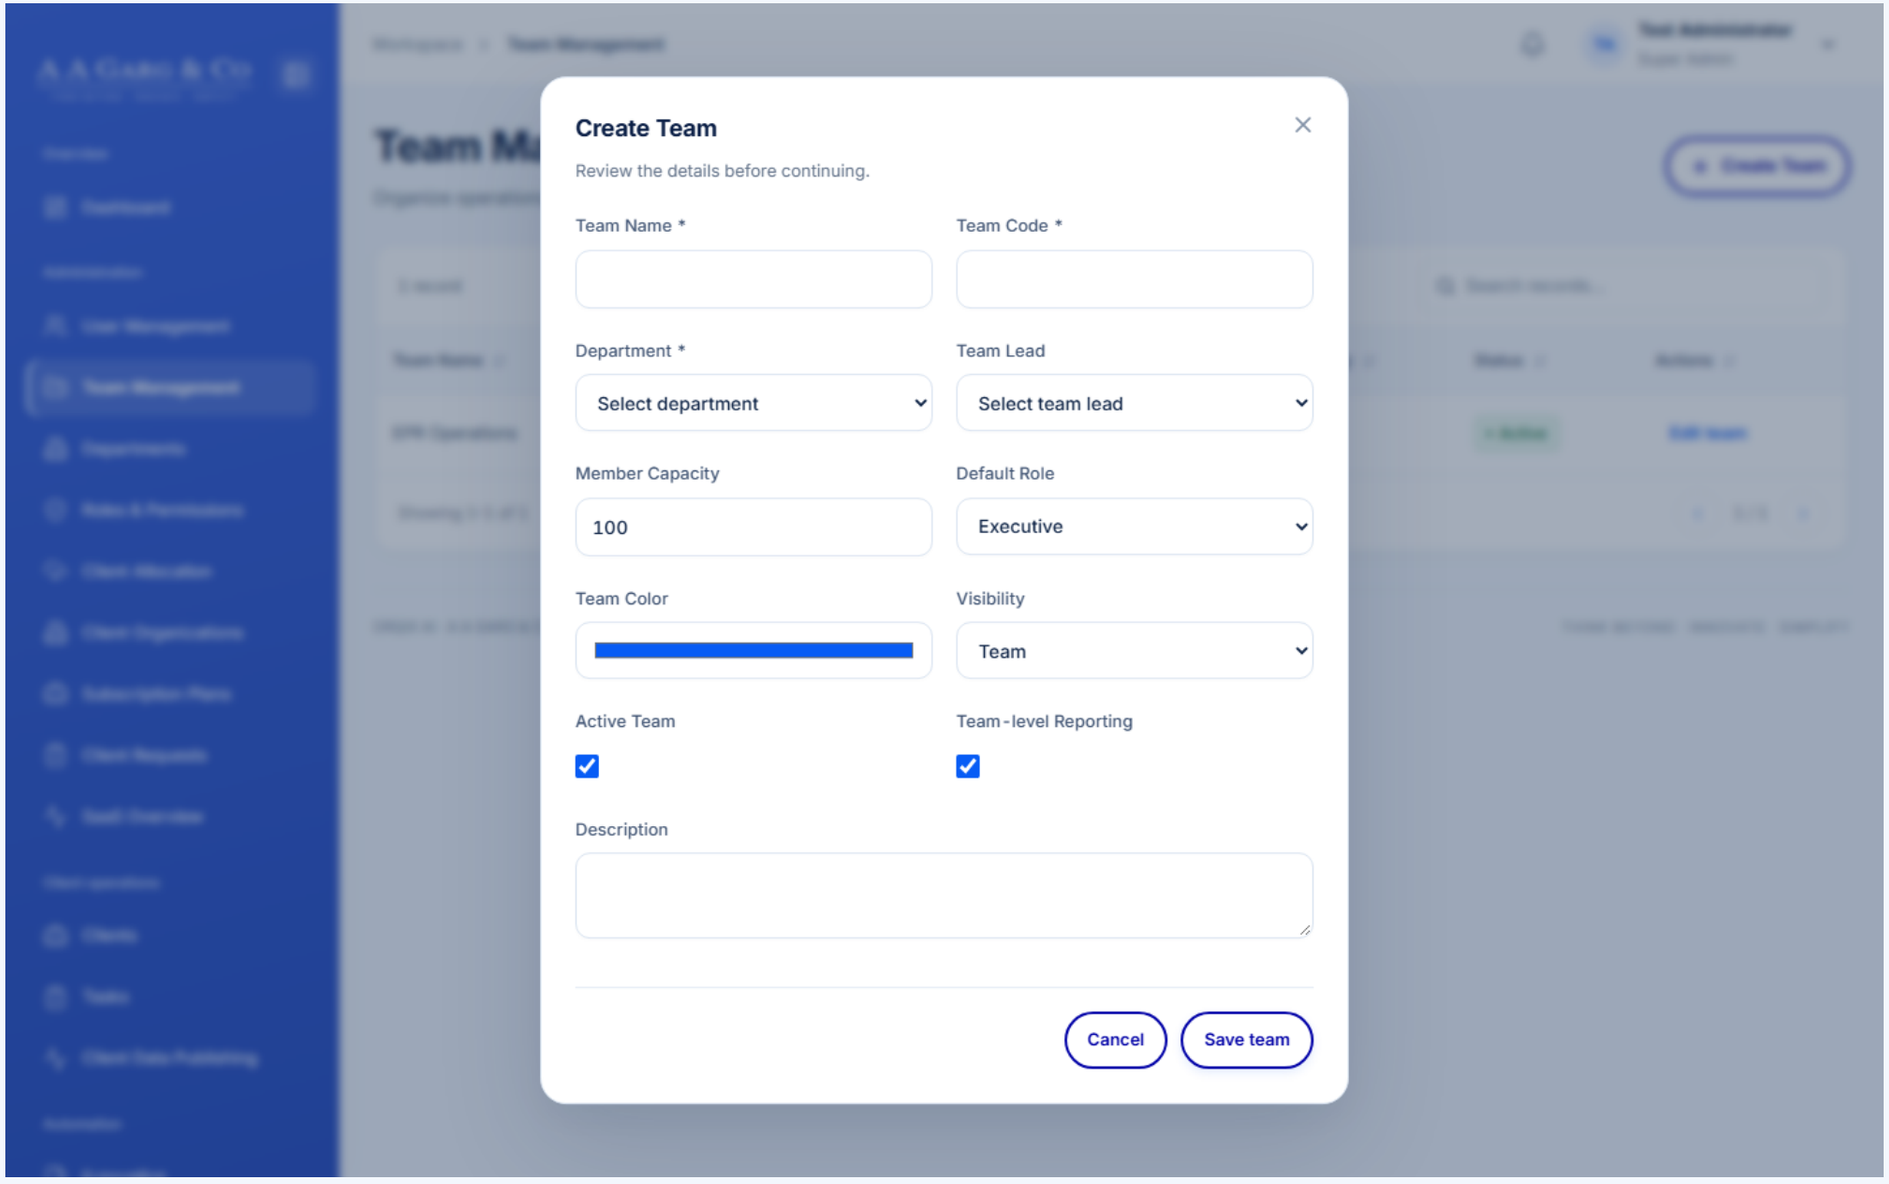

ADMIN FORMS

/admin/teams

Create Team

Define the team code, department, lead and operating settings before assigning employees.

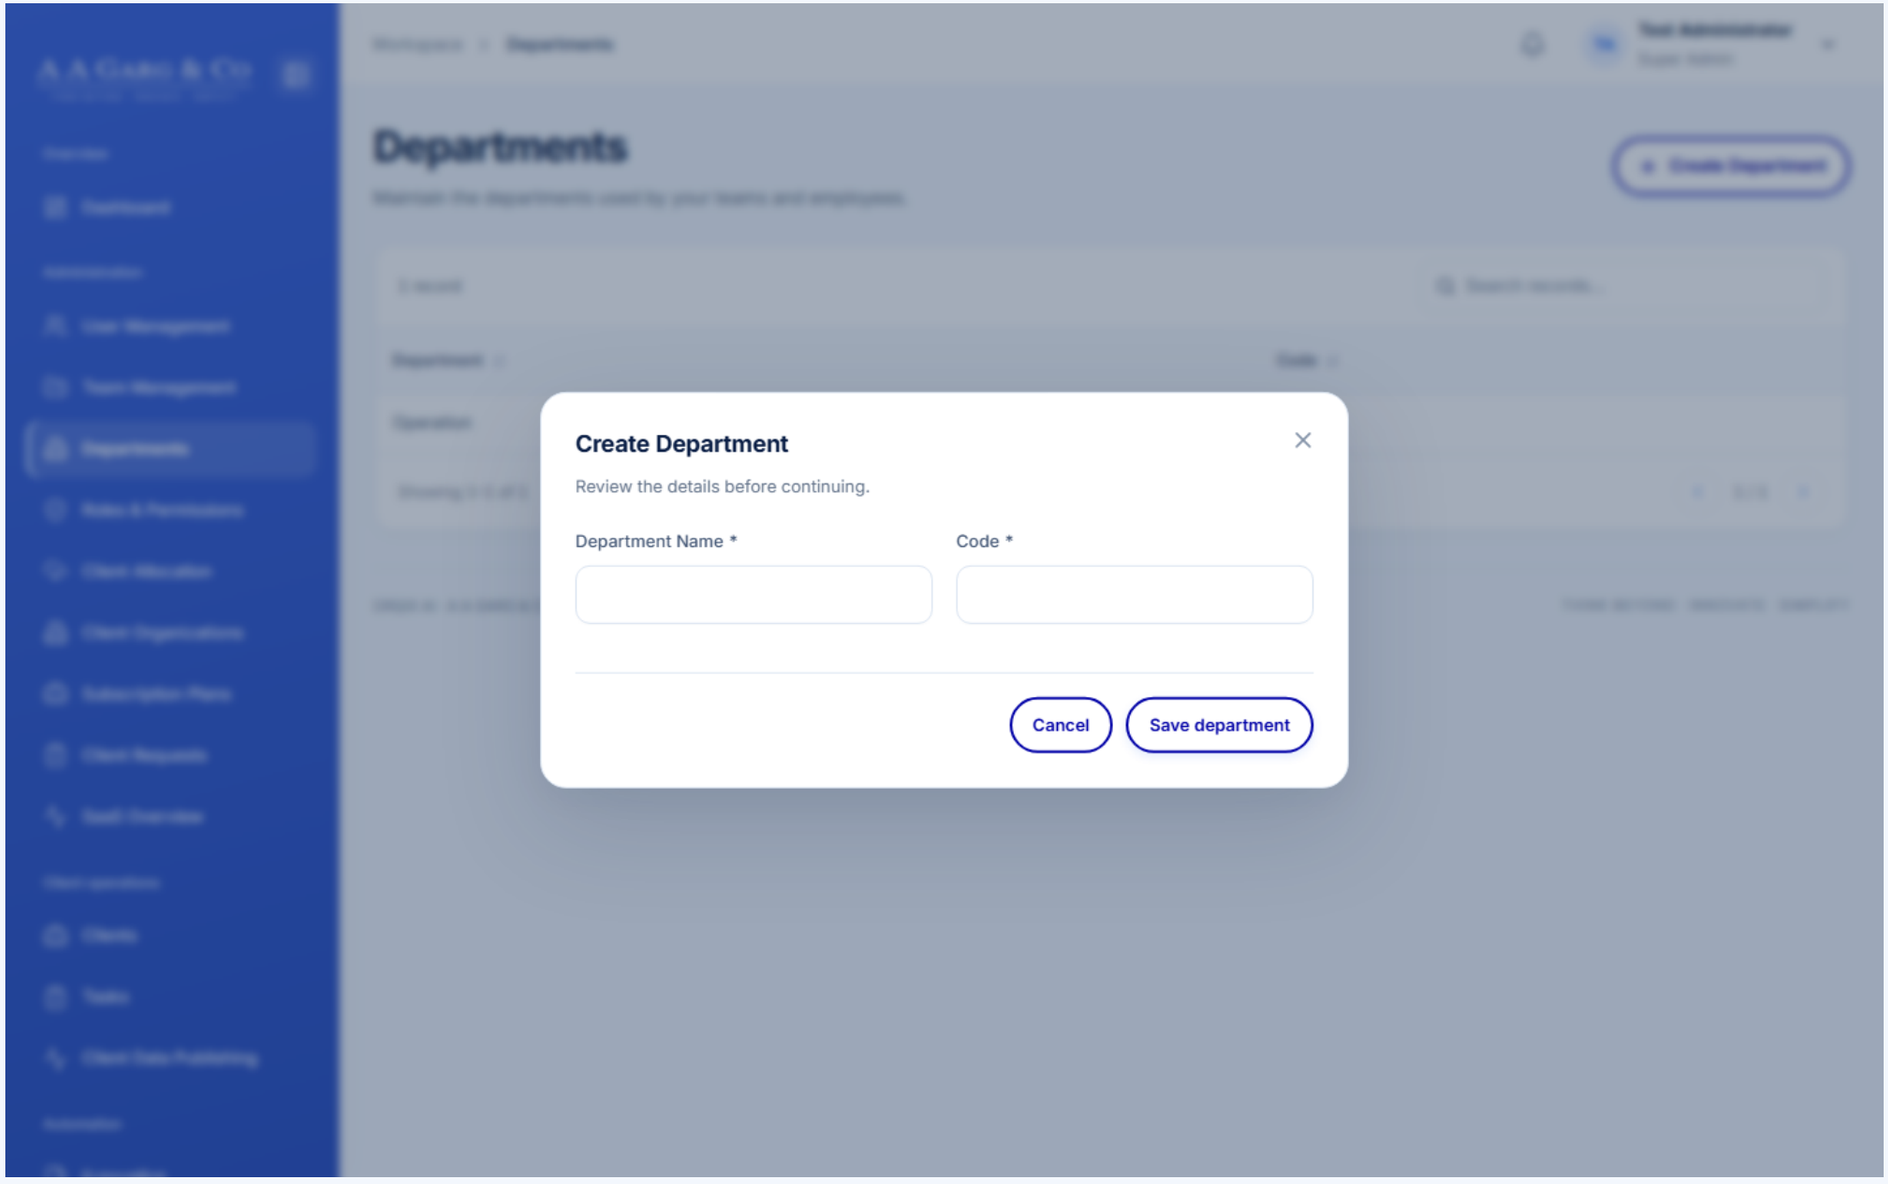

ADMIN FORMS

/admin/departments

Create Department

Maintain reusable department names and codes for user and team records.

