21 screens | Workflow explanations | Page-by-page screenshots

PROJECT WALKTHROUGH / 4 NOVEMBER 2026

How the platform works

DATA ARRIVES

Internal BOT extract > Final workbook > Staff publication > Client dashboard

CLIENT EXPLORATION

Select company / FY > Explore quantities > Compare summary > Download reports

ADVISORY

Request Consultation > Assigned team inbox > Reply + status > Client follows up

Workbook coverage

Available, Procurement data and Procurement Summary drive current client analytics. Other workbook sheets do not currently contribute to dashboard calculations.

Access model

Clients see their organization scope. One organization can contain multiple accounts, units and portal registrations. Clients do not operate the internal BOTs.

Current boundaries

Certificate review/action requests are removed. Reconciliation compares available numeric records; it does not present missing-field issue tables. Razorpay test checkout does not prove a live subscription or real payment.

ACCESS

/client/login

Client Login

External clients use their separate organization login. BOT controls and internal administration are not available in this portal.

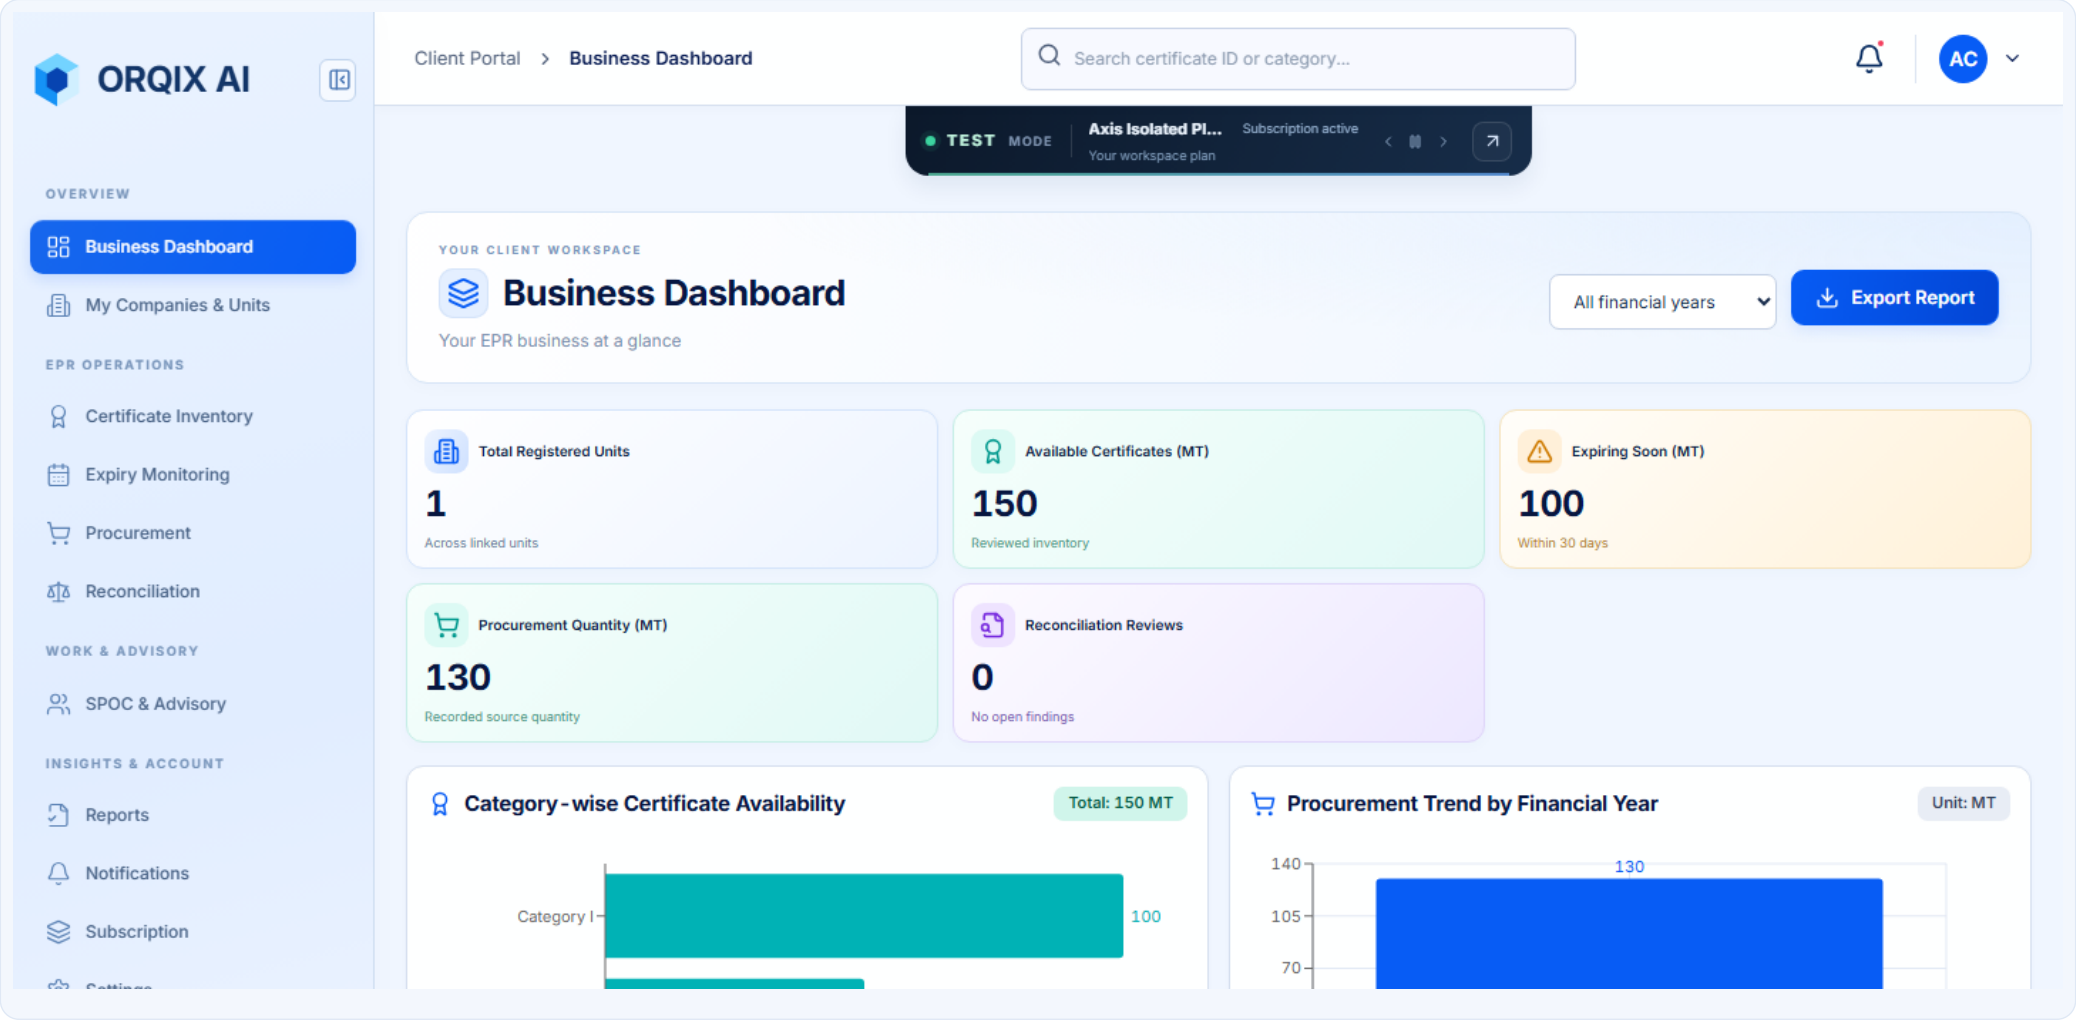

CLIENT PORTAL

/client/dashboard

Business Dashboard | 1/2

Published workbook data drives certificate quantities, procurement charts, expiry distribution and source refresh information.

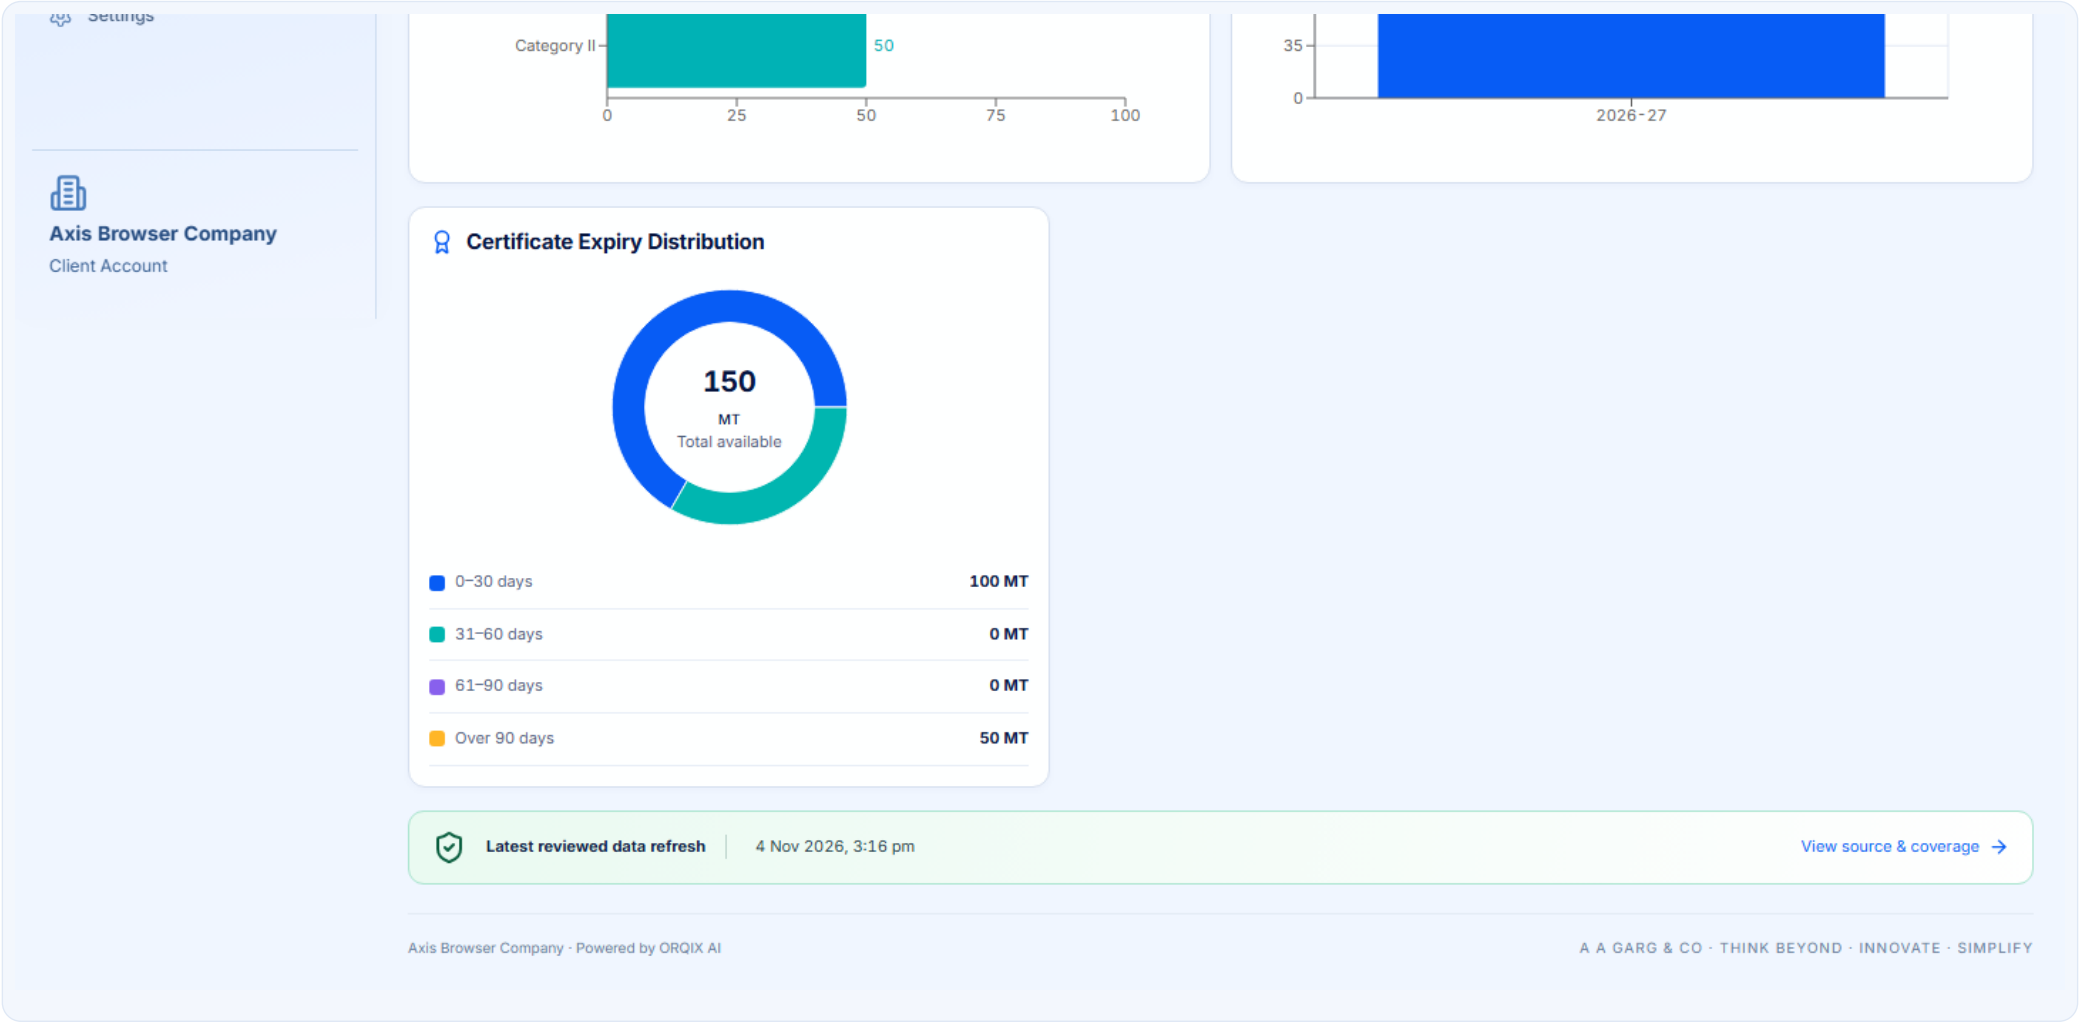

CLIENT PORTAL

/client/dashboard

Business Dashboard | 2/2

Published workbook data drives certificate quantities, procurement charts, expiry distribution and source refresh information.

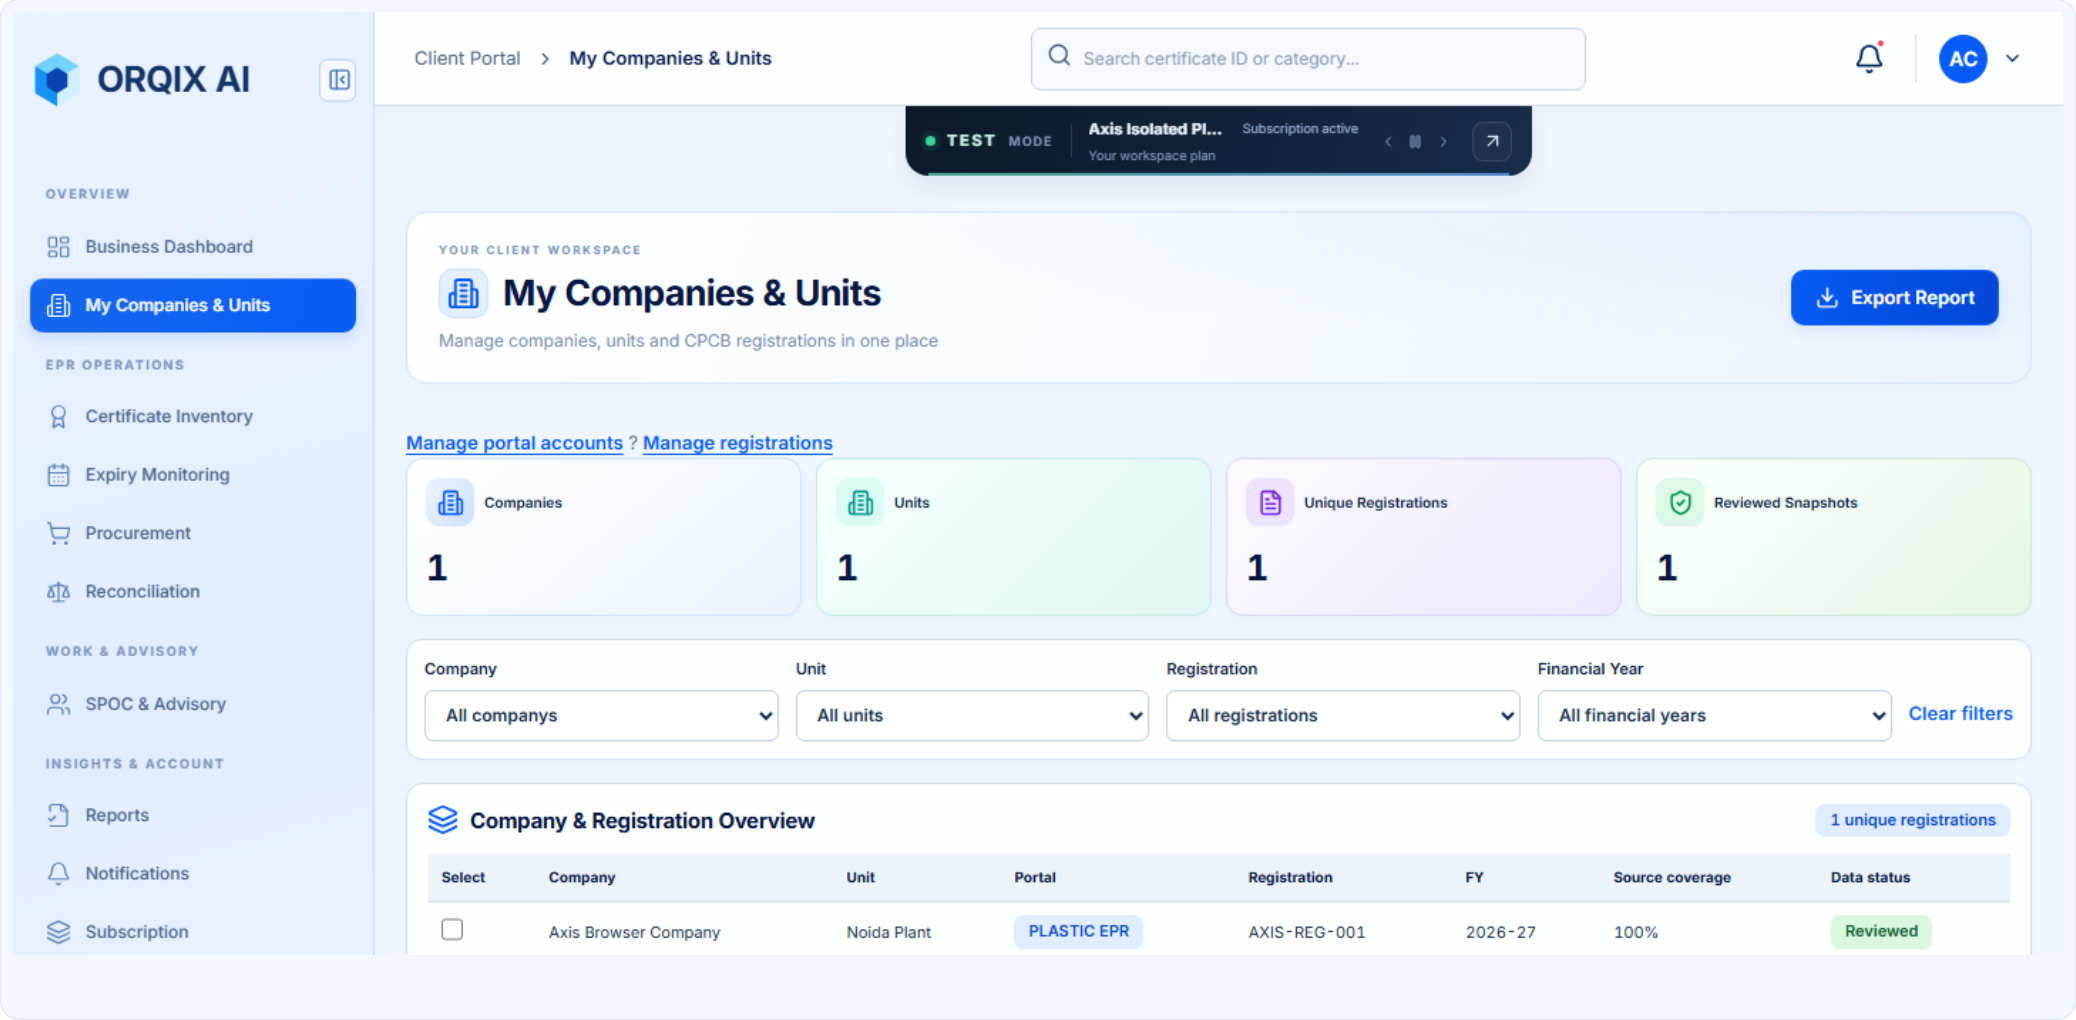

CLIENT PORTAL

/client/companies

My Companies & Units | 1/2

Browse linked companies, units and registrations. Filter the scope and compare published quantities without counting duplicate logins twice.