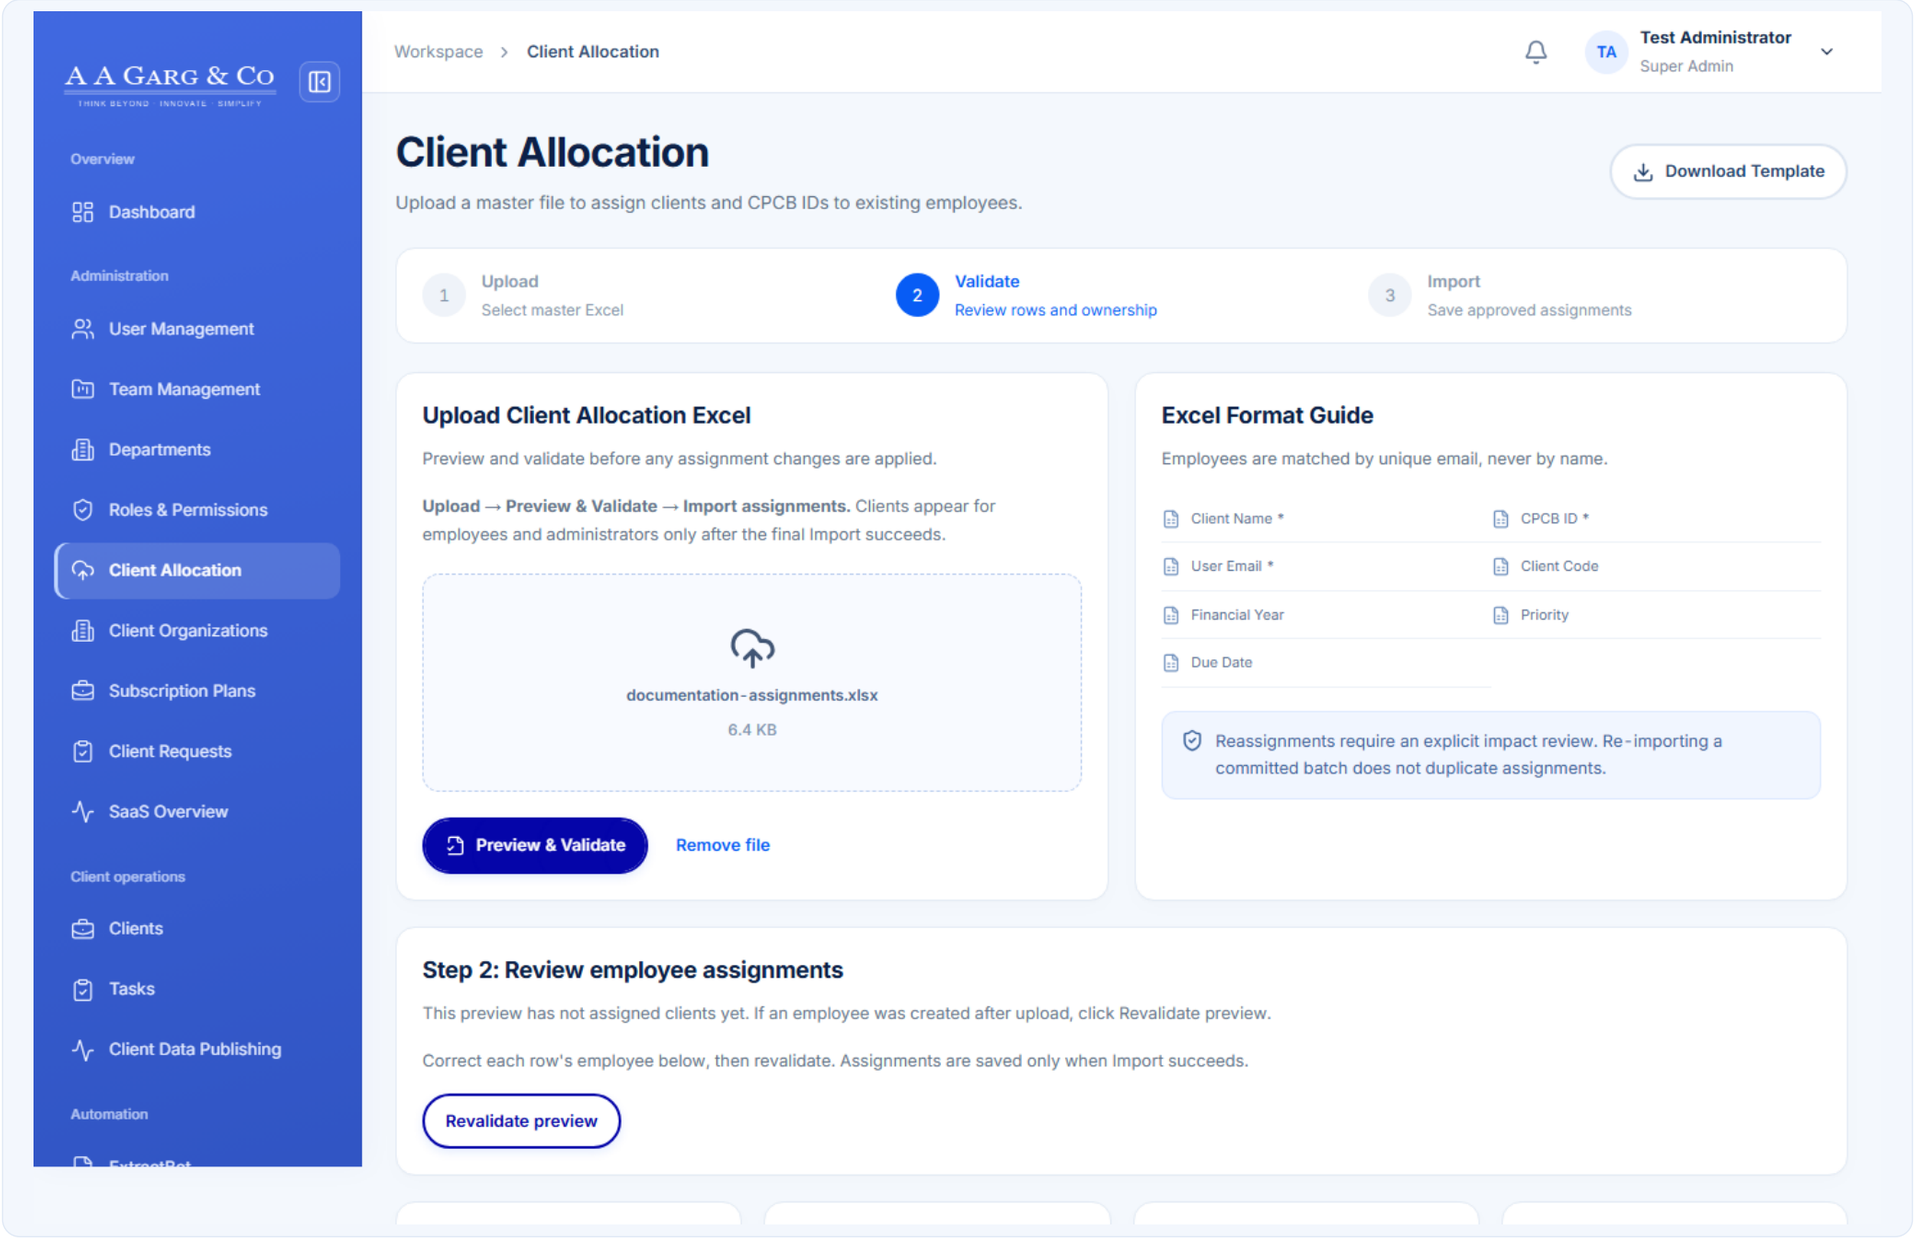

ADMIN FORMS

/admin/client-allocation

Allocation Preview | 1/2

Review parsed assignment rows and employee mappings before import. Re-import behavior protects existing mappings and avoids duplicate assignment records.

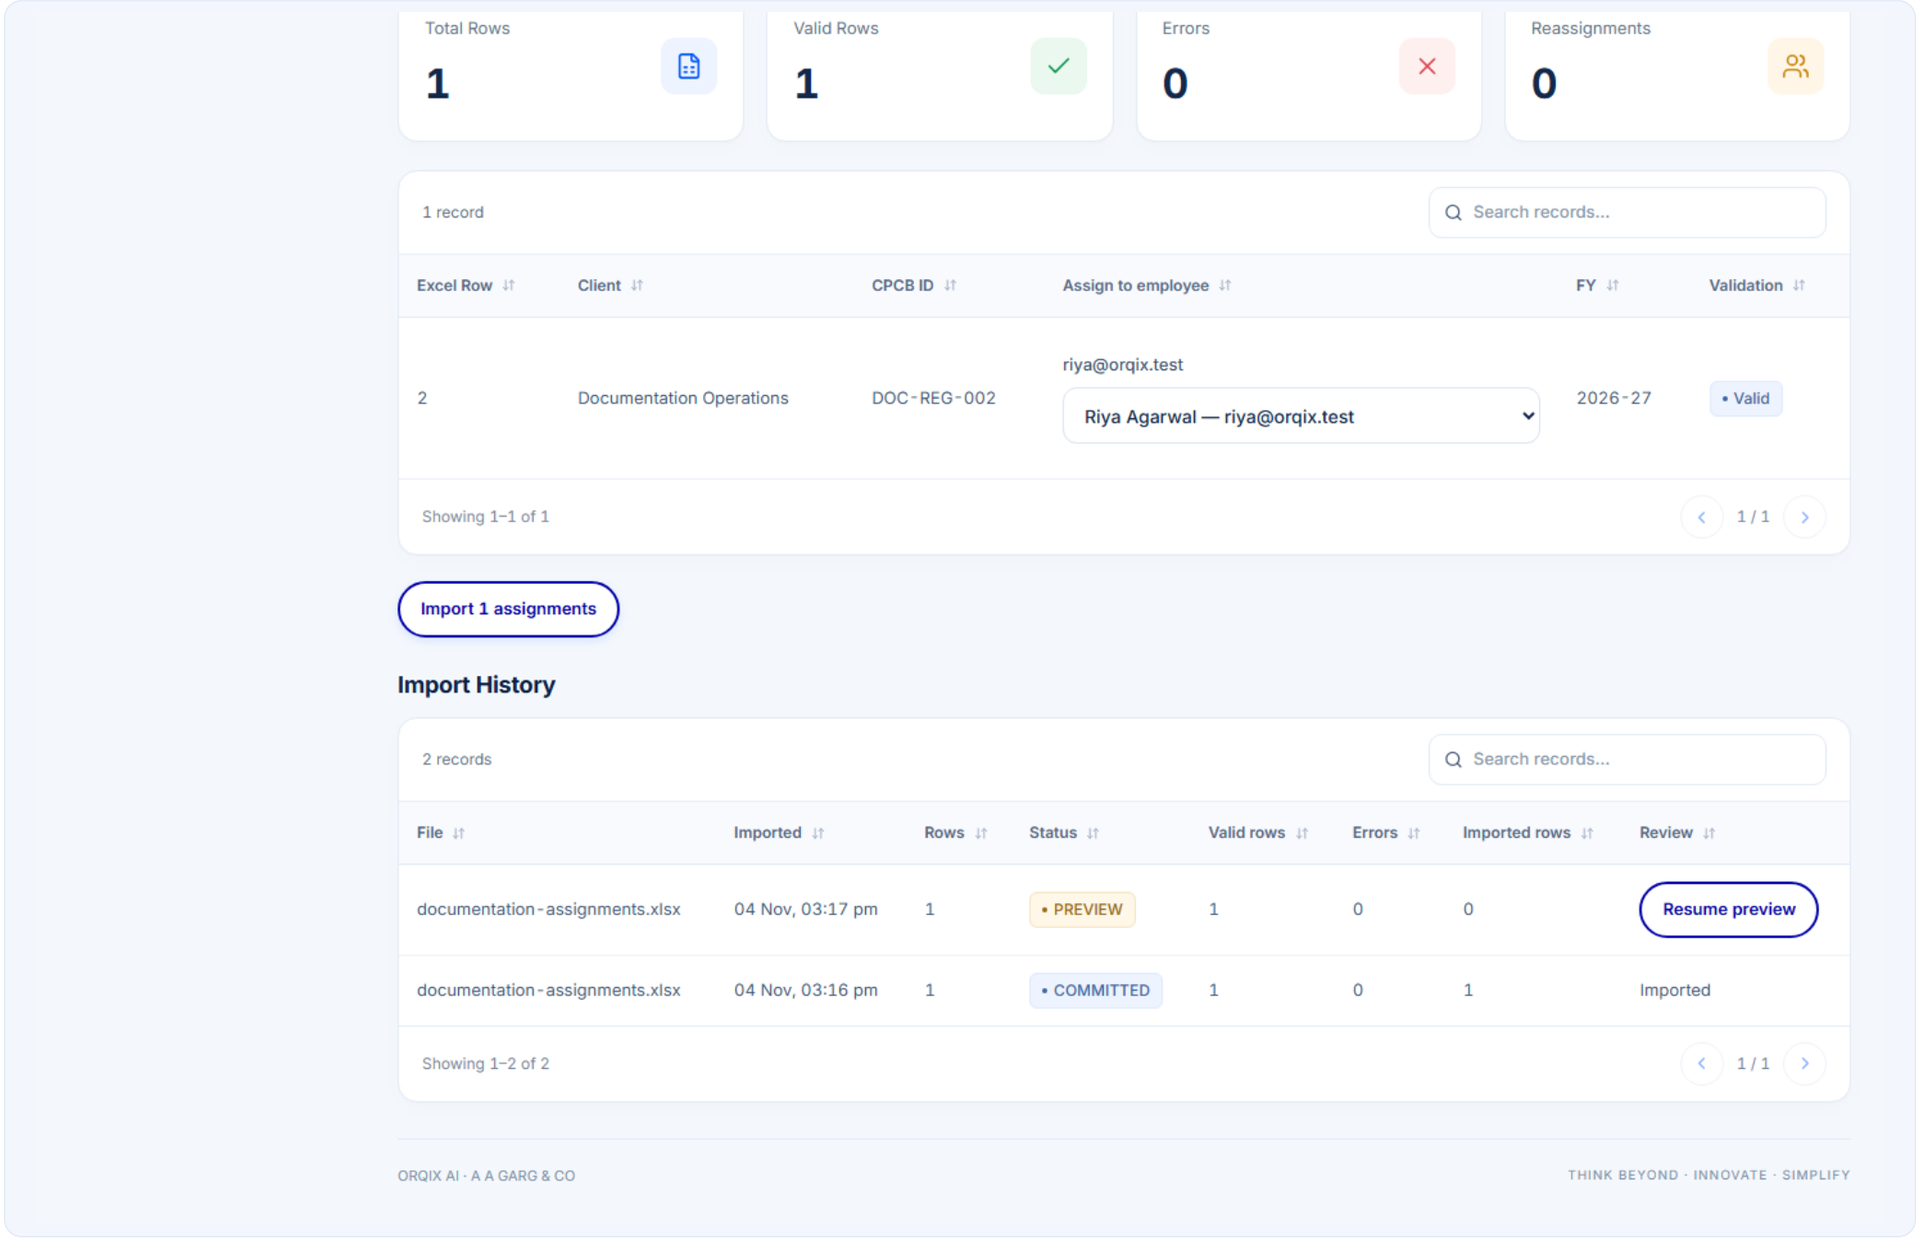

ADMIN FORMS

/admin/client-allocation

Allocation Preview | 2/2

Review parsed assignment rows and employee mappings before import. Re-import behavior protects existing mappings and avoids duplicate assignment records.

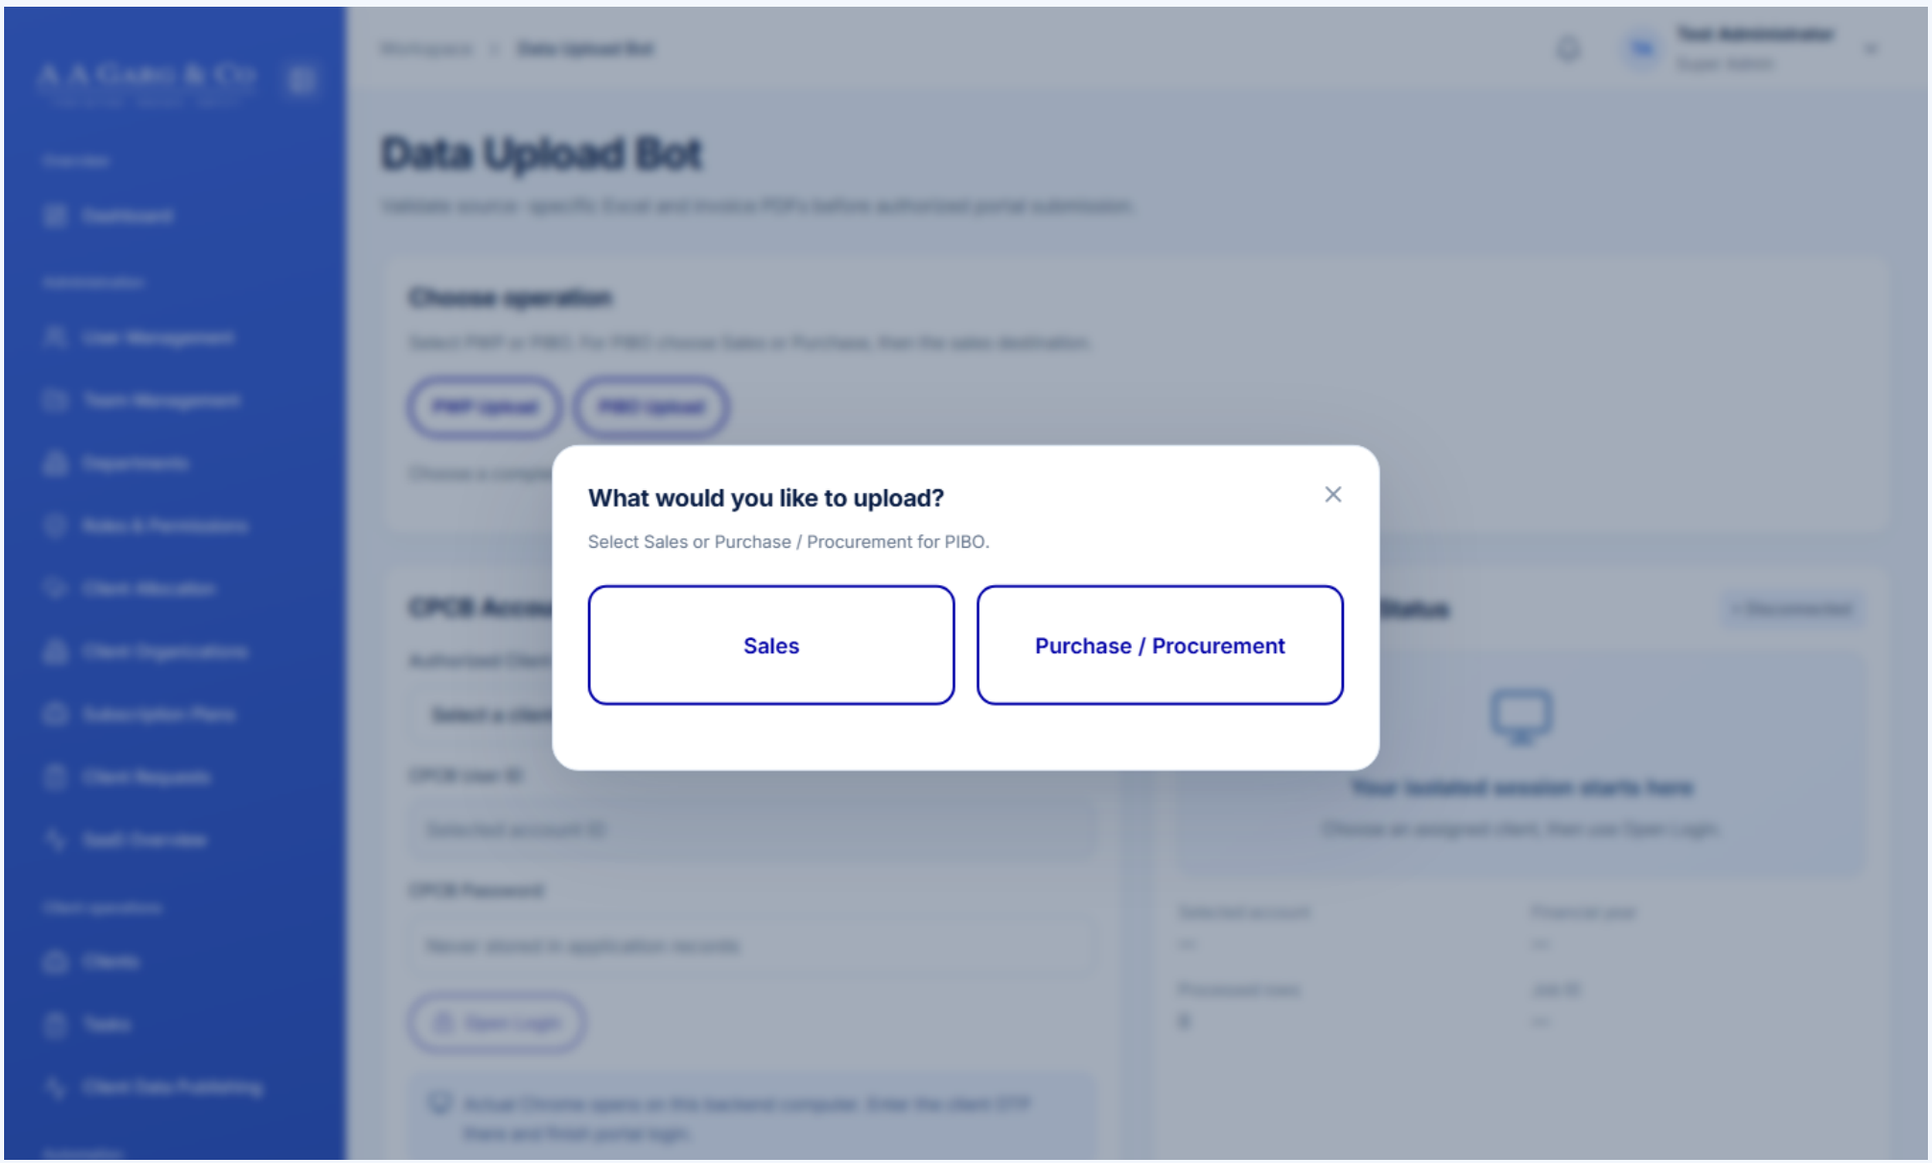

AUTOMATION DETAILS

/bots/upload

PIBO Upload Type | 1/2

The selection dialog separates Sales from Purchase / Procurement; each workflow uses its own schema.

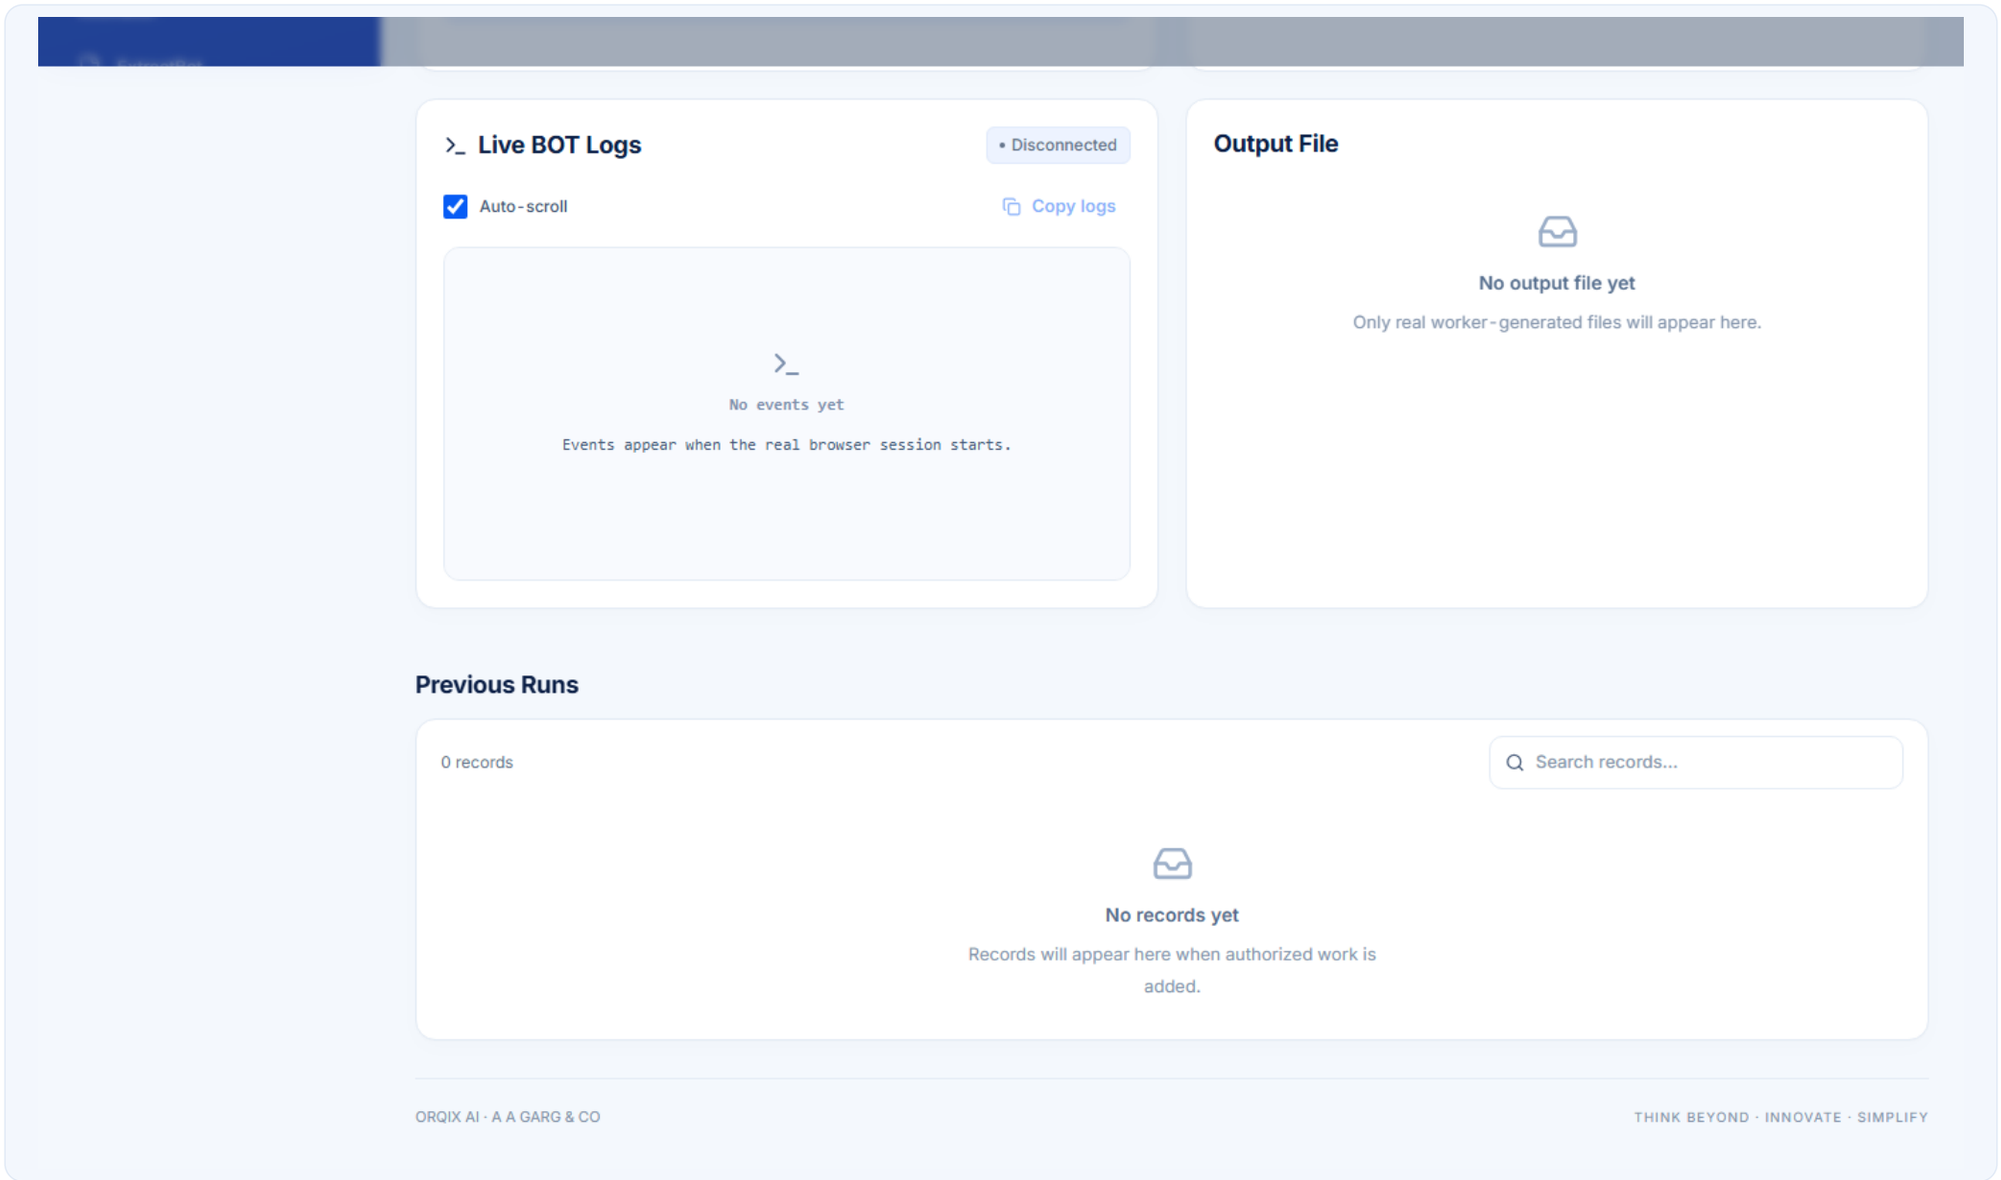

AUTOMATION DETAILS

/bots/upload

PIBO Upload Type | 2/2

The selection dialog separates Sales from Purchase / Procurement; each workflow uses its own schema.