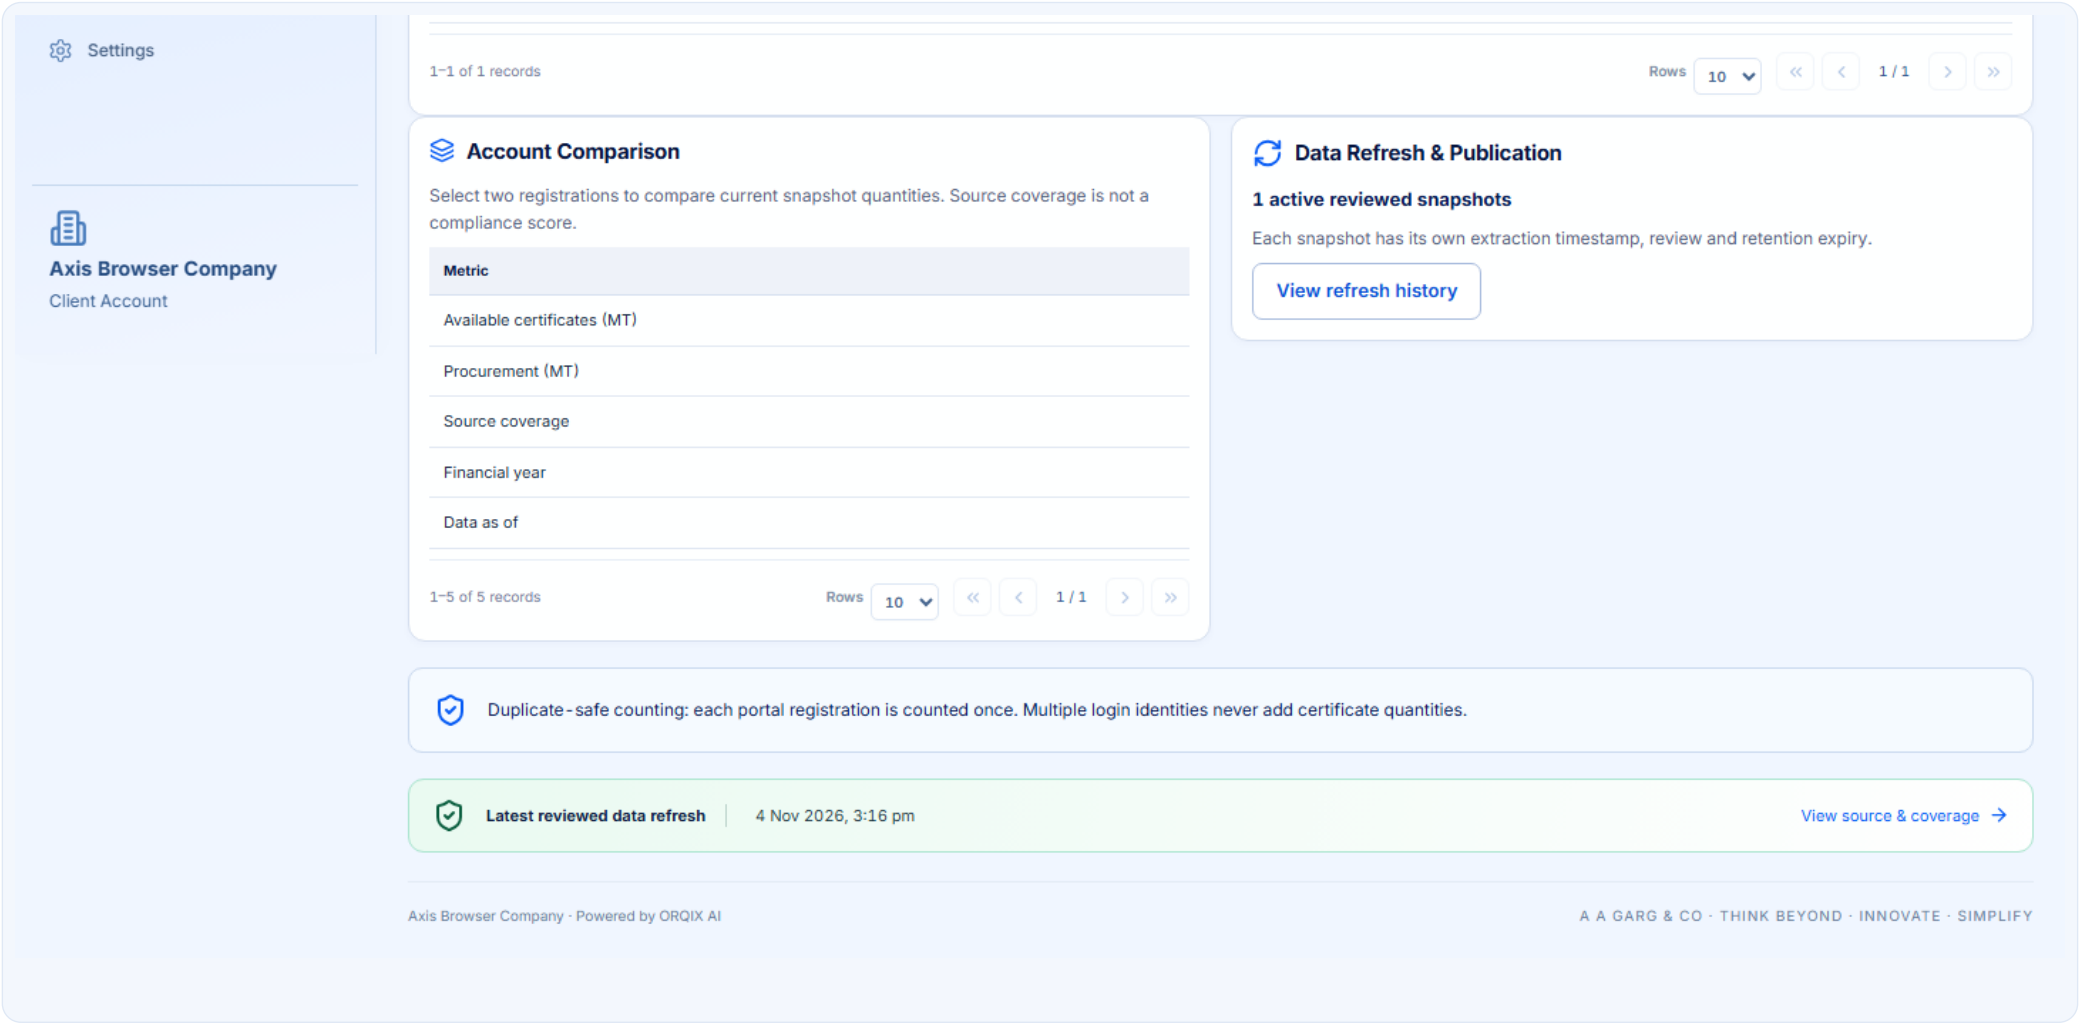

CLIENT PORTAL

/client/companies

My Companies & Units | 2/2

Browse linked companies, units and registrations. Filter the scope and compare published quantities without counting duplicate logins twice.

CLIENT PORTAL

/client/certificates

Certificate Inventory

Browse Available-sheet certificate records, categories, processing types, quantities and validity. Filters and pagination support record exploration.

ORQIX AI

CLIENT PORTAL

/client/expiry

Expiry Monitoring

View validity windows and upcoming certificate expiry quantities. This is informational monitoring; certificate action/review requests have been removed.

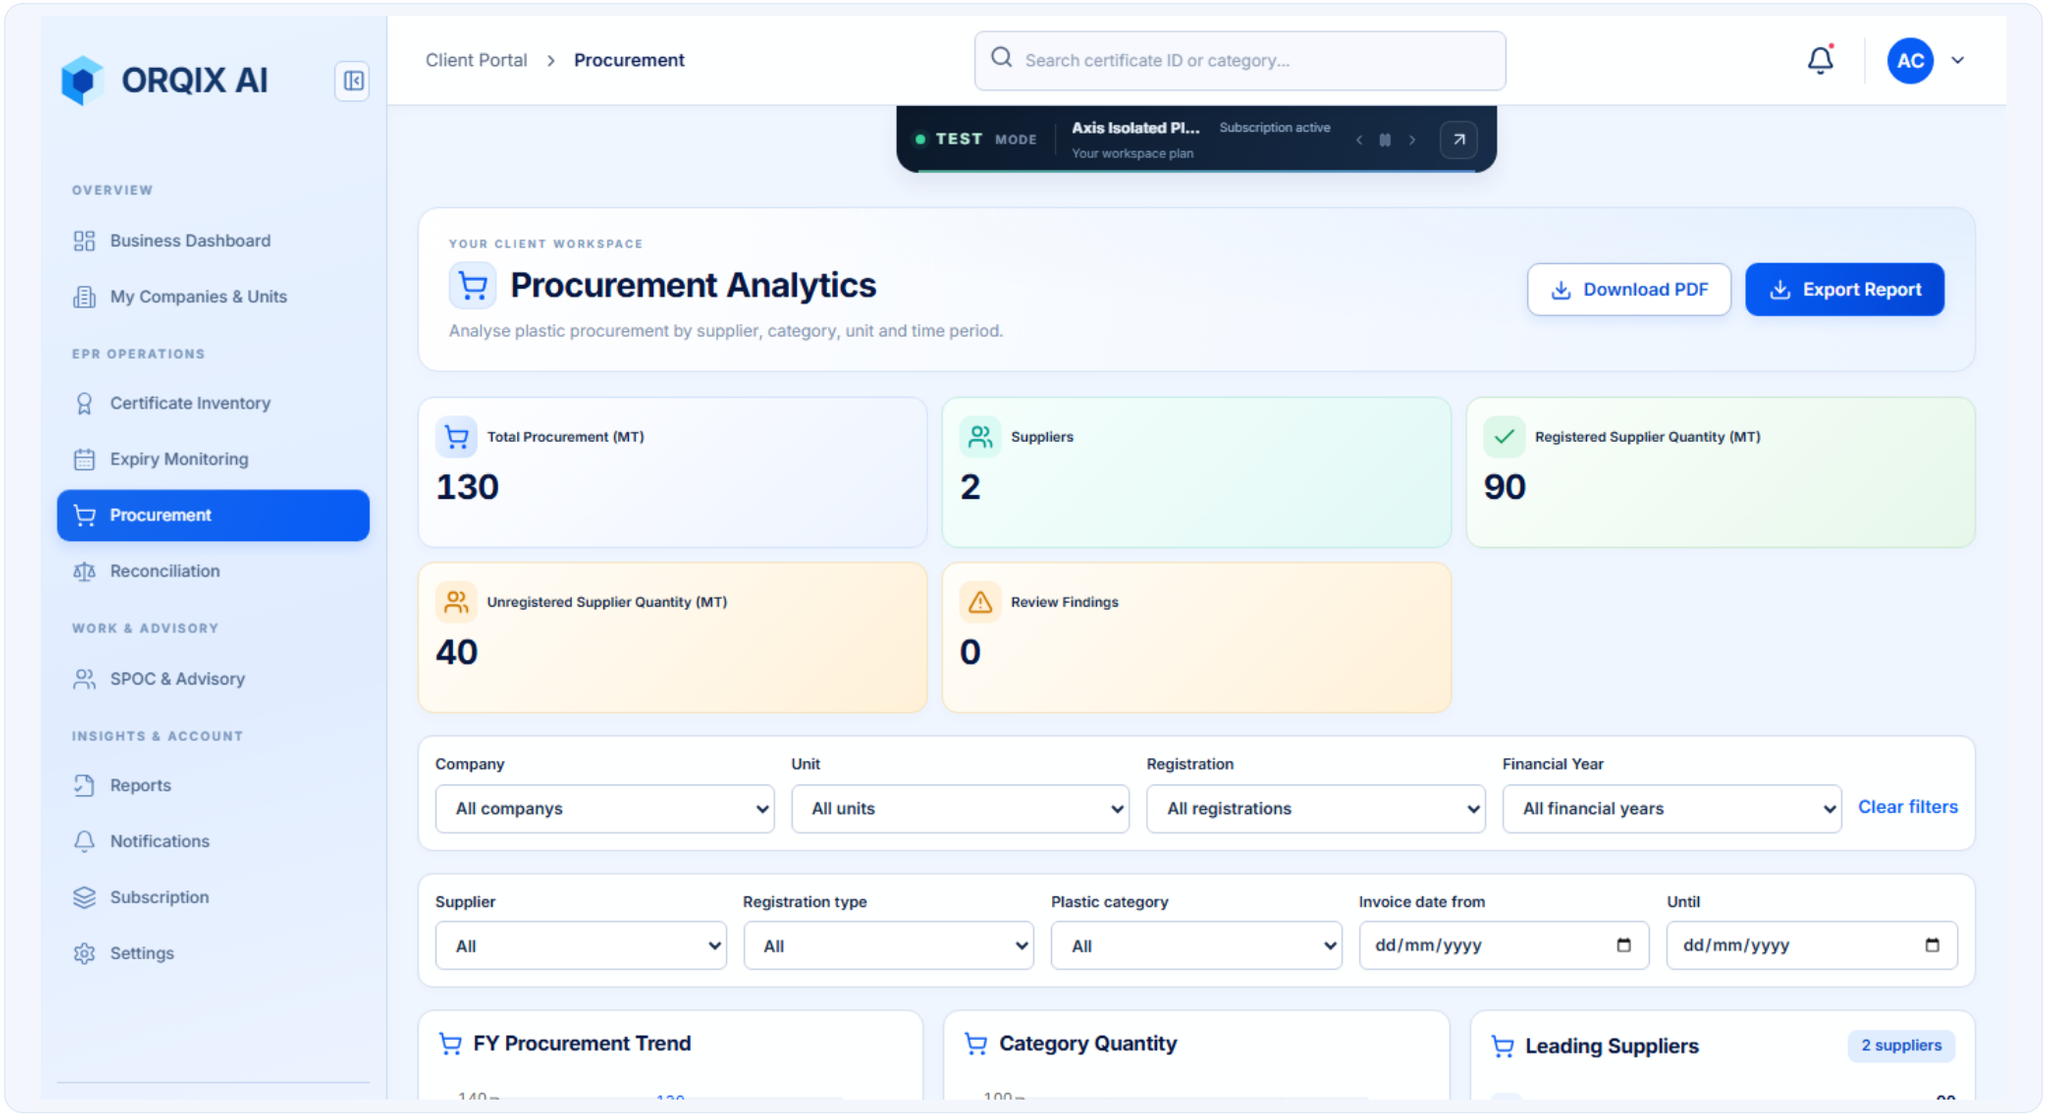

CLIENT PORTAL

/client/procurement

Procurement Analytics | 1/2

Analyze Procurement data by supplier, registration type, category, unit and financial year. Export Excel or a branded PDF with matching procurement records.

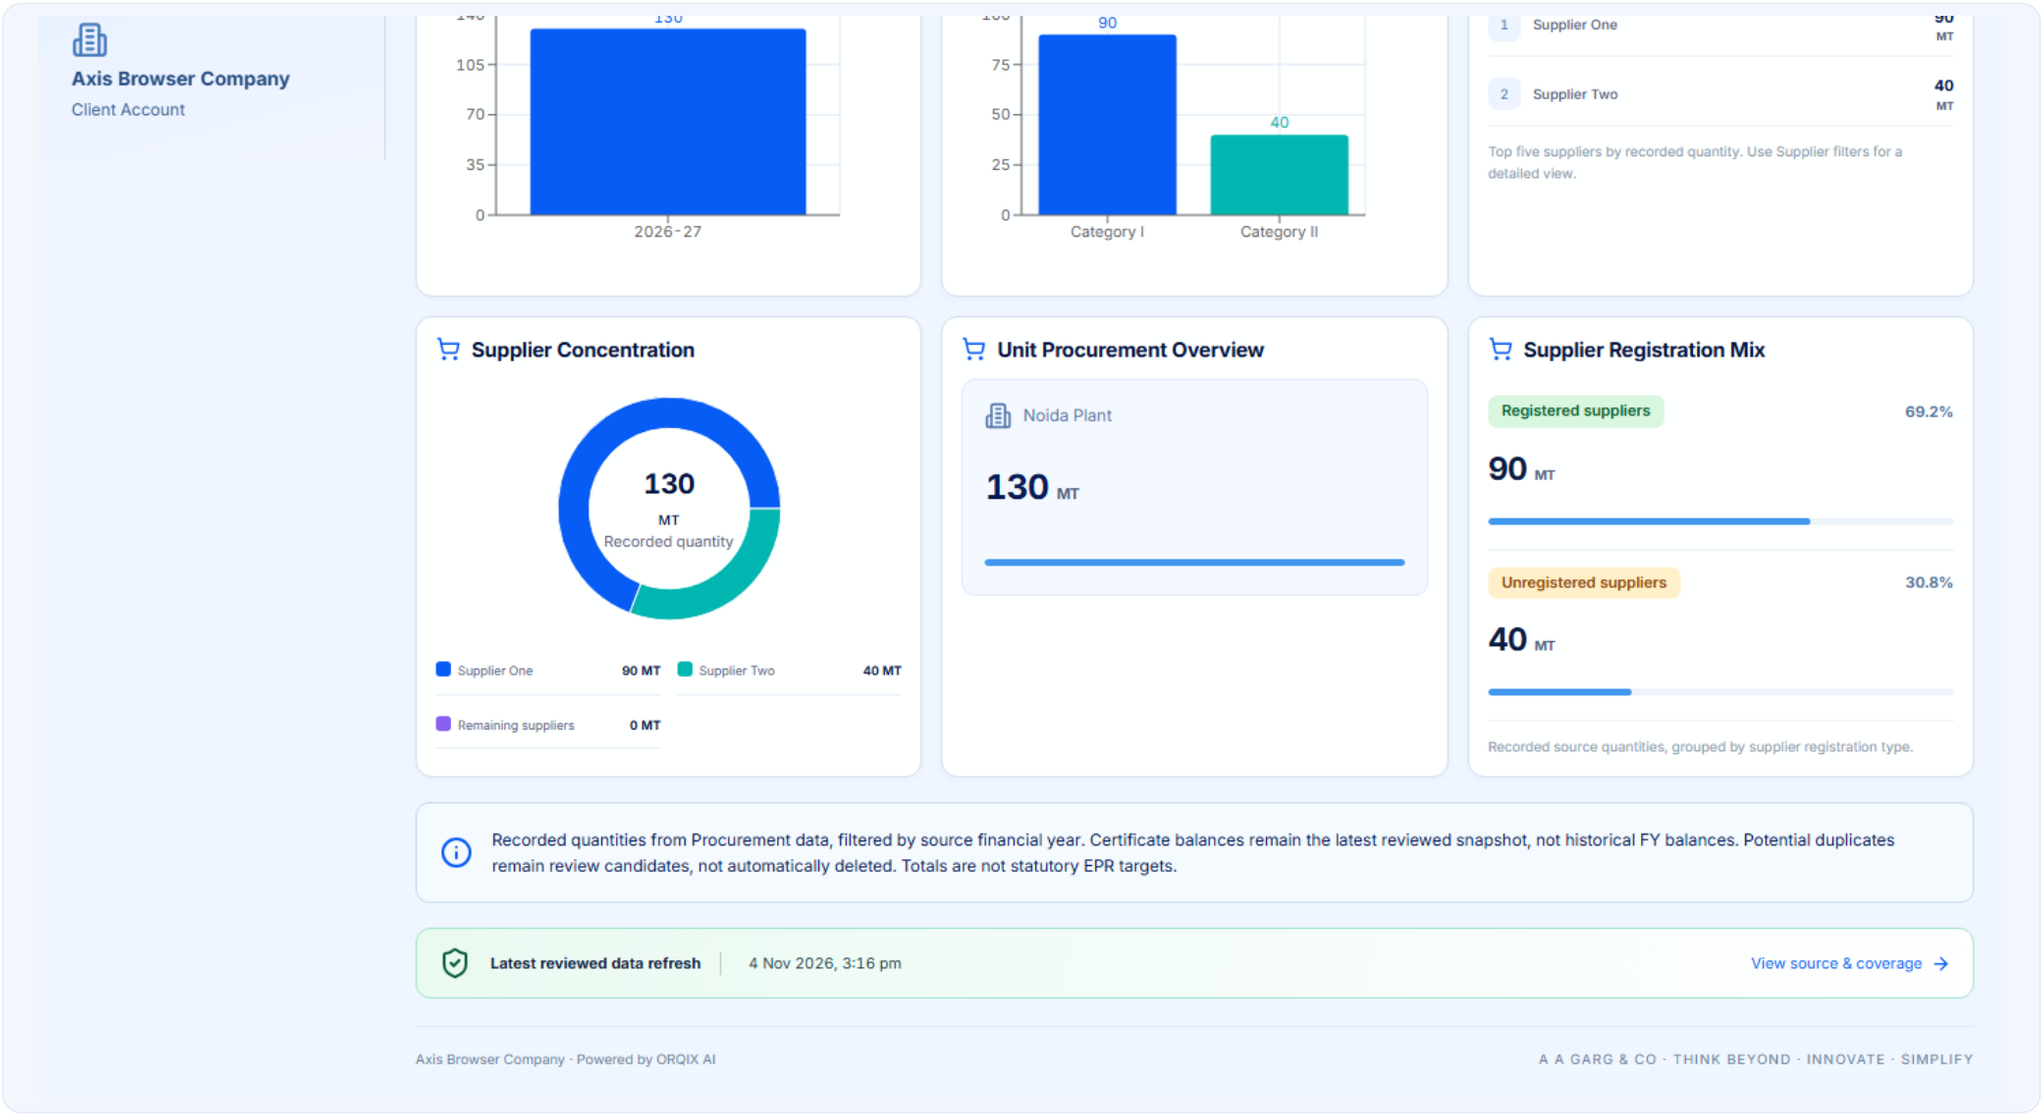

CLIENT PORTAL

/client/procurement

Procurement Analytics | 2/2

Analyze Procurement data by supplier, registration type, category, unit and financial year. Export Excel or a branded PDF with matching procurement records.

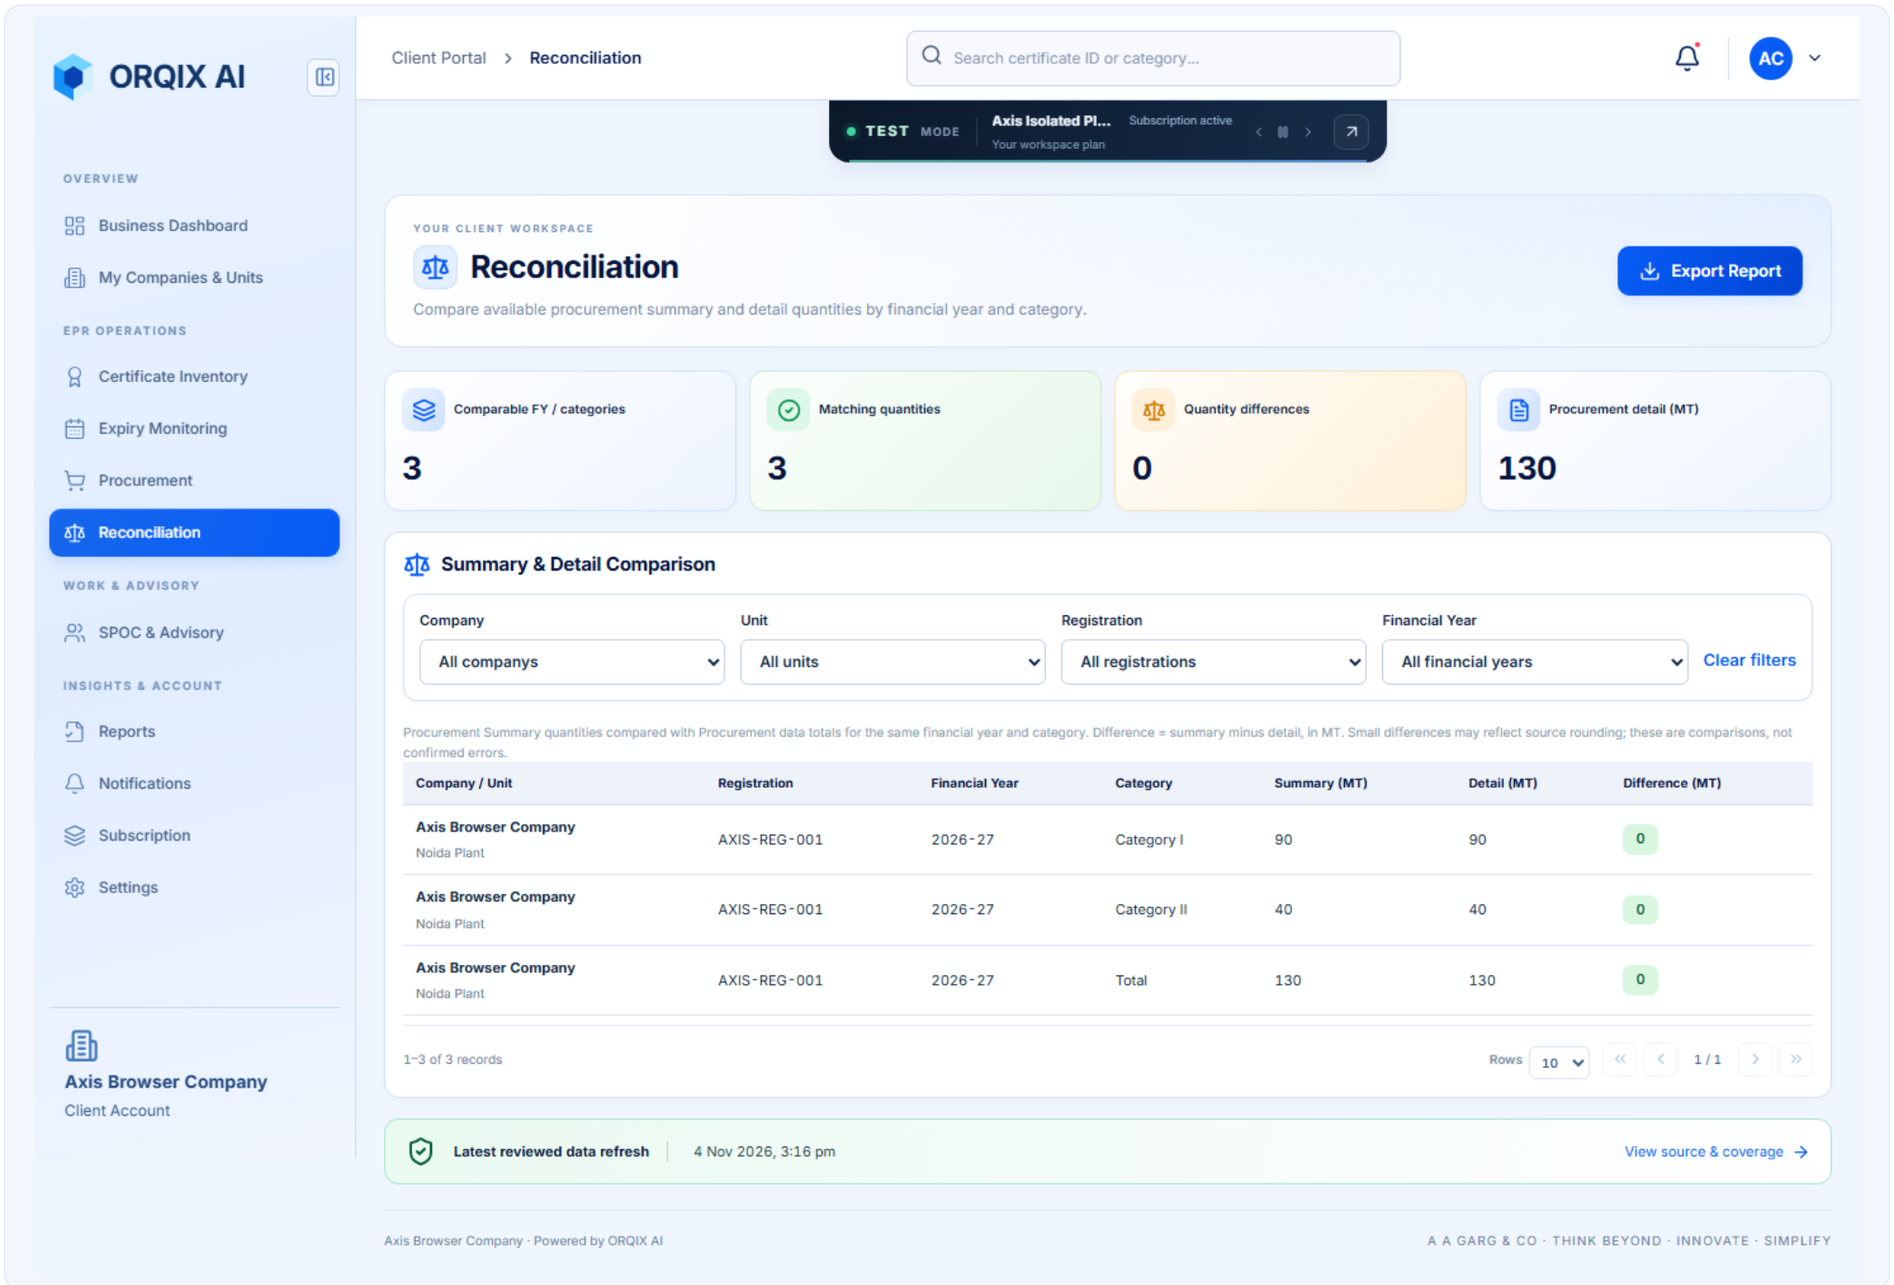

CLIENT PORTAL

/client/reconciliation

Reconciliation

Compare Procurement Summary and detail totals for the same financial year and category. Differences are observations, not confirmed errors; missing-field issue tables are not shown.

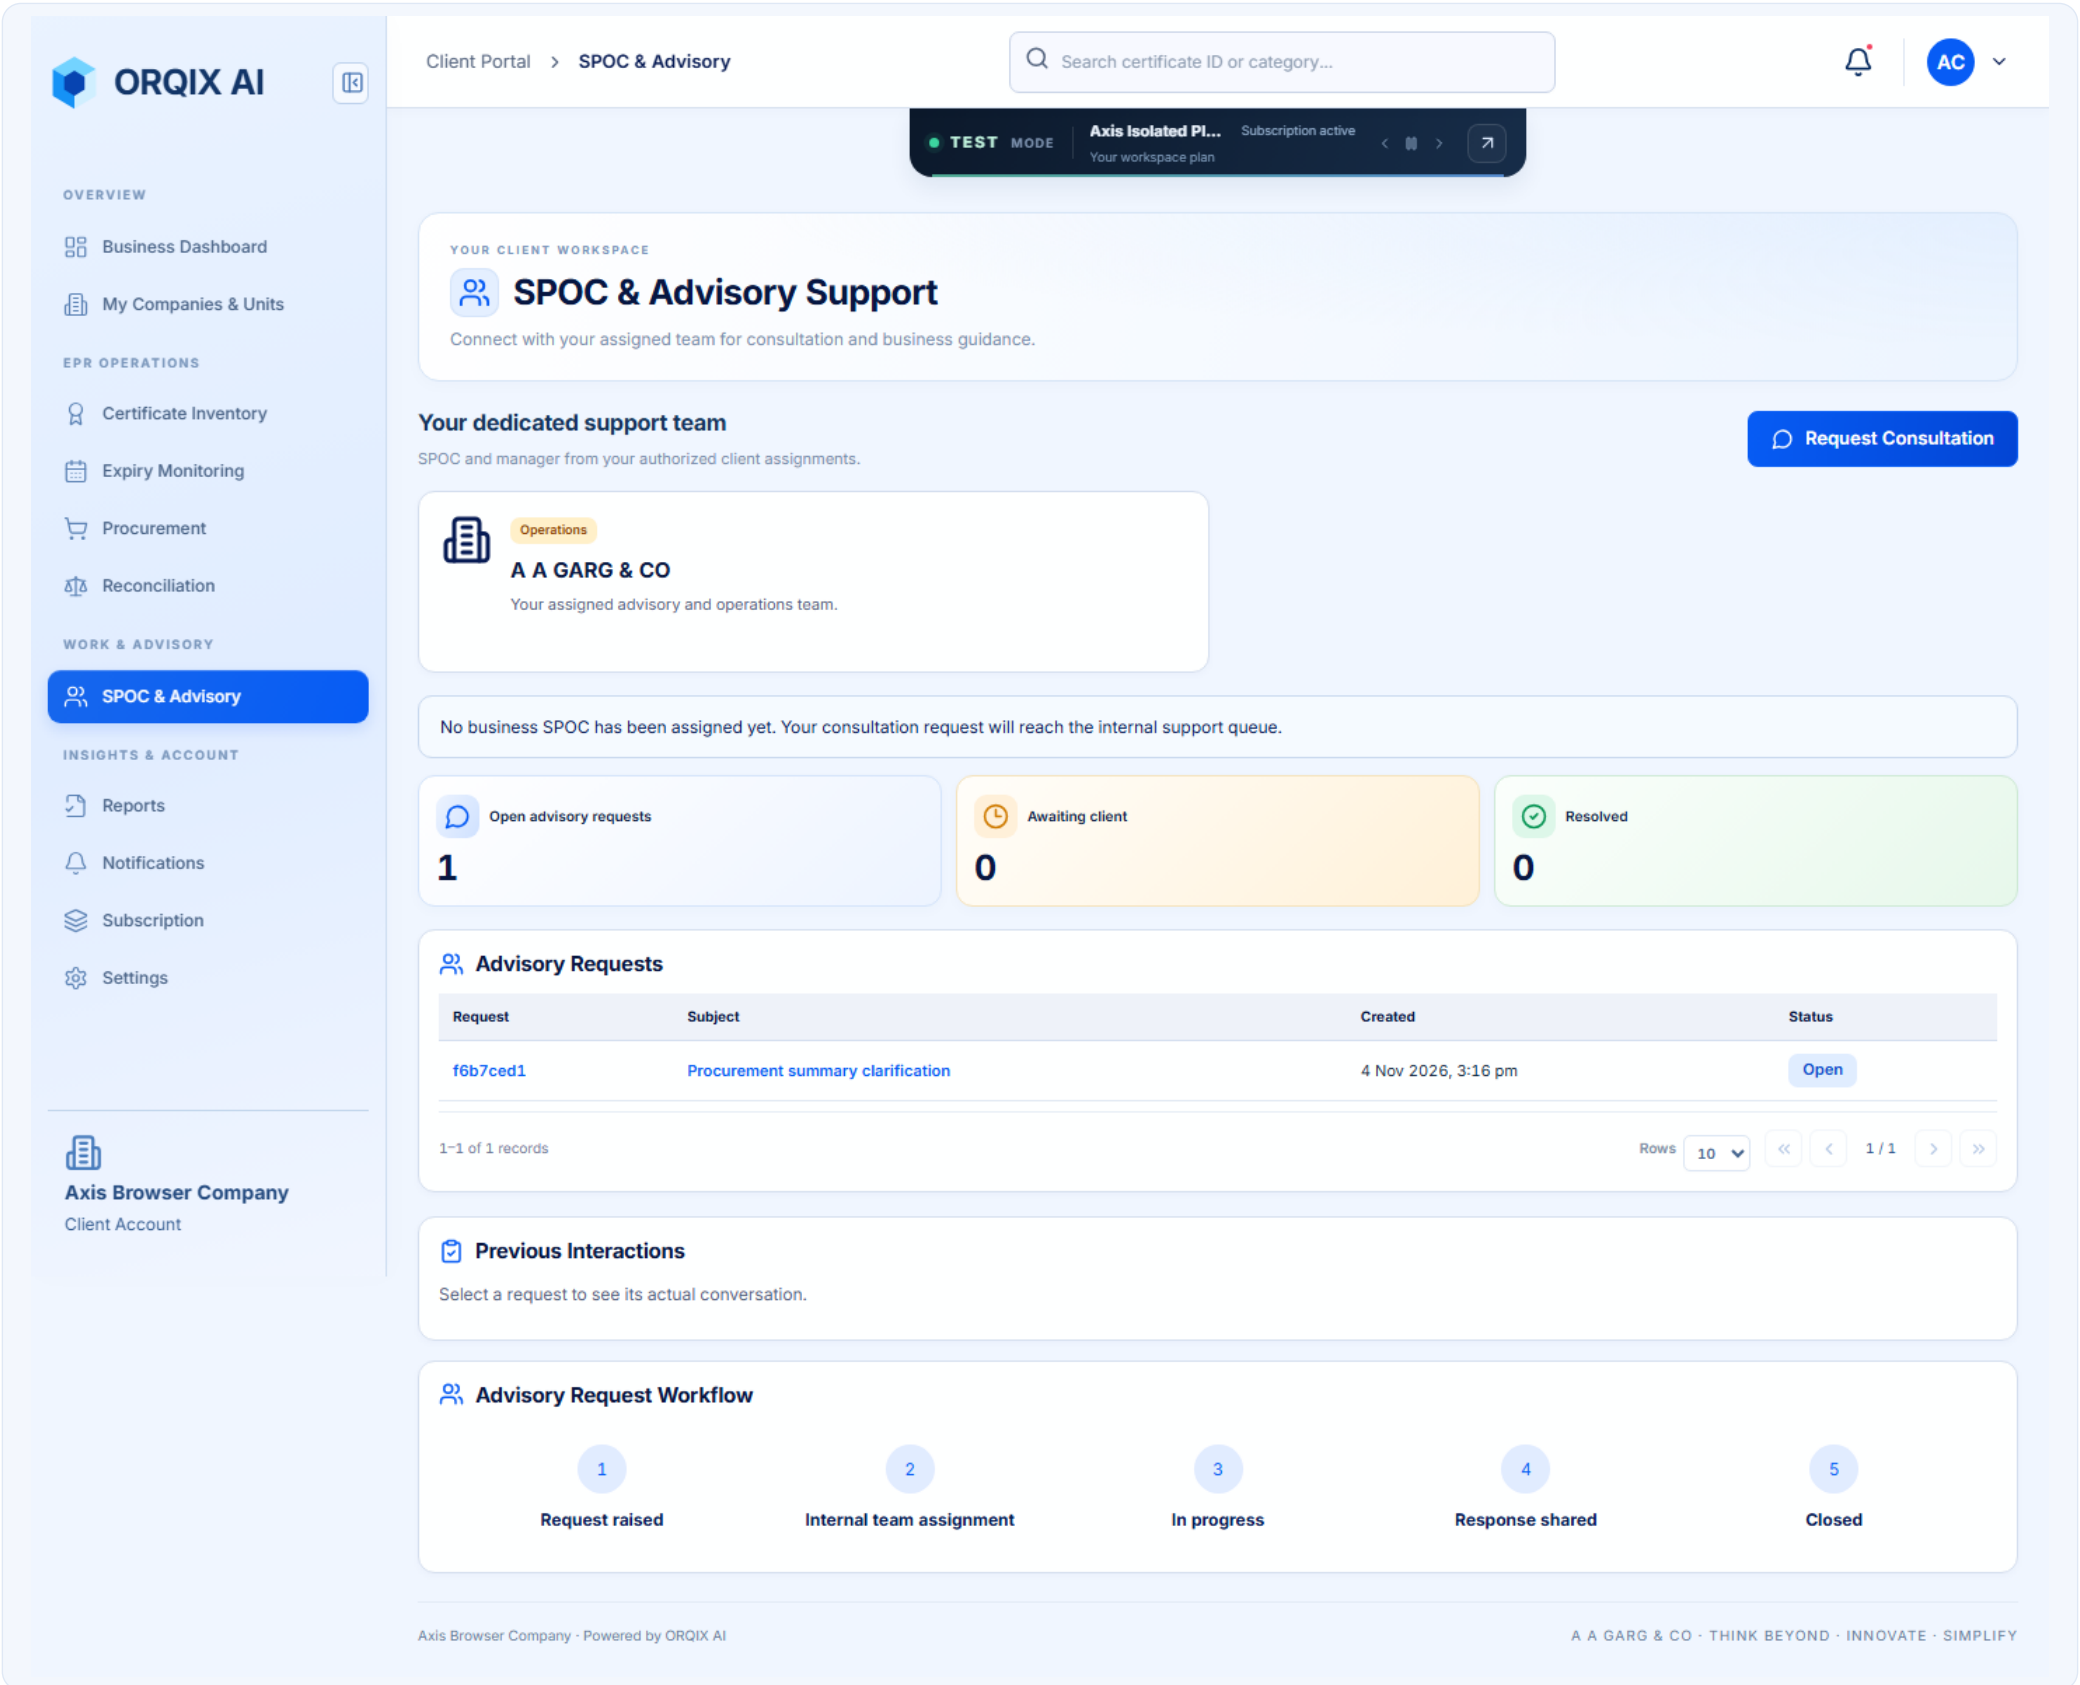

CLIENT PORTAL

/client/my-spoc

SPOC & Advisory Support

See assigned contacts and reporting managers. Submit a topic and question through Request Consultation, then read staff replies and track status.

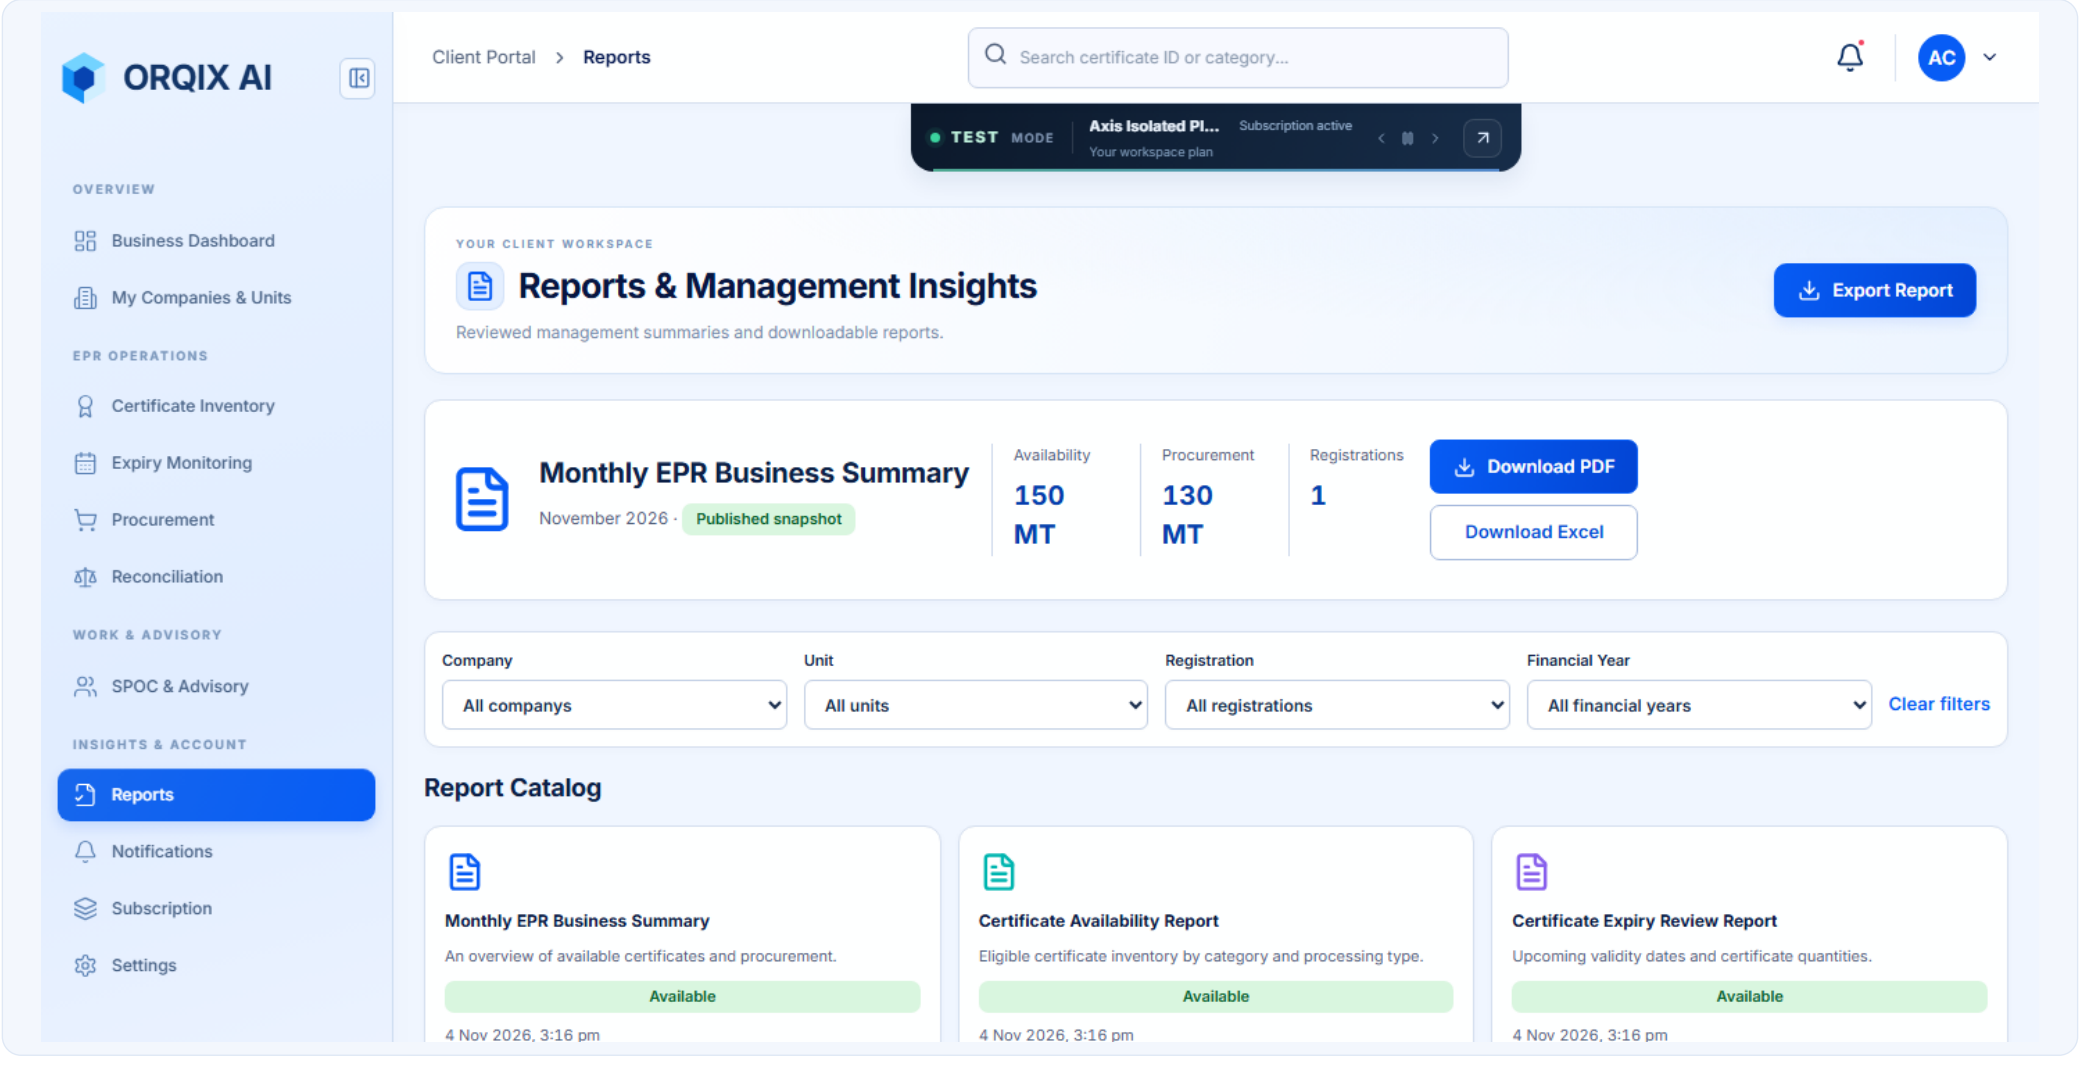

CLIENT PORTAL

/client/reports

Reports & Management Insights | 1/2

Download reports generated from the active published scope. PDF downloads support an optional company logo; source timestamps and report definitions provide context.