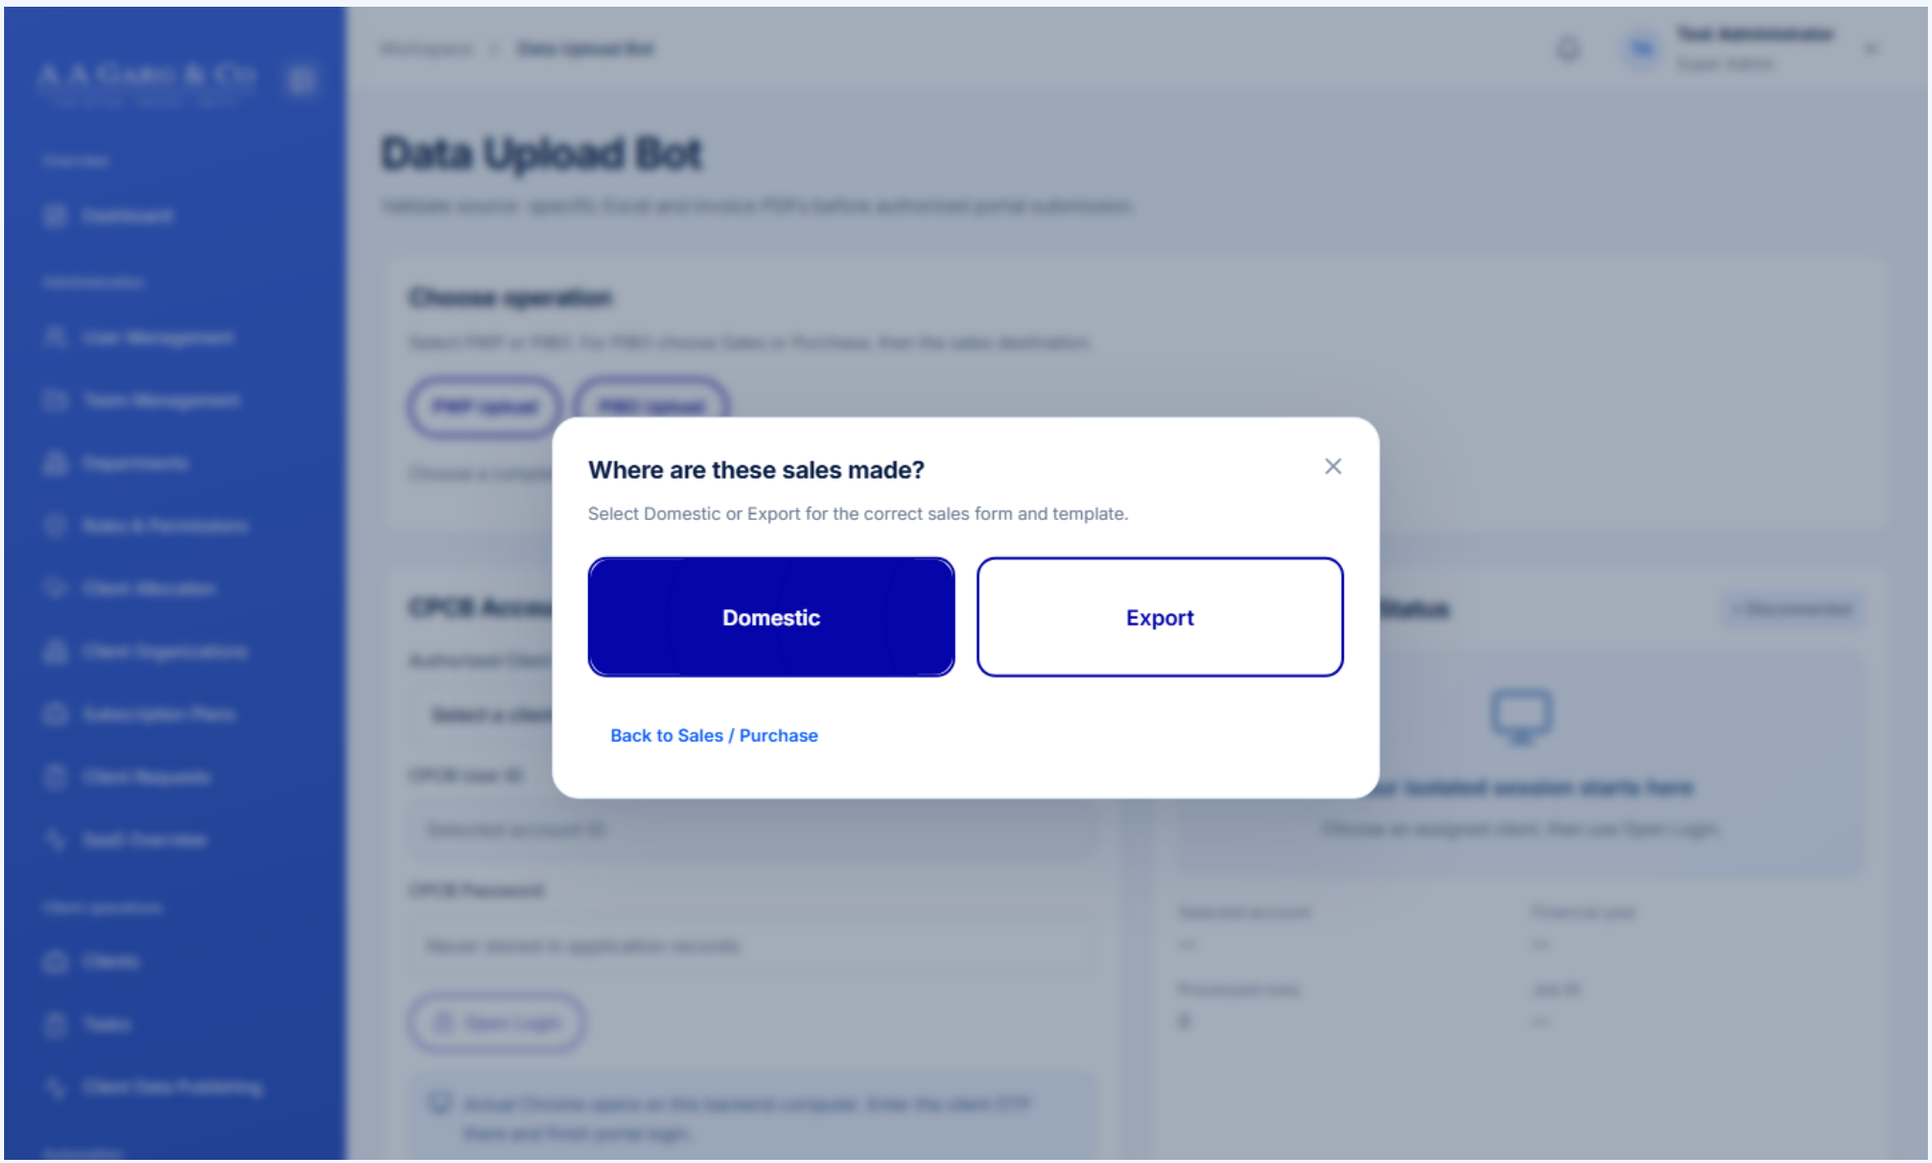

AUTOMATION DETAILS

/bots/upload

PIBO Sales Destination | 1/2

Select Domestic or Export before choosing the corresponding source files.

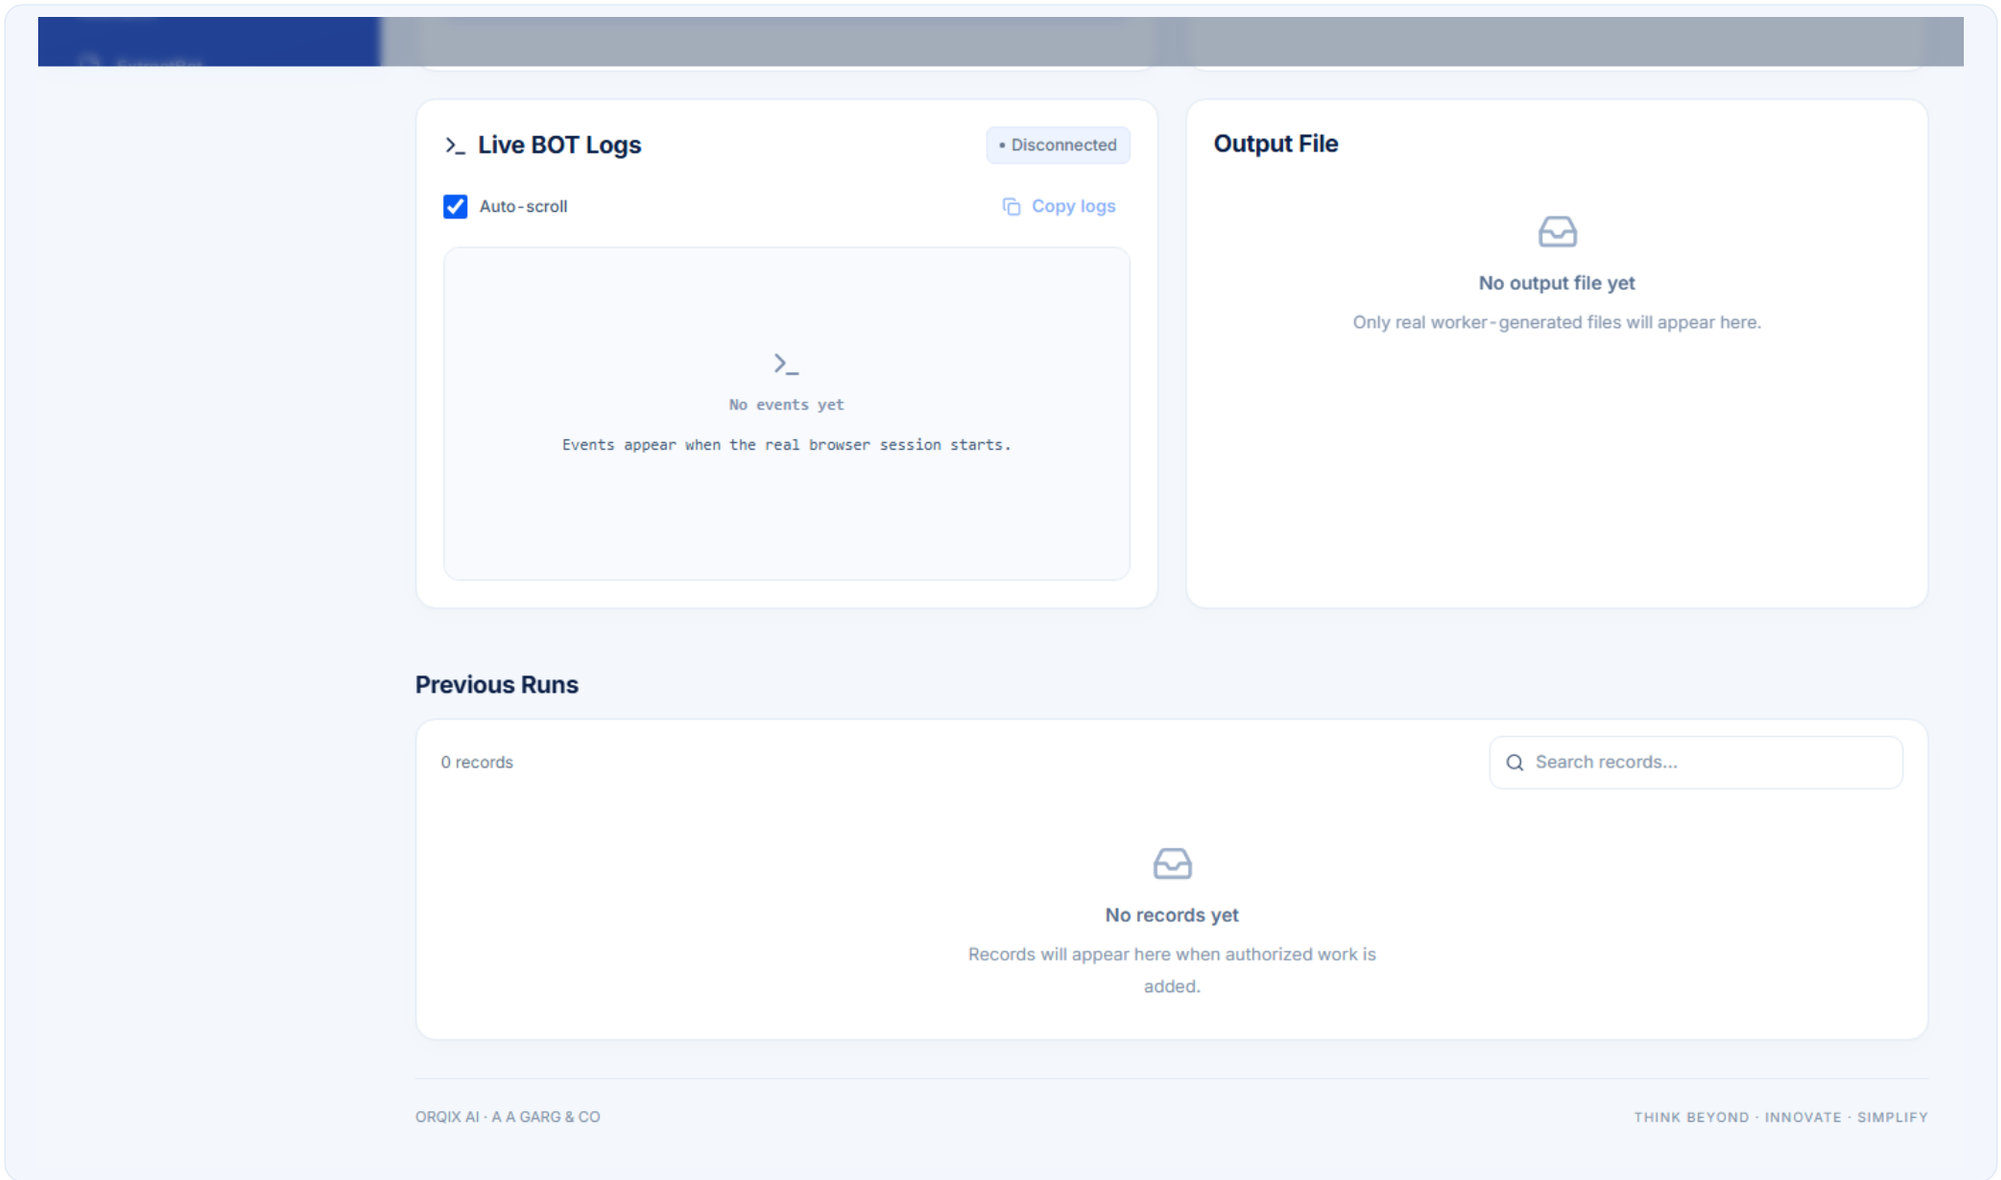

AUTOMATION DETAILS

/bots/upload

PIBO Sales Destination | 2/2

Select Domestic or Export before choosing the corresponding source files.