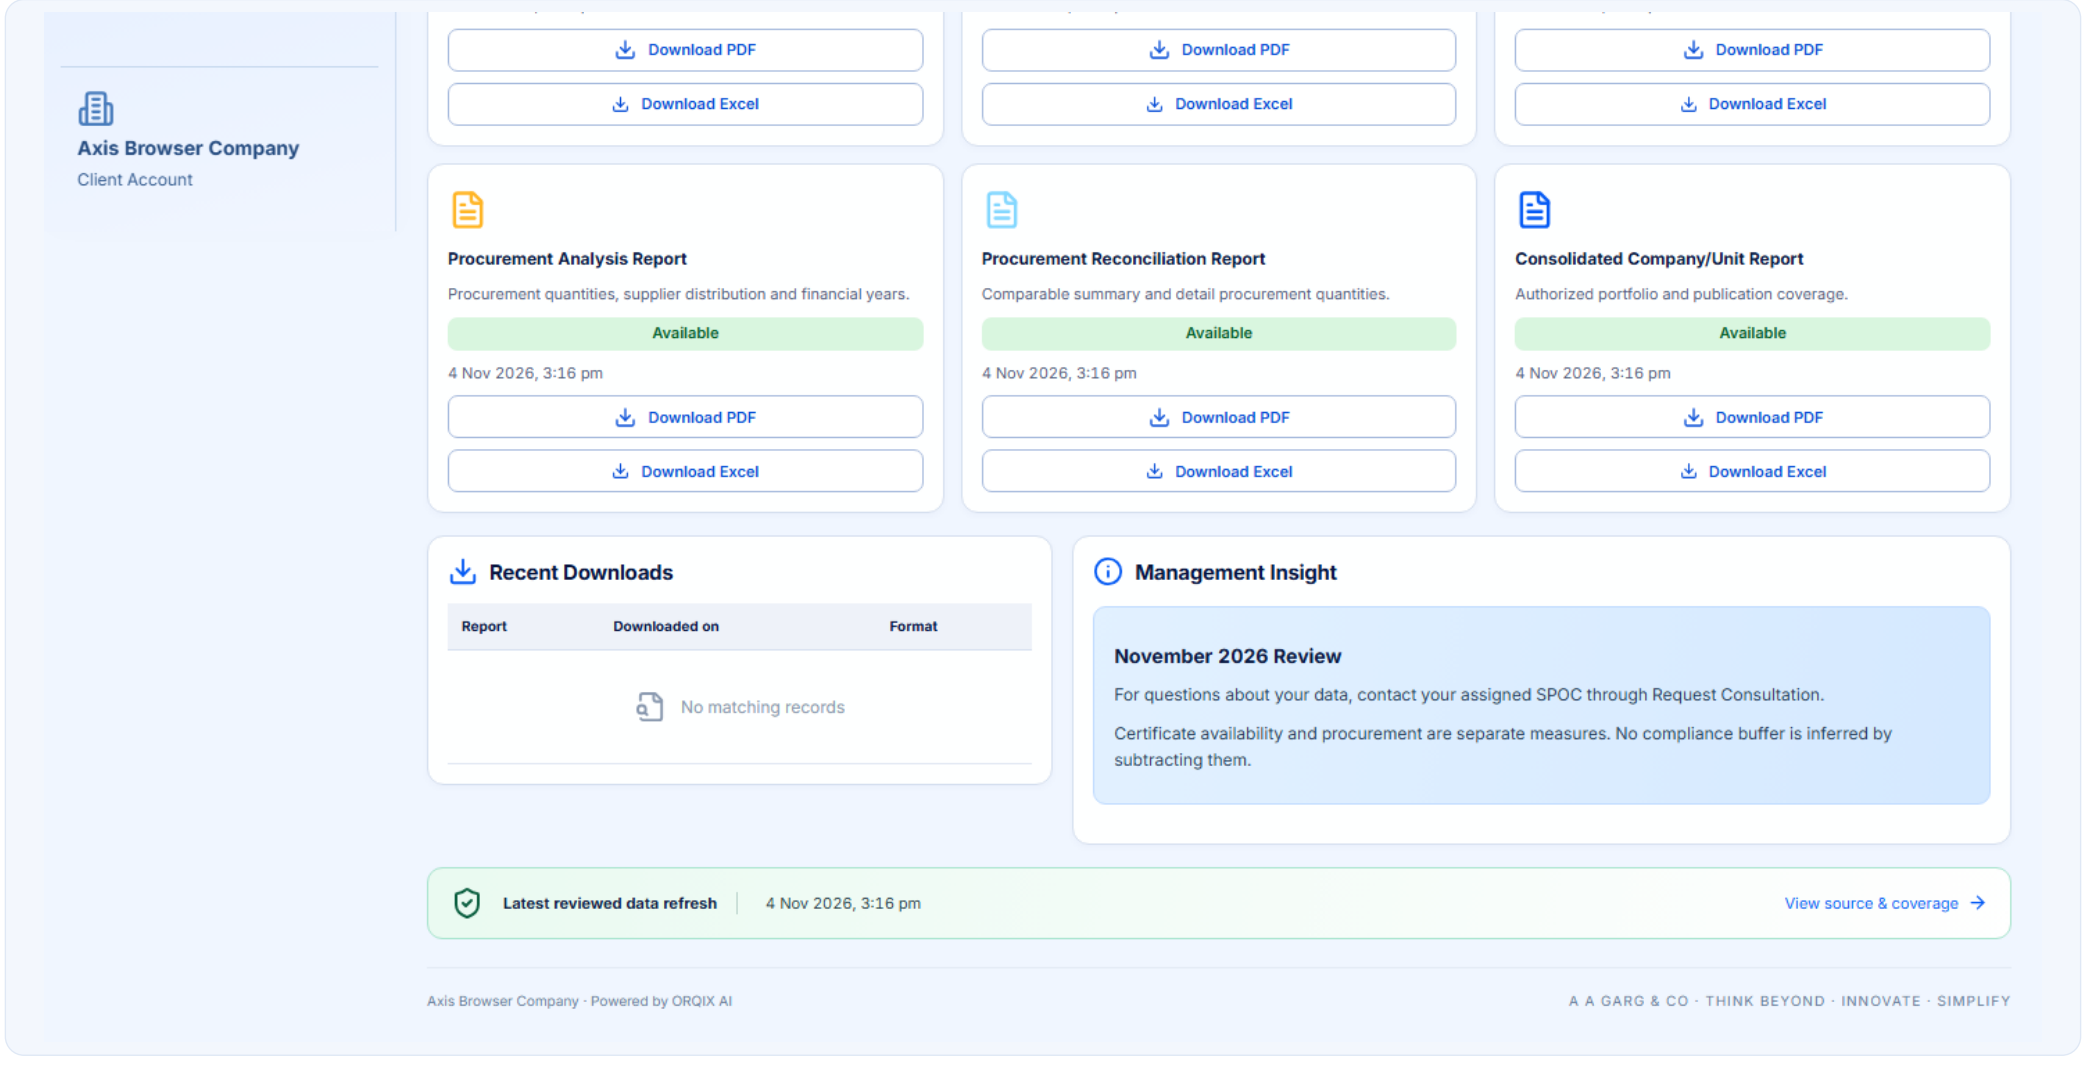

CLIENT PORTAL

/client/reports

Reports & Management Insights | 2/2

Download reports generated from the active published scope. PDF downloads support an optional company logo; source timestamps and report definitions provide context.

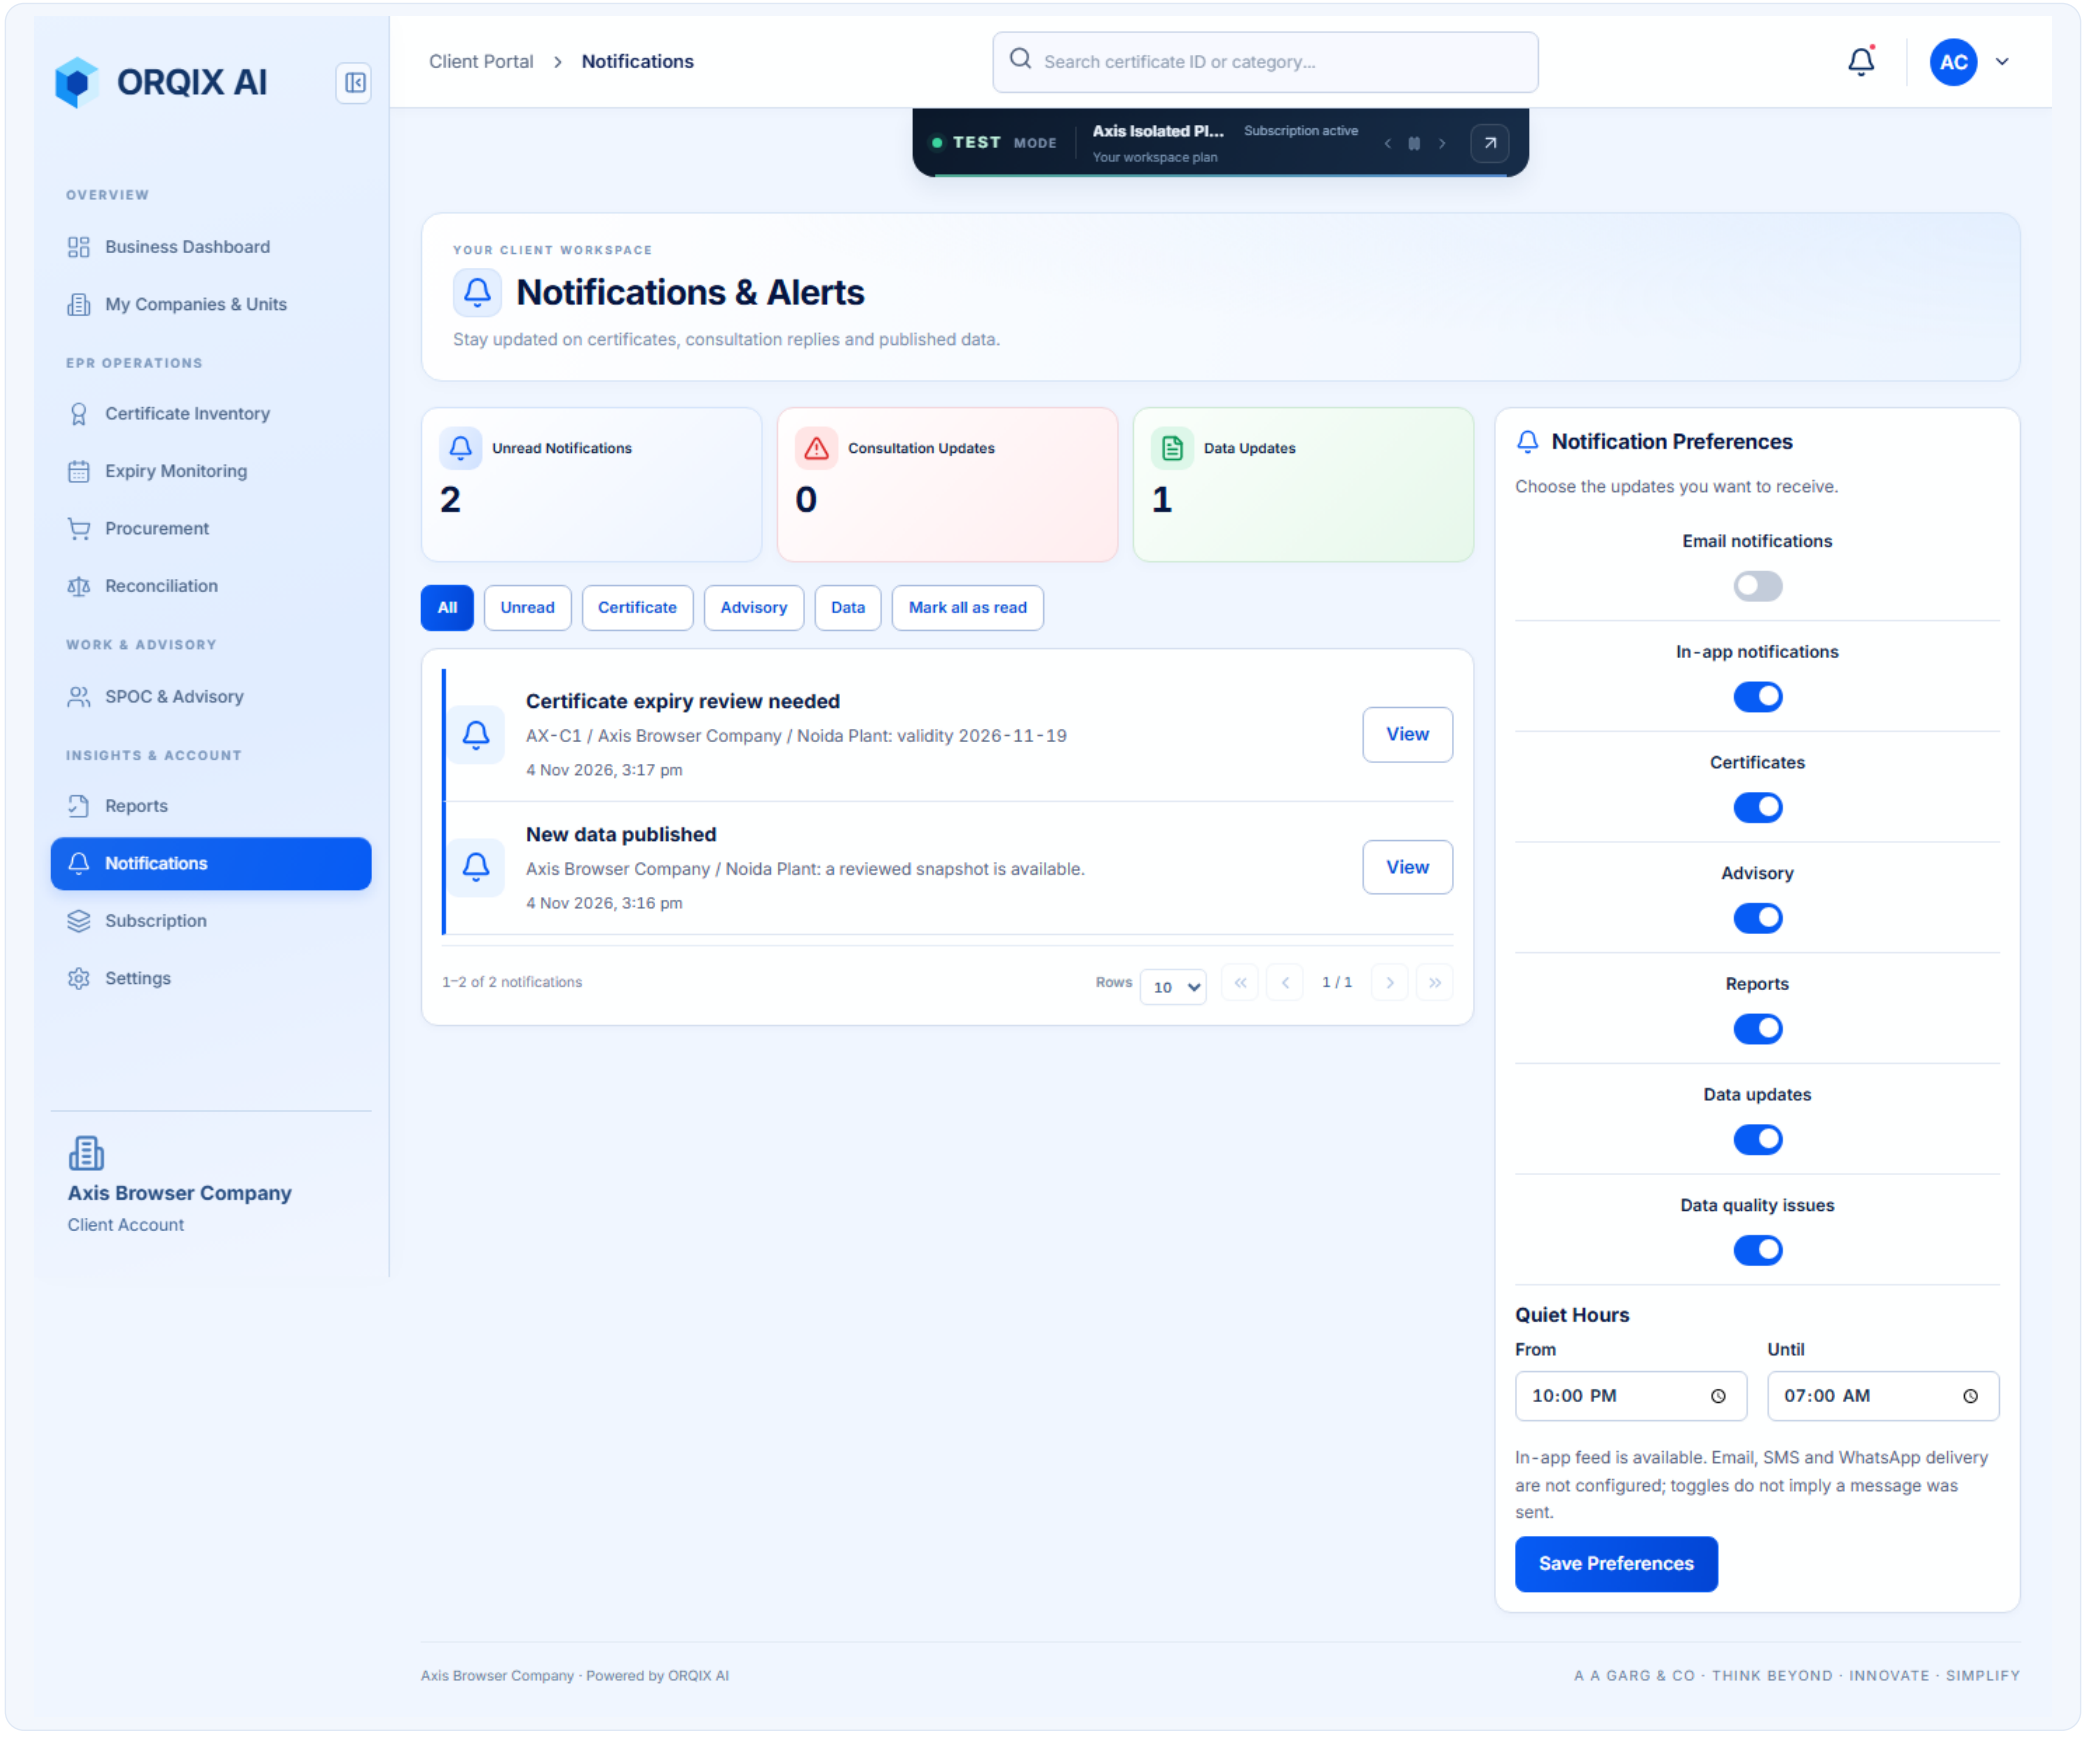

CLIENT PORTAL

/client/notifications

Notifications

Read published-data, certificate and consultation updates. Consultation replies link back to SPOC & Advisory Support.