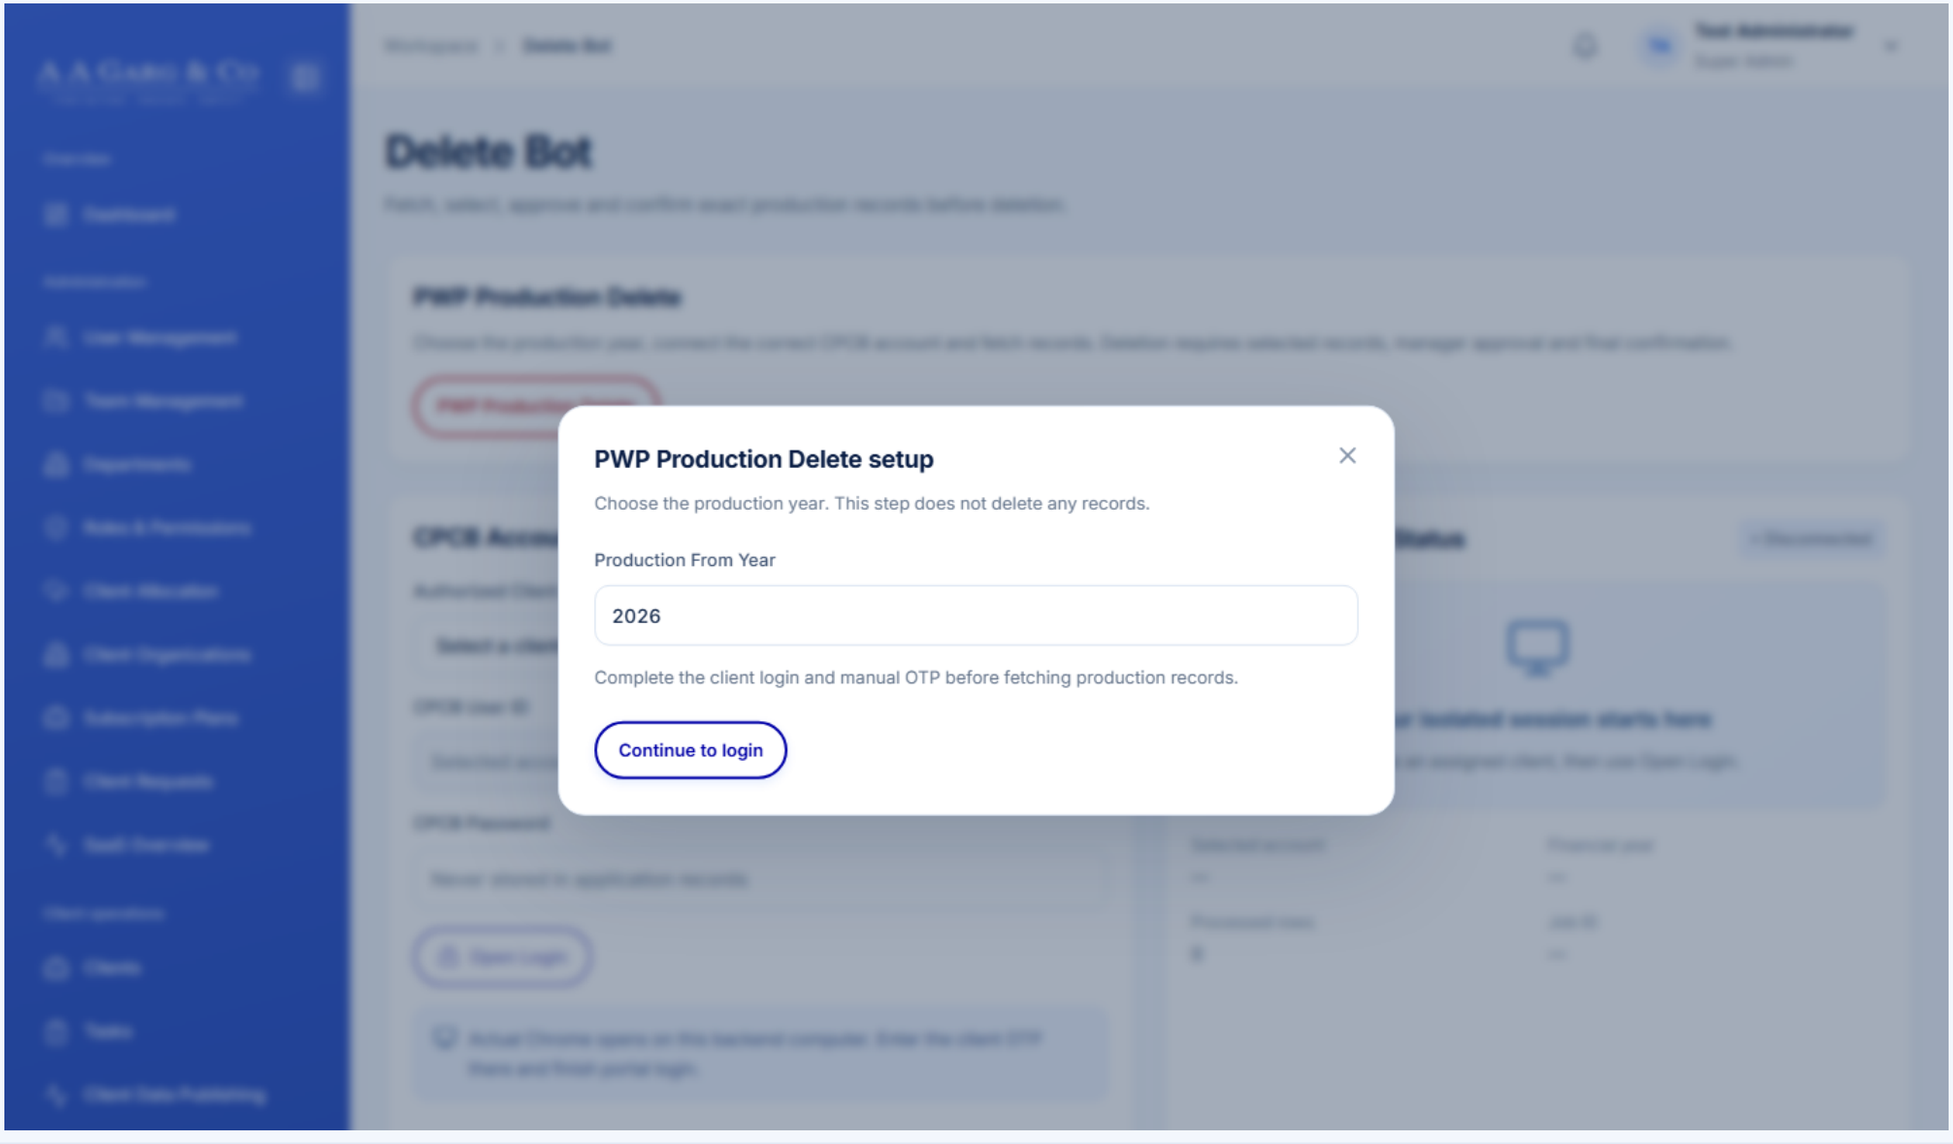

AUTOMATION DETAILS

/bots/delete

Delete Bot Setup | 1/2

Choose the supported production year before logging into the scoped portal session. This screenshot does not execute a portal deletion.

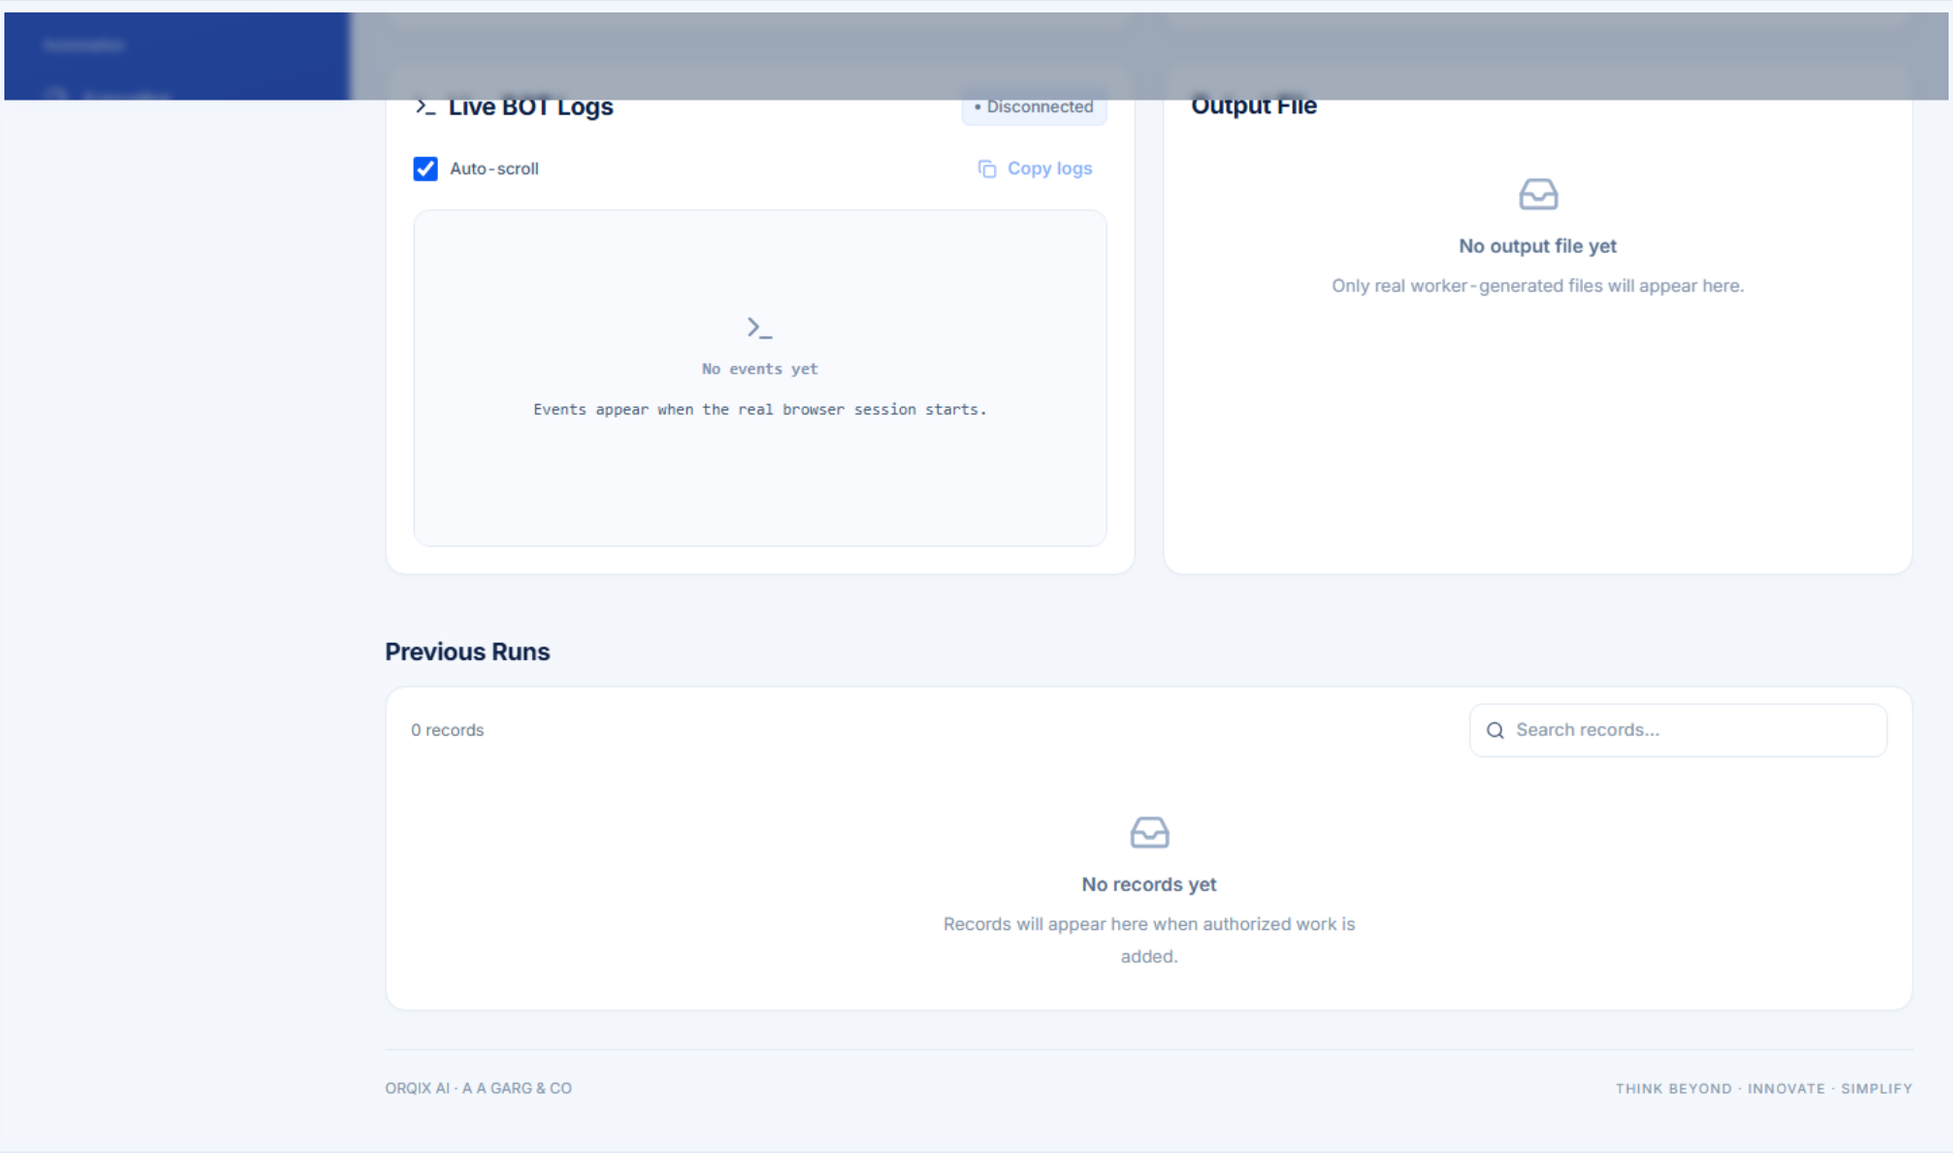

AUTOMATION DETAILS

/bots/delete

Delete Bot Setup | 2/2

Choose the supported production year before logging into the scoped portal session. This screenshot does not execute a portal deletion.

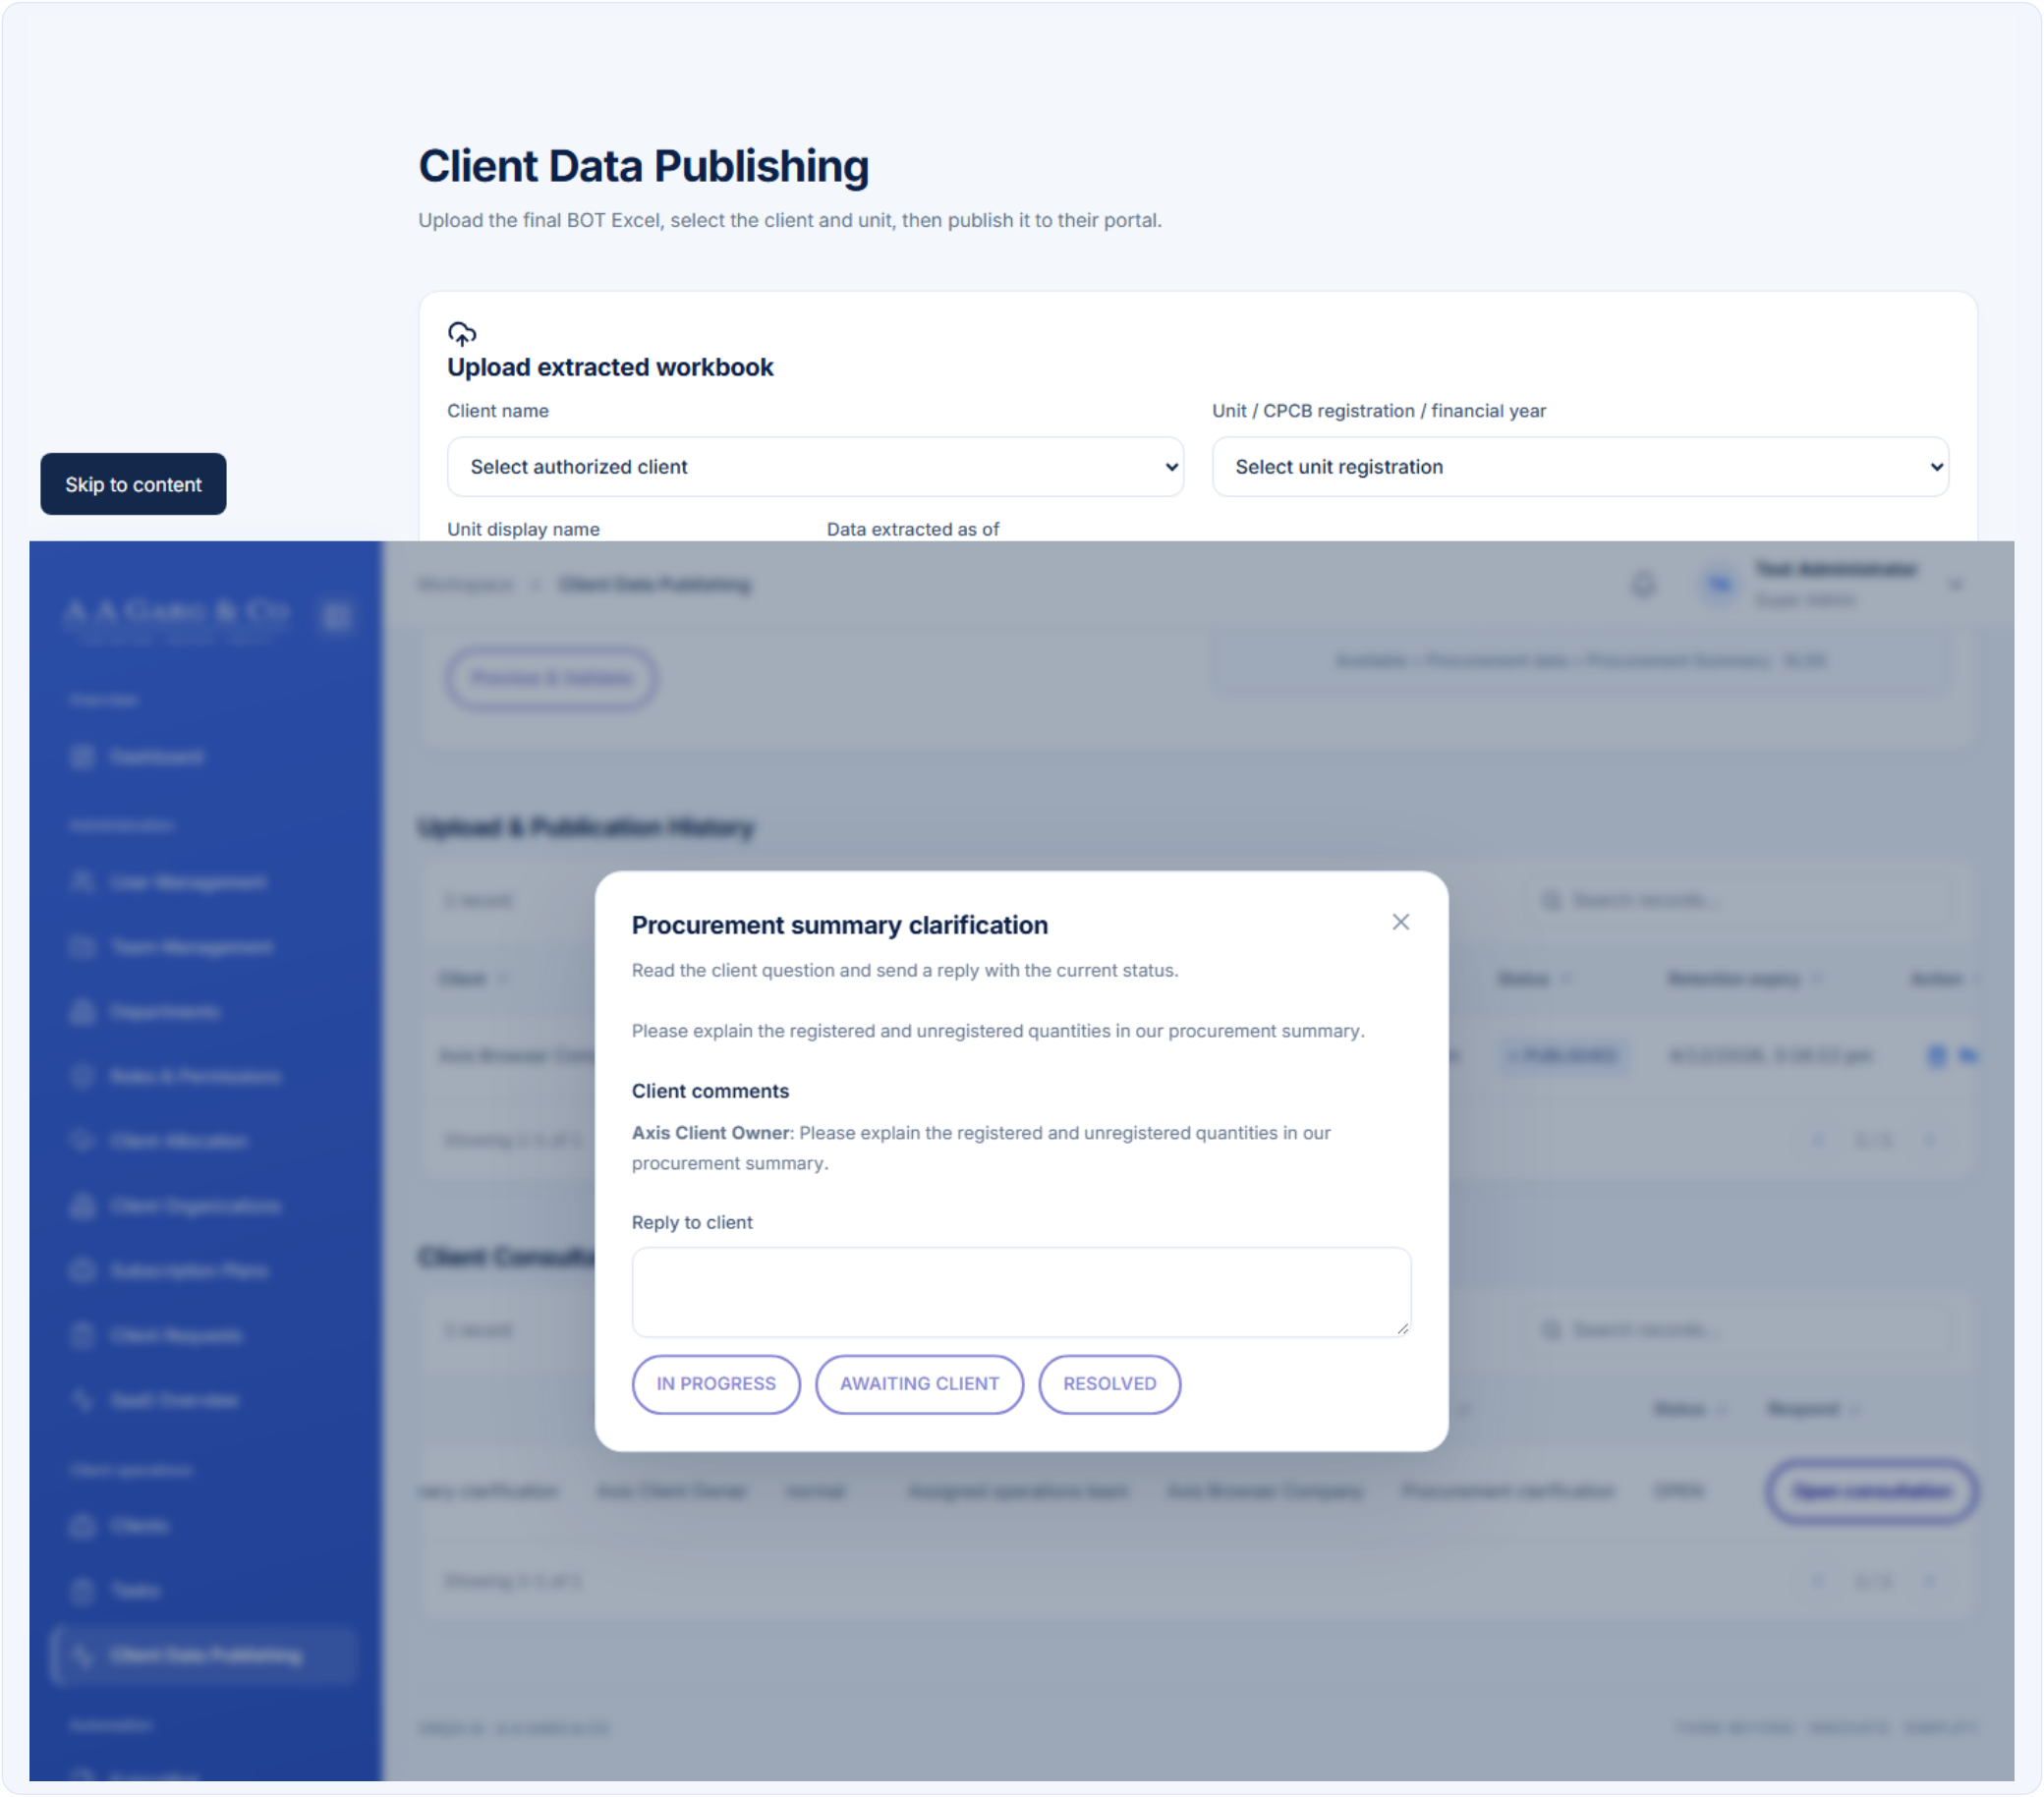

CLIENT OPERATIONS

/axis-dashboard

Consultation Reply

Read the client topic and question, then reply with In Progress, Awaiting Client or Resolved. Replies appear in the same client-side consultation thread.

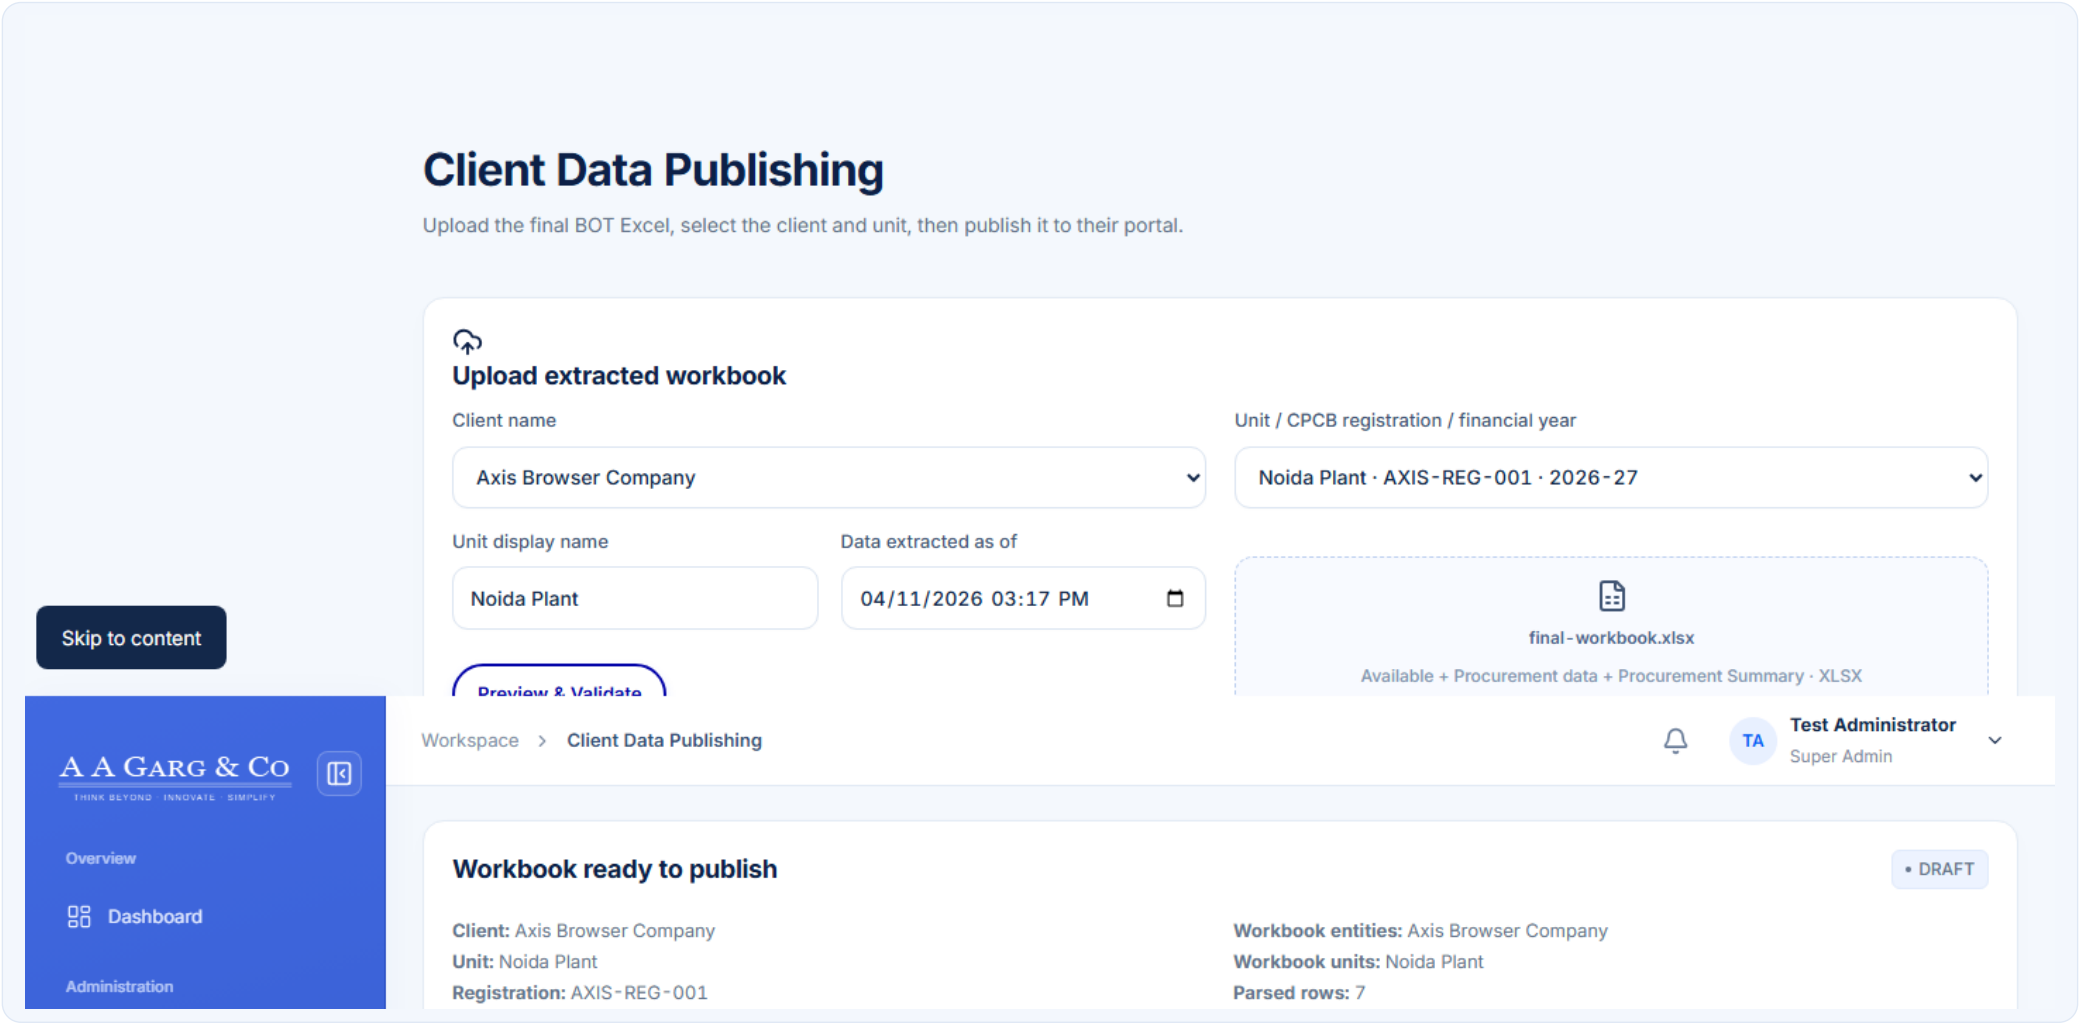

CLIENT OPERATIONS

/axis-dashboard

Workbook Preview & Publish | 1/3

The final workbook is ready for direct publication after parsing. Select retention and publish; no separate manager approval or review-note checkbox is required.