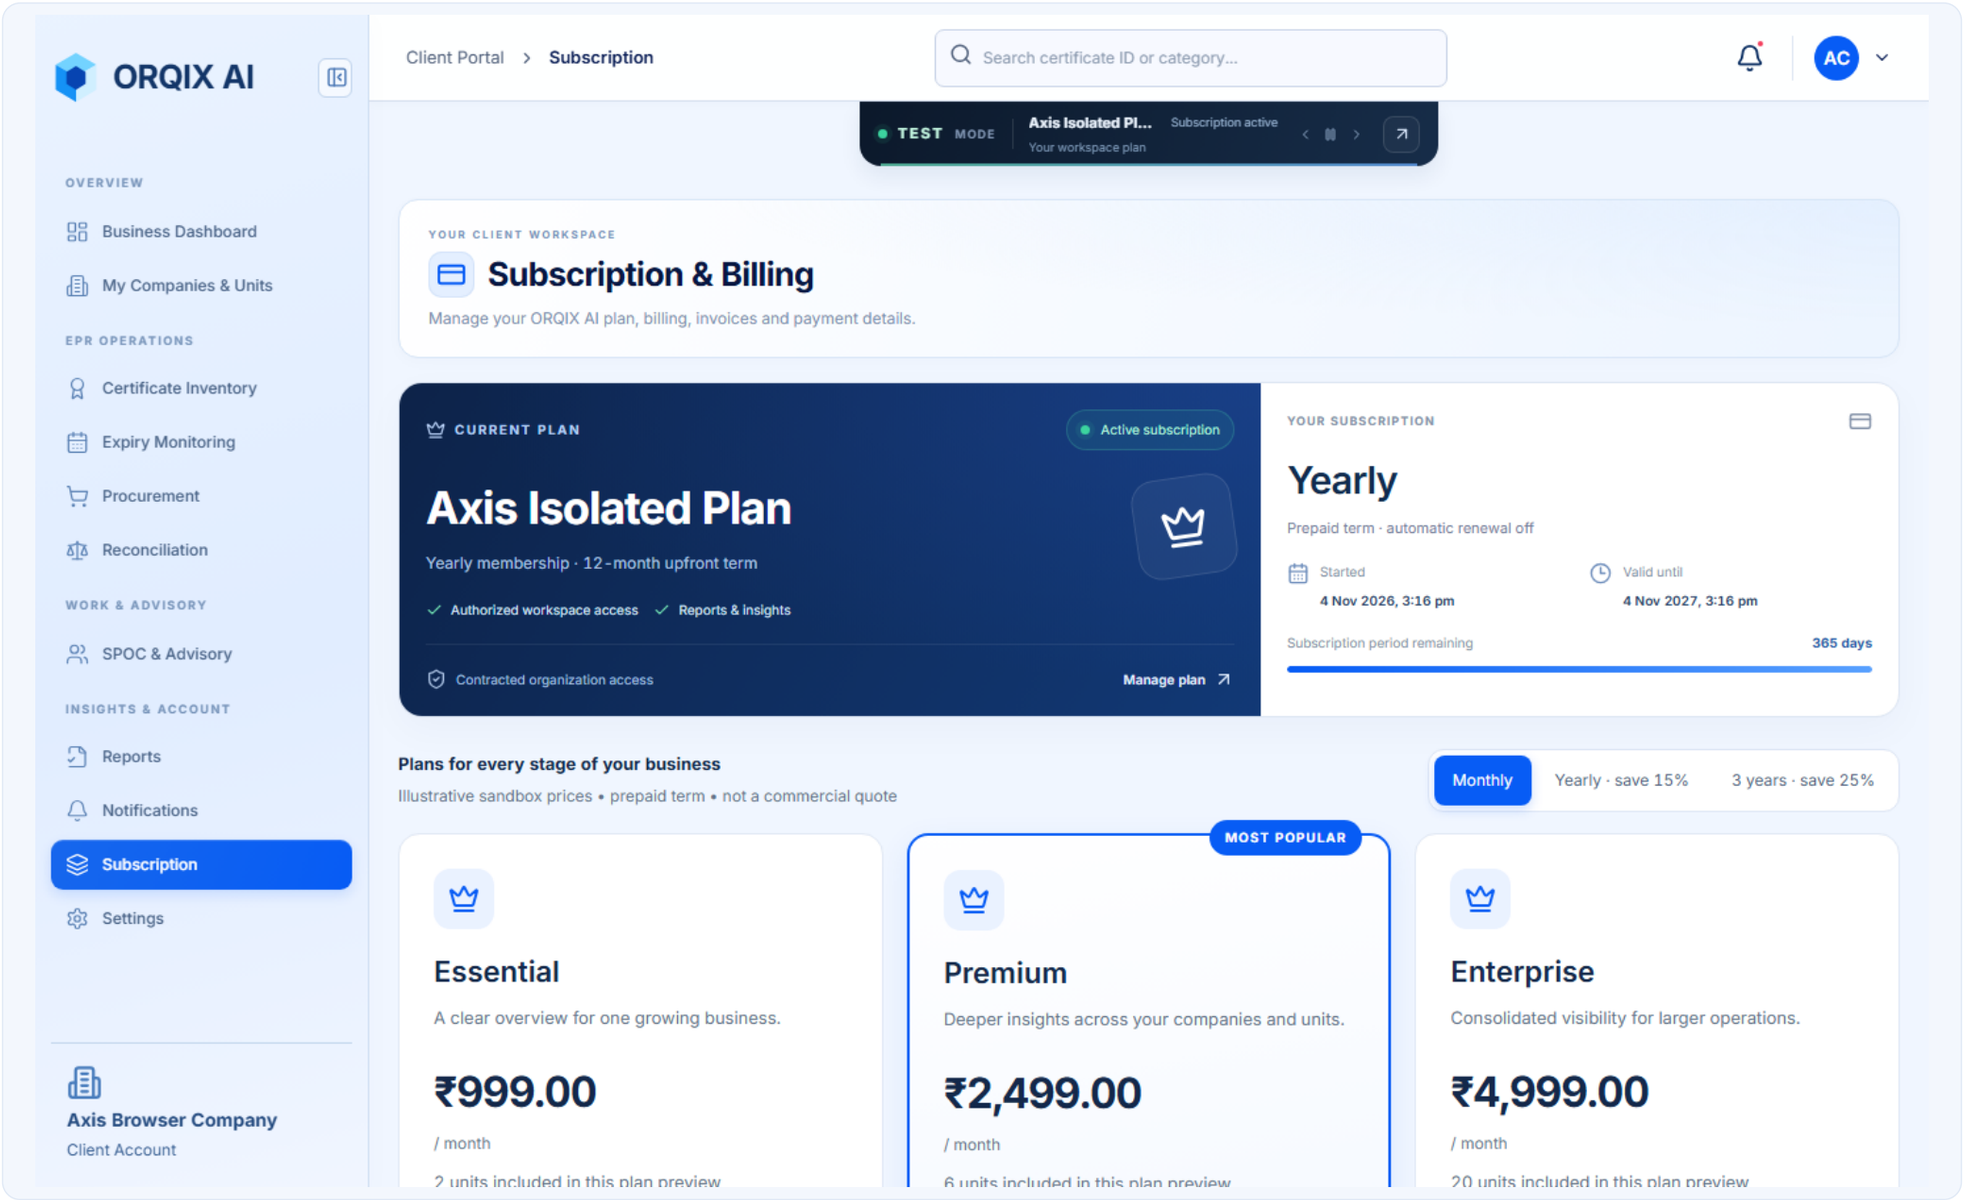

CLIENT PORTAL

/client/subscriptions

Subscription & Billing | 1/2

Review plan and billing information. Razorpay sandbox checkout is separate from live entitlement; missing provider configuration is shown honestly.

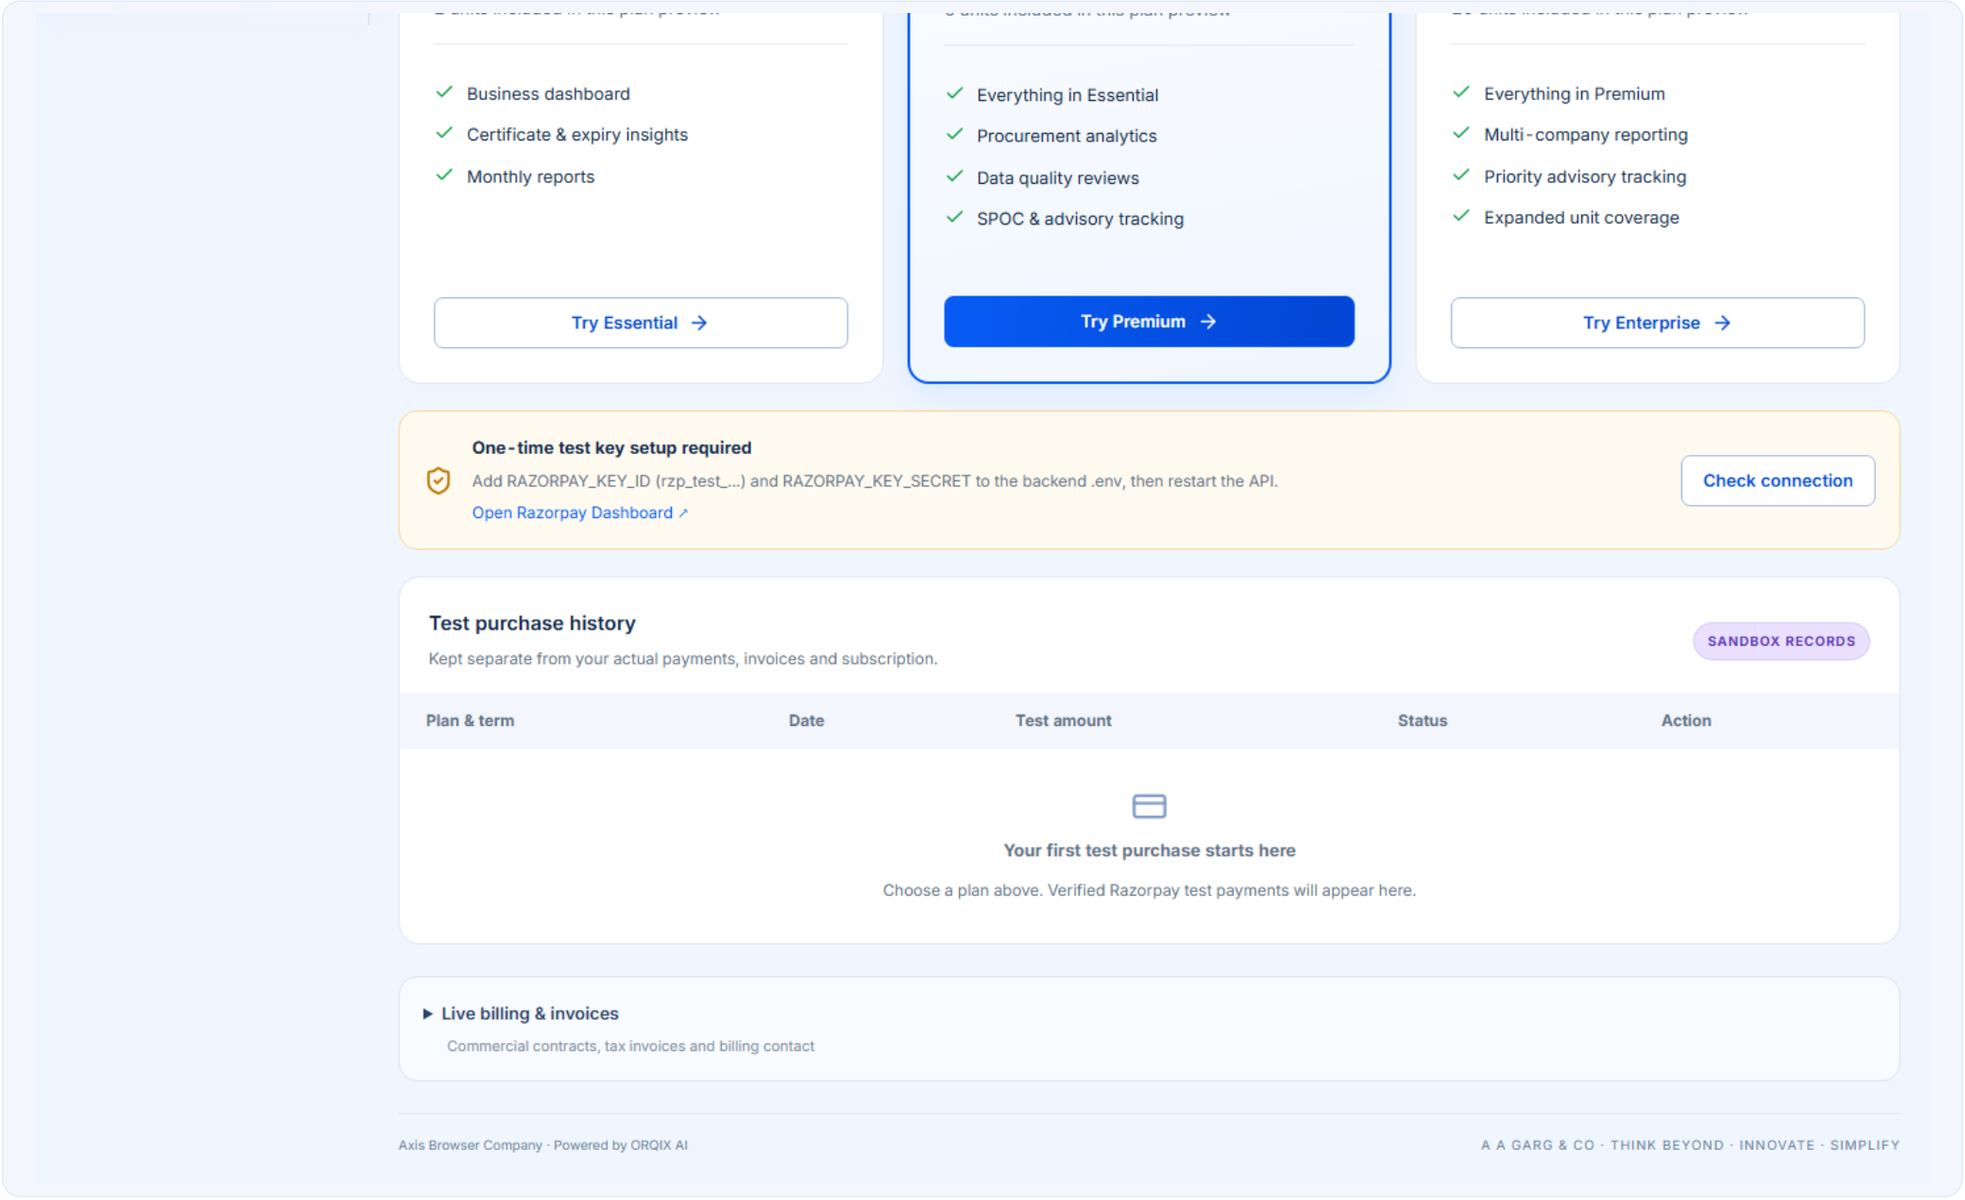

CLIENT PORTAL

/client/subscriptions

Subscription & Billing | 2/2

Review plan and billing information. Razorpay sandbox checkout is separate from live entitlement; missing provider configuration is shown honestly.

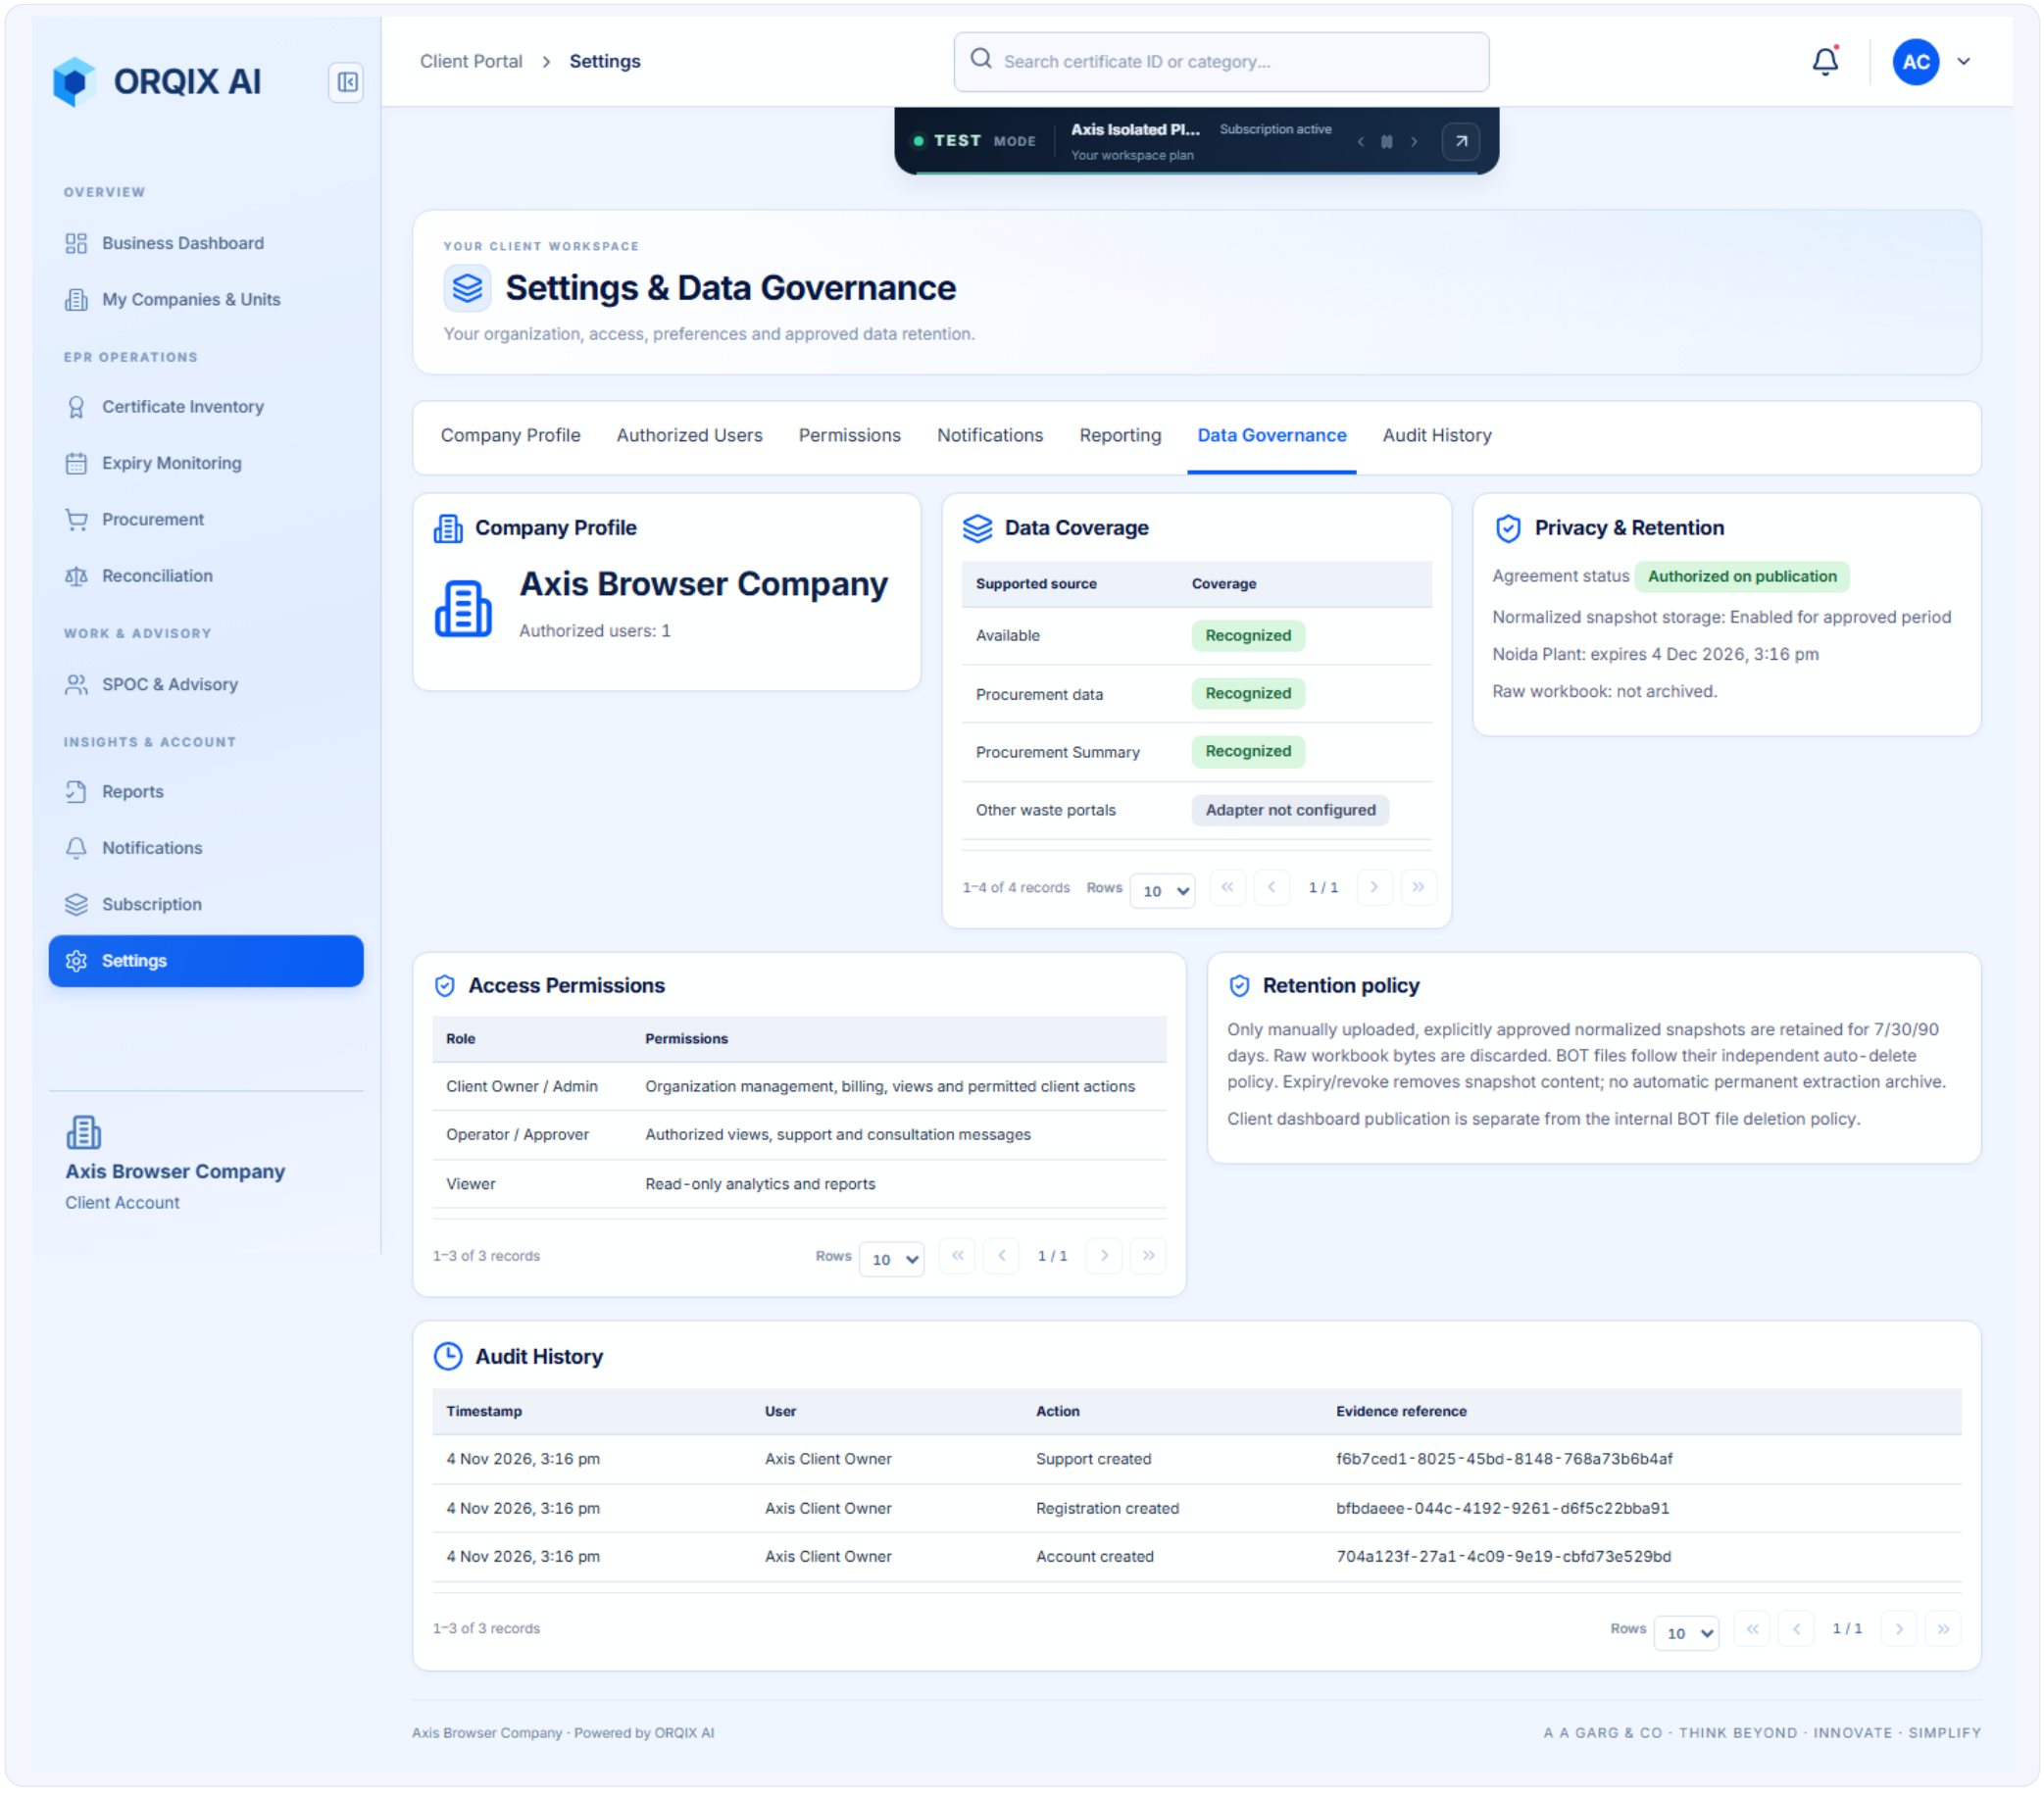

CLIENT PORTAL

/client/settings

Settings & Data Governance

Inspect organization identity, data coverage, access permissions, retention and reporting preferences.