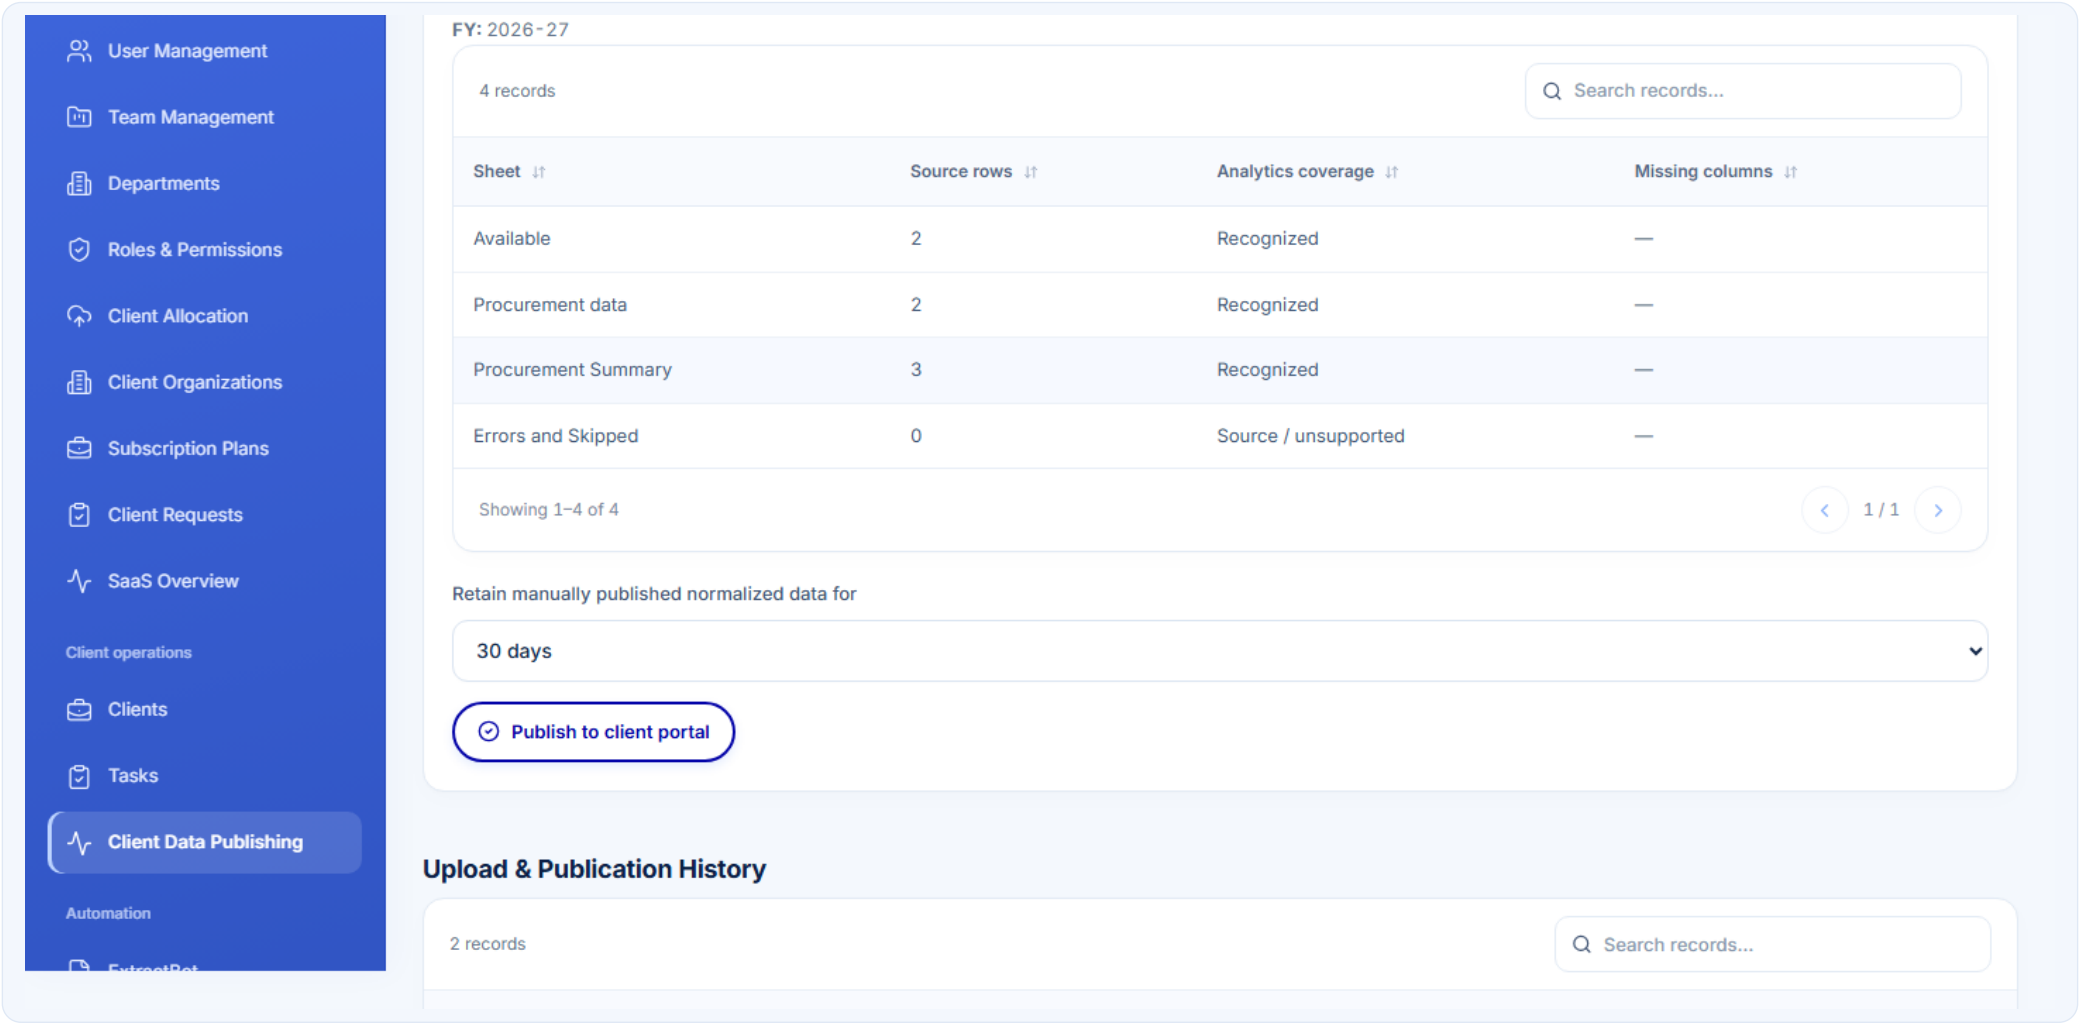

CLIENT OPERATIONS

/axis-dashboard

Workbook Preview & Publish | 2/3

The final workbook is ready for direct publication after parsing. Select retention and publish; no separate manager approval or review-note checkbox is required.

CLIENT OPERATIONS

/axis-dashboard

Workbook Preview & Publish | 3/3

The final workbook is ready for direct publication after parsing. Select retention and publish; no separate manager approval or review-note checkbox is required.

View account identity, role and department; use the password-change flow to maintain account access.

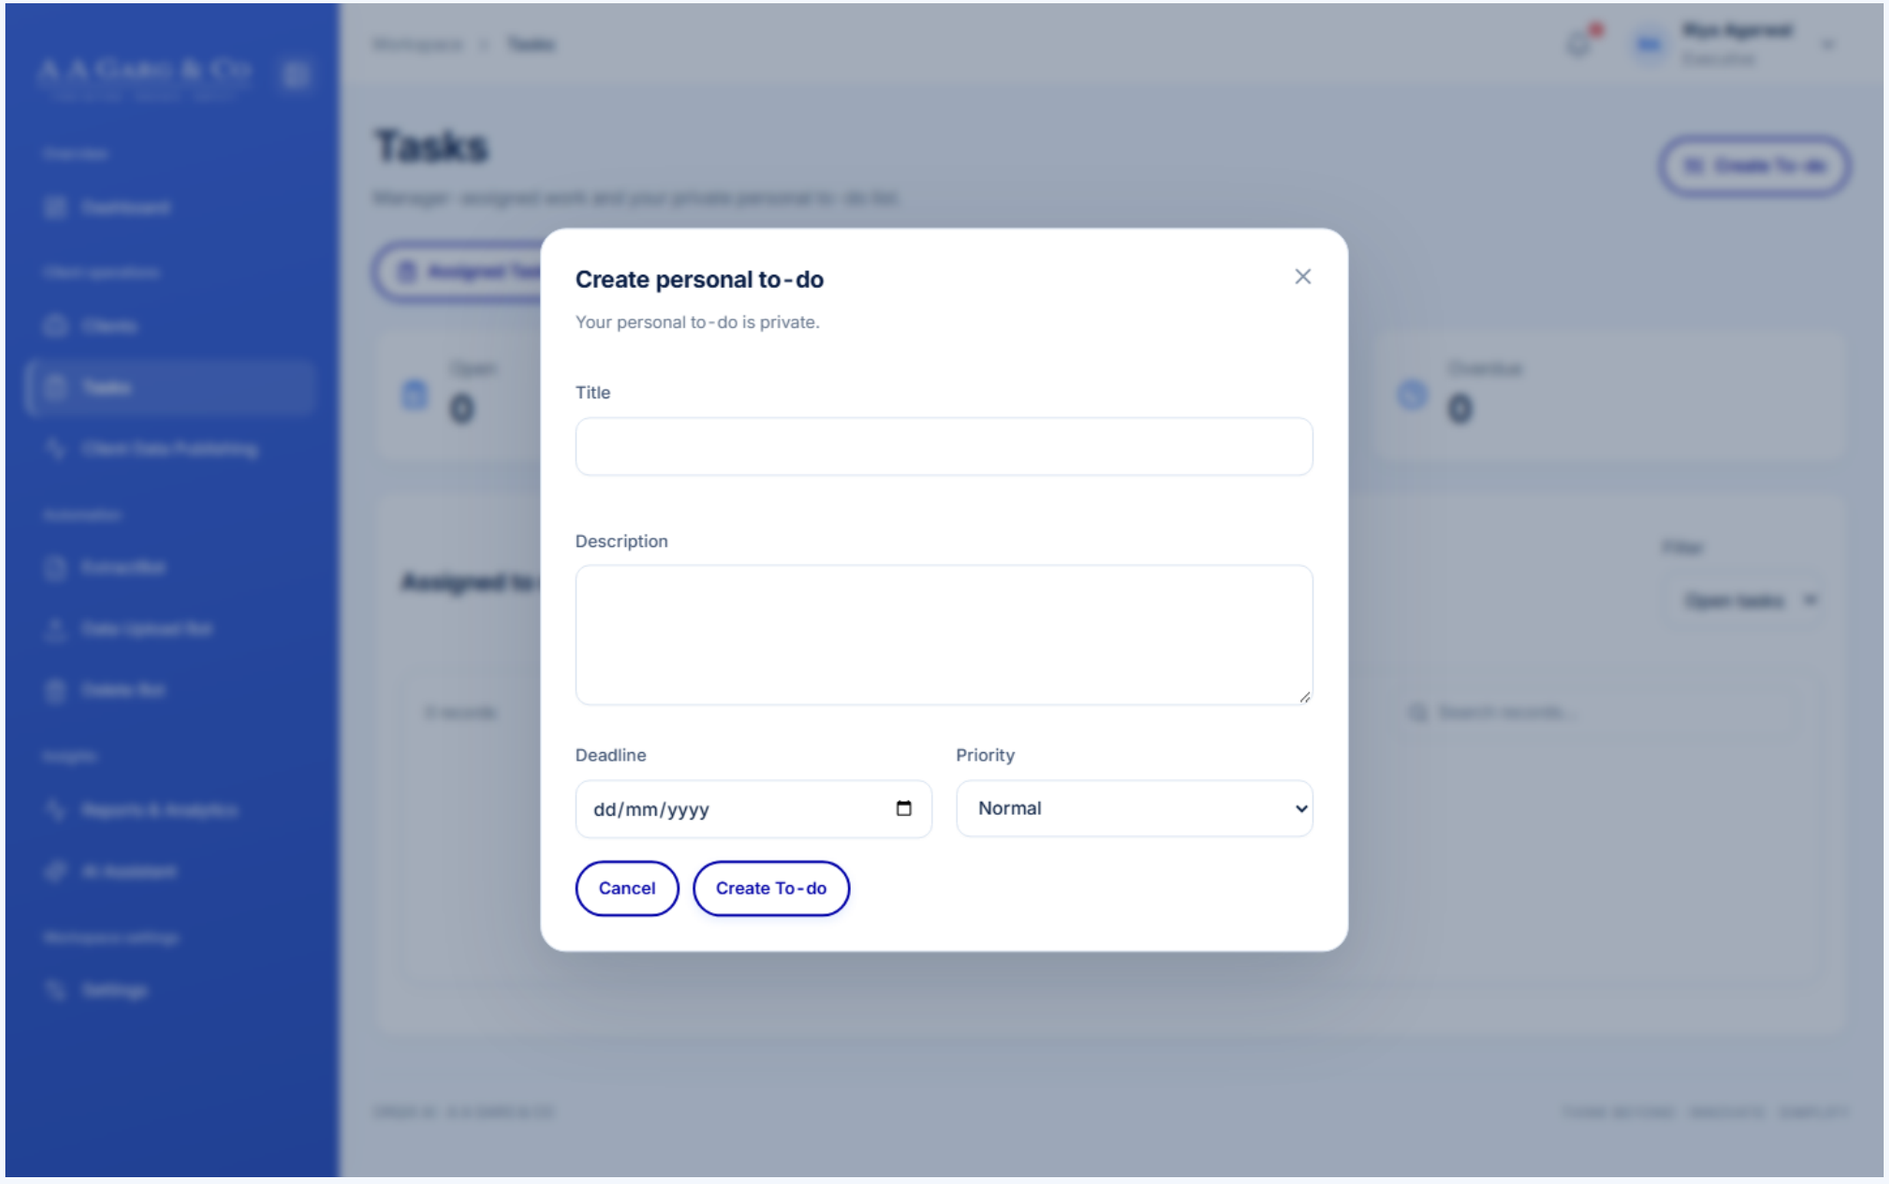

INTERNAL USER

/tasks

Create Personal To-do

Employees can create personal reminders and track their own task status independently of manager-assigned work.

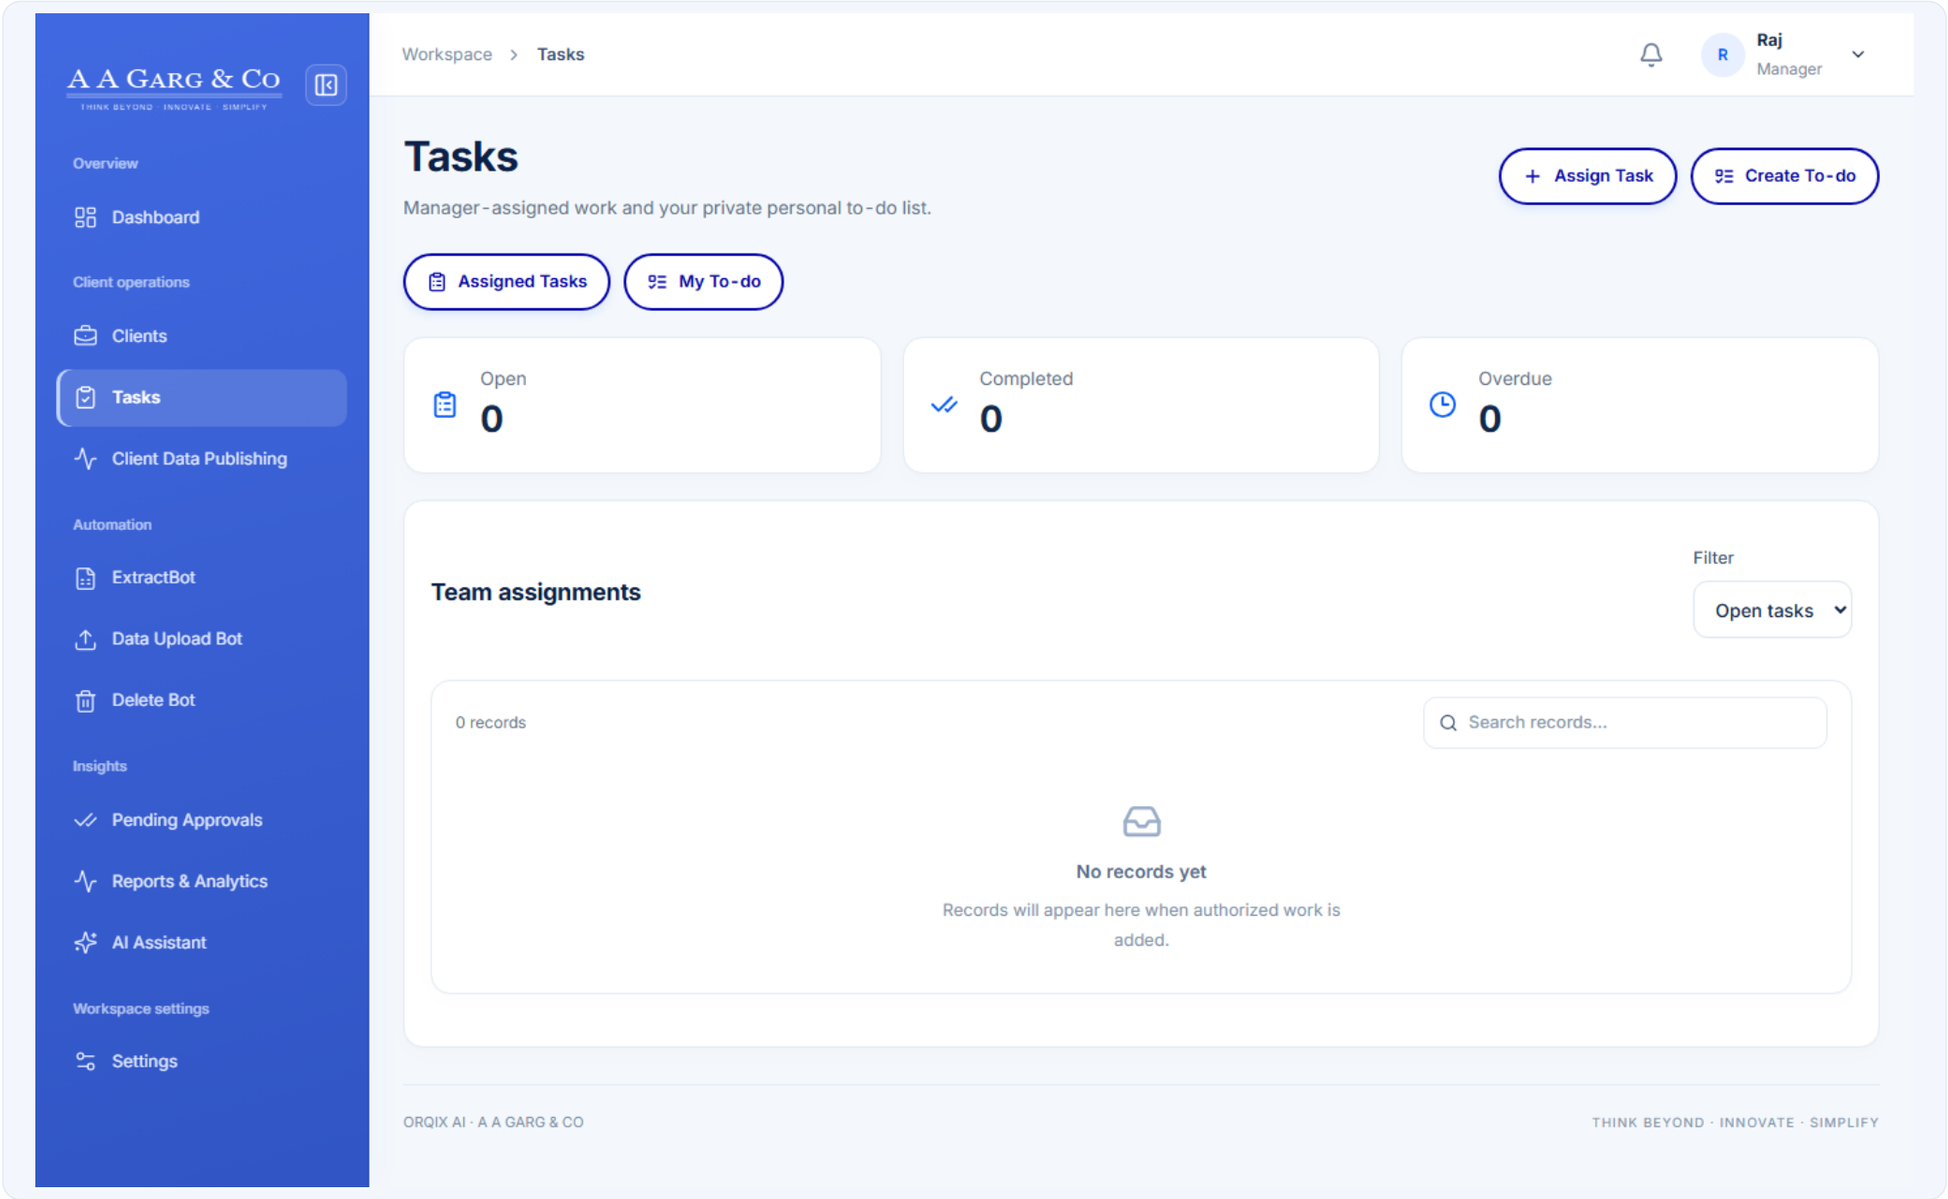

MANAGER

/tasks

Manager Tasks

The manager can assign tasks to authorized employees with a deadline and follow progress. Personal to-dos remain separate.

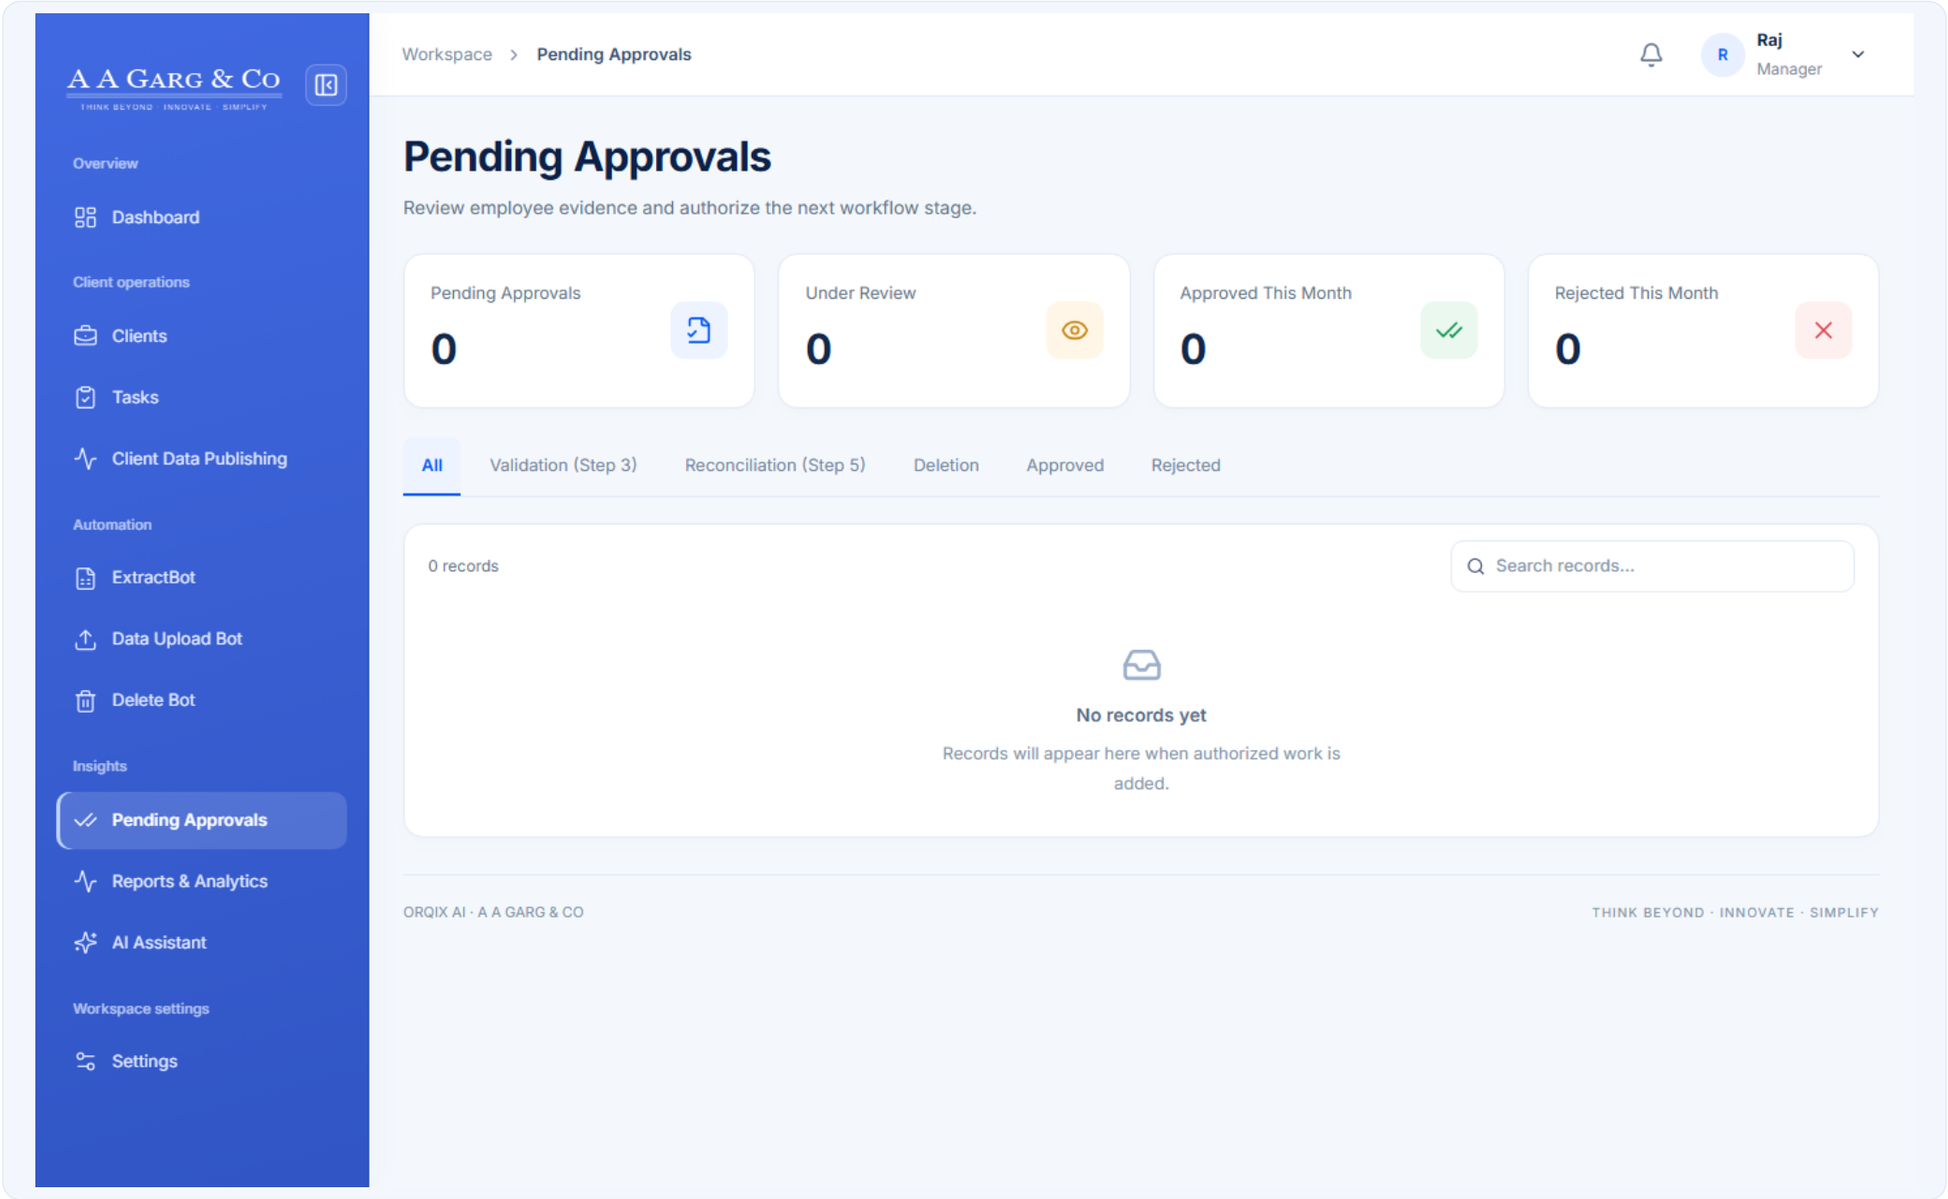

MANAGER

/approvals

Manager Approvals

Managers see requests within their reporting scope. No fabricated portal job or approval result is shown.

MANAGER

/tasks

Assign Employee Task

Choose an authorized employee and enter title, description, priority and deadline. The assigned task appears in that employee Tasks page.