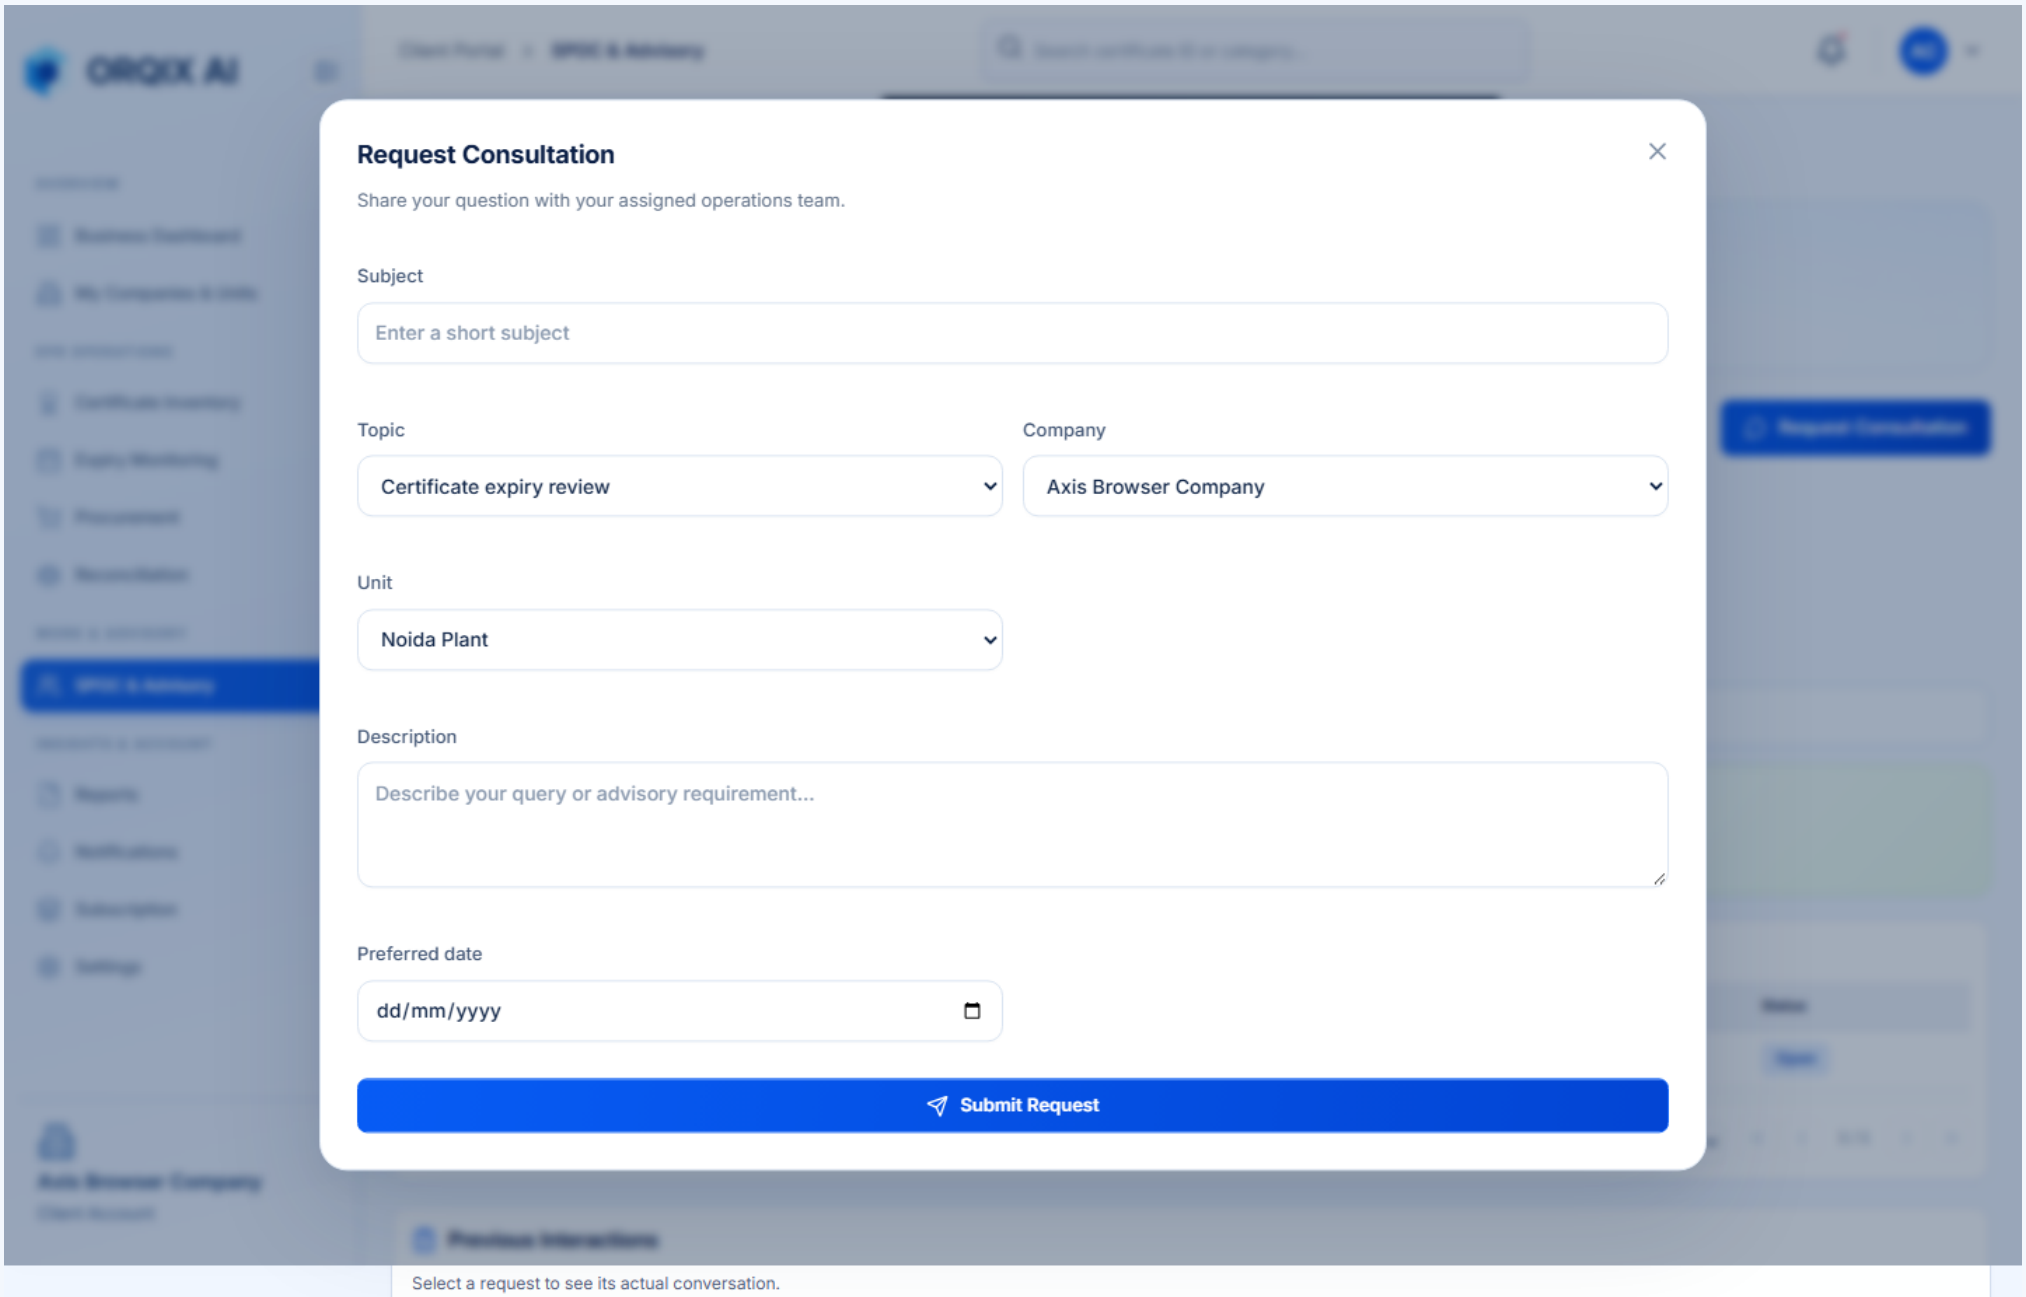

CLIENT WORKFLOW

/client/my-spoc

Request Consultation

Enter the subject, topic, company, unit, question and preferred date. The internal consultation inbox receives the request for authorized follow-up.

Select a request to see its actual conversation.

Advisory Request Workflow

1. **Request raised**
2. **Internal team assignment**
3. **In progress**
4. **Response shared**
5. **Closed**

CLIENT WORKFLOW

/client/reports

PDF Branding & Download | 1/2

Optionally upload a company PNG/JPEG logo, or download without one. The generated report includes A A GARG & CO branding and the selected source scope.

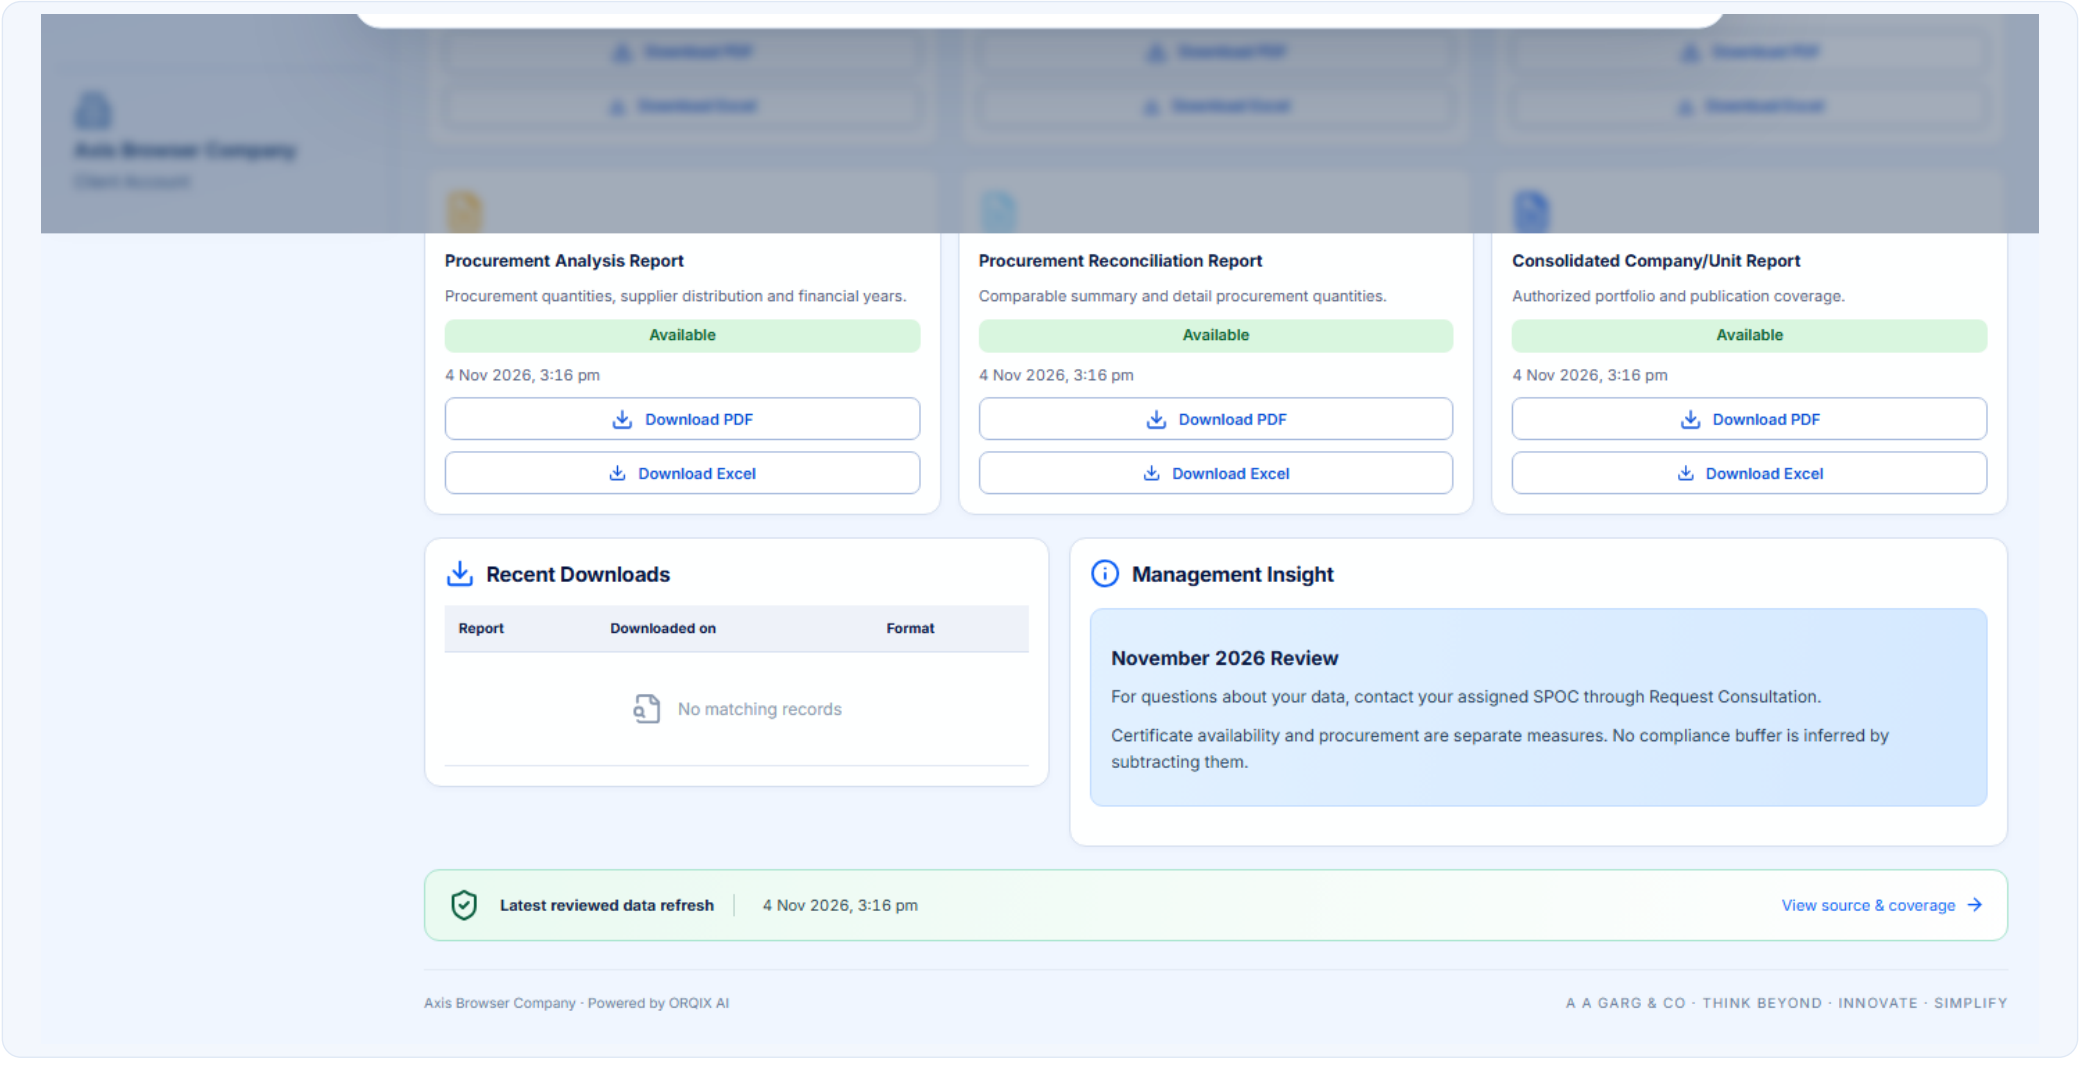

CLIENT WORKFLOW

/client/reports

PDF Branding & Download | 2/2

Optionally upload a company PNG/JPEG logo, or download without one. The generated report includes A A GARG & CO branding and the selected source scope.

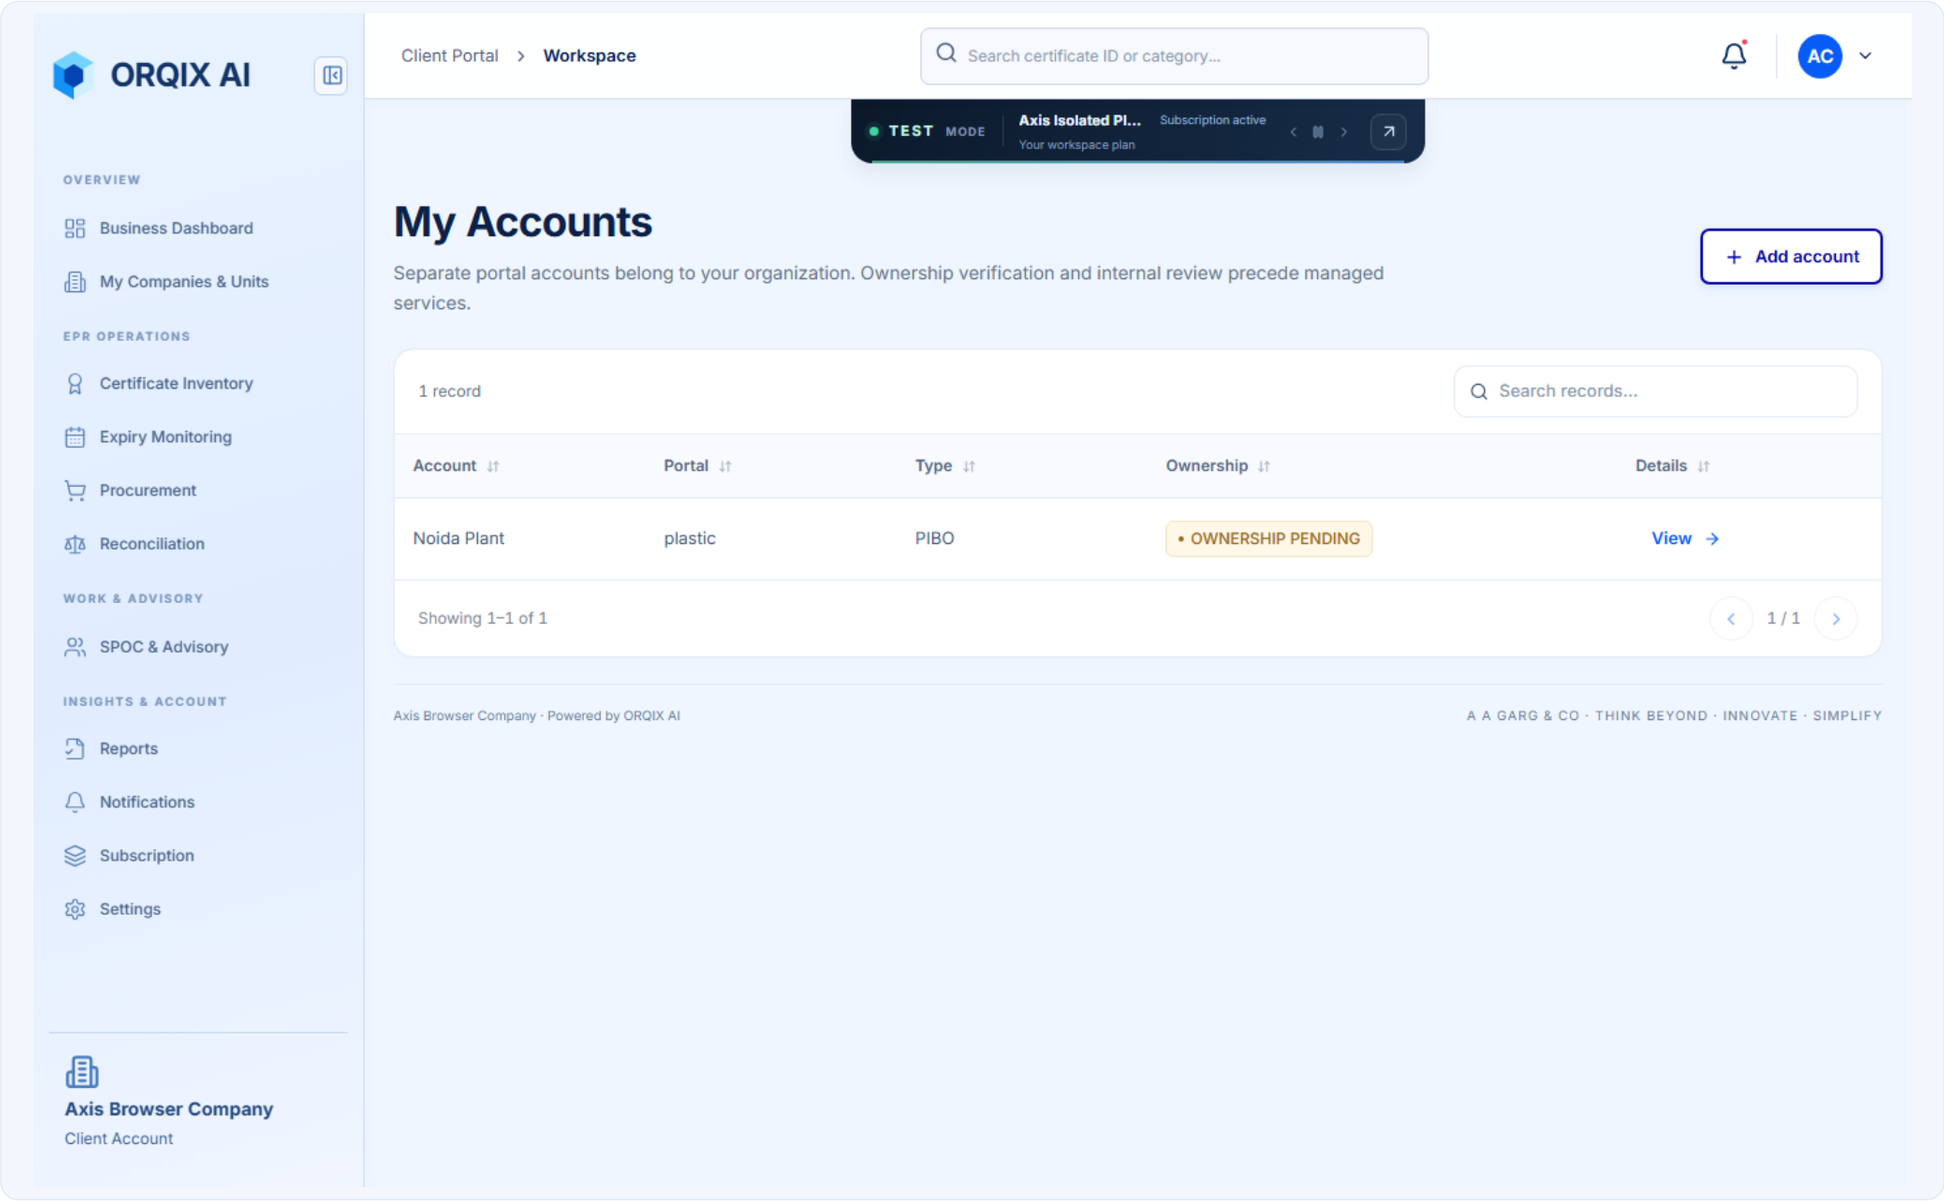

SUPPORTING PAGES

/client/accounts

Portal Accounts

Manage client portal account groupings. One organization can have multiple accounts and registrations across supported portal types.

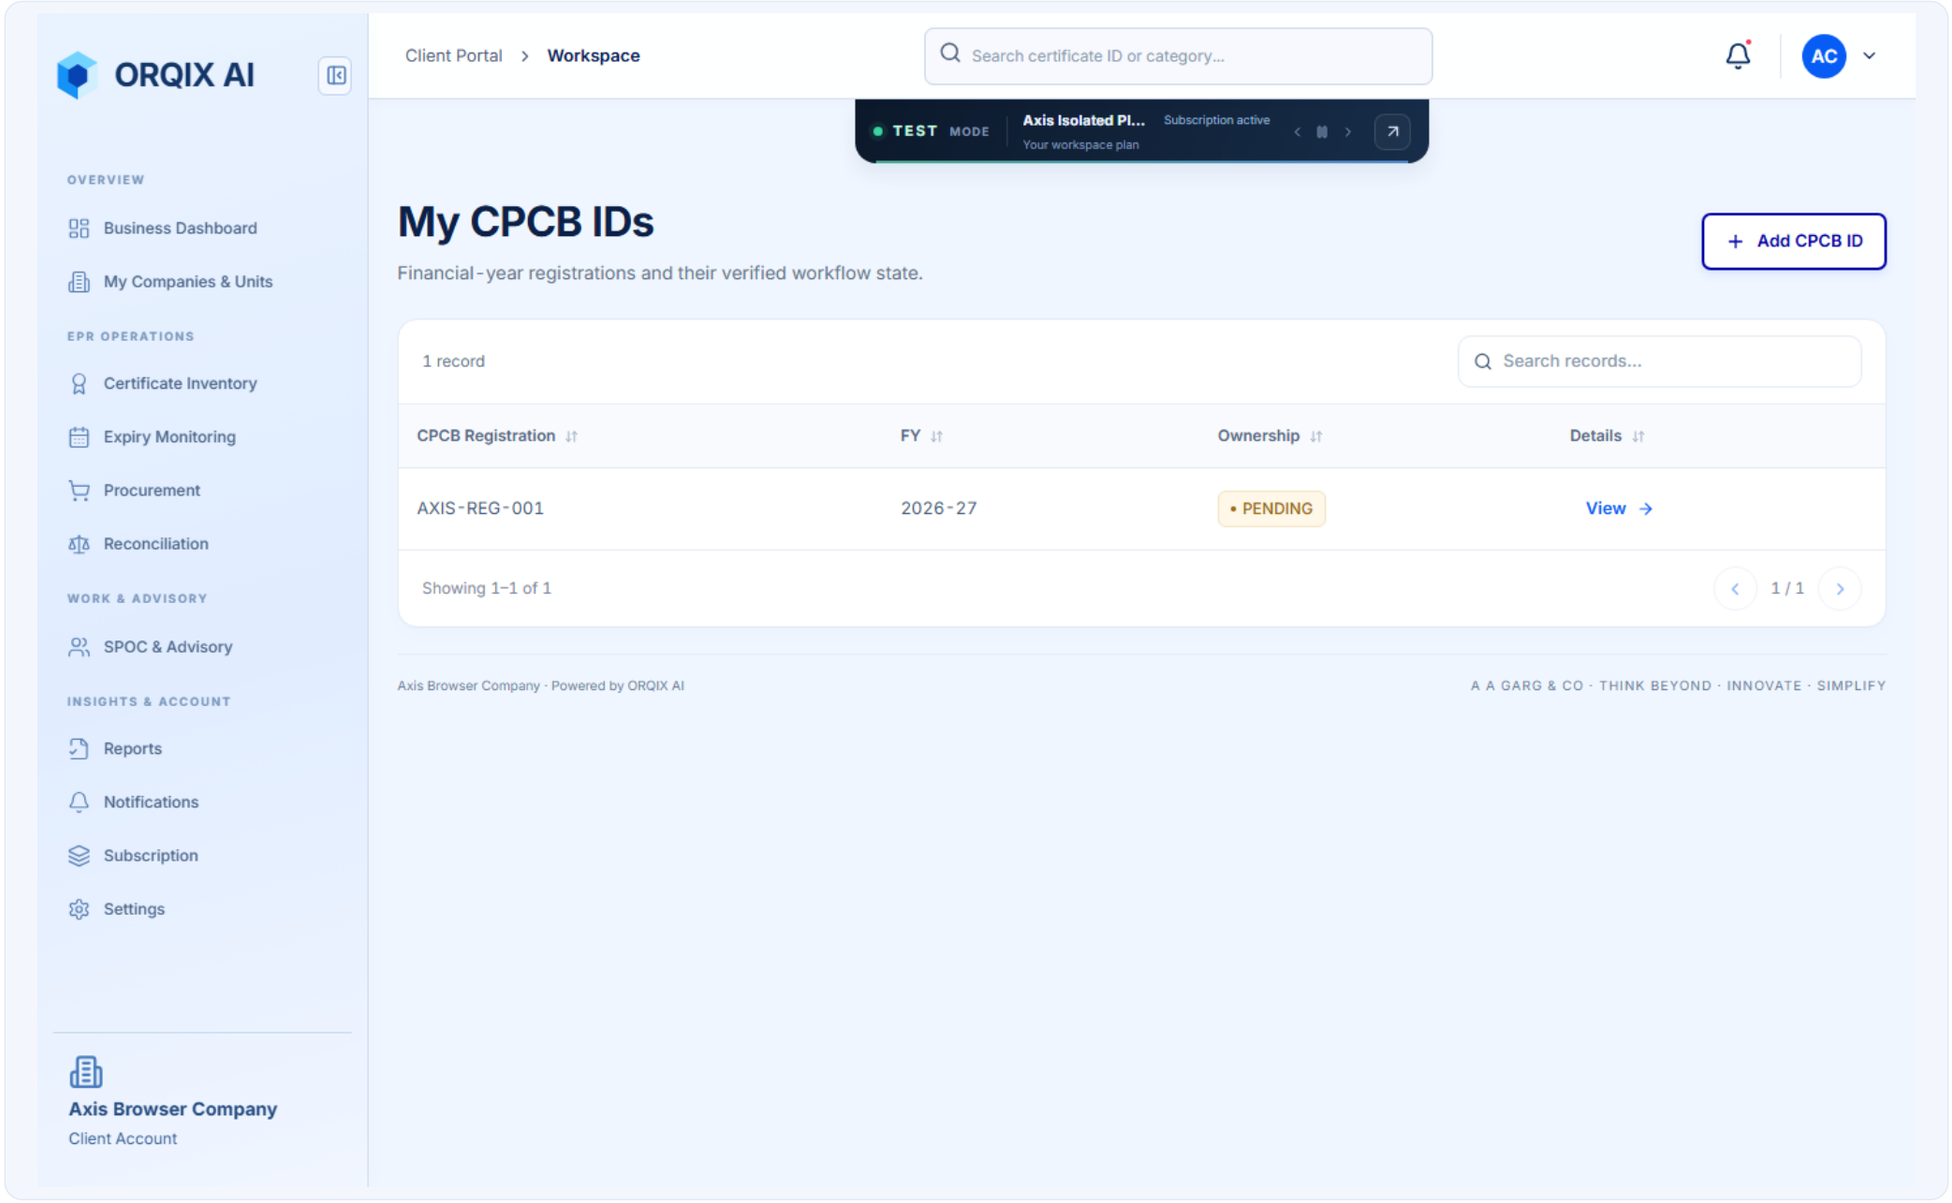

SUPPORTING PAGES

/client/cpcb-ids

CPCB Registrations

Maintain unit registration IDs and financial years. Verified registration ownership and organization scope govern access.

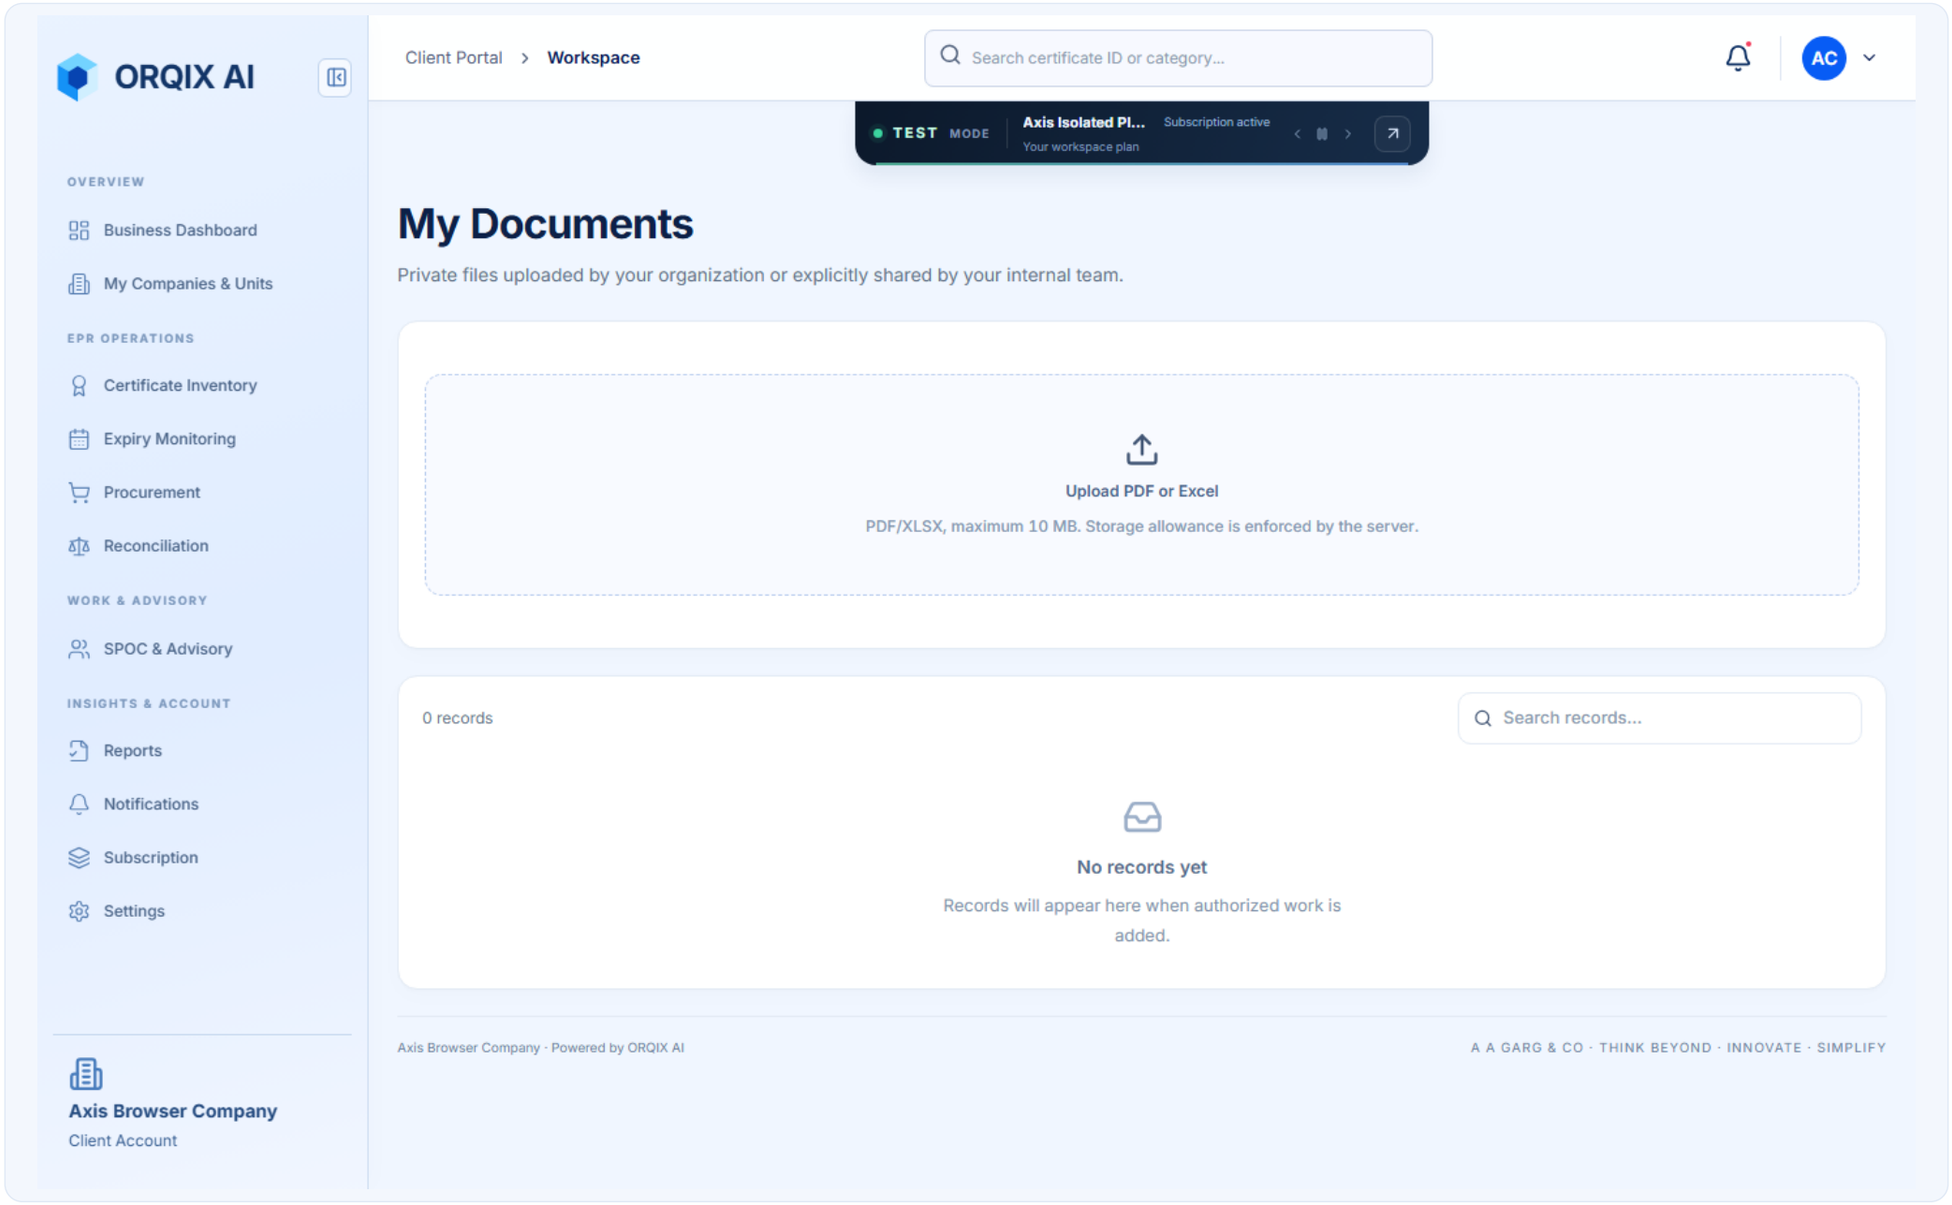

SUPPORTING PAGES

/client/documents

Client Documents

Upload and manage permitted supporting documents within configured file and storage limits.

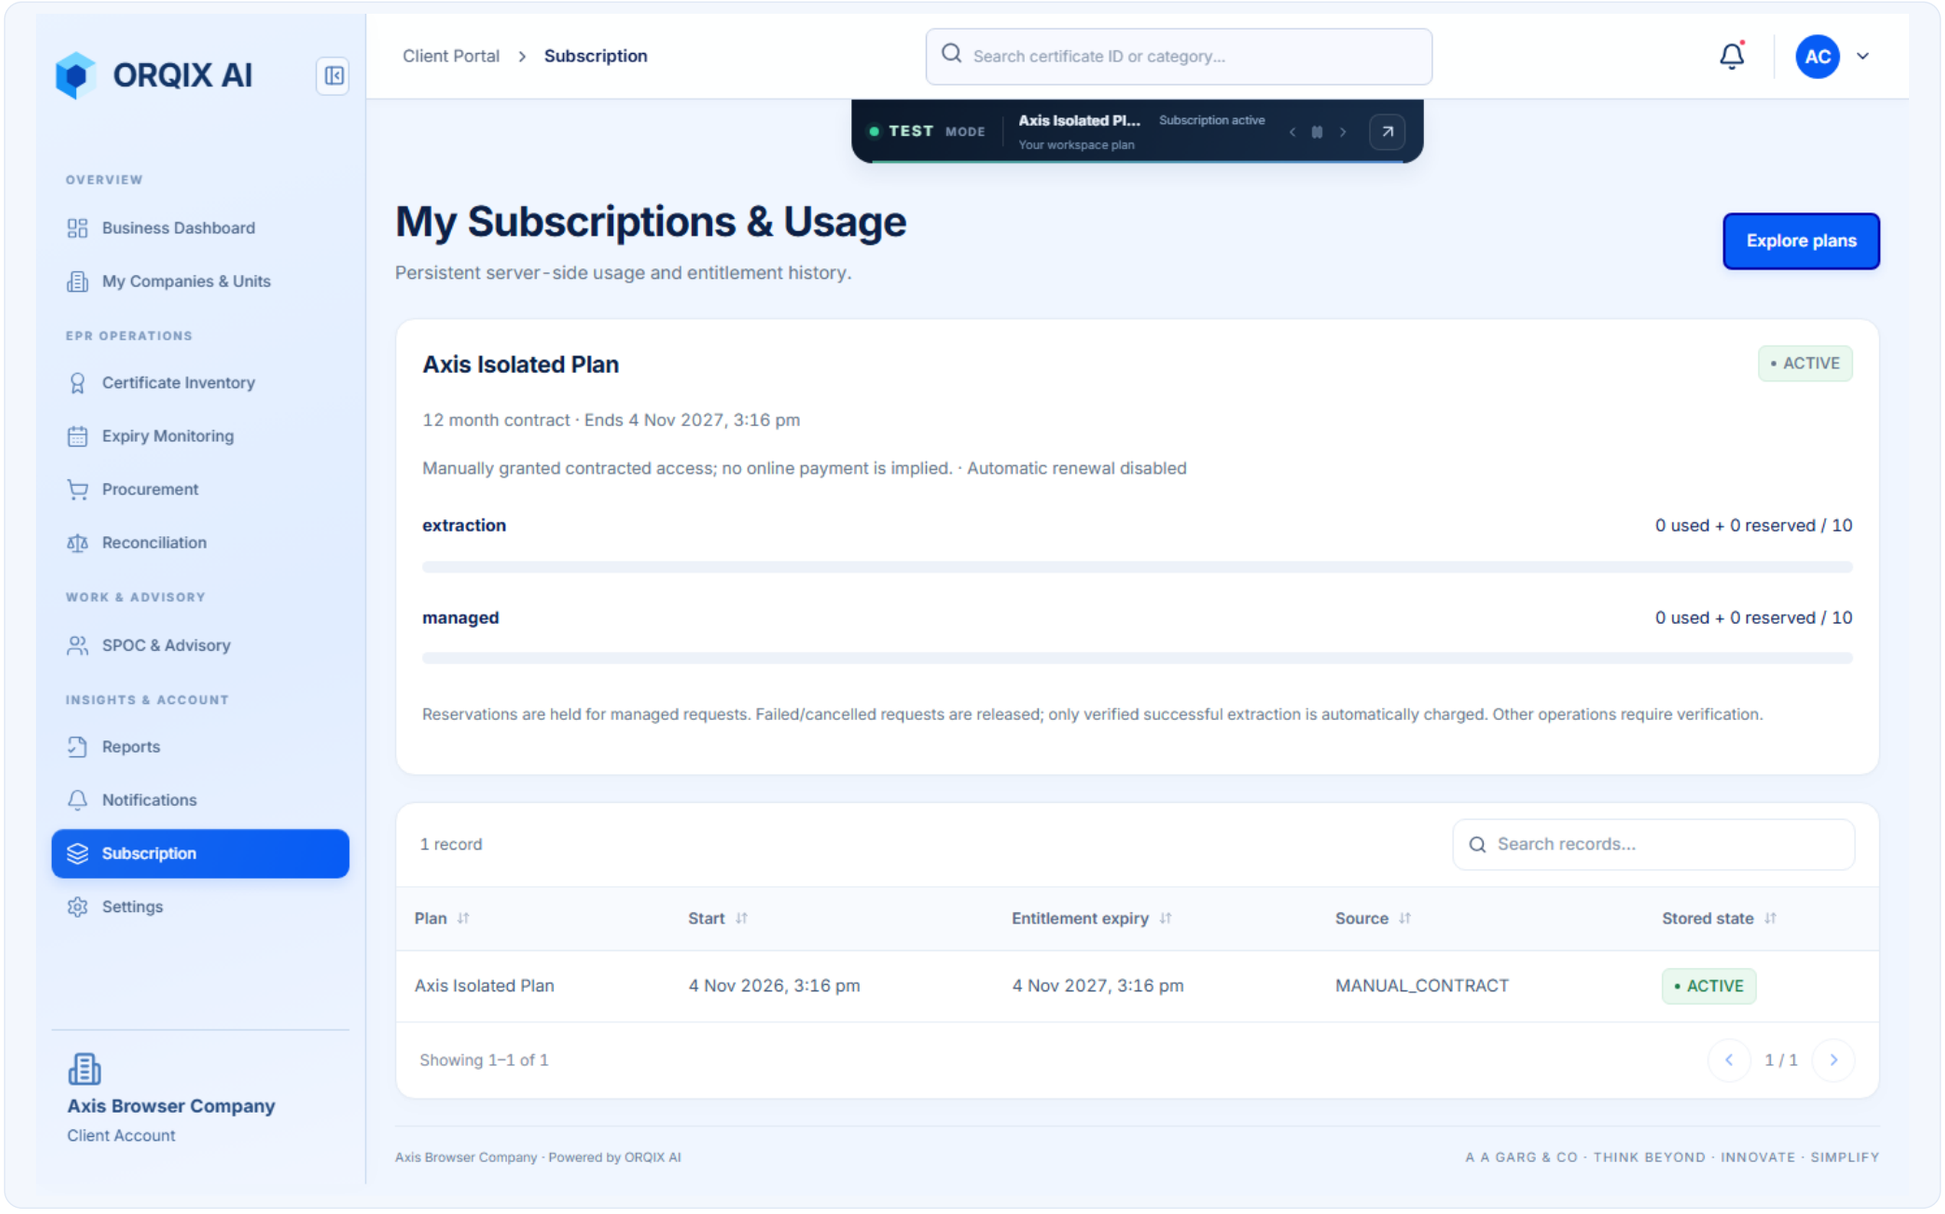

SUPPORTING PAGES

/client/subscriptions/usage

Subscription Usage

Inspect configured service allowances and usage. Availability follows the organization contract.

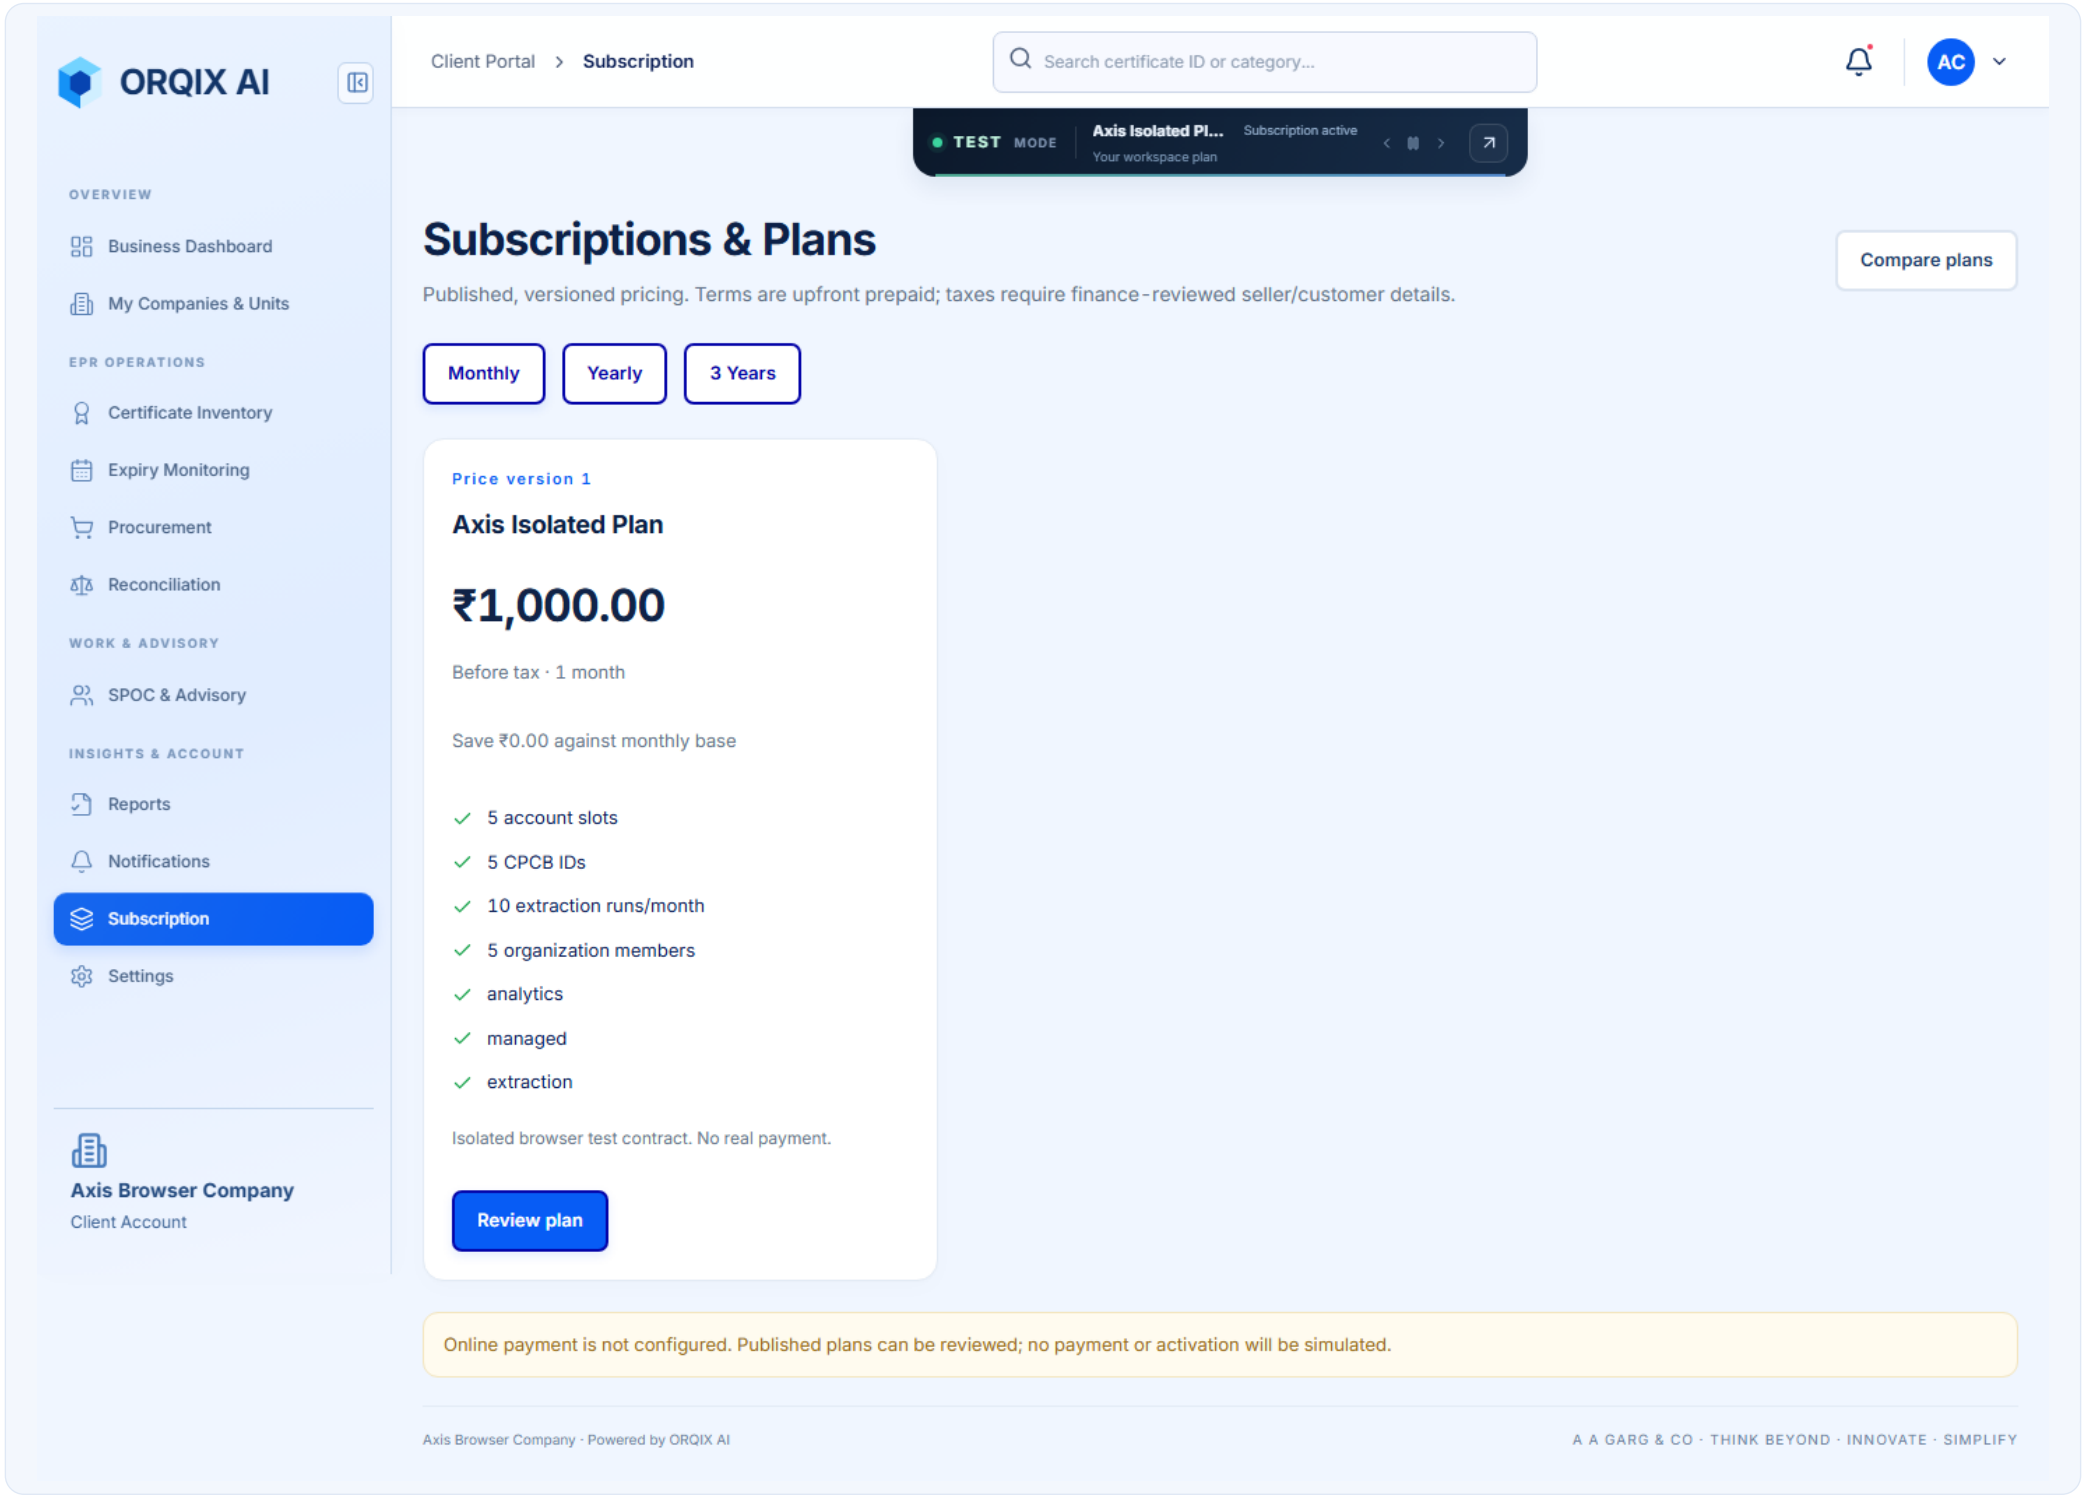

SUPPORTING PAGES

/client/subscriptions/plans

Plan Catalog

Inspect published commercial plans and available term options. No purchase is initiated for documentation.

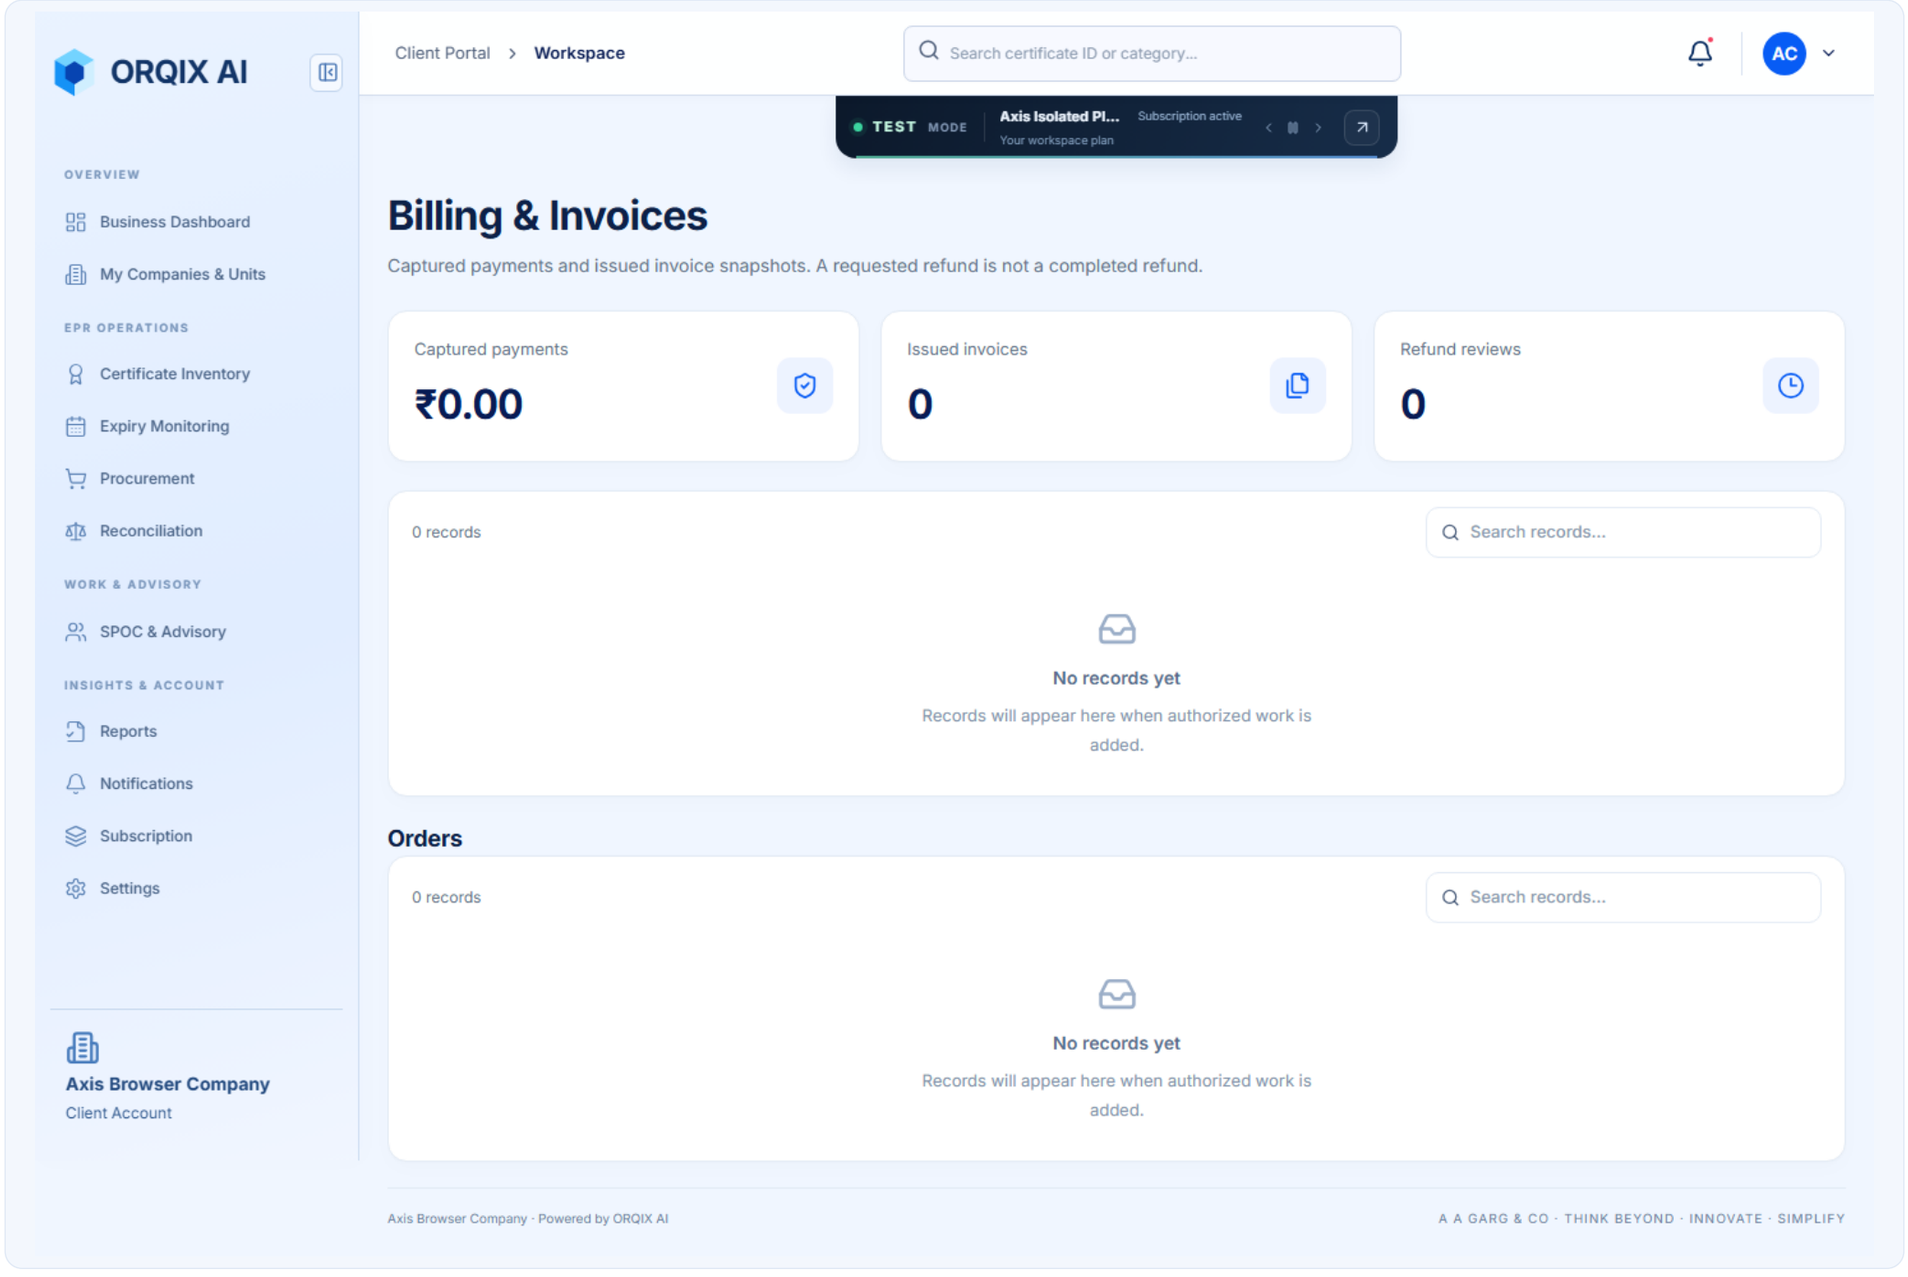

SUPPORTING PAGES

/client/billing/details

Billing Details

Maintain the organization billing contact and billing identity used by supported financial workflows.

SUPPORTING PAGES

/client/activity

Activity History

View organization activity records and timestamps for authorized client operations.
